A
UNIVERSAL PRONOUNCING
GAZETTEER:

CONTAINING

TOPOGRAPHICAL, STATISTICAL AND OTHER INFORMATION, OF ALL THE MORE
IMPORTANT PLACES IN THE KNOWN WORLD, FROM THE
MOST RECENT AND AUTHENTIC SOURCES.

BY THOMAS BALDWIN, *of Ph.adelphia*
ASSISTED BY SEVERAL OTHER GENTLEMEN.

TO WHICH IS ADDED

AN APPENDIX,

CONTAINING MORE THAN TEN THOUSAND ADDITIONAL NAMES, CHIEFLY OF THE SMALL TOWNS AND
VILLAGES OF THE UNITED STATES AND OF MEXICO.

WITH

A SUPPLEMENT,

GIVING THE PRONUNCIATION OF NEAR TWO THOUSAND NAMES, BESIDES THOSE PRONOUNCED
IN THE ORIGINAL WORK: FORMING IN ITSELF A COMPLETE VOCABULARY
OF GEOGRAPHICAL PRONUNCIATION.

A New Edition, Carefully Revised,

WITH THE

POPULATION INSERTED ACCORDING TO THE CENSUS OF 1850,

THE general interest felt in our new states and territories, towards which emigration is flowing from all points of the compass, and especially towards California, has induced the authors to give much fuller articles on that state, Oregon, Utah, New Mexico, Minnesota, Wisconsin, Iowa, and Texas, than comports with the general plan of the work. Here the emigrant, the man of business, or the tourist, may, without searching many volumes, find a synopsis of the prominent points of interest in regard to them; such as their surface, soil, climate, productions, rivers, lakes, minerals, &c., compiled from the most recent and best authorities known.

In regard to regions so imperfectly known, they cannot hope to have made no misstatements; but they have used laborious and careful research to make them as few as possible. The articles on the United States, on New York city, on France, on Australia, and on some other cities and countries, have been much enlarged, and the information concerning them is in accordance with the latest data accessible in this country. In all the states and counties, and in over one hundred and fifty towns of the United States, the populations have been given according to the census of 1850.

The populations in Europe and the British possessions have been given according to the censuses taken at various periods between 1845 and 1851. But little of the latter census, however, has reached this country in an available form.

ADVERTISEMENT TO THE EIGHTH EDITION.

THE extraordinary and increasing favour with which the Universal Pronouncing Gazetteer has been received, has induced the authors to prepare, at great labour and expense, a NEW EDITION, intended to supply what has been felt by all, as a serious defect in the former editions of the work; namely, its want of fulness with respect to the number of names. When the first edition of the Gazetteer was prepared, it was absolutely impossible for the authors to obtain any reliable information respecting a multitude of foreign names, of which, therefore, if they gave any pronounciation at all, they must give one based on the most vague and uncertain conjecture. They were reduced to the alternative of choosing between the defect of incompleteness and that of inaccuracy. There was of course no room for hesitation. They believed that to *ascertain* and *fix* the pronounciation of a few hundred difficult names would be a greater service to the cause of education, than to give the pronounciation of ten times the number at random, or upon mere conjecture. They were sensible, moreover, that without accuracy they could not hope to inspire that confidence which is so essential to the permanent reputation and success of a work of this kind.

In the seven years which have elapsed since the first publication of the work, many new sources of information have been opened, not to mention the assistance which greater experience, and the habit of investigating everything which could throw any light upon the subject of geographical orthoepy, must necessarily confer. Availing themselves of these new facilities, the authors have at length under-

taken to remedy, as far as possible, the unavoidable deficiencies occurring in the former editions of the Gazetteer.

A SUPPLEMENT has been added, giving the pronunciation of from 1500 to 2000 additional names. For the convenience of reference, all the difficult names contained in the Gazetteer, and those now added for the first, are given together in the Supplement, each in its alphabetical place. Hence, as a mere pronouncing vocabulary, the Supplement will be found to be complete in itself.

It should be observed that the Appendix has been added chiefly for the purpose of giving the small towns, &c., of the United States. The pronunciation of the names, in this portion of the work, has rarely been given, partly because the larger number of them can readily be pronounced by any one who knows how to read, and partly on account of the insuperable difficulties inherent in the task itself. (See Preface to the Supplement, p. 649-50.) It has been the aim of the authors to concentrate, in the Appendix, a large amount of information, into the smallest possible compass. By the employment of small-sized type and a few additional abbreviations, they have generally been able to condense the notice of the smaller places into a single line, so that, without greatly increasing the size of the work, there has been a most important and extensive addition to its matter.

☞ If the inquirer seeks the *pronunciation* of any difficult name, let him look for it in the Supplement, where it will be found if it occurs in the book at all. If he is desirous of obtaining *any other information* respecting the town, river, &c., and should not find a brief notice in the Supplement, he must refer to the body of the work—unless the name has an asterisk prefixed, in which case he will find it in the Appendix.

☞ The attention of teachers is particularly invited to the Table at the end of the Introduction, exhibiting the diversity which prevails in the mode of writing geographical names;—also to the List of geographical names most frequently mispronounced, at the end of the Supplement.

PREFACE.

IN offering to the public a book like the present, which, as respects some of its more important characteristics, is quite new, the authors feel themselves called upon to explain briefly the object and nature of the work, as well as the motives which induced them to undertake it.

They had themselves often felt the want of a geographical dictionary, to which they might refer for the pronunciation of the names, as well as for the description, of places. They were also convinced by the concurrent testimony of a number of teachers of the highest respectability and of great experience, that the want of such a work was extensively felt; the absence of any standard of geographical pronunciation, rendering it extremely difficult to determine the proper mode of pronouncing many names which are found in the elementary works used in our schools. On inquiring more particularly among persons of different classes and occupations, they were led to the belief that a pronouncing gazetteer, if properly executed, would be generally acceptable to the community.

To fix upon the most eligible system of pronunciation, was a point of the highest importance, but it did not appear to be one of extraordinary difficulty. They determined, in accordance with what they believed to be the prevailing sense of the more intelligent, and the prevailing practice of the better educated, to give the pronunciation of all geographical names, as nearly as possible, as they are pronounced by the well educated people of the respective countries to which they

belong, with the exception of those well known foreign names which appear to have acquired a fixed English pronunciation, as PARIS, NAPLES, &c. In these cases, it has been their aim to give the English pronunciation according to the usage of the best speakers: at the same time the pronunciation of the people of the country has been added, for the satisfaction of those who might feel any curiosity on the subject. Thus they have given Pâr⁴-is, as the proper mode for an Englishman or an American to pronounce this name, at the same time adding the name as spoken by the French, which might be written Pâr²-ree: and so with respect to most other well known names in foreign countries.

It is admitted that cases not unfrequently occur, in which it is impossible to convey, with any great degree of precision, the native pronunciation of other countries by means of English letters; but something is undoubtedly gained by such an approximation to the true sound, as would enable one more readily to understand, and to be understood by, those who are familiar with the names of places as spoken by the inhabitants themselves.

Some have indeed maintained the propriety of pronouncing foreign names as they are written, giving to every letter its proper English sound. But this system appears to be attended with greater difficulties than any other, since different persons would differ with regard to the proper English sound of many letters or combinations of letters. Thus the river SEINE might be pronounced *seen* or *sane*;—we have heard those, we think, unacquainted with French, more frequently call it *seen*, and it is doubtful whether, even among the better educated, there is one in fifty who could say without some reflection, to which pronunciation the scale of analogy would incline. A few probably would call it *sine*, and others might pronounce the final *e*.

This one instance out of a multitude may perhaps serve to

show the endless diversity and confusion into which such a system, or rather want of system, must of necessity lead. But this is not all; there are innumerable cases wherein it is very difficult, if not impossible, to pronounce the names of other countries according to the English sound of the letters, *e. g.*, CZERNIGOW, CSONGRAD, SZEGEDIN, LJUSNE, &c., while there is no difficulty whatever, in pronouncing them according to the native sound. Many instances also occur, in which the English manner of pronouncing names, though not difficult, is far less euphonious than that of the inhabitants of the country to which such names belong. MINHO (meen'-yo,) a river, and BATALHA (bá-tál'-yá,) a town of Portugal, and BACCHIGLIONE (bák-keel-yo'-ná,) a river of Italy, may serve as examples.

As a further confirmation of the propriety of the system which we have adopted, it may be remarked that it agrees (as will be seen from the first part of the Introduction,) with the mode of pronunciation generally employed by all our most distinguished poets.

Nothing in their mental culture is perhaps so important to be taught *early* to children, as a habit of correct pronunciation. It need not occupy any additional time, since a faulty pronunciation is no more easily learned in the first instance, than a correct one, but when once acquired it can be changed only with the greatest difficulty. Erroneous habits,—as those engaged in the business of education well know—are far more difficult to eradicate than erroneous opinions. In order, however, to teach pupils to pronounce correctly, a *system* of pronunciation is indispensable.

Most persons who have reflected at all upon the subject, will doubtless admit, that it is highly desirable that there should be some fixed mode of pronouncing geographic names, as well as ordinary English words, in which all should at least generally agree. If this be conceded, and the scholar be required to conform to a system at all, it appears clear,

that that system should be preferred, which, without placing any serious difficulty in the way of the learner, approaches most nearly to the usage of those, who, whether natives or travellers, seem entitled, by their superior knowledge of places, to determine the proper manner of speaking their names. It may be remarked that the recently increased facilities of communication, and consequent increase of intercourse between different parts of the world, render an acquaintance with the native geographical names of other countries, at the present time, additionally important.

Particular pains have been taken in the present work, with the European, and the better known of the Asiatic languages, not only to give the accent correctly, but also to notice all important peculiarities of pronunciation. In performing this, it has been our anxious aim to consult, in every instance, the very best authorities in each of the different languages. We flatter ourselves that in this aim we have been singularly successful; and esteem ourselves most fortunate in being able to cite in our list of authorities, the names of so many gentlemen of distinguished reputation in their respective departments.

In our Introduction we have thought it proper to state the general principles of pronunciation of each of the more important European languages, as well as to explain the mode of writing and pronouncing the geographical names of Asia, Africa, &c. With respect to the four great languages of continental Europe, viz: the French, German, Italian, and Spanish, it seemed requisite to treat the subject somewhat more fully, both on account of their intrinsic importance, and because it has been found convenient to employ them as standards of comparison, to which other languages less known might be referred.

It may be proper to state, that in the present work the adjective, and the appellation of the inhabitants, derived from

the names of countries, cities, &c., have been added, whenever these appeared to be sanctioned by common usage, or by the authority of some writer of established reputation. Thus from DENMARK are derived the adjective *Danish*, and the noun *Dane* designating the inhabitant of the country;—from SWEDEN, *Swedish* and *Swede*; &c. In most instances the adjective and inhabitant are expressed by the same word, as *Algerine*, *Neapolitan*, &c. These have never been given, that we are aware of, in any former gazetteer, and it is hoped they will form no unimportant addition to the value of the present work, at least as a school book. While we have dictionaries of almost every description, and adapted to every stage of intellectual development, to which the pupil may refer for the definition, correct spelling, and pronunciation, of ordinary English words, it is somewhat remarkable, that there has hitherto been no work of any authority which one might consult respecting the proper mode of spelling and pronouncing this numerous class of words, the use of which, with the progress of geographical knowledge, is daily becoming more extensive.

It may be further stated, that the ancient Greek or Roman names of places on the old continent, and occasionally their signification, have been carefully given from the best authorities. This we trust will be found useful and interesting, not only to the classical scholar, but likewise to the ordinary reader, more especially as in many instances it points out the derivation of the present name, and at the same time, perhaps, associates it with some important historical or topographical fact, as in the case of TRIPOLI, TRAPANI, MAESTRICHT, UTRECHT, &c. We have also given the signification of modern foreign names, or those of foreign origin, whenever it seemed that this would teach or impress any useful fact, as PORTO BELLO, *i. e.*, “beautiful port;” BOMBAY, *i. e.*, “good harbour;” INNSPRUCK, (originally *Innsbrücke*) *i. e.*, the “Bridge of the Inn,” &c.

Independently of the advantage, whatever it may be, resulting from this work, considered merely as a system of orthoepy, another may be mentioned, which, it is hoped, will be found not an unimportant one, viz: *Such a pronouncing gazetteer would dispel the perplexity and error into which the learner is constantly liable to fall, in consequence of the diversity which prevails in the mode of spelling many foreign, especially oriental, names.* There is a town of some note in Upper Egypt, which is usually spelled in our gazetteers after the French manner, *Aboutige*, while on some of our maps it is written *Abootish*, which is the English mode of expressing the same sound. *Abootizh*, however, would represent it more exactly. Is it probable that any mere English scholar, however well educated, would know, unless he were expressly taught, that by these two words was indicated one and the same place? or that *Tchernigoff*, and *Czernigow*, are but different spellings of the same name, and represent, in fact, the same sound? We find the capital of Afghanistan frequently spelled in three different ways, usually *Cabul*, according to the German, Italian, and Portuguese, more seldom *Cabool*, after the English, and *Caboul*, after the French mode. *Oorfa*, an important town of Asiatic Turkey, is often written in works of the highest character, *Urfa*, and *Ourfa*, the first being the English, the second the Italian or German, and the last the French mode. Innumerable instances of a similar kind might be adduced.

As might be expected, this diversity in spelling geographical names frequently leads to important errors. In some of our gazetteers we find the same name introduced twice, the authors naturally supposing the different spellings to represent the names of different places. We may cite a single instance, which occurs in one of our most popular geographical dictionaries. *Schirvan* (more properly *Schirwan*), the German, and *Shirvan*, the English spelling of the

name of a Persian province, are given under different heads, as designating two distinct territories. It happens, also—probably in consequence of a discrepancy in the works from which the compilation was made—that the boundaries, as well as the latitude and longitude, are laid down differently, so that it is impossible that any one should know, without referring to some other work, that *Schirvan* and *Shirvan*, are properly one and the same name.

It will be seen, from the fifteenth section of our Introduction, that the plan which we have pursued, precludes the possibility of any mistakes of this kind, at the same time that it furnishes an easy clue to the labyrinth of perplexity, into which the various modes of writing the same geographical names, must, of necessity, lead the inexperienced reader.

With regard to the descriptive, statistical and historical portions of this gazetteer, it may be remarked, that we have endeavoured to consult, on every subject, the best authorities with which we are acquainted. We have aimed to make, as far as practicable, Balbi's celebrated *Abrégé de Géographie* (last edition—1842,) a production of unequalled merit, the basis of our work. We have, also, drawn largely from the geographical department of the Penny Cyclopædia, which, at least, so far as regards the correctness of the information it conveys, is unquestionably the best work on geography in the English language. McCulloch's *New Geographical Dictionary*, Malte Brun's *Geography*, and the *Edinburgh Gazetteer*, have likewise been extensively consulted.

In a work so limited as the present, when so much must be omitted, and so little, comparatively speaking, could be inserted, it has been a point of the highest importance to make a judicious selection of matter. Without claiming to have made such a selection, we may, as an act of justice to ourselves, affirm, that it has been our sincere endeavour, to

comprise the greatest possible amount of useful information in a small compass; and should it appear that some important subjects are omitted, while to others of less consequence, a place has been given in our dictionary, we doubt not that the candid reader will bear in mind, that there must always be some difference of judgment in matters of this kind, and that even among the most intelligent and enlightened, perhaps no two individuals can be found, who will assign to a number of different subjects, the same relative importance.

It will be seen that a smaller proportion of names belonging to our own country, is inserted in this work, than is usual in gazetteers published in the United States. We admit that, generally speaking, it is more important to possess information about places in our own country, than those in distant parts of the globe, but as in this instance the great object has been to give the pronunciation of geographical names, it seemed proper, in a book of so limited a compass, to prefer the difficult names of foreign countries, to those of our own which might be readily pronounced without the aid of a dictionary.

AUTHORITIES.

To the following gentlemen we are chiefly indebted for our information respecting the pronunciation of the names of places in foreign countries, as well as for the general principles of pronunciation of the different foreign languages noticed in our Introduction. Justice, however, requires us to state distinctly, that these gentlemen are in nowise responsible for any errors that may occur in our gazetteer; it being impossible in a work like the present (in which the names of each country are scattered through the entire volume), to avail ourselves of the benefit which might result from their revision.

INTRODUCTION.

It is proposed, in this portion of our work, to set forth more fully some of the arguments alluded to in the preface, by which the propriety of our system of pronunciation is supported, as well as to explain the particular method in which this system has been carried out, in the dictionary before us.

I. It has already been intimated, that not only the present practice of the best speakers, but the usage of our more distinguished poets, is clearly in favour of the system which we have chosen. If any might be allowed to pronounce foreign names without regard to the peculiar sounds of the letters, or to the accents, which prevail in other countries, this privilege might surely be claimed by the poets, who, in the use even of English words, are considered to enjoy a special license. It is very evident, however,—as every one who will take the trouble to examine the works of the better class of them, must admit—that, as a body, they have neither claimed nor used this privilege. On the contrary, our more distinguished poets have usually exhibited a classical—we might almost say a punctilious—accuracy, in the employment of foreign names, whether of places or persons. To illustrate by examples,—GRANADA,* and GENOA,† are pronounced by all the great poets

* "In Lithuania had he served and Russe;
No Christian man so oft of his degree.
At Algezi'ras, in GRANADA, he
Had joined the siege;——"—CHAUCER.

"The Moorish king rides up and down
Through GRANADA's royal town"——

"And GRANADA must be won
And thysel' with her undone."—BYRON.

"GRANADA caught it in her Moorish hall,
Galicia bade her children fight or fall."—SCOTT.

"There was crying in GRANADA when the sun was going down,"——
"Farewell, farewell, GRANADA, thou city without peer."—LOCKHART

† "Signior Baptista may remember me
Near twenty years ago, in GENOA, where
We were lodgers at the Pegasus."—SHAKSPEARE.

who use these names, from CHAUCER and SHAKSPEARE down to the present time, with the native accentuation; that is, GRANADA has the accent on the penultima, and GENOA on the antepenultima, though the generality of English—or at least of American—speakers, who have not heard these names pronounced, but merely follow analogy, or their own notions of propriety, reverse the accentuation, making GRANADA rhyme with *Canada*, and GENOA with *boa*.

No poet, perhaps, employs foreign names so frequently as BYRON, and yet—though he often writes very carelessly—it would be difficult, in all the poetry he has written, to point out half a dozen instances where he has not conformed to the foreign accentuation, excepting always, *those few well known names which have acquired an established English pronunciation*, and in these cases he appears invariably to adopt the pronunciation of the best English speakers. The same may be said of SCOTT; though he writes with great freedom, he rarely, if ever, violates the strictest rules of geographical pronunciation. In the poetry of ROGERS, SOUTHEY, MOORE, CAMPBELL, and MONTGOMERY, we have met with scarcely a solitary example of departure from the native accentuation of names, which does not properly come within the exception above stated. WORDSWORTH takes the liberty of changing the accent in a single instance—CHAMOUNY—but acknowledges the authority of the law by apologizing in a note for its violation, (see *Descriptive Sketches of a Tour among the Alps*.) What has already been said respecting the usage of the poets, refers principally to accentuation, which, for the most part, can be readily determined by the metre of the poetry. Their manner of pronouncing the letters of a foreign name, is far less easily ascertained, since it can only be known when the name ends a line in rhyme, and even then it is often extremely uncertain, as they appear to consider themselves entitled, in such cases, to much greater license than in the accentuation of words. Thus we often see associated in rhyme, words which correspond but very imperfectly in sound, as

“Were GENOA’s galleys riding in the port,—” —BYRON.

“How quick they carved their victims and how well,
Let Saxony, let injured GENOA tell.”—MOORE.

“That noble haven, where, when GENOA reigned,
A hundred galleys sheltered——” —ROGERS.

“My native GENOA, if with tearless eye
Prone in the dust thy beauteous form I see,” —MONTGOMERY

enemy and *lie*, *mourn* and *burn*, &c. Nevertheless, by comparing a number of examples, and especially by observing the usage of those poets who are most remarkable for the correctness of their rhymes, we shall frequently be enabled to ascertain the true pronunciation of a word or name.

Now it will be found that the system which we have adopted, is supported by the practice of the poets in this respect also. In other words it will be found, that while foreign names that are in familiar use in our own language, have an English pronunciation, those not very well known are generally pronounced with the native sound of the letters, as will be seen from the following passages :

"Not now to while an hour *away*,
Gone to the falls in *Valombre'*,"—

"'Tis *Jacqueline!* 't is *Jacqueline*,"
Her little brother laughing cried,
'I know her by her kirtle *green*,
She comes along the mountain side."

"De Courcy, lord of *Argentiere!*

Thy thirst for vengeance sought the *snare*."—ROGERS

"Winding between Alpine trees;
Spiry and dark around their house of *prayer*,
Below the icy bed of bright *Argentiere*."—WORDSWORTH.

"Sure there never was hero so *civil*—*he*
Saw us safe home to our door in *Rue Rivoli*."—MOORE.

"And though to-morrow's tempest *lower*,
'Tis calmer than thy heart, young *Giaour*."

"This circumstance may serve to give a 'notion
Of the high talents of this new *Vauban*,*
But the town ditch below was deep as ocean,
The rampart higher than you 'd wish to *hang*."—BYRON

"For many an age remembered *long*
Shall live the towers of *Hougomont*,*
And fields of *Waterloo*."—SCOTT.

It would be easy to cite a multitude of such examples: but these will perhaps be sufficient to illustrate our position.

* In these names the letter *n* is similar in sound to *ng*. The *t* at the end of *Hougomont* is silent. The rhymes, however, are not quite perfect; the *o* in the last syllable of *Hougomont* should be sounded like *o* in *won't*. The latter syllable of *Vauban* sounds like *bong*.—*Vauban* was a noted French military engineer, who flourished in the reign of Louis XIV.

On the other hand we shall find the poets pronounce foreign names of some celebrity, such as NILE, PARIS, LYONS, CADIZ, POITIERS or POICTIERS, &c., with the English sound of the letters, as may be seen from these and similar examples:

"Deep in those solitary woods
Where oft the genii of the floods,
Dance round the cradle of their Nile
And hail the new-born Giant's smile."—MOORE.

"Oh never talk again to me
Of northern climes and British ladies;
It has not been your lot to see
Like me, the lovely girl of Cadiz."—BYRON.

"And Courtenay's pride and Percy's fame—
Blazed broader yet in after years
At Cressy red and fell Poitiers."—SCOTT.

"So the shaft
Of victory mounts high and blood is quaffed
In fields that rival Cressy and Poitiers—
Pride to be washed away by bitter tears."—WORDSWORTH.

II. Instead of saying that the poets conform to the native accentuation of proper names, except in cases when these are well known, we might, perhaps, with more propriety say, that they merely follow the practice of the best speakers, of which their own may generally be regarded as the written representation. With this view of the subject, we have occasionally cited in the body of our work, passages from the poets in support of the pronunciation there given. These citations, for the most part, are not intended to be decisive of any doubtful question, but rather to illustrate and confirm what is believed, on other grounds, to be the correct pronunciation. The supreme tribunal to which we would on all occasions appeal, is the authority of the *best speakers** in England and this country. To the former we generally give the preference when the question relates to names belonging to the old continent—to the latter when it relates to those of America. But since it is impossible to produce oral evidence in a book, we have availed ourselves of the authority of the poets, as the only one at our

* By this phrase, we do not mean those who, from their superior knowledge and judgment on general subjects, may be presumed to be qualified to decide questions of orthoepy. In order to deserve a place among the *best speakers*, it is not enough that one should have what is commonly termed a good education and good sense, *he must have paid particular attention to the subject of pronunciation*, unless he has been surrounded during the whole period of his education with none but correct speakers, which is seldom or never the case, at least in this country

command, to prove or illustrate what we have, in all cases, studiously endeavoured to learn by actual hearing, from those who are considered best qualified to determine questions of orthoepy.

III. It may be further observed, that all those works (so far as we are acquainted) which attempt to give the pronunciation of geographical names, show at least a tendency towards the system that we have adopted. The Penny Cyclopædia, which gives the accentuation of a considerable number of proper names, appears always to follow the native mode. In the list of geographical names appended to WORCESTER'S "Comprehensive Pronouncing and Explanatory Dictionary—Boston, 1841"—which is certainly one of the most creditable and successful attempts towards supplying the deficiency in this important department of orthoepy that has ever been made—the *native* pronunciation of names not extensively and familiarly known, is almost invariably given. STEWART'S "Compendium of Modern Geography—seventh edition—Edinburgh, 1843," gives the pronunciation of the principal geographical names on the globe, and though the work contains many errors,* it is evident that it aims generally to conform to the native accentuation of the names of other countries, and frequently to the native sound of the letters. Several other works, of less importance, exhibit the same general tendency.

IV. There is one difficulty in carrying out the system of geographical pronunciation adopted by us, which it may be proper to notice here, viz: that of drawing the line between foreign names which *are*, and those which are *not*, well known. With respect to the more obvious in each division there cannot be the slightest hesitation; but the two classes meet and pass into each other by imperceptible gradations, so that sometimes the question whether they should be pronounced according to the foreign, or the English mode, can only be settled by arbitrary decision. In these doubtful instances, we have spared no pains in order to ascertain the prevailing practice of the best speakers, as well as the usage of the poets: when these have been found unsatisfactory, nothing has remained for us but to decide according to the best of our ability. We have, in these cases, usually given both the pronunciations, placing that first, which, in our judgment, is to be preferred.

* This remark is intended to apply to the pronunciation only. In other respects, this "Compendium" appears to be an accurate and highly valuable little work

V. It should be observed, that though we have endeavoured to give the native pronunciation of the names of other countries, with minute accuracy, yet, in accordance with the advice of a number of our most intelligent and judicious friends, *we have been careful to avoid as much as possible, on all occasions, the use of sounds which cannot readily be uttered by the mere English scholar—more especially in the pronunciation of those geographical names which are commonly taught in schools.*

VI. In those cases where it is impossible to express the sounds of other languages by means of English letters, we have endeavoured to employ a mode of indicating those sounds, which, if it does not afford any effectual assistance to the mere English scholar, may at least be in no danger of embarrassing or leading him astray. Thus we have represented the sound of the German *ch* by κ , distinguished by being a small capital. Perhaps a strongly aspirated *h*—which might be indicated by *hh*—would convey a nearer idea of the German sound, but it seemed less eligible than the other mode, both because persons might differ in the pronunciation of it, or, perhaps, be at a loss to pronounce it at all, and because the established mode of anglicizing the German *ch*, seems to be to change its sound to that of *k*, as in the instances, *BLUMENBACH, METTERNICH, &c.* The Scotch and Dutch sounds of *ch*, so similar to the German, when anglicized assume invariably, if we mistake not, the sound of *k*. The ordinary mode of pronouncing the Greek χ tends to the same result. We have not, however, represented the sound of the German *g* at the end of a syllable in the same manner as the *ch*, though it has precisely the same sound, because it is not customary to anglicize it by *k*, except in a few instances. Were the pronunciation of such a word as *berg*, represented by *berκ*, it would have the effect to lead the English scholar to pronounce it differently from the ordinary mode, while he would be in no respect nearer the German than those who pronounce the word according to the English sound of the letters. Another consideration may, perhaps, be allowed to have some weight, viz., that though the more approved mode of German pronunciation requires that *g*, when it does not begin a word, should be pronounced like *ch*, yet in some parts of Germany it is pronounced in every case like *g* hard in English. In a similar manner, and for similar reasons, we have usually represented the German *w* by a \mathfrak{w} distinguished as a capital, and not by a *v*, though this is nearer the sound of the German letter.

VII. With regard to French names, however, a different plan has been pursued, both because it is less easy, so to speak, to anglicize the French letters, and because, from the circumstance of this being far more studied than any other foreign language, it is much more usual to adopt all the peculiar sounds of the letters, in pronouncing French words or names. Even here, however, it will be found that very few, if any, of those geographical names which are taught in our common schools, will require the use of sounds that cannot readily be pronounced by the mere English scholar.

VIII. In giving the pronunciation of the geographical names contained in the present work, we have adhered, in the main, to the method of Walker, not only from a desire to avoid all unnecessary innovation upon a system which has been so generally received, but also, because we regard it, on the whole, as superior to any other system which has hitherto been given to the public.* As, however, a multitude of instances occur, wherein the ordinary spelling of geographical names indicates very nearly the proper manner of pronouncing them, it has been thought unnecessary, in these cases, to give a different spelling in order to show the exact pronunciation. At the same time, that no part of the work might be incomplete, it has been requisite to assign to some of the letters, sounds, which Walker has not attributed to them. Thus, in giving the pronunciation of such names as *Boston, Pennsylvania, &c.*, we have not re-written them, as Walker would have done—*pên-sil-và'nê-â, bôs'tân, or bôs't'n*, but merely given *BOS'-TON, PENN-SYL-VA'-NI-À*; the point under the vowels in the final syllable of each name, denoting that these have an obscure sound like short *u*, or like *e* in the word *battery*; while the two points under the *r* in the latter name indicate that this is to be sounded like *e*. In like manner *Berks* is written *BËRKS*—the *e* in this name approximating the sound of short *u*. This mode of marking the pronunciation, is recommended by other considerations than that of brevity. As some

* It may not be improper to observe, that with respect to actual pronunciation we have differed from Walker in a number of particulars. Thus, we pronounce *ASIA*, a'-she-a, according to the practice of the best English speakers, though Walker gives a'-zhe-a as the true pronunciation. (See *Principles of Pronunciation*, 453.) In a few instances we have departed from his practice in the accentuation of classical names, *e. g.*, we have, with the sanction of the highest authorities of the present day, given the name of the ancient capital of Egypt with the accent on the penultima, thus—*ALEXANDRI'À*—though Walker accentuates the antepenultima, as we do, in pronouncing the modern *ALEXANDRIA*. (See *ALEXANDRIA*, in the body of this work.)

of our most celebrated orthoepists make a decided distinction between the sounds of *e* and *u* in a syllable ending with *r*,* it might be deemed improper to represent the pronunciation of *Berks* by *burks*. On the other hand, were we to follow the method of Walker in similar cases, and pronounce it *bérks*, we should be still wider from the mark. The mode adopted by us will, it is hoped, be found sufficiently definite, at the same time that it obviates both of the difficulties just mentioned.

IX. With a view to simplify as much as possible, we have rejected Walker's second and third sounds of *o* (the former being equivalent to *oo*, the latter to *au*), and his third sound of *u* (corresponding with *oo* in *good*, a sound which we have represented by $\ddot{o}\ddot{u}$). From the same motive we have dispensed with the *figured* vowels, whenever their use has not appeared to be necessary in order to avoid ambiguity. Thus we write simply *TIL'-SIT*, and not—*TIIISIT*, *tíl'-sít*,—as Walker would have done. All marks or figures which are not needed, in order to indicate the exact pronunciation, must tend rather to embarrass than to aid the learner.

X. In the pronunciation of names belonging to England, or to those countries where the English language is spoken, *a* ending a syllable with the accent, should always have its first sound; in an accented syllable before a single *r* it usually takes the second, and before *rr*, or any other consonant, the fourth sound. Accordingly, in giving such names as *PENNSYLVANIA*, *SA'RUM*, *FAR'MINGTON*, *CAR'ROLL*, *MAN'CHESTER*, it has been deemed unnecessary to mark the *a* in the accented syllables, as scarcely any one in the least acquainted with the principles of English pronunciation, could mistake its true sound. In all cases which depart from these simple and general rules, it has been thought best to mark the sound, as *Dál'ton*, *Mál'wah*, *Pár'is*, &c.

XI. The Latin names of foreign countries are nearly always to be pronounced with the English sounds of the letters. Thus, in *BAVA'RIA*, *BULGA'RIA*, *LUSA'TIA*, and *TRANSYLVANIA*, the accented *a* should have its first sound.

* Walker says that "*Derby* is pronounced NEARLY as if written *Durby*"—and that "*fír*, a tree, is perfectly similar [in sound] to the first syllable in *ferment*, though often CORRUPTLY pronounced like *fur*, a skin." (See Principles of Pronunciation, 100 and 109.)

† We have, however, retained his third sound of *a*, (though precisely similar to *au*), in order to indicate the broad sound of the *a* in such names as *DALTON*, *CALDER*, &c., without writing the pronunciation separately.

Obs. In PRUSSIA and RUSSIA, however, the *u* instead of being pronounced short, as it would unquestionably have been done in *ancient* Latin names of this kind, is usually sounded like *oo*, assuming in these instances the character of the German or Russian *u*. In like manner the first syllable of BULGARIA is to be pronounced bööl and not bül.

XII. In the anglicized forms of foreign names, and in most well known names of foreign countries, the same rules of pronunciation, generally speaking, obtain, as in genuine English words, e. g., SPAIN, ITALY, NAPLES, &c.

Obs. 1. At the same time, we may observe a general tendency to adopt those sounds of the English vowels, which approach most nearly to the foreign sounds: thus the *a* in the first syllable of ADRIATIC, and PARIS, has its fourth sound, which is much nearer to the French and Italian *a*, than its first sound, though this would probably be given to these names by the mere English scholar, who should be guided by analogy solely. In like manner the *i* in MILAN is made short, so as nearly to correspond to the Italian *i*, which is like our *e*.

Obs. 2. In the pronunciation of foreign names that have become thoroughly anglicized, it is interesting to observe the tendency of our language, to throw the accent as far as possible from the termination. Thus PARIS is pronounced with the accent on the first syllable, though the French appear to place it on the last, and the Germans, who have not the same aversion to the *ultimate* accent, that we have, lay the stress of voice distinctly on the final syllable, thus PAR-IS'. HANOVER, which might be pronounced with the native accentuation (HANO'VEr,) without the slightest offence to the genius of our tongue,* has become irrecoverably HAN'OVER. Thus, also, we pronounce ANDALU'SIA, (in Spanish ANDALUCI'A,) AR'AGON (in Spanish ARAGÓN'), &c. So in our own country, the old NIAGA'RA has become unalterably fixed as NIAG'ARA; and HURON', though still sometimes heard, is fast giving place to HU'RON.

XIII. It may be observed that with respect to foreign names, not only in the French, Italian, and other languages that are written in the Roman letters, but also in German† and Greek, (the characters of which may be readily converted into corresponding Roman letters), it is generally customary in English to retain the literal spelling, e. g., ANSPACH, (German Anspach), KÖNIGSBERG, (German Königsberg), CHIOS, (Greek Χίος,) &c., excepting a very few well known names, as LYONS, (French Lyon), NAPLES, (Italian Napoli,) MUNICH, (German München), DANTZIC, (German Danzig,) LEIPSIK, (German Leipzig);—we often find, however, the last two names spelled literally Danzig and Leipzig.

* We have a multitude of words similar in accent, as *promoter*, *devotion*, &c.

† It is, perhaps, scarcely necessary to remark, that Roman letters are not unfrequently employed in writing and printing German.

XIV. On the other hand, names in languages of which the characters cannot be readily converted into Roman letters, or which are but little known as written languages, are usually spelled according to their sound in some well known European tongue. Thus the name of one of the cities of Persia is written in English, *Shooster* or *Shuster*, in German *Schuster*, and in French *Chouster*, precisely the same sound being expressed by these different spellings.

We find in English works of the highest character, these various modes of writing oriental and other names, employed indiscriminately. Thus in McCulloch's Geographical Dictionary, under the article *SHUSTER*, we find within the space of eight lines *Khuzistan*, (*KHOOZISTAN*), *Karoon* and *Dezphoul*, (*DEZFOOL*); the first name being, as regards the sound of the vowels, German or Italian, the second English, and the third French. On the map of Persia, published by the Society for the Diffusion of Useful Knowledge, names written according to these three different modes, occur promiseously in almost every part. Even the same name is frequently spelled differently in different parts of the same work. Thus on the map just mentioned *OORFA* is written "*Orfa* or *Ourfa*," while on another of the same set it is spelled *Urfa*. In the Penny Cyclopædia, we find *Boossa* and *Boussa*, *Soodan* and *Sudan*, *Toorkistan* and *Turkistan*, &c. McCulloch gives *SHUMLA* (*Shoomla*) under its proper head, but mentioning the town in another place writes it *Schumla*: in the same article, *AFRICA*, he has both *Soodan* and *Soudan*, each occurring several times: under *MOGADORE* he gives *Shwera* (more properly *Sweera*) as the Moorish name of this town; afterwards, in enumerating the principal fortified and garrison towns of Morocco, he gives *Suira* (pronounced *Sweera*), without so much as mentioning the name of *MOGADORE*. As neither *Schumla* nor *Suira* are to be found in his gazetteer, under their respective heads, it is scarcely possible that any one unacquainted with the different modes of writing these names, should know what places are meant by them, or in what part of his work to look for information respecting them.

XV. In order to avoid the perplexity and confusion resulting from the diversity which prevails in the mode of writing oriental names and others of the same class, we have made it a point always to spell them after the English manner, except in a few instances where a different spelling appears to have become thoroughly established by usage. Accordingly we have given *OORFA*, *SOODAN*, *TOORKISTAN*, &c., as

the preferable mode of writing such names; at the same time, under the heads of OURFA and URFA, SOUDAN and SUDAN, and TURKISTAN, the reader will find a reference to the names as spelled in the English manner, to which he must look for a description of those places. By adopting this plan, it is believed that the correct pronunciation of oriental names will be taught in the simplest and easiest manner; the perplexity and error into which the prevailing inconsistent mode of writing such names, has sometimes led even well-informed geographers,* will be avoided; and the apparent contradictions which are so often met with in our most popular geographical works, will be accounted for and reconciled.

* The reader may be referred to the case of *Schirvan* and *Shirvan*, already mentioned in the Preface. There can be little doubt, that the practice which prevails among the English, of writing oriental names after the manner of other European nations, has sometimes led geographers of the highest character into error. Thus *Mantchou*, the name of a tribe of Tartars, inhabiting the north part of the Chinese empire, is written by some of the most respectable authorities, *Manchow*. It is probable, that in the first place some English writer or writers, spelled it *Mantchou* after the French manner, and that others supposing it to be English, and wishing to adopt a mode of spelling less equivocal, wrote it *Manchow*. It may be, however, that the latter indicates the true pronunciation, and that the name was originally written correctly *Mantchou*, the *ou* having its genuine English sound; and that some English writer, naturally supposing it to be French, (for many, if not most of the English, appear to prefer the French mode of spelling such names, to their own,) without investigating the subject, converted the name, as they thought, into English, by writing it *Mantchou*. As *Mantchooria* (the country of the *Mantchoes*) is rarely visited by Europeans, this question may long remain undecided. At present, *Mantchou* appears to have become almost universal. In one of the earlier numbers of the *Penny Cyclopædia*, (*article CHINA*.) we find it written *Manchow*, but in other parts of the work *Mandshoo*, which does not differ materially in sound from *Mantchou*. Had the English uniformly adopted the practice of writing oriental names according to the sounds of their own language, it is probable that *CABUL* would never have lost its native sound (*Kâ-b'li*), so far as to be generally pronounced by the English and French, *Cabool* or *Caboul*, (see *CABOOL*, in the body of this work.) It is true that it was formerly written correctly in English works *Cabul* or *Caubul*; but the practice of spelling oriental names according to the German or Italian mode, is so common among English writers, that analogy would naturally lead us to adopt or confirm that pronunciation of *Cabul*, which appears to be now so thoroughly established. Had it been the uniform practice of English travellers and geographers to write such names as *Surmul*, *Dezful*, (or *Dezphou*), according to the sounds of their own tongue, viz., *Soormool* and *Dezfool*, no English reader would have thought of pronouncing the *u* in *Cabul* like *oo*. The erroneous pronunciation of a single name may, perhaps, justly be regarded as of little moment, but the embarrassment and error into which the prevailing practice of English writers on geography, is continually liable to lead both the ignorant and the learned, appear to us to involve considerations of the highest importance to the interests of geographical science. From a sincere wish to add as much as possible to the utility of the present work, we have had recourse to the system of writing oriental names, which has already been explained. It may be remarked that though this system is frequently at variance with common usage, it is sanctioned by the example of the most distinguished French geographers, as well as of several English writers of the highest character.

XVI. In giving the pronunciation of this class of geographical names, to represent the accent correctly, is the principal difficulty to be encountered. Those acquainted with French, are aware that this language has no *accent* in the sense in which we employ the term. The same may be said of the Hungarian, and perhaps also of the Arabic, Turkish, and Persian. At all events, those best acquainted with these languages, are not unfrequently at a loss, when they wish to represent accurately in English, the accentuation of Arabic, Turkish, and Persian words. Nevertheless it will be found that here, as in the French and Hungarian, there is something analogous to our accent, which will generally serve to guide us in marking in English, the accentuation of names in these languages. The different syllables of oriental names, however, like those of French words, are not unfrequently pronounced with a stress of voice so nearly equal, that it has been deemed proper in a number of instances, to use the secondary accents in order to indicate more precisely the true pronunciation. (See Remarks on the French accent, Section XIX.)

Obs. 1. It may not be improper here to remind the reader, that the accents which we often see upon oriental names, are by no means to be understood as always indicating the manner in which an Englishman should accentuate these names in pronunciation, as they are often employed to denote some particular sound in the vowels over which they are placed. Thus some authors place an accent upon *a*, when they wish merely to signify that this letter has the clear full sound of *a* in *far*. In the same manner an accent is placed upon *u*, in order to show that it has the Italian or German sound, or in other words, is to be pronounced like *oo*.

Obs. 2. The sound of *a* in several of the oriental languages is often very broad, approaching nearly to that of *au*, in English. Hence we often see *AFGHAUN* instead of *AFGHAN*, *CAUVERY* instead of *CAVERY*, *sultaun* instead of *sultan*, &c. In writing *NEPAUL* and *BHOPAUL*, the improper diphthong *au* appears to be almost universally employed by the English. The French indicate the same sound, by using *a* with a circumflex, *e. g.*, *NEPÂL*, *BHOPÂL*, &c. This method is, perhaps, preferable to ours, the sound of *â* being intermediate between that in the English word *far* and that in *fall*.

Obs. 3. The Arabic article *al* or *el*, is often changed in pronunciation, so as to correspond with the initial consonant of the word to which it is prefixed, thus, *EL-RASHEED* (*Rashid*), *EL-SHAM*, (the Arabic name of Syria), and *EL-SIOOT*, are pronounced and should be written in English, *Er-Rasheed*, *Esh-Sham*, *Es-Sioot*. The vowel sound of the article also varies considerably, sometimes approaching that of *oo*, thus the "Country of Dates," is usually pronounced *Beled'ööl Jer-eed'*. So *ES-SIOOT* (or *SIOOT*, without the article,) is sometimes written *As syout* and *Osioot*.

Obs. 4. *Gh* in the Arabic and some other oriental tongues, is not merely a hard *g*, as in the Italian, nor an aspirate like the German *ch*, as in the Irish language, but a harsh guttural, bearing the same relation to the German *ch* that *g* bears to *k*. As it has no equivalent in any European language, we have not attempted to distinguish it in pronunciation, having represented it merely by a hard *g*.

Kh is equivalent to *ch* in German, and accordingly has been represented by *k*, distinguished as a small capital.

GENERAL PRINCIPLES OF PRONUNCIATION OF THE MORE IMPORTANT EUROPEAN LANGUAGES.

It may perhaps be proper to remark that this brief exposition of the peculiar sounds of the different European languages, has been prepared solely with reference to the work before us. The object has been twofold: first, to enable the reader more fully to understand the system of geographical pronunciation adopted in this gazetteer: secondly, to furnish some general hints for the proper pronunciation of those European names which are not found in the present work. Some explanation of the kind has been deemed indispensable; and imperfect as this may be, it is hoped that it will be found to answer, in a great measure, the particular object proposed.

BOHEMIAN.

DANISH.

XVII.

1. *A* is pronounced generally as in the English word *far*, though it frequently approaches the sound of *a* in *fat*.

2. *E* at the end of an accented syllable usually has a sound like that of *i* in *pin*; in other cases it is sometimes like *e* in *met*, and sometimes like *e* in *battery*.

3. *I* is like *ee*, or like *i* in *pin*.

4. *O* " " the English *o*.

5. *U* " " *oo*.

6. *Y* is equivalent to the French *u* or *ü*.

7. *Aa* sounds like *o*.
8. *Ae* “ “ *a* in *fate*.
9. *Ie* “ “ *ee* in English.
10. *Oe* or *ö* is the same as in German.
11. The consonants *b, c, f, h, k, l, m, n, p, q, s, t, x, z*, are like the English.
12. *D*, between two vowels, or at the end of a syllable in which it follows a vowel, sounds like *th* in *this* ; in other situations it is usually the same as in English.
13. *G* is always hard ; at the end of a word it is sounded very slightly so as to resemble *h* ; e. g. AALBORG is pronounced nearly *ol'-bor'h*.
14. *J* is like the English *y* (consonant).
15. *R* is similar to the German.
16. *V* is usually like the English, but it sometimes appears to have a vowel sound ; thus, *havn* is pronounced almost *houn*.
17. *W* has a sound similar to the German.

DUTCH.

XVIII.

1. The vowels *a, e, i, o, and u*, are similar to the French.
 2. *Y* is like long *i* in English, as in *nigh*.
- Obs. *Ij* is sometimes made use of instead of *y* : thus, OVERYSSEL is not unfrequently written *Overijssel*.
3. *Ae* is equivalent to *åå*.
 4. *Ie* sounds like *ee* in English.
 5. *Oe* “ “ *oo*.
 6. *Oo* “ “ *o* long.
 7. *Ui* or *uy* is similar to *oi* in English, or *eu* in German.
 8. The consonants *b, c, f, h, k, l, m, n, p, q, r, s, t, v, x, z*, are similar to the English.
 9. *D*, at the end of a word, is like *t* ; in other cases it is the same as in English.
 10. *G* resembles in sound a strongly aspirated *h*, or the German *ch*.
 11. *J* is equivalent to the English *y* (consonant).
 12. *W* is like the German.

13. *Ch* is similar to the German *ch*. (14.) *Sch*, however, has not, as in German, the sound of the English *sh*, but the pure sound of *s*, followed by the guttural *ch*, resembling *sk* in English.

Obs. The FLEMISH is so closely allied to the Dutch, that it may be regarded as essentially the same language.

FRENCH.

XIX.

1. *A*, in French, is generally considered to have two sounds; the first long, as in the English word *far*, *e. g.* in *pas*; the second short, almost like *a* in *fat*, *e. g.* in *bal*. *A*, circumflexed (*â*), however, has a sound broader than the *a* in *pas*, being intermediate between that in *far* and that in *fall*. In giving the pronunciation of French names containing an *â*, we have used the same letter, as we have no equivalent in English.

Obs. The French *a* would frequently seem to be intermediate between its second English sound and that of short *u*.* However this may be, the French writers often employ *a* in spelling oriental names when the English make use of *u*, *e. g.* in Cutch (Fr. *Catch*); FUR RUCKABAD (Fr. *Farrakâbâd*); MUSKAT (Fr. *Mascate*).

2. *E* has three sounds: (1.) *close*, like *a* in *fate*, *e. g.* in *été*; (2.) *open*, nearly as in *met*, but more prolonged, *e. g.* in *procès* and *tête*; † (3.) *obscure*, as in *battery*, *e. g.* in *retour*, *devrait*. ‡

3. *I* has two sounds; the first nearly as in the English word *fig*, *e. g.* in *il*, *ami*; the second like *ie* in *field* or *ee*, *e. g.* in *gîte*.

4. *O* has three sounds: (1.) nearly as in *robe*, *e. g.* in *trône*; (2.) as in *rob*, *e. g.* in *parole*; (3.) as in *lord*, *e. g.* in *corps*.

Obs. *O* circumflexed, in French, has a deeper and fuller sound than *o* long in English: in giving the pronunciation of French names containing this letter, we have used the same, as no English vowel or

* The late Mr. Du Ponceau, who, though a native Frenchman, was an accomplished and thorough English scholar, in giving in English the French pronunciation PARIS, wrote it *pur-ree*. He remarked, however, that it might be written *par-ree*.

† In pronouncing this sound, the mouth must be freely opened, whence the name.

‡ The *e* in these and similar cases is often scarcely sounded at all, and appears to pass imperceptibly into *e* mute: *retour* and *devrait* may be pronounced *r'toor* and *d'eray*.

vowels could accurately indicate its sound, *e. g.* PUY DE DÔME, *puwe d'dôme*.

5. The sound of the French *u* has no equivalent in English. It may be said to be intermediate between *ee* and *oo*; but it can be learned from an oral instructor only. In the present work it is represented by the German *ü* (or *ue*).

OBS. *U*, before *n*, nasal, has its second English sound nearly, *un* being pronounced almost *üng*.

6. *Y* is similar to the French *i*.

7. *Ai* is like *è* or *e* open.

8. *Au* " " *ô*.

9. *Ei* " " *è*.

10. *Eu* is similar to the English *u* in *tub*, but the sound is more prolonged, nearly resembling *u* in *fur*.

OBS. *Eu* in the different parts of the verb *avoir*, "to have," always has the sound of simple *u*.

11. *Ie* is like *ee* in English, or *i*.

12. *Oi* usually sounds like *wâ*, *e. g.* *moi* is pronounced *mwâ* or *mwöh*.

OBS. *Oi* was formerly used in the termination of the French verbs, *e. g.* *avois*, *avoit*, *avoient*; also, in the final syllable of a number of adjectives, as *Polonois*, "Polish," and *Lyonnois*, "belonging to Lyons." The *oi* in these words,—which are now usually written *avais*, *avait*, *avaient*, *Polonais*, *Lyonnais*,—sounds like *ai* (or *è*).

13. *Ou* sounds like *oo* in English.

14. *B*, *c*,* *d*, *f*, *k*, *p*, *t*, *v*, and *z*, are the same as in English.

15. *G*, before *a*, *o*, and *u*, is hard, as in the English word *gap*; before *e*, *i*, and *y*, it is soft, having the sound of *zh*, or of *s* in *pleasure*. *Gu* sounds like *g* hard; thus, *gue'*, *guide*, are pronounced *gâ*, *gheed*.

16. *H* is never pronounced in French so forcibly as in English. Some orthoepists say that *h* has no sound in French.†

17. *J* sounds like soft *g* in French, or *zh* in English.

18. *L* has usually the same sound as in English; but when it ends a word, being preceded by *i*, or when *ll* follows *i*, in any situation, it usually has what is called its *liquid* sound. This may be said to

* *C*, with a cedilla (*ç*), before *a*, *o*, and *u*, sounds like *s*; thus, *ça*, *ço*, *çu*, are pronounced *sa*, *so*, *su*.

† See Bolmar's Fables—Remark on the letter *h*, page 4.

answer nearly to the sound of *lli* in *million*, the sound of *l* in such cases being blended with that of *y* (consonant); e. g. *papillon* is pronounced pâ'-peel'-yôn'; CHANTILLY, shân'-teel'-ye', &c. It should, however, be observed that, according to the present practice of the more polite French speakers, the sound of *l* is scarcely heard at all in such words, so that their pronunciation might rather be indicated thus—pâ'-pe'-yôn'; shân'-te'-ye'.

19. *M* and *N*, when followed by a vowel, or when double, have the same sound as in English; but when at the end of a word (not immediately followed by another word beginning with a vowel), or when followed by another consonant in the middle of a word, they have what is termed the *nasal* sound, which resembles that of *ng*, as in *long*, *pang*, &c., but is somewhat softer;* thus, *m* and *n* are nasal in such words as *comparer*, *contente*, but have their natural sound in such as *commune*, *connu*. MELUN, before a consonant, or standing by itself, would be pronounced almost *m'lung*; but if followed immediately by a vowel, as in the sentence, *Melun a six mille habitans*, "Melun has six thousand inhabitants," the final *n* is sounded distinctly like *nn*: the pronoun *sien*, when not followed immediately by a vowel, is pronounced nearly *se-âng'*; but when it takes the feminine termination, the *n* being doubled, has the same sound as in English, so that *sienne* is pronounced *se-enn'*.

20. *M* or *n*, nasal, when preceded by *e*, usually causes this vowel to assume the broad sound of *a*: thus, *dents*, *sens*, are pronounced like the French words *dans* and *sans*, almost as if written in English, *dong* and *song*.

21. *In*, *im*, *ain*, *aim*, *ein*, *oin*, and *en* preceded immediately by *i*, when nasal, have a sound nearly resembling that of *ang* in the English word *pang*. In such cases *in*, *im*, *ain*, *aim*, *ein*, and *en*, are pronounced alike, *âng*; the *o* in *oin* has the sound of our *w*, so that *loin* and *soin* are pronounced almost *lwâng*, *swâng*.

22. In *om* and *on*, nasal, the *o* is long, as in *won't*.

Obs. The French nasal sound is represented in the present work by *N* or *M* distinguished as a small capital, e. g. CHAUMONT, sho'-môn'; QUIMPER, kâm'-pare'.

23. *Q* or *qu*, in French, always sounds like *k*; e. g. *quel* is pronounced *kel*; *qui*, *kee*, &c.

* In uttering this sound, care should be taken not to press the back part of the tongue against the palate, as is done in pronouncing the English *ng*.

OBS. *Q*, in *French* words, (except when terminal, as in *coq* and *cing*,) is always followed by *u*, though it is sometimes employed without this letter, in writing certain foreign names. Thus Balbi and several other authors, both French and English, write *Qené* for *KENEH*; *Qoum* for *KOOM*, &c. In such cases, *q* is used to denote a sound like that of *k*, but somewhat more guttural.

24. *R* is like the English, but is trilled more strongly, especially when it precedes another consonant, or stands at the end of a word, as in *vertu*, *punir*: in similar cases the English *r* is but very slightly sounded. This sound is indicated by a small capital *r*.

25. *S*, when single and between two vowels, sounds like *z*; in other cases, it is the same as in English.

26. *X* generally has the same sound as in English, but is sometimes sounded like *s*; e. g. in *six*, pronounced *seece*, and *Bruxelles* (Brussels), pronounced *brü'sell'*; and occasionally like *z*, as in *dixième*, *de'ze'-amé'*.

27. *Ch* is like *sh* in English: *th* is like *t*.

28. *Gn* (the same as in Italian), has a sound which blends that of *n* and *y* (consonant), or in other words is equivalent to the sound of *ni* in *minion*. Thus, *AVIGNON* is pronounced *â'veen'-yõn'*.

OBS. This sound is represented in Spanish by *ñ*, and bears the same relation to *n* that the liquid *l* (*l̃*) does to the ordinary *l*. In Hungarian it is expressed by *ny*, and in Portuguese by *nh*.

When it occurs in the middle of a word, we have represented it by *n* and *y*, as in the example above given; but when it stands at the end of a word, as it cannot then be expressed by any letter or combination of letters in English, it has been indicated by the Spanish *ñ*: accordingly the French pronunciation of such names as *COLOGNE* and *BOULOGNE*, are thus given—*ko'-loñ'*, *boo'-loñ'*.

SILENT LETTERS.

29. The vowel *e* at the end of a word, when not marked with an accent, is invariably mute, e. g. in *parole*, *contente*,* &c.

30. The French consonants, when occurring at the end of a word are generally not pronounced, unless they are immediately followed by a word beginning with a vowel; e. g. in *content*, *BORDEAUX*, and *dents*. If, however, they are followed by a mute *e*, or any other vowel, they must always be articulated, e. g. in *contente*, *denté*, &c.

* The particles *le*, *ne*, and the pronouns *je*, *me*, *te*, &c., are perhaps, strictly speaking, exceptions: but though the *e* in these words is not always absolutely mute, it is very often so; thus, the sentence *vous me trouverez le même*, is pronounced *room troov rel name*, the vowel in *me* and *ne* being entirely suppressed, and the consonants attached to the preceding words.

OBS. 1. The letters *c*, *f*, *l*, and *r*, are, when final, very often pronounced; *e. g.* in *avec*, *neuf*, *il*, and *punir*.

OBS. 2. The French articulate the final consonants in almost all foreign and classical names; *e. g.* in AMSTERDAM (*m* not nasal) VÉNUS, &c.

REMARKS ON THE FRENCH ACCENT.

It may be observed that the French language has no accent in the sense in which we employ this term. The marks called *accents*, that are placed over the different vowels, serve only to indicate some particular sound of these letters, and not that peculiar impulse of the voice, which characterizes an accented syllable in the English and most other European tongues. Thus, the accent over the *e* in *parlé* serves to show that this vowel has its first French sound, and at the same time distinguishes it from *parle*, another form of the same verb, in which the *e* is mute. The circumflex imparts to the vowels over which it is placed, a longer and deeper sound than ordinary; *e. g.* in *hâte*, *tempête*, *gîte*, and *apôtre*.

It is commonly said, that the French pronounce all the syllables of a word with an equal stress of voice, but that they *seem* to an English ear to accentuate the last, because, in our language, the universal tendency is to throw the accent towards the beginning of the word. (See XII. Obs. 2.) Others, on the contrary, maintain that in pronouncing words of a number of syllables, the voice of a native French speaker almost invariably rises and dwells on the last, and that this peculiar terminal intonation is very analogous, and nearly equivalent, to our accent. This last opinion appears to us to be not without a real foundation. But, however the question may be settled, the fact that the English, who have learned the pronunciation of names from hearing them spoken by the French themselves, almost invariably throw the accent on the final syllable, furnishes, in our judgment, sufficient ground for establishing a general rule on this subject. Accordingly, in the present work, we have, with very few exceptions, placed the principal accent on the last syllable of French geographical names; at the same time, it has been thought proper to mark the others with secondary accents, in order to prevent them from being pronounced too slightly or indistinctly, as is usually the case with unaccented syllables in English. The pronunciation of ORLÉANS, for example, has been thus given—OR'-LÀ'-ÂN'.

OBS. Particular care, however, should be taken not to break such

names into as many isolated sounds as there are different syllables, but, while pronouncing these syllables with a stress of voice nearly equal, to let each glide smoothly into that which follows it. It may be observed, that the French, in uttering short sentences, usually make the different words run into each other, as if they were parts of the same word.

GERMAN.

XX.

1. *A*, in German, usually sounds as in the English word *far*, though sometimes approximating the *a* in *fat*.

2. *E*, when long, sounds like *a* in *fate*; when short, like *e* in *met*: frequently, however, it has an obscure sound, like *e* in *battery*.

3. *I*, long, sounds like *i* in *marine* (or *ee* in English); *i*, short, like *i* in *pit*.

4. *O*, long, is like that in *no*; *o*, short, like that in *on*.

5. *U*, long, is like *oo* in *cuckoo*; *u*, short, like *oo* in *good*.

6. *Y* sounds like the German *i*.

7. *Ae*, or *ä*, is similar to the German *e*, or to the English *a* in *fate*.

8. *Oe*, or *ö*, nearly resembles the *eu* in French, but has no parallel sound in English; the sound in our language nearest to it is that of *e* in *her*, or *u* in *fur*; the German poets often rhyme it with *e* (*à* or *ê*).

9. *Ue*, or *ü*, is like the French *u*.

10. *Au* is equivalent to the English *ou* in *our*.

11. *Äu* and *eu* resemble in sound the English *oi*, as in *oil*.

12. *Ei* and *ey* have the sound of *i* in *mine*, as pronounced by the Americans (the English draw the corners of the mouth farther back).

13. *Ai* is similar to the preceding, but somewhat broader.

Obs. It may be observed, that *ai* and *au*, in German, as well as in several other languages, are *proper* diphthongs, the vowels preserving their distinct and proper sound; thus, *ai* is equivalent to *ä'-e*, and *au* to *ä'-oo*, in English.

14. *Ui* sounds like *oo-e*.

15. *Ie* is equivalent to *ee* in English.

16. The consonants *f*, *k*, *l*, *m*, *n*, *p*, *q*, *t*, and *x*, are pronounced as in English.

17. *B* and *d*, at the beginning of a word, have the same sound as in English; at the end of a word, *b* is pronounced like *p*, and *d* like *t*.

18. *C*, before *a*, *o*, and *u*, sounds like *k*; before *e*, *i*, and *y*, like *ts*.

19. *Ch* has a sound unknown in our language, and which, consequently, can be learned from an oral instructor only. It somewhat resembles that of our *h*, with a strong aspiration; after *a*, *o*, and *u*, it is guttural; for example, in the word *ach*.* When it follows *e*, *i*, *ä*, *ö*, *ü*, *äu*, or *eu*, it seems to be sounded more in the palate, as in *ich*.* We have represented this sound in the present work by *κ*, distinguished as a small capital.

Obs. *Ch*, before *s*, radical, (*i. e.* forming a part of the root of the word,) has the sound of *k*; *e. g.* *Ochs* is pronounced *oks*; *Sachsen*, *säk'-sen*, &c.

20. *G*, at the beginning of a word, sounds as in the English word *get*. In other situations, it should be pronounced like the German *ch*. In some German dialects, however, it is sounded, in all cases, nearly like *g* hard, in English.

21. *H* is pronounced only when it begins a word.

Obs. 1. When *g* and *h* occur in the middle of a compound word, they have the same sound as when they are initial, provided they begin any part which is a complete word in itself; thus, in the participle *gegeben* (*given*), the latter *g* has the same sound as the former, because it begins the verb *geben* (*to give*), from which that participle is derived. It is sounded in like manner in *aufgeben* (*to give up*), and *vergeben*, (*to forgive*), &c. *H*, in similar instances, is pronounced; *e. g.* in *gehabt*, *aufhalten*, &c.

Obs. 2. *G* and *h*, occurring after a vowel, lengthen its sound; *e. g.* in *Tag*, *Zähl*, *Flöh*, &c.

22. *J* has the sound of the English *y* (consonant).

23. *Q* is only used before *u*, and sounds as in the English word *quit*.

24. *R* is pronounced like *rr* in the English word *terror*, but somewhat more strongly. (See XIX, 24.)

Obs. Care should be taken to pronounce the *r*, in German, distinctly and forcibly. In such words as *berg* and *werth*, the learner should be particularly on his guard against allowing the *e* to become like short *u*, as in similar words in English. The *e*, in such cases, should have the same sound as in our word *merit*, so that *berg* should be pronounced almost as if written *baigr* (not *burg*); *werth*, as *Wairt* (not *Wurt*), but somewhat shorter.

* Those who have no opportunity of acquiring this sound from a German, might, perhaps, learn it from a Scotchman, as the Scotch *ch* is essentially the same with the German, though pronounced somewhat more strongly.

25. *S*, at the beginning of a word, or between two vowels, is like *z*; in other cases it is sharp, as in *this*. *Ss* is always sharp.

26. *Sch* sounds like the English *sh*; *sz* like *ss*.

27. *Th* is pronounced like *t*.

28. *V* sounds like *f* in English, except when between two vowels; it is then usually pronounced like our *v*.

29. *W* resembles our *v*, but in pronouncing it, the upper teeth should not be allowed to touch the lower lip, as is done in uttering the English *v*. This sound is indicated by a capital *w*.

30. *Z* and *tz* sound like *ts*.

GREEK (MODERN).

XXI.

1. Α α (alpha) is like *a* in *far*.

2. Ε ε (epsilon) “ *a* in *fate*.

3. Η η (ēta) “ *ee* in English.

4. Ι ι (iōta) “ *e* in *me*, or *i* in *pin*.

5. Ο ο (omicron) “ *o* in English.

6. Υ υ (upsilon) is nearly like the French *u* (or *ü*).

7. Ω ω (ōmēga) is like *o* in English, there being no difference between this and *omicron* in prose; in poetry ω is longer.

8. Αι is like *a* in *fate*.

9. Ει and οι sound like *ee* in English.

10. Ου is like our *oo*.

11. Β β (bēta) is like *v* in English.

12. Γ γ (gamma) “ *g*, hard, as in *get*.

13. Δ δ (delta) “ *th* in *this*.

14. Ζ ζ (zēta) “ the English *z*.

15. Θ θ (thēta) “ *th* in *thin*.

16. Κ κ (kappa) “ *k*.

17. Λ λ (lambda) “ *l*.

18. Μ μ (mu) “ *m*.

19. Ν ν (nu) “ *n*.

20. Ξ ξ (xi) “ *x*.

21. Π π (pi) is usually like the English *p*; but after μ (m), it is like *b*; *e. g.* ἔμπορος is pronounced *em'-bo-ros*.

22. Ρ ρ (rho) is similar to the German *r*.

23. Σ σ ς (sigma) is like the English *s*.

24. Τ τ (tau) is usually like the English *t*; after ν (n), however, it is sounded like *d*; *e. g.* ἐντός is pronounced *en-dos'*.

25. Τ ν (*consonant*) when before a vowel, or the liquids *l, m, n, r*, is like our *v*; *e. g.* ἀνέριω is pronounced *āv-à-rū'-o, αἰλός, āv-los', αὔριον, āv'-re-on*: in other cases it is like *f*; *e. g.* Λευκαδία (*Leucadia*) is pronounced *lef-kā-the'-ā*.

26. Φ φ (phi) is equivalent to our *f*.

27. Χ χ (chi) is similar to *ch* in German.

28. Ψ ψ (psi) is like *ps* in English.

Obs. Recently it has become the practice to give to all, or nearly all, the islands, towns, &c., of modern Greece, their ancient names, and it is probable that, at no distant period, such modern corruptions as *Theaki* for *Ithaca*, *Scio* for *Chios*, may be regarded as obsolete. But, as the modern names are employed in nearly all our books on geography, and in the writings of the English travellers and poets, it has been thought proper in a work like the present, which is intended for popular use, to assign to them their accustomed place.

HUNGARIAN.

XXII.

1. *A*, unaccented, is like *o* in *not*; with an accent (á), it has the sound of *a* in *far*, and is always long; thus, *Aba Uj-vár*, the name of a town, is pronounced *ōb-ōh oo-e vāār*.

2. *E*, unaccented, is like *e* in *met*; with an accent (é),* it has a sound intermediate between *e* in *met* and *i* in *pit*, but more prolonged.

3. *I*, and *y* when a vowel, are similar to *e* in *me*, or *i* in *fig*.

4. *O*, without an accent, is the same as in English; when accented (ó),* it has a longer and deeper sound.

5. *U*, without an accent is like *oo* in English, with the accent (ú),* its sound is fuller and deeper.

* The peculiarity of these sounds cannot be indicated by English letters; in giving the pronunciation of Hungarian names, we have merely distinguished them as being long.

6. *Oe* or *ö*, and *ü*, are the same as in German.
7. The consonants *b, d, f, h, k, l, m, n, p, t, v, z*, are like the English.
8. *C* is not used without being joined with some other consonant *cs* is sounded like *ch* in English; *cz* like *ts*.
9. *G*, except when followed by *j* or *y*, is always hard, as in the English word *get*. *Gh* sounds like a simple *g*.
10. *J* is usually like *e* in English; *uj* is pronounced *oo-e*. *Dj* and *gj* are equivalent to *dy* and *gy*, and *tj* to *ty*. (See 16, 17, and 20, of this Section.)
11. *R* is like the German; in other words, is to be trilled more strongly than the English.
12. *S* is like the English *sh*.
13. *Sz* is like *s* sharp, or *ss*.
14. *Ts* is equivalent to *cs*, or *ch* in English.
15. *Tz* is like *cz*, or *ts* in English.
16. *Y*, in Hungarian, is nearly always a consonant. When it follows *d, g, l, n*, and *t*, it seems to be blended with these letters, so as to form but one consonant sound.
17. *Dy* and *gy* are alike. *Magyar* is pronounced *möd-yör*.
18. *Ly* is like *l* in Spanish, or *lli* in the English word *million*. *Vásárhely* is pronounced in three syllables—*vââ-shââr-hêl*.
19. *Ny* is like the Spanish *ñ*, or *ni* in *minion*. *Mártony* is pronounced in two syllables—*mââr-toñ*.
20. *Ty* approximates the sound of our *ch*, bearing the same relation to *t*, that *dy* does to *d*.
21. *Zs* sounds like the French *j*, or *zh* in English.

Obs. The Hungarian language cannot be said to have any accent, in the sense in which we employ this term: the syllables of words, however, are distinguished from each other by *quantity*. As quantity in Latin and Greek is converted into accent by the usage of English pronunciation, so, in giving Hungarian names which are ordinarily used in geographical works, we have placed the accent according to the quantity; *e. g.* *Csongrád*, *chon-gráád'*; but when the name is not in common use, but is merely given in a parenthesis, the quantity only of the vowel has been indicated, as this mode of marking the pronunciation is more strictly accurate; *e. g.* HUNGARY (Hung. Magyar Ország, *möd-yör* OR-sáág).

ITALIAN.

XXIII.

1. *A*, in Italian, is like the English *a* in *far*, though its sound varies somewhat in different situations.*

2. *E* has two sounds: (1.) *close*, as *a* in *fate*; (2.) *open*, like *e* in *met*.

3. *I* is like *e* in *me*, or *i* in *fig*.

4. *O* has two sounds; (1.) *close*, as in *note*; (2.) *open*, similar to *o* in *not*, but rather broader.

5. *U* is like *oo* in English.

6. *Ai* and *au*, in Italian, are *proper* diphthongs. (See XX., 13, Obs.) Accordingly, *CAIRO* is to be pronounced *ki'ro*, and *AUSA*, *ou'sà*, &c.

7. The consonants *b*, *d*, *f*, *l*, *m*, *n*, *p*, *q*, *s*, *t*, and *v*, are similar to the English.

Obs. *K*, *w*, *x*, and *y*, are not used by the Italians, except in spelling foreign names.

8. *C* and *cc*, before *a*, *o*, and *u*, are sounded like *k*; before *e*, *i*, and *y*, like *ch* or *tsh*.

Obs. *Cc* should be pronounced more strongly than a single *c*. This remark will apply to all double letters, in Italian, as well as in most other languages.

9. As *c*, when immediately before *a*, *o*, or *u*, is never pronounced like *ch*, in order to express this sound in such cases, the vowel *i* is inserted; thus, *cia*, *cio*, *ciu*, are pronounced *chà*, *cho*, *choo*. (See table at the end of this Section.)

10. *Ch* is employed to express the sound of *k* before *e* and *i*.

11. *G*, before *a*, *o*, and *u*, is hard, as in the English word *get*; before *e*, *i*, and *y*, it sounds like the English *j*; *gia*, *gio*, *giu*, are pronounced *jà*, *jo*, *joo*. (See table at the end of this Section.)

*Of all the European tongues, the Italian has, probably, been brought to the greatest degree of perfection. There are, however, a number of niceties in this language, which, however interesting to a thorough linguist, cannot properly be noticed in a work like the present. The difficulty of giving a brief, and, at the same time, a satisfactory exposition of the principles of Italian pronunciation, is increased by the existence of different dialects in different parts of Italy. It has been deemed sufficient, in this synopsis, merely to explain those principles of pronunciation which appear to be recognized by the Italians generally.

12. *Gh* is used to express the sound of hard *g*, before *e*, and *i*.

13. *Gli* has the sound of the liquid *l* (Y), or of *lli* in *million*; thus, *BOGLIO* is pronounced *bole'-yo*.

14. *Gn* has the same sound as in French; or, in other words, is like the Spanish *ñ*; *e. g.* *BOLOGNA* is pronounced *bo-lone'-yã*.

15. *H* is never sounded in Italian.

16. *J*, at the beginning of a syllable, is like the English *y* (consonant); at the end of a word, it is equivalent to *ii* (Italian).

17. *R* resembles the French, but is trilled somewhat more strongly (See XIX., 24).

18. *Sc*, before *e*, and *i*, is like the English *sh*; *e. g.* *SCIO* is pronounced *Shee'-o*.

19. *Z* commonly has the sound of *dz* in English; *zz* is pronounced like *ts*.

The following table will, perhaps, enable the reader more readily to understand the mode in which *c* and *ch*, *g* and *gh* are employed by the Italians.

ca	is pronounced	kã	ga	is pronounced	gã
che	"	kã	ghe	"	gã
chi	"	ke	ghi	"	ghe
co	"	ko	go	"	go
cu	"	koo	gu	"	goo

ce	"	chã	ge	"	jã
ci	"	che	gi	"	je
cio	"	cho	gio	"	jo
ciu	"	choo	giu	"	joo

Obs. It may be observed, that, in consequence of the position of Italy, and its former extensive and intimate commercial relations with the Levant, a great number of the geographical names of Greece, Syria, and Egypt, as well as many of those along the southern shore of the Mediterranean, are written in the Italian mode, and should be pronounced according to the principles of this language; *e. g.* *CORFU*, *TRIPOLIZZA*, *SCIO*, *JAFFA*, *CAIRO*, &c.

NORWEGIAN.

XXIV.

As a written language, the Norwegian may be said to be identical with the Danish, since not only the grammar, but, with very few excep

tions, the words of both, are precisely the same. In pronunciation, however, the Norwegians differ widely from the Danes, while these again differ considerably among themselves. Under Section XVII., we have given the elements of Danish pronunciation, as the language is spoken by the educated classes in Copenhagen. The principal points of difference between this and the Norwegian, appear to be the following: (1.) *d*, in the latter tongue, always has its proper sound, while in Danish it is often pronounced like the English *th*; (2.) *g*, at the end of a word, in Norwegian, is to be sounded distinctly as *g* hard in English; (3.) *o*, ending a syllable, is pronounced like our *oo*; (4.) *e*, at the end of a word, always retains its distinct sound; thus, ODENSE would be pronounced oo'-den-sêh, and not o'-den-seh, as in Danish.

POLISH.

XXV.

1. *A* sounds as *a* in the English word *far*.
2. *E*, without an accent, like *e* in *met*; with an accent (*é*), like *a* in *fate*.
3. *I* as in *marine*.
4. *O*, unaccented, as in *note*; with an accent, like *oo*, as in *good*, or *öö*.
5. *U* is like *oo* in *moon*.
6. *Y* resembles *e* in *me*, but is more guttural, being similar to *i* in *pin*.
7. The consonants *b*, *d*, *f*, *g* (always hard), *h*, *k*, *l*, *m*, *n*, *p*, *s* (always sharp), *t*, and *z*, are essentially the same as in English.
8. *C* is like the German *c*, or *ts* in English; *cz* is equivalent to our *ch*; *ch* is like the German *ch*.
9. *J* is like the German, being equivalent to *y* (consonant).
10. *R* is like the German.
11. *W* is similar to the German, resembling our *v*.
12. *N*, with an accent over it (*n*^), sounds like the Spanish ñ.
13. *S*, marked in a similar manner (*s*^), has a sound blending that of *s* and *y* (consonant). *S*'*c*' has a sound which cannot be given in English, its nearest approximation in our language is *sts*.
14. *Sz* is equivalent to *sh* in English.
15. *Z*, with a point over it, is like the French *j*, or *zh* in English.

16. *Z*, with an accent (*z'*), is somewhat similar to the above, but has no equivalent in our language.

Obs. The sounds of the letters in Slavonian, Bohemian, and Illyrian, correspond, with very slight exceptions, to those of the Polish language.

PORTUGUESE.

XXVI.

1. The vowels *a*, *e*, *i*, *o*, *u*, and *y*, and the diphthongs *ai*, *ay*, *au*, *ei*, and *ey*, are essentially the same as in Spanish.

2. *Ã* *O* is pronounced almost *oung*.

3. The consonants *b*, *d*, *f*, *l*, *m*, *n*, *p*, *s*, *t*, *v*, and *z*, are similar to the English.

4. *C* is the same as in French, differing from the English only by sometimes having the *cedilla*.

5. *Ch* is the same as in French; or, in other words, is like our *sh*.

6. *G* and *j* are the same as in French. (See XIX, 15 and 17.)

7. *H*, in Portuguese, is always silent. When, however, it follows *l* or *n*, it renders these letters *liquid*; thus, *filho* (son), is pronounced feel'-yo; *senhora* (lady), sane-yo'-rã, &c.

8. *M*, frequently, and *n*, sometimes, has a nasal sound. *Sam*, like *são*, is pronounced almost *soung*; *alem* or *alen* sounds like å-leng'.

9. *Qu* is pronounced as in French, the *u* in this case not being sounded.

10. *R* is like the French. (See XIX, 24.)

11. *X* is sounded like *ch* in Portuguese, or *sh* in English.

RUSSIAN.

As the Russians neither employ Roman characters, nor those which can be readily converted into corresponding Roman letters, we have, in writing the geographical names of Russia, followed the mode adopted with respect to oriental names. (See XIV and XV.)

SPANISH.

XXVII.

1. The Spanish *a* sounds as in the English word *far*; *e* like *a* in *ale*, like *e* in *mete*; *o* as in English; *u* like *oo*; and *y* like Spanish *i*.

2. *At* and *ay* are like long *i* in English. *Au* sounds like *ou* in *our*. (See XX, 13, Obs.) *Ei* and *ey* are pronounced å'-e.

3. The consonants *f, l* (single), *m, n, p, s, t*, and *v*, are pronounced nearly as in English.

4. *B*, at the beginning of a word, sounds as in English; but when it occurs between two vowels, its sound resembles that of *v*, with this difference—*v* is pronounced with the upper teeth placed against the under lip, while the sound of the Spanish *b* is formed by bringing the lips loosely or feebly into contact. This sound seems to be between that of *v* and the English *w*.

5. *C*, before *a, o*, and *u*, is pronounced as in English; before *e* and *i*, it has the sound of *th* in the word *thin*. In the Catalan dialect it is the same as in English.

6. *Ch* has the same sound as in English, except in the dialect of Catalonia, where it is pronounced like *k*.

7. *D*, at the beginning of a word, is sounded nearly as in English, but is pronounced with the tip of the tongue against the upper teeth, while in pronouncing the English *d*, the tongue is made to touch the roof of the mouth. At the end of a syllable, or between two vowels, *d*, in Spanish, sounds like the English *th* in *this*, but is somewhat softer. This sound is usually represented, in the present work, by a small capital *d*.

8. *G*, before *a, o*, and *u*, is hard, as in English.

9. *G*, before *e* and *i*, and *j* before every vowel, are pronounced like a strong guttural *h*, similar to the German *ch* in *ach*. This sound is indicated by *h* distinguished as a small capital.

10. *Gua* and *guo* sound somewhat like *gwâ, gwo*, but the *g* is so soft that it is scarcely perceived; so that in these cases the sound of *gu* seems to approximate very nearly to that of the English *w*. *Gu*, before *e* and *i*, is usually sounded like *g* hard; thus, *GUIANA* is pronounced *ghe-ân'-â*. When, however, the *u* is marked with a diæresis; thus, *güi*; these two letters have the same sound as when before *a* or *o*, and consequently *güi* is pronounced *gwe* or *we*. (See table at the end of this Section.)

11. *H*, in Spanish, is never pronounced, except in words beginning with *hue*, and then very slightly.

12. *Ll* (now sometimes written *l̃*), has a sound which combines that of *l* and *y* (consonant), and is similar to the liquid *l* in French; e. g. *villa* or *vī̃a* is pronounced *veel'-yâ*; *Llerena*, *lyâ-râ'-nâ*.

13. *Ñ*, in a similar manner, unites the sounds of *n* and *y*, and is like *gn* in French; thus *peña* is pronounced *pane'-yâ*.

14. *Q*, in Spanish, is always followed by *u*. *Qu*, before *a* and *o*, is

sounded as in English; or, in other words, is equivalent to *kw*; before *e* and *i*, it is pronounced like *k*, unless the *u* be marked with a diæresis, in which case it is like *kw*. (See table at the end of this Section.)

15. *R* is similar to the French, but is trilled more strongly. (See XIX., 24.)

16. *T* is to be pronounced by putting the tip of the tongue against the upper teeth.

17. *X* is usually sounded like the Spanish *j*, which letter, according to the present mode of spelling, has been generally substituted for it; thus, instead of the old spelling, XIMENES, XUCAR, &c., we now see *Jimenes*, *Jucar*, &c. *X*, before a consonant, or before a vowel marked with this sign \wedge , is sounded as in English: Example—*Exterior*, *Exâminar*.

18. *Z* is to be pronounced like *th* in *thin*.

The following table will, perhaps, serve to show more clearly the manner in which *c*, *g*, *j*, *q*, *x*, and *z*, are used in Spanish.

ca — is pronounced	kâ	cua or qua is pronounced	quâ
— que “	kâ	cue or quë “	quâ
— qui “	ke	cui or quï “	que
co — “	ko	cuo or quo “	quo
cu — “	koo		

ga is pronounced	gâ	gua is pronounced	gâwâ or wâ
gue “	gâ	güe “	gâwâ or wâ
gui “	ghe	gui “	gwe or we
go “	go	guo “	gwo or wo
gu “	goo		

ja or xa — is pronounced	hâ	za — is pronounced	thâ
je, xe, or ge “	hâ	ze or ce “	thâ
ji, xi, or gi “	he	zi or ci “	the
jo or xo — “	ho	zo — “	tho
ju or xu “	hoo	zu — “	thoo

Obs. The Spanish language, as spoken in Mexico, differs, in some points, materially from the true Spanish. Thus, *z* and *c*, before *e* and *i*, instead of having the sound of *th*, are generally pronounced like *s*. Among the uneducated classes, *ll* is universally sounded like *y*; thus, *villa* is pronounced vee'-yâ. It will be perceived that this is similar to the fashionable pronunciation of the liquid *l* in French. In most countries of South America, the Spanish tongue is spoken in greater purity, though the above-mentioned corruptions prevail, in some parts, to a greater or less extent.

SWEDISH.

XXVIII.

1. The vowels *a*, *e*, *i*, *ä*, and *ö*, are similar to the German.
2. *å* sounds like the English *o*.
3. *O*, at the end of a syllable, is like our *oo*; in other cases, like *o* in *not*.
4. *U* appears to blend the sounds of short *e* and of *oo*, being somewhat similar to *è'-oo*. It has been represented, in the present work, by *oo*; this sound being the nearest to it of any in our language.
5. *Y* is the same as in Danish; or, in other words, is similar to the French *u*.
6. The Swedish consonants are for the most part pronounced like the English, with the exception of *j*, and *g* before *e*, *i*, *ä*, *ö*, and *u*, which are equivalent to *y* consonant, and of *z*, which sounds like *ts*.
7. *Kj* sounds like the English *ch*; thus, *Kjöping* (written, also, simply *Köping*) is pronounced *chöp'-ing*.

The following Table is intended to exhibit the striking discrepancy in the mode of writing the same geographical names, which occurs in the works of respectable authors. (See *Preface*, page xii., and *Introduction*, page 28.)

Small capitals are used to denote the mode of spelling which occurs in the Gazetteer, and which the authors considered to be the preferable orthography.

An asterisk denotes that the pronunciation of the spelling to which it is appended is different from that of the others. But when a name occurs with two or more different spellings, not marked by an asterisk, it is to be understood that the pronunciation of all these is essentially the same.

If the reader will bear in mind that *oo* in English, *ou* in French, and *u* in Italian and German, have the same sound; that *i* in all the languages of continental Europe is similar to *ee* in English; that *j*, in two-thirds of the European languages, is like our *y*; that *ch* in French, and *sch* in German, is equivalent to our *sh*, and that *j* (and *g* before *e* and *i*) in French is like our *zh*—or *z* in *azure*—and nearly like the German *sch*; a clue will be furnished to many of the perplexities with which geographical spelling and pronunciation so much abound. Some other difficulties are explained in the Table by reference to the Introduction: e. g. *Habana, Havana; Xingu, Chingu*.

(App.) placed after a name, indicates that it is to be found in the Appendix.

1. The vowels *a*, *e*, *i*, *o*, marked with a point underneath (À or à, È or è, &c.) have an obscure sound, similar to short *u*, thus, MÈRTON should be pronounced almost mür'-tün or mür'-t'n. (See Introduction, VIII.)

2. Ì with two points underneath sounds like é.

3. *ö* has a sound similar to the French *eu* or nearly like that of *e* in *her*. It may be anglicized by *e*. (See Introduction, XX., 8.)

4. *ü* is like the French *u*, being intermediate between *ee* and *oo*. (XIX., 5.)

5. A letter when it has a line underneath, or when italicised, is silent; *e. g.* in WALKER, GREENE, *öb-öh*.*

6. *ʔ*, small capital, in the pronunciation of a name, indicates that its sound is similar to *TH* in *this*.

7. *†g* and *κ*, small capitals, indicate the sound of the German *ch* or one similar to it. (VI. and XX., 19.)

8. *ʔh*, small capital, has a sound nearly similar to the preceding, but more resembling a strongly aspirated *h*.

9. *l* (*l* liquid) is to be pronounced like *lli* in *million*: it blends the sounds of *l* and *y* consonant. (XXVII., 12.)

10. *m* and *n*, small capitals, are nasal, being similar in sound to *ng*. (XIX., 19.)

11. *r*, small capital, has the sound of *rr* in *terror*. (XIX., 24.)

12. *v*, small capital, indicates the sound of the French *eu*. It is pronounced nearly as *u* in *tub* or in *fur*.

13. *†w*, capital, has a sound similar to our *v*.

14. *Y* and *ey*, at the end of an unaccented syllable, sound like *e* in *me*.

15. *Ai* and *ay* are considered to be equivalent to *a* in *fate*.

16. *Au* and *aw* have the sound of *a* in *fall*.

17. *ëë* indicates a sound similar to *i* in *pit* or in *spirit*.

18. *Ow*, when the *o* is not marked long (*ôw*), is to be pronounced like *ou* in *hour*.

19. *Gh* is sometimes employed in pronunciation for *g* hard.

20. *ġ* is to be pronounced more softly than simple *g*. (XVII., 13, and XXVII., 10.)

21. *ş* sounds like *z*.

☞ The sounds of the figured vowels are explained at the top of the page, in the body of the work.

OBSERVATIONS.

1. Every letter, or combination of letters, occurring in the *pronunciation* of a word or name, is to be pronounced with its proper English sound; *e. g.*, *ou* is to be sounded as in *our*, *sour*, &c., and not like *oo*, as in *tour*, and some other words of French origin: *g* must be hard, as in *get*, *give*, &c.; *ch*, as in *chill*, *choose*, unless the *h* be marked as silent, in which case *ch* has the sound of *k*.

2. In the pronunciation of foreign European names, care should be taken not to allow *â* to fall into the third or broad sound of this vowel—an error to which American and English speakers are very prone—it would be much less a fault, generally speaking, to pronounce it like *a* in *fat*. It should, however, be observed, that *a* preceding the nasal *n* in French, is usually broad, almost like *o* in *not*. (See Int. XIX., 19, 20, and 21.)

A, in some names, appears to have a sound intermediate between *â* and *â*.

*The *h*, in this and similar instances, is employed in order to enable the learner more readily to pronounce the vowel short, as in *not*: were it omitted, thus, *ob-ö*, the inexperienced pupil might be in danger of pronouncing the *o* long, as in *no*, or indistinctly, as we often hear it in *piano*.

† It is intended that the mere English scholar shall pronounce these letters with their proper English sound (See Introduction, VI.)

Thus the *a* in the penultimate syllable of ALABAMA, is somewhat longer than in *fat*, though not so broad as in *far*. It may be remarked that some orthoepists assign such a sound to *a* in certain English words, *e. g.* in *fast*.

3. When *e* and *o* end a syllable in the pronunciation of a word, they are always to be pronounced *distinctly* with their first sound (as in *me* or *no*.)

4. *E* is rarely *figured* when occurring in a syllable with the primary accent (IX.); in other cases *e*, and also the other vowels, are frequently thus marked, in order to guard against their being pronounced indistinctly.

5. *O* marked long (\hat{o}), though often employed in English names, in order to show merely that this letter has its first sound, when it occurs in the pronunciation of *foreign* words or names, always indicates that the sound of the vowel is to be *prolonged*. In like manner, \hat{o} indicates that this letter has a sound like *o*, in *not*, to be pronounced distinctly but very short.

6. The sound of *u* before a vowel, in Spanish words, is usually represented by *w*. Thus *nuevo* is pronounced *nwa'-vo*, which is nearly equivalent to *noo-a'-vo*. In Italian, the *u* before a vowel appears to be sounded more distinctly: accordingly, we have indicated the pronunciation of *nuovo*, *duomo*, by *noo-o'-vo*, *doo-o'-mo*. In these cases, however, *noo-o* and *doo-o* are to be pronounced almost in one syllable.

7. When two or more geographical names, with the same spelling, occur in succession, and the pronunciation of the first only is given, it is intended that all shall be pronounced alike.

9. The *pronunciation* of a name is distinguished from the name itself, by its not beginning with a capital. In examples like the following, BRES'-LAU or *bres'-lou*, the latter spelling has reference to pronunciation only, while the former gives the true mode of writing the name and the pronunciation at the same time. Had we written BRESLAU, *bres'-lau* or *bres'-lou*, the same end would have been attained, but at the expense of brevity.

9. The number of syllables in a word or name is indicated by the hyphens; *e. g.* SMYTHE not being divided by a hyphen, is to be pronounced in one syllable; *pane'-ya* in two: the *e*, in such syllables as *pane*, is silent, being only used to render the preceding *a* long, as in *fate*. In some few cases, however, where a name of two or more syllables is necessarily familiar to all, we have not divided it by hyphens, nor indicated the pronunciation in any way; *e. g.*, HENRY, WILLIAM, &c. In Latin names, the accent only has been marked.

10. When the *right* or *left* bank of a river is spoken of, the reader is supposed to be *looking down* the stream, or, in other words, going with the current.

11. It may be remarked, respecting the adjective and appellation of the inhabitants, derived from the names of places (see PREFACE, pages vi. and vii.), that, if the latter has *man* for its termination, in the singular, the plural is often expressed by the adjective; *e. g.*, singular, FRENCHMAN; plural, THE FRENCH: singular, SCOTCHMAN; plural, THE SCOTCH, &c. We sometimes hear also "THE SPANISH," instead of "THE SPANIARDS;" but such expressions are not to be approved.

12. When no date is given, the population of places in this country has reference to the census of 1850; the population of Great Britain to the census of 1841, and that of France to the census of 1836.

13. When, immediately after a geographical name, there occur one or more names beginning with a capital, enclosed in a parenthesis, these are to be understood as different modes of writing the first, but if the word enclosed begins with a small letter, it is merely the pronunciation of the first name.

AB-YE-SIN'-Ī-Ā, a kingdom of Africa, bounded on the E. by the Red Sea, N. by Sennaar, W. and S. by Sennaar, Kordofan, and barbarous regions; about 770 m. long, and 550 broad. The ranges of mountains, with which it is everywhere intersected, preserve the air cool, and afford a sufficient supply of water. In consequence of this physical structure, Abyssinia is exceedingly fertile, and is exempted, in a great measure, from that sand which dooms so large a portion of Africa to sterility. The chief alimentary plants are, millet, barley, wheat, maize, and teff.* All travellers concur in praising the fine wheaten bread of Abyssinia; but it is eaten only by people of rank. Teff grows on every soil, and affords the bread which is in universal use.

This once powerful kingdom, which during so many ages preserved its independence against the efforts of paganism and the sword of Mahomet, is now a prey to anarchy, and completely dismembered. Among the various kingdoms into which it has been divided, the following are the principal: The kingdom of **AMHARA**, of **TIGRÉ**, and of **SHOA** or **SHWA**. These will be spoken of in their respective places.—The Abyssinians profess Christianity, but their religion is filled with Judaical observances.—Adj. and inhab., **AB-YE-SIN'**-Ī-ĀN.

ACAPULCO, ăc-ă-pool'/-co, a t. of Mexico, on the coast of the Pacific Ocean. Its port is the finest in Mexico, and has few equals in the world. Lat. 16° 50' N., Lon. 99° 49' W. Pop. 4,000. (B.)

ADRIA, ă¹-dre-ă (Anc. Had¹ria or At¹ria), a t. of Italy, 30 m. S. S. W. of Venice. It was an important commercial city, and a station for the Roman fleet under the emperors, but is now greatly reduced, and, in consequence of the sea having receded, is situated about 20 m. inland. Lat. 45° 3' N., Lon. 12° 4' E. Pop. 10,000. (B.)

ADRIANOPLĒ, ad¹-dre-an-o¹-p¹l, (Anc. Adrianop¹olis, *i. e.* the "city of Adrian;," Turk. Ed¹ren-ĕh¹), the second city of European Turkey on the Maritza, in a rich plain, 135 m. N. W. of Constantinople. It was the seat of the Turkish dominion in Europe from the year 1366 to 1453, when the residence of the Sultans was transferred to Constantinople. Adrianople is the residence of a grand mollah and of a Greek archbishop. It contains some interesting Roman antiquities and several remarkable Moslem buildings, among which may be mentioned the mosque of Selim II., regarded as the most magnificent edifice of the kind that has ever been erected. Its dome is said to be even higher than that of St. Sophia's, at Constantinople. Pop. estimated by Balbi at 100,000. Lat. 41° 41' N., Lon. 26° 40' E.

AD¹-RI-AT¹-IC SEA, or GULF OF VENICE, (Anc. Mare Adriat¹icum, or Mare Su¹perum,) a great arm of the Mediterranean, extending in a N. AF-RÏ-CÏ, one of the five grand divisions of the globe; bounded on the W. by the Atlantic, N. by the Mediterranean, E. by the Red Sea and Indian Ocean, while its S. touches the great Southern Ocean. Its most northern point, Ras el Kroon, or "Cape Horn," is in about 37° 21' N. Lat.; its most southern, Cape Agulhas (â-gool/-yâs), or Cape Needles, is about 34° 50' S. Lat. The distance between these two points is nearly 5,000 m. Cape Guardafui, in Lon. 51° 22' E., is the most eastern point of Africa; and Cape Verde, in Lon. 17° 32' W., the most western. The distance between these capes is above 4,500 m. It contains an area of about 11,650,000 sq. m. (Hassel.) On the whole, Africa seems to be less liberally supplied with moisture than either of the other great divisions of the globe. But while in some parts it has immense tracts of burning desert, in others it is marshy and flooded with water. In those regions which are exempt from these extremes, animal and vegetable life appear in remarkable variety and luxuriance. Of the central portion of this continent, little or nothing is known.—Adj. and inhab. AF-RIC-AN.

AL-BA'-NĪ-Ā,* (pronounced ăl-bă-nee'ă by the modern Greeks; Turk. Arnâoodlik or Arnaootleek,) a prov. of European Turkey, extending along the coast of the Adriatic and Ionian Sea. The limits of this country are not well defined; it appears, however, to extend from about 39° to 43° N. Lat. A chain of mountains near the 21st degree of E. Lon. may be considered to form its eastern boundary. It is 130 m. in length, and from 70 to 90 in breadth.—Adj. and inhab., AL-BA'-NĪ-ĀN and AL'BANESE'. (Turk. Arnaoot, ar'-nâ-oot'.)

ALBANO, ăl-bă'-no, a t. of Italy, in Campagna di Roma, resorted to on pleasure excursions by the inhabitants of Rome in spring and harvest. It is 14 m. S. S. E. of Rome. Pop. 4,200. (M.)

ALBAN'S (ST.), aul'-banz, a small t. of Hertfordshire, England, 20 m. N. N. W. of London. It derives its name from a magnificent monastery founded by Offa, in the eighth century, in honour of St. Alban, reputed the first British martyr. He is said to have suffered in the time of Diocletian, and to be entombed within the church.

ALBANY, aul'-ba-ne, a co. in the E. part of N. Y., bordering on the Hudson r. Entire population 93,279.

ALBANY, the cap. of the above co., and of the state of New York, on the W. bank of the Hudson, 160 m. N. of the city of N. York, is, in point of population, trade, and wealth, the second city in the state. It is finely situated for commerce, at the head of sloop navigation on the Hudson, and communicates by canals with L. Erie, L. Ontario, and L. Champlain. It is also connected by railroads with Utica, Rochester, and Buffalo, and with the principal towns of Massachusetts. Steamboats are constantly passing between Albany and New York. The first settlement of this city was made about the year 1612. Lat. 42° 39' N., Lon. 73° 44' 49'' W. Pop. 50,763.

AL-EP/-PO, (Arab. Hâ/-leb or Hâ/-lep; Anc. Berœ/a;—not the Berœa mentioned in the New Testament: this was in Macedonia—its modern name is KARA VERIA, kâ/-râ ver-ee/-a.) A city of Syria, and cap. of a pashalic of the same name. It was a few years since the third city of the Ottoman empire, yielding only to Constantinople and Cairo; but more than one-half of it was laid in ruins by the earthquake of 1822. Previously to this dreadful catastrophe, its commerce had raised it to the first rank among Asiatic cities, and procured for it the name of the *modern Palmyra*. Its population, together with that of its immediate environs, before 1822, is estimated by Balbi to have been near 200,000. Lat. 36° 11' N., Lon. 37° 10' E.—Adj. and inhab. ALEPPINE, al-ep-peen'. ALEUTIAN (â-lu/-she-an), or ALEUTAN ISLANDS, an insular chain in the North Pacific, stretching from the peninsula of Kamtchatka, in Asia, to Cape Alaska, in N. America, belonging to the Russian government of Irkootsk. They are about forty in number, and contain among them several volcanoes. In 1795 a volcanic island rose from the sea, which in 1807 was found to be enlarged to about 20 m. in circuit, and the lava was then flowing down its sides. *Aleutian* is derived from the Russian word *aleut* (or *aleoot*), signifying a "bold rock." (P. C.)

AL-EX-AN-DRET/-TA (called by the Turks Is-ken-der-oon' or Scander-oon'), a seaport of Syria, on the Gulf of Scanderoon, 30 m. N. of Antioch. Its road is the only one in Syria which affords good anchorage. The air of the place is very insalubrious, so that it is never exempt from pestilential fevers. Lat. 36° 36' N., Lon. 36° 10' E.

ALEXANDRIA, (Anc. Alexandri'a;* called Is-kân-der-ee/-yeh by the Arabs and Turks,) a large and celebrated city; the ancient capital of Egypt; founded by Alexander the Great, in the year 332 B. C. It is situated at the W. extremity of the Egyptian coast, on the borders of the desert, upon a neck of land between the Mediterranean and L. Mareotis. It was once the centre of science as well as of commerce. Its library, founded by Ptolemy Philadelphus, surpassed all others of which antiquity could boast. Even after its subjection to the Roman

* The accent should be placed upon the penultima of ALEXANDRIA whenever the ancient city is referred to. This accentuation is supported not only by the best authorities of the present day, but by the ancient Greek spelling, Αλεξάνδρεια (Alexandria). The same may be said of the ancient name of Philadelphia, which was written by the Greeks Φιλαδέλφεια (Philadelphœia).

empire, Alexandria scarcely lost any of its splendour. It was considered second only to Rome, and still engrossed, as it had done before, the trade of India: goods being brought up the Red Sea, landed at Berenice, and carried across to the Nile, were conveyed down the river and through a canal to the city. After it was reduced by Omar, in 640, and subjected to the Saracen yoke, the caliphs transferred the seat of government to Cairo, and Alexandria was no longer the capital even of Egypt. The discovery of the Cape of Good Hope, by turning the commerce of India into a different channel, completed its downfall. Lat. 31° 13' N., Lon. 29° 55' E. Pop. above 25,000. (B.)—Adj. and inhab. ALEXAN'DRIAN. (Arab. Skān-der-ā'-nee.)

ALGARVE, āl-gar'-vā, or AL-GAR'-EJ-A, once an independent kingdom, now the most southern province of Portugal; bounded on the W. and S. by the Atlantic, E. by Andalusia, N. by Alem-Tejo. Length, 85 m.; greatest breadth, about 30 m.

ALG-EZ-I'-RAS or ALGECIRAS, (Sp. pron. āl-hā-thee'-rās,) a town of Andalusia, Spain, on the Gulf of Gibraltar. Lat. 36° 8' N., Lon. 5° 26' W. Pop. about 9,900. (P. C.)

ALGIERS, āl-jeerz', or AL-GE'-RI-A (Arab. Al-Jēz-air,) a territory of northern Africa, forming one of the principal of the Barbary States, between 34° and 37° 7' N. Lat., and 8° 40' E. and 2° W. Lon.; bounded on the N. by the Mediterranean, E. by Tunis, S. by the Atlas, which separates it from the Beled-ool-Jereed, or Country of Dates, and on the W. by Morocco, from which it is divided by the desert of Angrab. It comprehends the greater part of the Numidia and Mauritania Tingitana of the ancients. In the sixteenth century, the celebrated corsair, Barbarossa, took possession of Algiers, and became its ruler. The utmost efforts of the emperor, Charles V., proved abortive against the power thus founded; and Algiers, under enterprising chiefs, became a great naval state, which continued for three centuries the terror of Christendom. More recently, however, from a want of intelligence in the rulers, and from not sharing in the rapid improvements of the European states, she had lost much of her relative importance and power; and finally, in the year 1830, was conquered by the French army, under Marshal Bourmont, and subjected to the dominion of France.—Adj. and inhab. ALGERINE, āl-jeer-eeen'.

ALGIERS, a celebrated city, and cap. of the country of the same name, is situated on the coast of the Mediterranean, upon the declivity of a hill, on which the houses rise gradually in the form of an amphitheatre, and terminate nearly in a point at the summit. It is not above a mile and a half in circuit. The largest street is said to be 1200 paces long, and not more than 12 feet wide. The population, previous to the French conquest, had been variously estimated, from 80,000 to 200,000, and even 300,000; but it is probable that even the first estimate was much beyond the truth. According to a census taken by the French in 1833, the whole number of inhabitants, exclusive of the garrison, amounted only to 23,753. (B.) Lat. 36° 49' N., Lon. 3° 25' E.

ALLAHABAD, âl'-lâ-ha-bâd', (*i. e.* "city of God,") an ancient city of Hindostan; cap. of a prov. of the same name. At the distance of about two miles from the town, is situated, at the junction of the rivers Ganges and Jumna, the celebrated fortress of Allahabad, founded by the emperor Akbar, in the year 1583, one of the most esteemed places of Hindoo worship and ablution. Every summer multitudes of pilgrims resort thither from all parts of India, and, encamping on the sands between the two rivers, perform their purifications and other ceremonies for nearly two months. This fortress stands in Lat. 25° 27' N., Lon. 81° 50' E., being, by the course of the Ganges, 820 m. from the sea. Pop. 20,000. (B.)

ALLE, âl/-lêh, a r. of Prussia, which flows into the Pregel, about 30 m. E. of Königsberg.

AL'-LE-GHA'-NY* MOUNTAINS, a chain of mountains, stretching from Maine to the N. part of Georgia. In New England they are less than 100 m. from the Atlantic coast, but gradually diverge as they advance southward, so that near their southern extremity, they are more than 300 m. from the sea. They divide the waters which flow into the Atlantic from those that flow into the Mississippi. Some writers on geography describe the Alleghany mountains as commencing in Georgia and terminating at the Hudson. But there appears to be no sufficient reason why the Green Mountains of Vermont, and White Mountains of New Hampshire, should not be included under the same general appellation with the rest of this chain. They are also sometimes called the AP'-PA-LA'-CHI-AN MOUNTAINS.

ALLEGHANY, a r. which rises in Pa., and after making a circuit into N. Y., returns again into Pa., and, uniting with the Monongahela at Pittsburg, forms the Ohio.

ALLEGHANY, a co. in the S. W. part of N. Y., bordering on Pa. Pop. 37,808. Co. t. Angelica.

* We regret to perceive that it is becoming customary, even in works of a respectable character, to write this name *Allegheny*. It is difficult to conceive of any sufficient motive for departing from the ordinary spelling, which gives the true pronunciation, in order to adopt another, which contradicts the pronunciation. We are compelled, therefore, to place this in the list of *retrograde* innovations.

This town suffered greatly from the invasions of the barbarians, on the fall of the Roman empire, and was at last utterly destroyed, during the wars of the emperors Conrad and Manfred against the popes. At present it contains scarcely 1,000 inhabitants. Lat. 41° 33' N., Lon. 13° 40' E.

AR-A/-E-A, an extensive country in the S.W. part of Asia, bounded on the N. by Syria and the river Euphrates, E. by the Persian Gulf, S. by the Indian Ocean, and W. by the Red Sea. Length from the northern extremity, on the Euphrates, to Cape Babelmandel, about 1,500 m.; breadth on the southern coast, from the Red Sea to the Persian Gulf, 1,200 m.; from Basrah to Suez, 900 m. It is commonly divided into three parts, Arabia Felix, or *happy*; Petræa, or *stony*; and Deserta, or *desert*. Arabia Felix borders on the Persian Gulf, the Indian Ocean, and the S. part of the Red Sea; Arabia Petræa lies on the Red Sea, N. of Arabia Felix; Arabia Deserta includes all the northern part of the country. Among the Arabians, these names are not known. They call Arabia Deserta, Nedjed or Nej'd; Arabia Petræa, Hedjaz; Arabia Felix is divided into Yemen, Hadramaut, Oman, and Lahsa; which will be treated of under their respective heads.

This vast country contains but two rivers worthy of the name, the Meidam (mâ'e-dâm'), and the Shab, which descend from the plain of Yemen into the Indian Ocean. All the other streams either entirely disappear in summer, or descend from the mountains and are dried up before reaching the sea. (B.) Arabia has long been celebrated for the abundance of its odoriferous plants. Coffee, of a superior quality, is cultivated in Yemen. Grapes, maize, wheat, barley, beans of different kinds, tobacco, &c., are produced in this country. The gum Arabic is obtained from an indigenous tree called by naturalists the *acacia vera*.

Arabia is remarkable in history for having almost uniformly maintained its independence against the different conquering powers which

in ancient or modern times, have successively extended their sway over the neighbouring kingdoms. For this independence it has been chiefly indebted to those peculiar means of defence, with which it has been furnished by nature. Its vast and parching deserts have stood as a "wall of fire" against the encroachments of foreigners; at the same time the general sterility of the soil has afforded no sufficient motive for undertaking the conquest of a country, in which so many formidable, not to say insurmountable, difficulties must be encountered. This country is also remarkable as the birth-place of Mahomet, and the cradle of the Moslem religion, which, in a few years, extended its dominion over a large portion of Asia, the northern regions of Africa, and thence over the greater part of Spain.—Adj. AR-A'-BI-AN, ARABIC, âr'-a-bik, and ARABESQUE, âr'-a-besk'.—Inhab. ARAB, âr'-ab, and ARABIAN.

ARACAN. See ARRACAN.

ARAD, ôr'-ôd', the name of two small towns of Hungary, situated in a county of the same name.

OLD ARAD, (Ger. Alt-Arad, âlt â'-rât; Hung. O' Arad;) is on the r. Marosch. Lat. about 46° 10' N., Lon. 21° 20' E. Pop. 5,000. (B.)

NEW ARAD, (Ger. Neu-Arad, noi â'-rât; Hung. Uj Arad, oo-e ôr'-ôd;) an important fortress, on the opposite side of the Marosch, 2½ m. from the old town.

ARAGON, âr'-a-gon, (Sp. pron. âr'-â-gone',) a large prov., formerly a kingdom of Spain, bounded on the N. by the Pyrenees, E. by Catalonia and a part of Valencia, S. by Valencia, and W. by Navarre and Old Castile. Length, from N. to S., about 200 m.; greatest breadth, from E. to W., about 130 m.—Adj. and inhab. AR'-A-GON-ÈSE'.

ARAGUAY, âr'-a-gwî', a r. in the central part of Brazil, which flows into the Tocantins.

ARAL (âr'-al), SEA OF, a great inland lake of Asia, situated E. of the Caspian Sea, between the 43d and 47th degrees of N. Lat., and the 58th and 62d of E. Lon. Its length is about 290 m. from N. to S., its breadth varies from 130 to 250 m. The southern extremity is studded with innumerable small islands, at the mouth of the r. Amoo; and from this circumstance it has received the name Aral, which, in the Tartar language, signifies island. It has no communication with the ocean, and though it receives several rivers, among which are the Amoo and Sihon, the level of this lake is constantly lowering. The waters are saline, but the exact proportion of salt has not been ascertained. (P. C.)

ARANJUEZ, â-rân-hweth', (Lat. A'ra Jo'vis, "altar of Jove,") a t. and royal palace of Spain, on the Tagus, 25 m. S. by E. from Madrid. It is the residence of the court ordinarily from Easter till the end of June. Permanent pop. about 4,000. (B.) Lat. 40° 2' N., Lon. 3° 36' W.

ARARAT, âr'-a-rat', a celebrated mountain of Armenia, situated to the S. W. of the t. of Erivan, about 5 m. from the river Aras. It rises from the midst of a great plain, in two conical peaks, one of which ascends far above the limit of eternal snow, its height being about 17,260 feet above the level of the sea. It does not, however, rise to this great elevation, immediately from its base, but stands on the table land of

Armenia, which is stated by Ritter to be 7,000 feet above the level of the sea. The smaller cone is separated from the greater by a plain of considerable extent, and is much lower. The surrounding people regulate their agricultural operations by the melting of the snow on the little Ararat, from the summit of which it entirely disappears in summer.

ARAS, ár/-as, (Anc. Arax/es), a r. of Armenia, which rises about 20 m. S. of Erzroom, and, flowing easterly, empties itself into the Koor (Kur). Length estimated at above 500 m.

AR-AU-CA/-NI-ANS, a nation of Indians of S. America, inhabiting a country bounded on the N. by the r. Bio-bio, E. by the great Cordillera of the Andes, S. by Valdivia, and W. by the Pacific Ocean; extending along the coast about 180 m., with a breadth, from the sea to the crest of the Andes, of perhaps 150 m. They are a brave and hardy people, very jealous of their honour, hospitable, honest, grateful, generous, and humane; but when not at war, indolent, haughty, and addicted to intoxication. The Araucanians have sustained an almost uninterrupted war against the Spaniards from the first invasion in 1537, until the present time. Their independence was formally acknowledged by Spain in 1773, and they were allowed to send an ambassador, who should reside at Santiago de Chili. (P. C.)

ARBE, ar/-bà, an i. in the Gulf of Venice, containing an area of about 29 sq. m., and between 3,000 and 4,000 inhabitants. Also, a small t. on the above island. Lat. 44° 45' N., Lon. 14° 50' E. (P. C.)

ARBROATH. See ABERBROTHOCK.

ARCHANGEL, ark-ane/-jel, (Russ. pron. árK-âng/-gèl,) a prov. the most northern and the most extensive of Russia in Europe. Its superficial extent is estimated at 300,000 sq. m. Pop. perhaps 280,000. (P. C.)

ARCHANGEL, an archiepiscopal t.; the cap. of the above, on the Dwina, with a fine harbour, which, however, is ordinarily free from ice only from July to September. It was the only town in Russia of any commercial importance, previously to the founding of St. Petersburg, in 1703; since which time its trade has diminished, though it is still the depository of foreign merchandise destined for Siberia. Pop. 19,262. (B.) Lat. 64° 32' N., Lon. 40° 43' E.

AR'-cot', a decayed city of Hindostan; the Mahometan cap. of the Carnatic. It is a place of great antiquity, and was once an important Indian fortress. Lat. 12° 54' N., Lon. 79° 22' E.

ARDÈCHE, ar'-daish', a small r. of France, which flows into the Rhone.

ARDÈCHE, a dep. in the S. E. of France, W. of, and bordering on the Rhone. Pop. 353,752. (B.) Capital, Privas.

ARDENNES, ar'-denn',* (Lat. Arduen/na Sil/va,) a celebrated forest of France, which gives name to the dep. of Ardennes.

* In the works of some of the poets, this name is spelled *Arden*, in which case it is to be accented on the former syllable.

AR'-DRAH, a small kingdom of Africa, on the coast of Guinea.—Also, the cap. of the above. Lat. near 7° N., Lon. 2° 30' E. Pop. estimated at 20,000. (B.)

AREQUIPA, ár-à-kee/-pà, cap. of a prov. of the same name, and, after Lima, the largest and finest city of Peru, near the r. Quilca (keel/-ká), about 50 m. from the sea. It was founded by Pizarro, in 1539. The houses are built chiefly of stone; low and very substantial, with a view to resist the shock of earthquakes. Its manufactures and trade are considerable. Pop. estimated at above 30,000. (B.)

AREZZO, à-ret'/-so, (Lat. Arre'tium,) an ancient and still considerable t. of Tuscany, 40 m. S. E. of Florence. Arretium was one of the most wealthy and populous cities of ancient Etruria, and has ever since held an important place in the history of Italy. Arezzo is remarkable for having been the birth-place of many distinguished men, among others, Guido, the first restorer of modern music, and the celebrated Petrarch. Lat. 43° 28' N., Lon. 11° 52' E. Pop. 9,000. (B.)

ARGENTAN, ar'-zhân'-tân', a t. of France, in the dep. of Orne, 23 m. N. of Alençon. Lat. 48° 44' N., Lon. 0° 1' E. Pop. about 6,000. (P. C.)

ARGENTEUIL, ar'-zhân'-tuī', a t. of France, in the dep. of Seine and Oise, on the right bank of the Seine. Lat. 48° 56' N., Lon. 2° 14' E. Pop. 4,700. (P. C.)

ARGENTIÈRE, ar'-zhân'-te-air', a small t. of France, in the dep. of Ardèche, 20 m. S. W. of Privas. It derives its name from the mines of silver (argentum), wrought here in the 12th century. (M.)

ARGOON or ARGUN. See AMOOR.

ARGOSTOLI, ar-gos'/-to-le, the chief t. of Cephalonia, with the best harbour in the island, and considerable commerce. Lat. 38° 10' N., Lon. 20° 30' E. Pop. about 5,000. (B.)

ARG-YLE' (often written Argyll), a shire in the W. of Scotland, bordering on the sea. Pop. 97,371.

ARGYRO-CASTRO, ar'/-ghe-ro-cas'/-tro, (Mod. Gr. Arguro/-kaston, Turk. Ergree Kastree,) an inland t. of Albania. Lat. 40° 7' N., Lon. 20° 13' E. Pop. estimated at from 15,000 to 20,000. (P. C.)

ARICA, à-ree/-ká, a seaport t. of Peru, once a flourishing and populous place, but now a miserable village. It has suffered much from earthquakes, particularly in 1608. During the war of independence, it was entirely desolated. Present pop. not above 400. (P. C.)

ARIÈGE, à-re-aizh', a small r. of France, tributary to the Garonne.

ARIÈGE, a dep. in the S. of France, on the sources of the above r., and bordering on Spain. Pop. 260,536. (B.) Capital, Foix.

AR-KAN'-SAS or AR'-KAN-SAW', a r. of N. America; next to the Missouri, the largest affluent of the Mississippi. It rises in the Rocky Mountains, and, after a course of more than 2,000 m., flows into the Mississippi, in Lat. 33° 54' N., Lon. 91° 10' W. It is navigable almost to its source.

Area estimated at 54,500 sq. m. Pop. 209,639; of whom 162,068 are whites, 589 free coloured persons, and 46,982 slaves. Arkansas was admitted into the Union in 1836. Little Rock is the seat of government.

ARKANSAS, a co. in the E. part of Arkansas, intersected by the Arkansas r. Pop. 3,245. Co. t. Arkansas.

AR-KEE/-KO (Arkiko), a seaport on the W. coast of the Red Sea. Though a small and miserable place, it is the point through which all the maritime intercourse of Abyssinia is carried on. (P. C.) Lat. 15° 38' N., Lon. 39° 37' E.

ARLES, arlz, (Fr. pron. arl; Lat. Arela/te,) an ancient t. of France, on the left bank of the Rhone, about 50 m. W. N. W. of Marseilles. It formerly held a conspicuous place among the cities of Europe, but has fallen greatly to decay. The numerous existing ruins attest its former magnificence, and constitute its principal claims to our attention. Lat. 43° 40' N., Lon. 4° 38' E. Pop. 13,342. (M.)

ARMAGH, ar'-má', an inland co. in the N. of Ireland. Pop. in 1831, 220,651. (P. C.)

ARMAGH, a city of Ireland, and cap. of the above co. In the middle centuries it was celebrated as a place of learning, and, according to the Irish historians, had, at one time, 7,000 students at its college. At present it possesses several establishments for education, an observatory, a lunatic asylum, and a fever hospital. Armagh is the residence of an English archbishop, who is styled Primate of all Ireland. The Observatory is in 54° 21' 12" N. Lat., and 6° 38' 52" W. Lon. Pop. in 1834, 10,764. (M.)

ARMAGNAC, ár'-mân'-yák', formerly a county of Gascony, in France; now chiefly comprehended in the dep. of Gers.—Adj. and inhab. ARMAGNAC.

AR-ME/-NI-Å (Turk. Erminee/yeh), a country of Asia Minor. It is not defined by any permanent natural boundaries. In the course of its history, we find its limits exposed to continual changes. In its widest application, it may be said to embrace the country from L. Ooroomeeyeh (Ourmiah), and the junction of the rivers Koor and Aras, on the E., to the upper course of the Kizil Ermac, on the W.; and from the upper course of the rivers Tchorak and Koor, on the N., to the Taurian Mountains, in the direction of Beer, Mardeen and Nisibis, on the S. The principal productions are wheat, barley, cotton, hemp, tobacco, and manna, besides various fruits. Many of the Armenians are engaged in trade, and bear a high character for integrity in their dealings. They form the chief class of traders in the Persian empire, and are found scattered over various other parts of the world. Their religion is a species of Christianity.—Adj. and inhab. AR-ME/-NĪ-ĀN.

ARMENTIÈRES, ar'-mān'-te-air', a t. of France, in the dep. of Nord, near the Belgian frontier, on the Lys, 10 m. N. N. W. of Lille. Lat. 50° 41' N., Lon. 2° 52' E. Pop. 7,700. (M. B.)

ARM/-STRONG, a co. in the W. part of Pa., N. E. of Pittsburg, and intersected by the Alleghany r. Pop. 29,560. Co. t. Kittaning.

ARN/-HEM (supposed to be the Roman *Arenacum*), a fortified city of the Netherlands; cap. of Guelderland. It was formerly one of the Hanse towns. Lat. 52° N., Lon. 5° 52' E. Pop. about 11,000. (B.)

AR/-NO (Lat. Ar'nus), the principal river of Tuscany, rises in the Apennines, and, passing through Florence and Pisa, flows into the sea, about 5 m. W. of the latter town. Length about 150 m. It is navigable to Florence.

ARNSBERG, arns'-bērg, or ARENSBERG, a t. of the Prussian States; cap. of a circle of the same name; the largest of the three circles which form the prov. of Westphalia. Lat. 51° 24' N., Lon. 8° 1' E. Pop. 3,200. (B.)

ARNSTADT, arn'-stätt, a t. of Saxony, on the Gera, 11 m. S. of Erfurt. Lat. 50° 49' N., Lon. 10° 57' E. Pop. about 5,000. (B.)

AR-OOO/-TOOK, a co. forming the N. E. part of Maine. Pop. 12,535. Co. t. Houlton.

ARPINO, ar-pee'-no, (Anc. Arpi'num,) a city of Naples, near the confines of the kingdom, about 60 m. S. E. of Rome. It is celebrated as the birth-place of Cicero and Marius, to which circumstance it was once indebted for its preservation. In the wars between the houses of Anjou and Aragon, for the possession of the kingdom of Naples, Arpino took part with the French against the Aragonese and the Pope. The pontiff (Pius II.) generously commanded Orsini, his successful captain, to "spare Arpino for the memory of Caius Marius and Marcus Tullius." It has manufactories of parchment, leather, paper, and of the best cloth made in the kingdom. Lat. 41° 41' N., Lon. 13° 37' E. Pop. estimated at above 8,000. (B.)

AR'-RA-CAN' or ARACAN (called by the natives Rakhaing), a country of Chin-India, lying along the E. shore of the Bay of Bengal, between 17° and 21° 30' N. Lat., and 92° 20' and 94° 30' E. Lon. It formerly belonged to the Burmese empire, but in 1826 became one of the possessions of the East India Company. Its extreme length, from N. N. W. to S. S. E., is, perhaps, 230 m., and its average breadth about 50 m. (P. C.)

ARRACAN, the ancient cap. of the above prov., on a small river of the same name. It was once a flourishing and populous city, so that the

number of its inhabitants was estimated at above 100,000, but at present it does not probably amount to a third of that number. (B.) Lat. 20° 43' N., Lon. 93° 25' E.

AR/-RAN, a mountainous and romantic i. on the W. coast of Scotland, forming a part of Buteshire. It is more than 20 m. long, and about 1½ wide. Pop. 6,241.

AR/-RAS (Fr. pron. âr'-ràs'), a fortified and important t. of France; formerly the cap. of Artois, and now of the dep. of Pas de Calais, on the S. bank of the river Scarpe, which begins here to be navigable, 108 m. N. by E. of Paris. It was the cap. of the ancient Atreba/tes, from which it derives its name, and was a manufacturing t. in the time of St. Jerome, about the beginning of the 5th century. Robespierre was a native of Arras. Lat. 50° 17' N., Lon. 2° 46' E. Pop. 23,485. (B.)

ARROE. See ÆRÖE.

AR/-TA (Anc. Ambra/cia, Turk. Nar'-dâ), a t. of Albania, on a river of the same name. It was a few years since a flourishing place, with a population estimated at above 9,000, (B.); but it suffered greatly in the struggle for Grecian freedom. Lat. 39° 13' N., Lon. 21° 4' E.

ARTOIS, ar'-twâ', a former prov. of France, now comprehended in the dep. of Pas de Calais. It takes its name from the Atreba/tes, a nation of the ancient Gauls, who inhabited this region, and from whose name ARRAS is also derived.

ARUNDEL, âr'-un-del, a t. of England, on the Arun, in the co. of Sussex, 50 m. S. S. W. of London. Lat. 50° 51' N., Lon. 0° 33' W. Pop. 2,624.

ASAPH (az'-af) ST., an ancient city of Wales, in Flintshire, about 5 m. from the sea. Pop. of the parish, 3,338.

ASCENSION, as-sen/-shun, an i. in the S. Atlantic, between Africa and Brazil. It is 7½ m. long, and 6 m. wide. It owes its name to the circumstance of its having been discovered on Ascension-day, in 1501. It was then barren and entirely uninhabited by men. In 1815 the British took possession of the island, as a military station, and established a garrison there. Lat. of the fort, 7° 56' N., Lon. 14° 24' W.

ASCENSION, a parish in the central part of Louisiana, lying on both sides of the Mississippi. Pop. 10,752. Seat of justice, Donaldsonville.

ASCH-Ä/-FEN-BURG' or â-shâf/-fên-böörġ', a principality of Germany, now belonging to Bavaria.—Also, a t. in the above principality, 25 m. S. E. of Frankfurt. Lat. 50° 1' N., Lon. 9° 7' E. Pop. about 7,000. (B.)

Europeans respecting the internal geography of this country; along the coast, it is considered as extending from the r. Volta, or Aswada, which separates it from Dahomey on the E., to the r. Assinee on the W. But its actual extent, including the tributary kingdoms, appears to be somewhat greater. The Ashantees are a brave, and, to a considerable degree, may be regarded as a civilized people. Their military enterprises have been attended with the most wonderful success; and a multitude of different states, amounting to near fifty, according to one writer, have been either incorporated into the empire or reduced to the condition of tributaries. Even the English, on the coast, were at one time compelled to purchase, with liberal presents, the peace of this warlike and powerful nation.—The Ashantees have schools, where the pupils are taught to read and write Arabic, and appear also to possess some skill in sculpture and other arts. They manufacture cloths of cotton, and sometimes of cotton and silk interwoven. Many of these cloths are of great fineness of texture, and their colour of the highest brilliancy. They also make earthenware, tan leather, and work in iron. The pop. of the empire of the Ashantees is estimated by Balbi at 3,000,000. The capital is Coomassie.

ASHE, a co. forming the N. W. extremity of N. C. Pop. 8,777. Co. t. Jeffersonson.

ASHTABULA, ash'-tā-bu/-la, a co. forming the N. E. extremity of Ohio, bordering on Lake Erie. Pop. 28,766. Co. t. Jefferson.

ASH'-TON-UNDER-LYNE, a manufacturing t. of Eng. in Lancashire, 6½ m. E. of Manchester. It is a well built and rapidly increasing town. The pop. in 1831 exceeded that in 1821 by more than 5,000, and the last census gives 7,841 more than that of 1831. This great increase is attributed, in part, to the employment of labourers on the Sheffield and Manchester railroad. Present pop. 22,678.

ASIA, ā/-she-a, one of the five grand divisions of the globe, bounded on the N. by the Black Sea and the Frozen Ocean, E. by the Pacific, S. by the Indian Ocean, W. by the Red Sea, the Mediterranean, the Archipelago, the Sea of Marmora, the Black Sea, the river Ural, the Ural Mountains, and lastly, by the river and sea of Kara. The most northern point of this continent is Northeast Cape, near 78° N. Lat., and 104° E. Lon.: the most southern is formed by the extremity of the Malay Peninsula, which extends to about 1° 20' N. Lat. Cape Baba, in Asia Minor, in Lat. about 39° 30' N., Lon. 26° 5' E., forms its western, and East Cape, in 66° 5' N. Lat. and Lon. 169° 40' W., its eastern extremity. The extreme length of this continent, from the Isthmus of Suez to Behring's Strait, is above 7,000 m.; the greatest breadth, from N. to S., about 5,300. The area is estimated by Hassel, at about 16,700,000 sq. m. Pop. estimated by Balbi, at above 525,000,000.—Adj. ASIATIC, a'-she-at/-ik, and ASIAN, a/-she-an (poetical). Inhab. ASIATIC.

AS-SWÂN/ (Assuan or Assouan), a small t. of Upper Egypt, on the right bank of the Nile, remarkable for its commerce, its picturesque situation, and the monuments of antiquity which are found in its neighbourhood. Close to it, on the south, may be seen the ruins of the town built by the Arabs, on the site of the ancient Syene. Lat. 24° 5' N., Lon. 32° 55' E.—Adj. and inhab. AS-SWÂN/-EE.

ASTERABAD, âs'-ter-â-bâd/, or Astrabad, a small prov. in the N. E. part of Persia.—Also the cap. of above. Lat. 36° 50' N., Lon. 54° 35' E. Pop. estimated at 40,000. (B.)

ASTI, âs/-te, (Lat. Ast/a,) a t. of Piedmont, cap. of a prov. of the same name on the N. bank of the Tanaro, on the high road from Turin to Alexandria. This place has been distinguished both in ancient and modern history, and is remarkable as being the birth-place of the great Italian poet, Alfieri. Lat. 44° 57' N., Lon. 8° 12' E. Pop. 22,000. (P. C.)

ASTORGA, âs-tor/-gâ, (the Astu/rica Augus/ta of the Romans,) a t. of Spain, in Leon. It was once the capital of Astu/res, and is called by Pliny a magnificent city. It contains some interesting remains of antiquity. Lat. 42° 27' N., Lon. 6° 10' W. Pop. 4,000. (M.)

AS-TO/-RĪ-Ā, a settlement at the mouth of the Columbia r., made by the American Fur Company, so called from Mr. Astor, of New York. Lat. 46° 14' N., Lon. near 126° W.

AS'-TRĀ-KĪĀN/, (Russ. pron. âs-trâ-kân/), a t. of Russia, in Europe, cap. of a prov. of the same name, on an island formed by the Volga at its entrance into the Caspian Sea. It has a fine citadel, called *Krem*, or Kremlin, and numerous churches, with steeples and minarets; but the houses are generally of a mean appearance, and built of wood; the streets unpaved, irregular and dirty. Astrakhan is remarkable for its manufactures as well as its commerce; its harbour is the most frequented of any on the Caspian. It is the seat both of an Armenian and Russian archbishopric. Lat. 46° 21' N., Lon. 48° 3' E. Permanent pop. about 40,000. (P. C.)—Adj. and inhab. AS'-TRĀ-KĪĀN-EËE/.

ATACAMA, ăt-ă-că'-mă, a district of S. America, belonging to Bolivia, and comprehending all the country of that republic which lies between the Andes and the Pacific Ocean. It is bounded on the N. by the r. Loa, between 21° and 22° S. Lat., and on the S. by the Salado, near 26° S. Lat.; so that it extends along the coast perhaps 250 m., while its breadth is from 25 to 40 m. It is divided into the Upper and Lower country. The latter is in almost every part an uninhabited desert. No rain ever falls on this coast, but in some places the soil is occasionally refreshed by mists and dews. (P. C.)

ATCHAFALAYA, ach-af-a-li'-a, (an Indian word, signifying "lost water,") a large bayou in La., which detaches itself from the right bank of the Red r., near its confluence with the Mississippi; and, after receiving the waters of L. Chetimaches and the r. Plaquemines, flows into Atchafalaya Bay. Its whole course is about 200 m.

ATCH-EEN', or ACHEEN, a kingdom on the N. W. part of the island of Sumatra. Also, the chief city of the above kingdom. Lat. 5° 36' N., Lon. about 95° 20' E. It contains about 8,000 houses, built chiefly of bamboo. (B.)—Adj. and inhab. ATCH-IN-ESE'.

AT'-FE', sometimes written ATFIH, (Anc. Aphroditop'olis, or "city of Venus,") a town of Egypt, on the right side of the Nile, 45 m. S. of Cairo. Lat. 29° 28' N., Lon. 31° 28' E. Pop. about 4,000. (B.)

ATH or AATH, ăt, a commercial t. of Belgium, in the prov. of Hainault, on the Dender, 32 m. W. S. W. of Brussels. Lat. 50° 42' N., Lon. 3° 46' E. Pop. 8,000. (B.)

ATH-Ā-PES'-cōw or ATHABASCA, the name of a river and lake in the N. W. part of N. America. The river rises near the Rocky Mountains, and flowing, for the most part, in a northerly direction, falls into the lake of the same name, by several channels.

ATHAPESCOW LAKE, also called the Lake of the Hills, is situated about 170 m. S. E. of the great Slave Lake; it is nearly 200 m. long, but its average width is not more than 20 m. Fort Chipewyan, at the W. S. W. extremity of the lake, is in Lat. 58° 42' N., Lon. 111° 18' W.

ATH-BOY', a t. of Ireland, in Meath, 30 m. N. W. of Dublin.

ATH'-ENS, (Lat. Athe'næ, Gr. Αθηναί,) a celebrated city of Greece, the capital of ancient Attica, founded, according to common account, by Cecrops, about 1550 B. C. It is situated about 5 m. from the sea-coast; the little river Ilissus flows near the city, on the S. E., and the Cephissus on the N. W.—Passing over the well-known epoch in which Athens was the most powerful and most illustrious of all the Grecian states, we shall briefly mention that it was captured by the Romans under Sylla (86 B. C.). This was the first time the fortifications of Athens had been forced by an enemy. After remaining several centuries in a state of inglorious repose, it shared the fate of the rest of the empire, in being ravaged and plundered by the barbarians. Soon after the fall of Constantinople, in 1453, it was completely incorporated with the Turkish dominions; in which condition it remained till the late

ŕate, fâr, fáll, fât; mê, mêt; pine or pîne, pîn; nõ, nõt; ðð, as in *gool*,

successful struggle for Grecian freedom. Notwithstanding all the vicissitudes which Athens has undergone, there still remain ample monuments to attest its former grandeur. The ruins of the temple of Theseus, the arch of Hadrian, and the buildings of the Acropolis, especially the Parthenon, may be mentioned as among the most remarkable. The walls of this once magnificent city are entirely demolished, but their foundations have been traced, by late travellers, under the shrubs which cover the plains. Athens is situated in Lat. 37° 58' N., Lon. 23° 46' E. The pop., before the late insurrection which threw off the Turkish yoke, was estimated from 12,000 to 15,000, but, at the termination of the war, did not probably amount to a third of the number. (B.) In 1834, it was declared the capital of the new kingdom of Greece, and it seems likely to recover, in time, some share of its former importance. P. 1845 27,800. Adj. and inhab. ATH-E/-NĀ-AN.

ATHENS, a t. of Ga., in Clark co., on the Oconee, 92 m. W. N. W. of Augusta: it is the seat of the University of Georgia. Pop. 3,795.

ATHENS, a co. in the S. E. part of Ohio. Pop. 18,215.

ATHENS, a small t. of Ohio, cap. of the above co., with a college called the University of Ohio, founded in 1821.

ATHENS, NEW, a small place in Ohio, 18 m. N. W. of Wheeling: it is the seat of Franklin College.

of Teramo, about 4 m. from the coast of the Adriatic, and 12 m. S. E. of Teramo. Hatria was once a place of considerable importance, but the present town is a small and poor place, and partly in ruins.

AT/-TA-LA, a co. in the central part of Miss. Pop. 10,999. Co. seat, Kosciusco.

ATTIGNY, ât'-teen'-ye', a small t. of France, in the dep. of Ardennes, on the Aisne, 31 m. N. E. of Rheims, anciently one of the summer residences of the kings of France.

AT'-TOCK', or ATTOCK BENARES (ben-â/-rez), a city and fortress on the E. bank of the Sinde or Indus, belonging to Lahore. Lat. 33° 52' N., Lon. 72° 10' E.

ATUI, â-too-i', one of the Sandwich islands, in Lat. 21° 57' N., Lon. 160° W.

AUBE, ôbe, a small r. of France, flowing into the Seine.

AUBE, a dep. in the N. E. central part of France, intersected by the above r. and by the Seine. Pop. 253,870. (B.) Capital, Troyes.

AU/-BURN, the chief t. of Cayuga co., N. Y., about 170 m. W. of Albany, on the outlet of the Owasco lake, a fine stream, with numerous mill seats. It is incorporated, and contains a theological seminary, founded by the Presbyterians in 1821. It is chiefly remarkable for the state prison established here, and conducted on a peculiar system of prison discipline. Pop. 9,548.

AUBUSSON, ô'-bûs'-sôn', a manufacturing t. of France, in the dep. of Creuse, on the r. Creuse, 23 m. S.E. of Guéret. Pop. above 4,000. (P.C.)

AUCH, ôsh, an archiepiscopal t. of France; cap. of the dep. of Gers, on the r. Gers. Among its buildings the ancient cathedral deserves to be mentioned. Lat. 43° 38' N., Lon. 35' E. Pop. 10,461. (B.)

AUDE, ôde, (Anc. A/tax,) a r. in the S. of France, rising in the Pyrenees, and flowing into the Mediterranean.

AUDE, a dep. in the S. of France, intersected by the above r., and bordering on the Mediterranean. Pop. 281,088. (B.) Capital, Carcassone.

AUERBACK, ou/-er-bâk, a t. of Saxony, 70 m. W. S. W. of Dresden, famous for its manufacture of a metallic composition, called *Rodewisch*, which employs about 2,500 persons from the neighbouring villages. Pop. 3,000. (B.)

AUGS'-BURG (Ger. pron. ougs/-böörg), the cap. of the circle of the Upper Danube, in Bavaria, at the confluence of the Wertach and Lech. It has numerous scientific and literary institutions, and is distinguished for its works in gold and jewelry, its manufactures of clocks and watches, and of philosophical and mathematical instruments. Lat. 48° 21' N., Lon. 10° 54' E. Pop. 34,000. (B.) The Roman emperor Augustus planted a colony here about 12 years before the Christian era, which was called Augus'ta Vindelico'rum. Augsburg appears to be a contraction of *August-burg*; *i. e.* the "castle of Augustus."

AUGUSTA, a t. of Ky.; cap. of Brecken co. It has a college, under the direction of the Methodists, founded in 1825.

AUGUSTA, a co. in the centre of Virginia. Pop. 24,610. Co. t. Staunton.

AUGUSTINE, St., sent au'-gus-teen', a city and port of entry of Florida; cap. of St. John's co., on an inlet about 2 m. from the main ocean. The harbour is defended by a fort. This place is much resorted to during winter, by invalids from the northern states. Lat. 29° 48' 30" N., Lon. 81° 35' W. Pop. 1,934.

AURUNGABAD, õ-rung'-gã-båd', a prov. of Hindostan, situated in the Dekkan.—Also, the cap. of the above, formerly called Gurka, but, becoming a favourite residence of Aurungzebe (pronounced õ-rung-zeeb'), it received from this circumstance its present name. The palace of that monarch, now in ruins, covers an extensive space. The whole city is rapidly falling to decay, but in 1825 was said still to contain a population of 60,000. (P. C.) Lat. 19° 54' N., Lon. 75° 33' E.

AUS'-TER-LITZ' (Ger. pron. ous'-ter-lits), a t. of Austria, in Moravia, about 13 m. E. of Brünn, celebrated for a great victory obtained by Napoleon over the emperors of Austria and Russia, in 1805. Pop. about 2,000. (B.)

AUSTRALASIA. See OCEANICA.

AUS-TRA'-LI-Å. (See Int. XI.) A term sometimes employed like AUSTRALASIA, to designate the fifth grand division of the globe, but more generally restricted to that portion of Oceanica which is situated immediately S. and S. E. of Malaisia, between 1° N. 55° S. Lat., and 110° and 180° E. Lon., including New Holland, (the Australian continent,) the islands of New Zealand, New Caledonia, New Hebrides, the Solomon Islands, New Britain, New Ireland, Papua or New Guinea, besides many smaller islands.—Adj. AUS-TRA'-LI-ÅN.

AUSTRALIAN CONTINENT, or NEW HOLLAND, is situated in the South Sea, between 10°30' and 39° S. Lat. and 113° and 153° 20' E. Lon. Length from E. to W. about 2400 miles, greatest breadth from N. to S., near 2000 miles. Area estimated at 3,500,000 sq. miles. The form of this continent is very compact, having only two large indentations, the Gulf of Carpentaria on the N. and Spencer's Gulf on the S. It is distinguished from all other parts of the globe by the general character of its plants and animals, as well as the nature of the country. Perhaps the most remarkable feature of this "land of anomalies" is the absence of permanently navigable rivers. The Murray, which, with its affluents, drains a surface of 400,000 square miles, discharges its waters into the sea by a mouth so miserably small that it was overlooked by the first explorers of the coast.

The central regions of Australia are entirely unknown, and the

ou, as in *our*; th, as in *thin*; TH, as in *this*; N, nearly like *ng*.

coasts have been only partially explored, except the eastern, on which the first settlement was made. There are mountains whose summits are covered with perpetual snow; but a large portion of the country appears to be flat land, which is sometimes marshy and flooded with water, and at other times so parched as to be a perfect desert. A chain of mountains extends nearly parallel with the eastern coast, at a distance which varies from 50 to 80 miles. Different parts of this range have received the names of the Warragong and the Blue Mountains. The most fertile soil is confined to the higher regions, which are separated from each other by extensive sandy deserts.

Lying to the south of the equator, its seasons are the reverse of ours. One-third lies within the torrid and two-thirds in the temperate zone. The climate of the latter is subject to great vicissitudes of temperature and moisture. A year of complete drought is sometimes followed by a year of floods; but here the hot is generally the dry season—a circumstance favourable to health. The heat of December rises to 112° Fahrenheit, and the forests and grass have been known to take fire spontaneously. (M. B.)

The aboriginal inhabitants are classed in the same grand division of the human race with the African negro, but appear to be decidedly inferior, both in their physical constitution and in their intellectual and moral faculties. They are the only people of whom we have any knowledge that go completely naked.

Of 5440 species of plants which have been discovered, only 270 are indigenous in the other divisions of the globe. The forests consist entirely of evergreens, and ferns and grasses in some cases attain the size of trees. A species of acacia which bears no leaves is very numerous, and gives a singular aspect to the forests. They also contain the cedar, rosewood, and a kind of mahogany, (*Eucalyptus*.) The palms are not very abundant, and are confined to the intertropical regions. There is a remarkable deficiency of useful native fruits and alimentary plants. Animal life in Australia assumes a form still more anomalous than that which marks its vegetation. Among 58 species of quadrupeds which exist here, 46 are peculiar to this continent; and 33 of these belong to the order of Marsupials, including the kangaroo, which is the largest animal of the country. The singular *Ornithorhynchus paradoxus*, is found only here, an oviparous quadruped which is covered with fur, but has webbed feet and a bill like a duck. The dogs, it is said, never bark, and the swans are entirely black.

The mineral resources of Australia are extremely great. Immense coal-fields occur in the Blue Mountains, and on the eastern coast, and copper is found in abundance. In May, 1851, a gold mine, which is said to rival those of California in richness, was discovered near the Macquarrie river. The locality is in a hilly and barren region, 33 m. W. from Bathurst, and 148. m. from Sidney. Before the end of the year, another rich deposit was found, 40 or 50 miles from the town of Geelong, on the southern coast. These discoveries, of course,

Fâte, fâr, fáll, fât; mĕ, mĕt; plne, or pĭne, pĭn; nò, nòt; ðð as in *good*;

produced a prodigious excitement in the colony. Before five months had elapsed, 10,000 persons had collected at this "Ophir of the Antipodes," and hundreds were arriving daily. The ships in the ports were deserted by their crews, and ordinary business was paralysed.

The Australian journals estimate that the increase of population in 1852, will not be less than 100,000, which will raise that of the continent to half a million. See **NEW SOUTH WALES**.

AUS'-TRI-A (Ger. Oestreich, òst/-rĭke), an empire of Europe, lying between 42° and 51° N. Lat., and 8° 30' and 26° 50' E. Lon.; bounded on the N. W. and N. by Saxony and Prussia, N. E. and E. by the republic of Cracow and by the Russian and Turkish provinces, S. by Turkey, the Gulf of Venice, the territories of the Pope, Modena, and Parma, and W. by the Sardinian States, Switzerland, and Germany. The length is estimated at 870, the breadth at 690 m. The superficial extent, according to Balbi, is about 259,300 sq. m. The pop. in 1848 amounted to 37,850,000. The empire of Austria is composed of the kingdoms of Bohemia, Galicia, Hungary, Illyria, Croatia, Slavonia, and Dalmatia, and the governments of Lower and Upper Austria, Styria, Trieste, Tyrol, Transylvania, the Military Frontier, and Austrian Italy, or the Lombardo-Venetian kingdom, besides some smaller districts, such as Great and Little Cumania, &c. This will be treated of under their respective heads. The name *Oestreich*, which signifies "eastern empire," arose from this territory having been the eastern part of the dominions of Charlemagne. The area of Austria at that time scarcely exceeded that of the present archduchy. Vienna is the capital.—Adj. and inhab. **AUS'-TRI-AN**.

AUSTRIA, ARCHDUCHY OF, which constitutes the principal part of the hereditary dominions of the house of Austria, is bounded on the N. by Bohemia and Moravia, E. by Hungary, S. by Styria, Illyria, and Tyrol, and W. by Tyrol and Bavaria. Area about 14,881 sq. m. It is divided into Lower and Upper Austria. The former occupies the eastern, the latter the western portion of the archduchy.

AVIGNON, av-eeen'-yôn, or â'-veen'-yôn', (Anc. Ave'nio,) a celebrated city of France; cap. of the dep. of Vaucluse, on the left bank of the Rhone, just above the mouth of the r. Durance. Avenio was a very ancient city; it appears to have been a town of some importance before the Roman conquest, and holds a conspicuous place in the history of the middle ages. About the year 1308, Pope Clement V., himself a native of France, removed his court from Rome to Avignon, which continued to be the papal residence till 1376, when Gregory XI. left it, to return to Rome. It afterwards became the residence of the anti-popes Clement VII. and Benedict XIII. Lat. 43° 57' N., Lon. 4° 48' E. Pop. 31,000: in the 14th century it amounted to 100,000. (B.)

AZ/-OF or **AZOV**, (Anc. *Pa/lus Mæo'tis*), a sea of Russia, forming a part of the boundary between Europe and Asia, and connected with the Black Sea by the Strait of Yenicalë. Its greatest length is about 200 m.; the breadth varies exceedingly, but perhaps, on an average, may be estimated at about 70 m. The only considerable river which it receives is the Don.

AZORES, *az/-örz,** or *az-örz'*, (Port. *Açores*, *â-so/-rê's*), called also the Western Islands, are situated in the Atlantic, about 800 m. W. of Portugal. They consist of nine islands, in three distinct groups, lying in the direction of W. N. W. and E. S. E., and extending about 330 m. The north-western group contains the small islands of Corvo and Flores; the central, Terceira, St. George, Pico, Fayal, and Graciosa the south-eastern, St. Michael and St. Mary. They are included between the parallels of 36° 57' and 40° N. Lat., and the meridians of 25° and 31° 15' W. Lon. The several islands will be treated of under their respective names. As these islands, when first discovered by the Portuguese, were entirely destitute of human inhabitants, as well as of beasts, they called them *Açores* (the plural of *açor*, a hawk or bird of prey), from the number of this kind of birds found here.—Adj. and inhab. **AZ-O/-RĀ-ĀN**.

BA/-BEL-MAN/-DEL, (see Int. XII.,) or, more correctly, **BAB-EL-MAN-DEB**, the strait which connects the Red Sea with the Indian Ocean, lying between Arabia and Abyssinia. The width of this strait is estimated at about 16 m.

BAD-AG/-RY, a t. on the Slave Coast of Guinea, cap. of a small kingdom of the same name, about 6° 15' N. Lat., and 2° 50' E. Lon. Pop. estimated at 10,000. (P. C.)

BADAJOS, *bâd-a-hoce'*, (Sp. Badajoz, *bâ-dâ-hôth'*; Lat. *Pax August/ta*), a fortified t. of Spain, cap. of Estremadura, on the Guadiana. The bridge over the Guadiana, 1,874 feet in length, is one of the finest in Europe. Lat 38° 52' N., Lon. 6° 48' W. Pop. 13,000. (B.)

* This accentuation, though perhaps not the most prevalent, is sanctioned by the general tendency of our language, (see Int. XII., Obs. 2.) as well as by the practice of many of the best speakers. The second pronunciation may be objected to as being neither native nor English. If we would pronounce like the natives we must follow the example of Milton, and divide the name into three syllables (See *Paradise Lost*, Book IV., line 592.) The authority of Cowper is in favour of the first pronunciation.

tic Turkey, formerly the capital of the empire of the Caliphs, and now of a pashalic of its own name, situated on both sides of the Tigris, about 200 m. in a direct line above the junction of that river with the Euphrates. It stands in a forest of date trees, and is surrounded by a high and thick wall of brick and mud, which is flanked at regular distances with round embattled towers. The whole wall of the city is about five miles in circumference. The citadel is on the E. bank of the Tigris and on the N. side of the town. Bagdad was formerly a great emporium of eastern commerce; besides the traffic with its own manufactures, it was the entrepôt for the commodities of eastern and western Asia. But its trade has recently much declined. This city was founded by the Caliph Aboo Jafer al Mansoor, in the year 763, and was afterwards greatly improved by the celebrated Haroon-er-Rasheed (Harun al Raschid). Little, however, of its ancient magnificence now remains. Though, to the approaching stranger, its numerous minarets and domes, seen by glimpses through the date trees, present an interesting and even imposing spectacle, the meanness of the buildings within, miserably disappoints the expectation which the exterior view may have raised. Lat. 33° 19' N., Lon. 44° 25' E. Pop. estimated at about 100,000. (B.)

BAGNÈRES DE BIGORRE, bân`-yair/d'be`-gor/, (Lat. Vi/cus Aquen/sis,) a t. of France, in the dep. of Upper Pyrenees, celebrated for its warm springs and great bathing establishment: 16,000 strangers are said to visit this place annually. Lat. 43° 3' N., Lon. 0° 8' E. Pop. 5,633. (P. C.)

BAGNÈRES DE LUCHON, bân`-yair/d'lü`-shôn/, (the A/quæ Convena/rum of the Romans,) a bathing t. of France, in the dep. of Upper Garonne. Lat. 42° 47' N., Lon. 0° 34' E. This is a small, but constantly improving place. Pop. in 1826, near 2,000. (P. C.)

BAGNOLS, bân`-yole/, a t. of France, in the dep. of Gard, 26 m. N.N.E. of Nîmes. Lat. 44° 9' N., Lon. 4° 35' E. Pop. in 1832, 3,800. (P. C.) —Also a t. in the dep. of Lozère, remarkable for its warm mineral waters. Lat. 44° 30' N., Lon. 3° 38' E.

BIRKET-EL-KEROON, more properly **BIRKET-EL-KOORN**, bēēr/-ket-el-koorn/ (*i. e.* the "lake of the horn," so named from its peculiar shape); a considerable lake of Middle Egypt, bounding the prov. of Faïoom on the N. W., and situated between 29° 35' and 29° 15' N. Lat., and 30° 10' and 30° 40' E. Lon. Its length, following the curve, is rather more than 30 m.; its greatest breadth, 6 or 7 m. It is the Lake Mæris of the ancients.

BIRKET-EL-MARIOOT, bēēr/-ket-el-mâ-re-oot/, (the Lake Mareo/tis of the ancients,) a lake in the N. E. part of Lower Egypt, S. E. of Alexandria. It had become entirely dry within the last three centuries, but as the bottom is several feet below the level of the sea, the English, in 1801, in order to circumscribe the operations of the French, cut across the narrow isthmus which separated the basin from the lake of Abookeer (Aboukir), when the sea-water flowed in, and covered an extent of 30 m. in length, and 15 in breadth. This isthmus has since been restored by Mehemet Ali.

BIR/-MA, **BURMA**, or **BRAH/-MA**, called also the kingdom of Ava, an empire of Chin-India, in the S. E. of Asia. Its exact boundaries on the N. and E. are not known. On the S. it extends about 240 m. along the gulf of Martaban; the country of Arracan bounds it on the W. The Birman empire consists of Birma proper, Pegoo, Martaban, and the Birman Lao. The climate is said not to exhibit the extremes of heat and cold which are found in India, and is supposed, therefore, to be more healthy to the European constitution. It varies, however, greatly in different parts of the country. The soil produces almost every kind of grain and vegetables, as well as the different tropical fruits; the pine apple is said to grow here spontaneously. The Birmans are much less civilized than the Hindoos. In religion they are Boodhists; neither Mahometanism nor Christianity has made any progress among them. The government is an absolute despotism, their sovereign being the lord of the life and property of all his subjects.—Adj. and inhab. **BIR/MAÑ** and **BIR-MESE'**, or **BURMESE**.

BIR/-MING-HAM, a large t. of England, in Warwickshire, 98 m. N. W. of London. It has increased astonishingly within a century, and has become the principal hardware manufacturing town of G. Britain. By means of canals and railways it is connected with all the more important places of the kingdom, and thus enjoys every facility for trade, and is enabled to distribute the productions of its industry to all parts of the globe. Lat. 52° 29' N., Lon. 1° 52' W. Pop. 182,922.

ou, as in *our*; th, as in *thin*; TH, as in *this*; N, nearly like *ng*.

BIRR or **PAR'-SONS-TOWN'**, a t. of Ireland, in Kings co. Lat. 53° 7' N. Lon. 7° 51' W. Pop. in 1831, 6,594. (P. C.)

BIS'-CAY, (Sp. Biscaya, bis-ki'-ã or Viscaya,) a small prov. in the N. of Spain, lying on the Bay of Biscay. Adj. and inhab. **BIS-CAY'-AN**.

BISCAY, BAY OF, is that portion of the Atlantic Ocean which washes the northern coasts of Spain, and divides them from the western coasts of France.

BLACK MOUNTAIN, near the N. W. extremity of N. C., remarkable as being the most elevated point of the Appalachian system, and the highest mountain-summit in the United States, E. of the Rocky Mountains. Height, 6,476 ft. Lat. about 36° 10' N., Lon. 81° 40' W.

BLACK RIVER, a r. in the northern part of N. Y., which flows into L. Ontario, near Sackett's Harbour. Its whole length is about 120 m.

BLACK ROCK, a village of Erie co., N. Y., on Lake Erie, at the commencement of the Niagara r., 2 m. from Buffalo.

BLACK SEA,* called also the *Eu-xine*, (Anc. Pontus Euxi/nus; Turk. Ká/-rà Deng/-is,) lies between 40° 50' and 46° 40' N. Lat., and 27° 20' and 41° 50' E. Lon., and divides the southern provinces of European Russia from Natolia. It communicates with the Mediterranean by the Bosphorus, the Sea of Marmora, and the Hellespont. Throughout its whole extent there is but one small island. This is uninhabited, and lies in 45° 15' N. Lat., at a considerable distance from the western shore. The waters of this sea are much less saline than those of the ocean. Their specific gravity, compared with that of fresh water, is 1142 to 1000. The water of the Atlantic is 1288. This difference is probably owing to the great quantity of fresh water which the numerous rivers pour into the Euxine from the surrounding country. The waters of the Baltic, however, are considerably less saline than those of the Black Sea, their specific gravity being not above 1042. (P. C.)

BLACK WARRIOR, a r. of Alabama, which flows into the Tombigbee. It is navigable for steamboats to Tuscaloosa, nearly 500 m. by water, from Mobile.

BLACK'-FORD, a co. in the E. N. E. part of Ind., a little S. E. of the Wabash and Erie canal. Pop. 2,860.

BLA'-DEN, a co. in the S. E. part of N. C., intersected by the Cape Fear r. Pop. 9,767. Co. t. Elizabethtown.

BLANC, MOUNT, (Fr. Mont Blanc, mòn blân, *i. e.* "white mountain,")

* The name *Black Sea* is said to have been given by the Turks, who, being accustomed only to the navigation of the Archipelago, where the numerous islands and their convenient ports, offered many places of refuge in case of danger, found the traversing such an open expanse of water very perilous, and accordingly expressed their fears by the epithet "*black*" (*kara*). Partly on the same account, and partly because the shores of this sea were occupied by barbarous nations, the ancient Greeks first called it *αξενος*, (*axenos*.) *i. e.* "inhospitable;" but afterwards, when they had become better acquainted with the art of navigation, and had established numerous colonies on the shores, they changed the name to *εὐξενος* or *εὐξεινος*, (*euxenos* or *euxeinos*.) *i. e.* "hospitable."

BOGOTA or **SANTA FE DE BOGOTA**, sãn'-tã fá dà bo-go-tã', an archiepiscopal t. of S. America, formerly the cap. of the Spanish vice-royalty of N. Granada, at present the metropolis of the republic of this name, situated 9 or 10 m. distant from the small r. of Bogota, at the foot of two lofty mountains, at an elevation of about 8,640 feet above the level of the sea. It was founded by Quesade, in 1538. Like many other towns built by the Spaniards in America, Bogota presents the figure of a cross, of which the principal square and church form the centre. As this place is subject to frequent earthquakes, most of the houses consist of one or two stories only. Bogota has three colleges; and twenty-six churches, the interior of which is resplendent with gold. It also contains nine monasteries, and three nunneries. Lat. $4^{\circ} 36' N.$, Lon. $74^{\circ} 13' W.$ Pop. estimated at 40,000. (B.)

BO-HE/-MĪ-Ā (Ger. Böhmen, bö'-mĕn, or Böhheim, bö'-hĭme), derives its name from the ancient Boii, who occupied the country about the sources of the Elbe and Moldau. It now constitutes a kingdom belonging to the empire of Austria, comprising Bohemia Proper, the margraviate of Moravia, and a small portion of Upper Silesia. Bohemia Proper occupies an irregular quadrangle in the S. E. of Germany, between $48^{\circ} 33'$ and $51^{\circ} 5' N.$ Lat., and 12° and $16^{\circ} 46' E.$ Lon., and is bounded on the N. W. and N. by Saxony, N. E. by Prussian Silesia, S. E. and S. by Moravia and Austria, and S. W. by Bavaria. It contains about 20,000 sq. m. Pop. about 3,932,000. (P. C.)—Adj. and inhab. **BO-HE/-MĪ-ĀN.**

BOIS-LE-DUC, bwã'-lĕh-dük', a fortified manufacturing t. of Holland; cap. of North Brabant. Lat. $51^{\circ} 42' N.$, Lon. $5^{\circ} 16' E.$ Pop. estimated at 13,000. (B.)

BOKHARA, bo-kã'-rã, or **BU-KHA'-RĪ-Ā**, (Anc. Sogdia/na and Transoxia/na,) called, also, **USBEKHISTAN**, ooz-bek'-is-tãn', a country in Central Asia, between 36° and $42^{\circ} N.$ Lat., and 62° and $72^{\circ} E.$ Lon. It is bounded on the N. by an extensive desert called Kizil Koom, and on the S. by Budukhshan and Afghanistan. The climate of Bokhara is regular and constant, and the soil produces a great variety of vegetables and fruits proper to the temperate latitudes. Area estimated at 90,000 sq. m. Pop. 2,500,000. (B.) The prevailing languages are the Persian and Turkish. The former is spoken by the better educated generally. The government is despotic, but, as it is regulated on the laws of the Koran, the authority of the sovereign, in some measure, is controlled by the priests and lawyers. The khan of Bokhara is the most powerful of the princes of Toorkistan, and maintains a standing army of about 25,000 men, of which not more than 4,000 are infantry.—Adj. and inhab. **BOKHARIAN**, bo-kã'-re-ãn, and **BU-KHA'-RĪ-ĀN**; also **BOKHARESE**, bo'-kã-rešĕ'. (M.)

BO-LIV'-I-Å, or bo-lee'-ve-å, a republic of S. America, situated between about 10° and $25^{\circ} 40' S.$ Lat., and 57° and $70^{\circ} 44' W.$ Lon., bounded on the N. E. and E. by Brazil and Paraguay, S. by Buenos Ayres and Chili, W. and N. W. by the Pacific and by Peru. Length about 1,100 m.; greatest breadth, 800 m. Area estimated at about 400,000 sq. m. No recent census of Bolivia having been taken, the pop. is variously estimated from 630,000 to 1,300,000. Balbi gives the latter number. This republic dates from the battle of Ayacucho (i-yå-koo'-cho), 1824, in which the patriots, under Sucre, completely defeated the royalists. The new republic was named Bolivia, in honour of General Bolivar. The seat of government is Chuquisaca, formerly called La Plata.—Adj. and inhab. BO-LIV'-I-ÅN.

BOLOGNA, bo-lone'-yå, (Lat. Bono'nia,) a city of Italy, in the Papal State, next to Rome in population and importance, 26 m. S. S. W. of Ferrara, with which it is connected by a canal (Naviglio, nå-veel'-yo), navigable for large boats. From Ferrara, by means of the Po, Adige, and intermediate canals, the water communication extends to Venice. This town is one of great antiquity. It was the principal city of the Etruscans north of the Appenines, and was then called Felsina. Afterwards the Romans changed its name to Bononia. Bologna abounds in churches, most of which are rich in paintings. It is also remarkable for its public institutions for the promotion of literature, science, and the fine arts. The university of Bologna is the oldest, and still one of the principal in Italy. There is a public library, containing 83,000 vols. Lat. $44^{\circ} 30' N.$, Lon. $11^{\circ} 21' E.$ Pop. above 71,000. (B.)—Adj. BOLOGNESE, bo'-lo-neze', and BOLOGNIAN, bo-lo'-ne-ån.—Inhab. BOLOGNESE.

very rapidly in population and importance within the last half century. By means of canals and railways, it is connected with all the more important places of the kingdom. The weavers of Bolton probably produce a greater variety of fabrics, than those of any other single town in England. The institutions for education are numerous. Lat. $53^{\circ} 33'$ N., Lon. $3^{\circ} 34'$ W. Pop., including Great and Little Bolton, with an area of above 3 sq. m., 49,763.

BOM-BAY', an i. on the W. coast of Hindostan a little more than 8 m. long, from N. to S., and about 3 m. in its greatest breadth. Its harbour is unequalled for safety, throughout the British empire in India, and hence the name *Bom Bahia** (good harbour), given to it by the Portuguese, which is now corrupted into Bombay. (P. C.) The town of Bombay is situated at the S. E. extremity of the island, and is tolerably well built. It is second only to Calcutta in commercial importance. Bombay possesses several institutions for the promotion of knowledge, among which is a fine observatory. Lat. $18^{\circ} 57'$ N., Lon. $70^{\circ} 40'$ E. The permanent pop. in 1816 amounted to about 162,000. (B.) Bombay is the seat of one of the three presidencies into which the British empire in India is divided. Together with the presidency of Madras, it is subordinate to the governor-general of India, whose residence is at Calcutta. The territory under the immediate jurisdiction of the governor and council of Bombay, is situated between the 14th and 24th degrees of N. Lat., and the 71st and 77th degrees of E. Lon.

BOOTAN, boo-tân/, or BHOOTAN, the name of a tract of country lying N. E. of Hindostan. Its exact limits do not appear to be ascertained. On the N. it is bounded by Thibet, on the S. by Bengal and Bahar.—Inhab. BOO-TEE/-A, sometimes written BOTIVA.

BO-PAUL/, written also BHOPÂL, a small independent principality in the central part of India, between 22° 32' and 23° 45' N. Lat., and 76° 2' and 78° 52' E. Lon.—Also, the cap. of the above. Lat. 23° 17' N., Lon. 77° 27' E.

BORCETTE. See BURSCHIED.

BORDEAUX, bor'-dô/,* or bor/-dô, formerly written BOURDEAUX, boor'-dô/, (Gr. Βουρδὶγαλα, Lat. Burdig'ala,) an ancient and celebrated city of France; cap. of the dep. of Gironde, and one of the finest, most commercial, and most populous towns in the kingdom, on the W. bank of the Garonne, 310 m. S. W. of Paris. The city is connected with its suburb La Bastide (lâ bâs'-teed'), on the other side of the river, by a bridge 532 yards in length, resting on 17 arches, and constituting one of the noblest structures of the kind that exist. Burdigala was an important place as far back as the middle or latter end of the fourth century, when it was made the capital of the Gallic province Aquitania Secunda. Even at that time it had a great reputation as a seat of learning. At present it is distinguished among the towns of France, not only by the extent and variety of its manufactures, and its active commerce, but also by its literary and scientific institutions, and its numerous and important establishments for public instruction, among which there is an *académie universitaire*, and a public library of 110,000 vols. Bordeaux is the seat of an archbishopric. Lat. 44° 50' N., Lon. 0° 33' W. Pop. in 1846 120,203. Adj. and inhab. BORDELAIS or BORDELOIS, bor'-d'la'; feminine, BORDELAISE, bor'-d'laze'.

BORGNE, a lake or rather bay in the S. E. part of La., connected with L. Pontchartrain by the Rigolets, and communicating on the E. with the Gulf of Mexico. Length about 60 m.; greatest breadth 26 m.

BOR/-NE-O, the largest island of the globe, with the exception of New Holland, situated between about 4° S. and 7° N. Lat., and 119° 30' and 109° 30' E. Lon. Its greatest length is about 850 m.; its breadth about 680 m.

* The accent is usually placed on the last syllable of this name, in ordinary discourse. But the poets, we believe, almost invariably accentuate the penultima. This is evidently the mode in which Shakspeare pronounced Bordeaux. Scott, whose authority may have more weight, as being more modern, follows his example.

“— England's hope and France's fear,
Victor of Cressy and Poitier,
In BORDEAUX dying lay.”

Lines on the Black Prince. *Rob Roy*.

“That venison free and BORDEAUX wine
Might serve the archery to dine.”

The area is estimated at 286,000 sq. m. Our knowledge of this island is limited, for the most part, to the shores. The climate, as far as it is known, is very hot and moist, and is particularly destructive to Europeans. Borneo is divided into a great number of small states. Some of these are subject to the sultan of the Tooloo Islands; others to the Dutch, who have possessions on the western, southern, and eastern coasts. Most of them, however, appear to be independent. The commercial intercourse of Borneo with China, is much more extensive than with Europe. Among European nations, the Dutch, who exercise authority over one-third of the coast, carry on the most active commerce, exporting pepper, gold, and other products. Borneo produces a great variety of vegetables and trees common to tropical countries. It also contains rich gold and diamond mines.

BORN'-HOLM, an i. in the Baltic, belonging to Denmark, 90 m. E. of Zealand. It is about 26 m. long, and 12 wide. Area estimated at 216 sq. m.

BOR-NOO', (Bornou,) a kingdom in the N. central part of Africa, between 10° and 15° N. Lat., and 12° and 18° E. Lon.—Adj. and inhab. **BOR'-NOO-EE'**.

BORODINO, bor-o-dee'-no, a village of Russia, about 70 m. W. of Moscow, the scene of a desperate battle between the French and Russians, in 1812. Lat. 55° 33' N., Lon. 35° 40' E.

BOSNA-SERAI, bos'-nâ-ser-î', or **SERAJEVO**, ser-î-yâ'-vo, a manufacturing and commercial city of European Turkey, on the Migliazza (meel-yât'-sâ) or Miliaska, near its junction with the Bosna. It is considered the cap. of Bosnia, although the pasha has for the last few years resided at Trawnîk. Lat. 43° 54' N., Lon. 18° 26' E. Pop. about 70,000. (B.)

BOS'-NĀ-Ā, (called Bos'-nâ by the Turks,) the most westerly eyalet or prov. of European Turkey, derives its name from the r. Bosna, an affluent of the Save, by which it is intersected. It is bounded on the N. W. and N. by Croatia and Slavonia, E. by Servia, and S. and W. by Albania and Dalmatia. Area variously estimated from 16,000 to 22,000 sq. m.—Adj. and inhab. **BOS'-NĀ-ĀN** and **BOS'-NĀ-AK**: the latter is more properly applied to that portion of the inhabitants of Bosnia who are descended from the original Slavonic nation that established itself here during the decline of the Roman empire.

BOS'-POR-US, commonly but incorrectly written **BOSPHORUS**, the strait between the Euxine and the Sea of Marmora, called also the Channel of Constantinople. It is about 1 m. or 1½ m. wide, and 20 m. long.

BOSRAH. See **BASSORA**.

BOS'-TON, a port of entry, cap. of Mass., and the largest city in New England, is situated in Suffolk co., on a peninsula 2 m. long and about 1 m. wide, at the W. side of Massachusetts Bay. Its harbour is one of the best in the United States. It has always a sufficient depth of water for the largest vessels, and is accessible at all seasons of the year. The Middlesex canal, 30 m. in length, connects this harbour with the Merrimack. Besides the advantages which Boston possesses for

maritime trade, it communicates, by means of railroads, with all the principal places in Mass., and with most of the important towns in the adjoining states. It is the second commercial city of the United States. The tonnage of this port, in 1850, amounted to 313,190. The total value of the imports, for the same year, was \$27,969,922, and of the exports \$9,142,649. It is probable that the amount of imports and exports, during the present year, will be much greater. The number and excellence of her institutions for education, and the zeal and success with which literature and science are cultivated by her citizens, appear fully to justify the distinguished reputation which Boston enjoys as a seat of learning. Among the numerous literary establishments of this city, may be mentioned the Athenæum, with a library of 50,000 vols. Lat. of the State House, $42^{\circ} 21' 22''$ N., Lon. $71^{\circ} 4' 9''$ W. The pop. by the census of 1850, was 136,871: if we add the suburbs, which are closely united with the city, it will exceed 200,000.—Inhab. BOS-TO'-NI-AN.

BOSTON, a seaport t. of England, in Lincolnshire, about 100 m. N. of London. Lat. 53° N., Lon. $0^{\circ} 2'$ W. Pop. of the town and parish, with an area of above 8 sq. m., 12,942.*

BOT-A-NY BAY, situated on the E. coast of New Holland, was named by Cook, from the great quantity of plants found there. Near it is Sydney, the chief town of the colony of convicts from Great Britain. See SYDNEY.

BOURG, boor, a t. of France, cap. of the dep. of Ain, 50 m. by the road N. N. E. of Lyons. Lat. 46° 13' N., Lon. 5° 12' E. Pop. 9,000. (B.)

BOURGES, boorz, (Anc. Avar'icum, afterwards Bitur'iges,) an archiepiscopal t. of France, cap. of the dep. of Cher, 125 m. due S. from Paris. This city may vie, in antiquity and ancient importance, with almost any in France. It was, in the time of Cæsar, the capital of the Bituriges, and one of the finest cities in Gaul. At present, it is chiefly remarkable as a seat of learning. Besides other institutions for education, of less importance, it possesses an *académie universitaire* and a royal college. Lat. 47° 5' N., Lon. 2° 23' E. Pop. 20,000. (B.)

BOURGOGNE. See BURGUNDY.

BRAZIL, or braz-il', or brã-zeel', a vast empire in the E. part of S. America, extending from about 5° N. to 34° S. Lat., and from about 35° to 73° W. Lon.; bounded on the N. W. and N. by Ecuador, Venezuela, Guiana; N. E., E., and S. E. by the Atlantic, and S. W. and W. by Monte Video, La Plata, Paraguay, Bolivia, and Peru. Its vast extent brings it in contact with all the countries of S. America, except Patagonia, Chili, and New Granada. The area has been estimated at 3,000,000 sq. m. Pop. 5,000,000. (B.) As might be supposed, the vegetable productions of a country of so great extent, lying within such latitudes, and, for the most part, plentifully supplied with water, are extremely abundant and various. Nor does animal life appear in less variety and luxuriance. Many of the Brazilian birds are remarkable for the brilliancy of their plumage: the insects, for their size and the

ou, as in *our*; th, as in *thin*; TH, as in *this*: N, nearly like *ng*.

beauty of their colours, especially the butterflies. The mineral wealth of this country is considerable, but limited to a few articles, of which the chief are gold, diamonds, topazes, iron, and salt. Brazil was formerly a colony belonging to the crown of Portugal. But, on the 12th of October, 1822, it was declared an independent state, and Pedro, the son of the king of Portugal, whom his father had appointed regent of Brazil, yielding to the torrent of public opinion, adopted the title of emperor, and, on the 1st of December, was crowned. Soon after, the Portuguese troops, who had been stationed in the towns of Bahia, Maranhã and Para, were compelled to sail for Europe, and the independence of the new empire was established, with scarcely any loss of blood. The government of Brazil is a limited monarchy. The cap. is Rio Janeiro.—Adj. and inhab. BRAZILIAN, brã-zil'-yun.

BRAZ'-OS, a r. of Texas, which flows into the Gulf of Mexico, in about 28° 50' N. Lat., and 95° 20' W. Lon. The entire length, following its windings, is estimated at near 1,000 m.

BRIEUX or **BRIEUC** (SAINT), sán'-bre'-uh', a t. of France; cap. of the dep. of Côtes du Nord, situated near the coast of the Channel, on a small bay of the same name. It possesses several public institutions, and a library of 24,000 vols. Lat. $48^{\circ} 31' N.$, Lon. $2^{\circ} 43' W.$ Pop. 11,382. (B.)

BRIGHTHELMSTONE, commonly written and pronounced BRIGH'-TON, a seaport t. and fashionable watering-place of England, in the co. of Sussex, 46 m. S. of London. This town contains many fine, and some magnificent edifices. Its suspension, or chain-pier, which extends into the sea to the distance of 1,136 ft., is justly an object of general admiration. The pop. of Brighton has increased with astonishing rapidity during the present century. In 1801 it was 7,339; in 1841, 46,661; but during summer the residents amount sometimes to near double that number.

BRINDISI, brin'-de-se, (Gr. Βρεντεςιον, Lat. Brundi'sium or Brundu'sium,) a commercial t. of Naples, in the prov. of Terra d'Otranto, well known in Roman history for its capacious and safe harbour, which was the chief port of embarkation from Italy to Greece. It is the seat of an archbishopric. Lat. $40^{\circ} 38' N.$, Lon. $18^{\circ} E.$ Pop. 6,000. (B.)

BRIOUDE, bre'-ood', a small t. of France, in the dep. of Upper Loire. Near it there is a magnificent bridge, over the r. Allier, of about 180 ft. span, supposed to have been built by the Romans. Brioude was the birth-place of the illustrious La Fayette. Lat. $45^{\circ} 17' N.$, Lon. $3^{\circ} 24' E.$ Pop. 5,052. (P. C.)

BRIS'-TOL, a manufacturing and commercial city and seaport in the W. of England, on the Avon, about 7 m. above its entrance into the Bristol Channel, and 108 m. W. of London. Together with its suburbs, Bristol forms a little county of itself, which, however, is now usually regarded as a part of Gloucestershire. In the old portion of the city, the streets are irregular and narrow, and the houses present a gloomy appearance; but the newer parts are well built, and have many fine edifices, especially the western quarter of the town, or rather of the suburbs, called Clifton, which is the principal resort of the gentry. Here is a warm mineral spring (the Hotwell), celebrated in consumptive cases. The scenery around Clifton is exquisitely beautiful. The erection of a great suspension bridge over the Avon, at Clifton, was commenced several years ago, but it is still unfinished. The span is to be 700 ft., the height 240 ft.; so that vessels of the largest size may pass beneath with outspread sails. Of the numerous institutions for educa-

tion of this city, we may mention the Bristol College, founded in 1830, and the Bristol Medical School, established on its present efficient scale in 1834. Bristol appears to have been a place of importance in the 5th century. The name seems to be derived from *Bricstow*, an old Saxon name of this city, which may be literally translated "breach place;" *i. e.* the place or town of the breach or chasm through which the Avon finds a passage to the sea. The ancient British name was *Caer Odor*, the "city of the breach." Lat. 51° 27' N., Lon. 2° 35' W. Pop., including the hundred of Barton Regis with a total area of about 16 sq. m., 122,296.

BRUGES, bru'-jez, (Fr. pron. brüzh, Dutch, Brugge, brug'-geh,) an ancient fortified city of Belgium, the cap. of W. Flanders, situated about 6 m. from the sea, and 55 m. N. W. from Brussels. Its name, Brugge, is derived from the number of bridges which cross the canals. From four to five hundred years ago, this city was the principal emporium of Europe; at present, it exhibits but the shadow of its former glory. Still, its commerce, manufactures, and public institutions, give it a distinguished rank among the towns of Belgium. Lat. 51° 12' N., Lon. 3° 13' E. Pop. 41,914. (P. C.)

BRÜNN, (native name Brno, *i. e.* "ford,") an archiepiscopal t., the cap. of Moravia, situated in the centre of a circle of its own name, near the confluence of the Schwarza and Zwittawa, (which run on each side of it,) and about 70 m. N. of Vienna. Its woollen manufactures are considered the most important in the empire. Brünn has a number of literary and scientific institutions, and several handsome edifices. Lat. 49° 12' N., Lon. 16° 36' E. Pop. 40,000. (B.)

BRUNS'-WICK (Ger. Braunschweig, broun'-shwig.) Two distinct sovereignties have sprung from the house of Brunswick. The possessions of the elder line are confined to the grand-duchy of Brunswick-Wolfenbüttel. The younger possesses Hanover, and is called the Brunswick-Lüneburg, or the Hanoverian line.

The duchy of Brunswick consists principally of three large unconnected districts, lying in the N. W. part of Germany, between about 51° 35' and 52° 32' N. Lat., and 9° 20' and 11° 7' E. Lon. Area about 1,525 sq. m. Pop. 242,000. (B.)

BRUNSWICK, the cap. of the above, situated on both sides of the r. Ocker, a branch of the Aller. Among its institutions for education, we may mention the *Collegium Carolinum*, and the College of Anatomy and Surgery. Lat. 52° 16' N., Lon. 10° 32' E. Pop. about 36,000. (B.)

BRUNSWICK, a t. of Cumberland co., Me., on the Androscoggin, about 25 m. N. E. of Portland. It is the seat of Bowdoin (bō'-den) College, a flourishing institution, which was founded in 1794, and derives its name from the Hon. James Bowdoin, by whom it was munificently endowed. BRUS'-SELS, (Dutch Brus'-sel, Fr. Bruxelles, brü'-sell',) the cap. of Belgium, situated in S. Brabant, on the little r. Senne, an affluent of the Scheldt, about 23 m. S. of Antwerp. It is surrounded by a brick wall, with eight gates. The origin of Brussels dates as far back as the 7th century. In 1044, it was enclosed with walls, and has since held an important rank among the towns of the Low Countries. Previously to the revolution of 1830, Brussels was the cap. of the Austrian Netherlands; and, after the separation of Belgium from Holland, towards which this town had made the first movement, it became the seat of government of the new kingdom. Among the public edifices of Brussels, we may mention the Hôtel de Ville, one of the finest Gothic buildings in the Netherlands, the tower of which is stated to be 364 ft. high. Among the numerous literary and scientific institutions, may be cited the Academy of Science and Belles-lettres, the Royal Society of Fine Arts, and the High School of Commerce and Industry. The Observatory stands in Lat. 50° 51' 11" N., Lon. 4° 22' 15" E. Pop. in 1845 117,000.

this kingdom, on the right bank of the Danube, and connected with Pesth, on the opposite side of the river, by a bridge of boats, 3,800 ft. in length. It is said to derive its name from Buda, a brother of Attila, who made this town his residence, and much enlarged it. The trade of Buda consists principally in the wines produced by the vineyards of the neighbouring country. The Royal Observatory, situated 516 ft. above the level of the Mediterranean, and 300 ft. above the waters of the Danube, at this place, is in $47^{\circ} 29' 12''$ N. Lat., and $19^{\circ} 3'$ E. Lon. Pop. above 33,000. (B.)

BUDUKHSHAN, bud'-uk-shân', (Badakhshan,) one of the principalities into which Toorkistan is divided, between 36° and 38° N. Lat., and 69° and 73° E. Lon. The ruby mines, so often alluded to by the Persian poets, are in this country, at a place called Gharan (gâ-rân'). The inhabitants of Budukhshan speak the Persian language. Their religion is Mahometanism.

BUDWEIS, bood'-wice, a manufacturing and commercial t. of Bohemia; the cap. of a circle of the same name, situated on the Moldau, and connected by a railway with Linz, in Upper Austria. Lat. $48^{\circ} 59'$ N., Lon. $14^{\circ} 58'$ E. Pop. about 7,000. (B.)

Buenos Ayres, commonly pronounced bo'-nos â'-riz (Sp. pron. bwâ'-noce-î-rês,) a city of S. America; cap. of the republic of La Plata, on the S. bank of the estuary of the r. La Plata. It is one of the most important commercial towns, as well as one of the principal seats of civilization and learning on the American continent. (B.) It is, in general, regularly and handsomely built, and is defended by a castle, the walls of which are mounted with cannon. The literary and scientific institutions of Buenos Ayres are numerous and respectable; the University, in particular, enjoys a distinguished reputation, both on account of its plan of instruction, and the number and talent of its professors. It has a library of 20,000 vols. This place was founded by the Spaniards, in 1535. The name Buenos Ayres (good air), was given by its founder, Mendoza, and is justified by the healthiness of the climate. Lat. $34^{\circ} 36'$ S., Lon. $58^{\circ} 10'$ W. Pop. estimated at 80,000. (B.)

Buf'-FA-LO', a city and port of entry of N. Y.; cap. of Erie co., situated at the E. end of L. Erie, near the commencement of the Niagara r., and at the mouth of Buffalo Creek. The growth of this town has been very rapid. In 1810 the pop. was only 1,508; in 1850 it amounted to 42,261. This increase may be attributed chiefly to its position. Situated at the termination of the Erie Canal, and of the Albany and Buffalo Railroad, it has, necessarily, become the great entrepôt for the merchandise of the east, and the agricultural productions of the west. Buffalo is the port whence persons going to the northern part of the western states ordinarily embark upon the lakes. Lat. $42^{\circ} 53'$ N., Lon. $78^{\circ} 55'$ W.

CADIZ, câ/-diz, (Sp. pron. kâ/-dith,) the principal commercial city of Spain, situated in the prov. of Andalusia, on the S. W. coast. It stands on a tongue of land, projecting from the island of Leon. This town was founded by the Phœnicians, many centuries before the Christian era; the exact time is not known. It was called by them Gadir or Gadeira, which was afterwards changed to Gades by the Romans, under whom it became a *municipium*, or free town, and one of the richest provincial cities in the empire. Nature and art have combined to render this place one of the strongest fortresses in Europe. Lat. 36° 31' N., Lon.

* These are sometimes employed to designate an inhabitant of the modern Turkish capital. The eastern Roman empire, the seat of which was at Constantinople, is frequently called the Byzantine empire.

† The French write this name *Caboul*, while the Germans, Italians, Spaniards, and Portuguese, write it *Cabul*, but pronounce the latter syllable *bool*. Nevertheless, we are assured, on the best authority, that the native inhabitants write and pronounce it without any vowel between the *b* and *l*, which might be represented in English thus—Kab'l. The European pronunciation, however, seems unalterably fixed; and we ought, perhaps, to acquiesce the more willingly because the original name could not be restored without some loss of euphony.

Moore writes the name Caubul, but accentuates the last syllable.

— "Pomegranates full
Of melting sweetness, and the pears
And sunniest apples that CAUBUL
In all its thousand gardens bears."—*Lalla Rookh*.

Rogers adopts the same accentuation.

"From Alexandria southward 'to Sennaar,
And eastward through Damascus, and CABUL,
And Samarcand, to thy great wall, 'Cahay."

CAF-FRA/-RI-A or CAF/-FRE-LAND, a name given by Europeans, to a country in the S. E. part of Africa, extending about 600 m. along the coast, from the Great Key r. to Lagoa Bay. The name is derived from the Arabic word *Kafir*, which signifies “unbeliever.” This country is occupied by four principal nations, originally of one stock. One of these, the Zoolas or Vatvahs, are a fine athletic race, and very warlike, and have overpowered, dispersed; or destroyed all the surrounding tribes, from King George’s r. to Port Natal, a tract of above 300 m. in length, from N. to S. The Caffres acknowledge the existence of a Supreme Being, but have no form of worship. Some tribes are industrious, and cultivate millet, beans, pumpkins, sweet potatoes or yams, maize and tobacco. The complexion of the Caffres varies from a copper hue to a deep black. Their nose is arched; they have thick lips and curly hair, but less woolly than the negroes. The Caffre women are considered to be among the handsomest in Africa.—Adj. and inhab. CAF/-FRE.

CAHORS, kâ'-or/, (Divona Cadurcorum,) a city of France; cap. of the dep. of Lot, on the right bank of the r. Lot. This town is very ancient; it was the cap. of the Cadurci, under the Romans, and afterwards of the prov. of Querci, which name, as well as Cahors, is derived

from Cadurci. Many ancient ruins are found in it and its vicinity. Lat. 44° 25' N., Lon. 1° 27' E. Pop. 12,000. (B.)

CAICOS (ki/-koce) ISLANDS, one of the groups comprehended under the general name of Bahamas, situated between 21° and 22° N. Lat., and 71° and 73° W. Lon.

CAIRO, ki/-ro, a celebrated city, the metropolis of modern Egypt, situated about half a mile from the right bank of the Nile, and about 100 m. in a straight line from the entrance of the E. branch into the Mediterranean. The Arabs formerly called it El-Kahira, el-kâ/-he-râ, *i. e.* "the victorious," but Musr (or Mâsr) is the name by which it is now commonly known among the natives. The streets of Cairo are winding, narrow, and unpaved. The houses, not being lighted except from windows opening on the courts in the interior, present, from the street, the appearance of prisons. But, though the exterior of the houses is gloomy, many of them exhibit, within, conveniences and luxuries suitable to the climate. Here everything is arranged with a view to coolness; the floor is inlaid with marble and coloured earthenware, and fountains spring up into marble basins. The commerce of this city is very extensive. Through it the productions of Asia and the East Indies, and partly also those of Europe, are transmitted into the vast regions of interior Africa. Boolak (boo'-lâk/), the principal port of Cairo, is on the right bank of the Nile, N. N. W. of the metropolis. Pop. estimated at above 18,000. (B.) The other port, Old Cairo, is situated on the Nile, S. S. W. of New or Great Cairo. The Egyptian capital is in about 30° 3' N. Lat., and 31° 18' E. Lon. Pop. estimated at 330,000, previously to the recent ravages of the cholera and plague; but, at present, it probably does not exceed 270,000. (B.)—Adj. and inhab. CAIRINE, ki-reen/. (Arab. Mus/-ree.)

CAITH/-NESS, a co. occupying the N. N. E. extremity of Scotland. Pop. 36,343.

CA-LA/-BRI-A, or kâ-lâ/-bre-â, a territory of the kingdom of Naples, occupying the southern extremity of Italy. It extends from 37° 56' to about 40° N. Lat., and is divided into Calabria Citra (chee/-trâ), which forms the N., and Calabria Ultra (ool/-trâ), the S. part of the territory.—Adj. and inhab. CA-LA/-BRI-AN.

CALAHORRA, kâ-lâ-or/-râ, (Anc. Calagur/ris,) a t. of Spain, in Old Castile, remarkable for the ruins which attest its ancient splendour. Calagurris was the birth-place of Quintilian. Lat. 42° 15' N., Lon. 2° W. Pop. 4,000. (B.)

CALAIS, kal/-is, (Fr. pron. kâ'-lâ/), a fortified seaport t. of France, in the dep. of Pas-de-Calais, situated on the Pas-de-Calais or Strait of Dover, 150 m. nearly N. from Paris. A steamboat runs daily from this place to Dover, which is about 25 m. distant. Calais was taken by Edward III. in 1347, and remained in the possession of the English till 1558. CAL-CUT/-TA, the cap. of Bengal, and the seat of the supreme government in British India, is situated on the E. side of the Hoogly, an arm of the Ganges, about 100 m. from the sea. In the beginning of the last century, Calcutta was only an insignificant village, and a great part of its present site was completely covered with jungle. The spot appears not to have been wisely chosen, as it is surrounded by a marshy and unhealthy country; and, though something has been done to remedy the evil, by draining the water off the surface, near the town, and by clearing away the surrounding jungle, the air is still far from being salubrious. The city may be considered as consisting of two distinct parts; that portion which is inhabited by the Hindoos and Mahometans of the lower classes, is, in general, badly built, with narrow and dirty streets, the dwellings being, for the most part, mud hovels, and the walls frequently consisting of mats and bamboos; while that quarter where the English and other Europeans reside, presents a very different aspect. This is finely, and even magnificently built, so that the houses are said to resemble palaces. The citadel, called Fort William, stands on the bank of the Hoogly, about a quarter of a mile below the city. The Europeans of Calcutta have established a number of literary and scientific institutions; among others, a Mahometan, a Sanscrit, and an Anglo-Indian college. About one-third of the native inhabitants of this town are Mahometans, and nearly all the remainder Hindoos. The number of Christians, in 1822, was stated to be 13,138. The commerce of Calcutta is very extensive; through it nearly all the external trade of the prov. of Bengal is carried on. Lat. 22° 34' N., Lon. 88° 26' E. Pop. estimated at 625,000. (P. C.)

CALDAS DA RAINHA, kâl/-dâs dâ râ--een/-yâ, a small t. of Portuguese Estremadura, much resorted to on account of its warm sulphurous baths. Lat. 39° 22' N., Lon. 9° 5' W. Permanent pop. 1,500. (B.) *Caldas*, signifying "warm baths," is a name given to a number of other places in Portugal and Spain.

CAL-I-FOR'-NI-A, LOWER, a peninsula of Mexico, on the Pacific, separated from the main land by the Gulf of California.

CALIFOR'NIA. At the close of the war with Mexico, the United States acquired by conquest and purchase, a tract of country, for the most part arid, sterile and mountainous, covering a space of nearly 500,000 sq. miles; the greater part of which had been hitherto known as the Mexican territory of Upper California. From the western portion of this sterile region, the Congress of the U. S. in Sept., 1850, created and admitted into the American Confederacy, the 31st sovereign state, under the name of California. This state lies between 32° and 42° N. Lat.; and between 114° and 125° W. Lon.; and is bounded on the N. by Oregon territory; E. by the territories of Utah and New Mexico; S. by Old California; and W. by the Pacific. The Eastern boundary is formed by the 120th degree of W. Lon., down to the 39th degree of lat.; and to this point has the Sierra Nevada Mts. in the boundary line; but here it diverges from the mountains in a right line S.E., till it strikes the Colorado on the 35th degree of lat., whence it follows that river to the boundary of Mexico. The length of this state from N. to S. is about 700 miles, with an average breadth of from 150 to 200 miles, including an area of 188,982 sq. miles, or about 120,000,000 acres.

Capt. Wilkes computes the arable portion of this state at only about 12,000 sq. miles. This portion, though subject to great droughts, is exceedingly productive. But the state of California, despite its sterility, has already in the very few years it has belonged to the U. S., acquired a prominent place not only in the estimation of Americans, but in the eye of the world. From the sands of its barren hills and mountains, and from the beds of its Alpine torrents, are sifted and washed out annually from \$75,000,000 to \$100,000,000 of gold dust and ore.* A commercial city has sprung up, as if by magic, whose harbor is thronged with shipping of the largest class, from Europe, Asia, and Australia; and which already numbers its population by tens of thousands. Regular lines of large steamers at stated and frequent periods depart from and arrive in its port, crowded with passengers to a degree that occurs in no line of steamers elsewhere. It holds regular and frequent intercourse with New York, by a length of voyage much greater than unites that metropolis with Europe. Besides, interior towns have sprung up, each numbering thousands of inhabitants, and communicating frequently with their

commercial capital. But even should the mines become exhausted, or had they never existed or been discovered, yet is this state destined to play a leading part in the commerce of the Pacific Ocean, by means of its deep and capacious harbor and otherwise advantageous location. Ere these mines were dreamed of, some of our farsighted statesmen had written and spoken of the importance of San Francisco to the commerce of our Pacific border; a city, whose position and other commercial advantages, threaten to revolutionize the trade of the East, to open commerce and civilization to the isles of the sea, and the eastern coast of Asia.*

Bays, Rivers, &c.—San Francisco Bay, the best and most capacious harbor on the Pacific coast, is (including the two arms, San Pablo and San Francisco bay proper,) perhaps 60 or 70 miles long, and in the widest part 14 miles broad. A strait about a mile wide, passing through a range of hills or low mountains connects it with the ocean. This strait has been termed not inappropriately the "Golden Gate,"† as it is the passage through which the multitudes from every region of the world are continually hastening, in order to gather the wealth of this new and richer El Dorado. Within the barrier of hills already alluded to, the bay divides into two parts—the one stretching to the S. about 40 miles, and the other to the N. about 25 miles. On the N. W. shore of the southern arm, or San Francisco Bay proper, stands the city of the same name. The northern arm is named San Pablo, and is connected by a strait with a small bay directly E. of it, into which the united waters of the Sacramento and San Joaquin (san ho-ah-keen') discharge themselves. This is called Suisoon Bay.

The strait that connects San Francisco Bay with the ocean, is the only channel of navigation between the interior of California and the sea. The Sacramento rises in several branches, in the mountains of the Coast Range, the Shasta and Sierra Nevada, in about 41° 30' N. Lat., and proceeding in its course nearly directly south, receives the Feather and American rivers from the east, with many smaller branches, and joins the San Joaquin after a course of about 200 miles. The latter river rises in the Sierra Nevada in about 37° 30' N. Lat., and running first in a S. W., and then in a direction a little N. W., receives the Mariposa, Merced, Tuolumne, Stanislaus, and Calaveras rivers, from the E., and after a course of about 200 miles, joins the Sacramento; their united waters running westwardly for about 200 miles, in a channel much interrupted by islands, empty into

* By an act of its legislature in April, 1851, California was divided into 30 counties, viz: Bute, Calaveras, Colusi, Contra-Costa, Eldorado, Klamath, Los Angeles, Marin, Mariposa, Mendocino, Monterey, Napa, Nevada, Placer, Sacramento, San Diego, San Francisco, San Joaquin, San Luis Obispo, Santa Barbara, Santa Clara, Santa Cruz, Shasta, Solano, Sonoma, Sutter, Ta-wal-um-ne or Tuolumne, Trinity, Yolo, and Yuba. San Jose is the present capital.

† Probably in allusion to the harbour of Constantinople, named, from its form, and from the prodigious wealth which was continually wafted into it, the "Golden Horn."

Suisoon Bay. The Mokelumne (or Moquelumne river) empties into these at the point of junction. The Klamath river empties itself into the Pacific in the N. W. of California. Capt. Wilkes's map represents its mouth and source as in Oregon.

The principal estuaries of the Pacific on the coast of California are, Humboldt bay in the N. W., Monterey bay and the bay of de los Esteros in the W., San Pedro, San Diego and Santa Barbara bays in the S. W.

The principal lake, Lake Tulare, (too'-lah-rà,) (bulrush lake,) is described by Fremont "as a strip of water of about 70 miles in length, surrounded by low lands overgrown with rushes, and as receiving all the rivers of the southern part of the valley. In times of high water it communicates with the San Joaquin." This lake is about 150 miles S. E. of San Francisco. Kern Lake, S. of Tulare, communicates with it. The other lakes are Rhett and Deer in the N. E.; Clear Lake, about 70 miles directly N. of San Francisco; Fremont Lake, 100 miles E. of the southern point of the latter, and Owen Lake, about 70 miles E. of the N. point of Tulare Lake. These are all small, except Clear and Tulare, the former of which is about 40 miles long.

Face of the Country.—As the voyager sails along the coast of California, he looks upon a low range of mountains, which in many instances approach to the water's edge, forming a bluff, iron-bound coast; through which he enters, by a narrow strait named the Golden Gate, the bay of San Francisco. Following these low mountains on the coast *north* of the Golden Gate, is a broken and hilly country, to which succeeds the coast range, entering from Oregon, and extending nearly parallel to the ocean, at distances varying from 30 to 50 miles, till it reaches the 35° of N. Lat., where it unites with the Sierra Nevada, and passes into Old California. *South* of the Golden Gate, between the coast *mountains* and the coast *range*, are the valleys of the river San Juan, emptying into San Francisco bay, and of Buenaventura, emptying into Monterey bay. The former is 60 miles long, by 15 to 20 wide, and the most fertile in California. The mountains immediately on the coast bear various local names. Table Hill, on the N. side of the strait leading into San Francisco bay, is 2560 feet high. Mt. Diablo in the coast range, directly east of San Francisco, attains an elevation of 3,770 ft. Mt. Linn is an elevated peak of the same range, in lat. 40°, whose height has not been ascertained. Near the northern boundary of the state, in a spur of mountains running N. E. to the Sierra Nevada, is Mt. Shasta, or Shaste, the highest known peak in California, which soars to the Alpine height of 14,400 feet, and is clothed with perpetual snow. We now enter the great valley of the Sacramento and San Joaquin, which extends from N. to S. about 500 miles, with an average breadth of about 60 miles, and an elevation of only a few hundred feet above the level of the sea. This is the garden of California, and the chief source from which she must draw her agricultural supplies. Soon after we have passed the Sacramento and San Joaquin, from a base of about 500 ft. above the

ou, as in *our*; th, as in *thin*; th, as in *this*; n, nearly like *ng*.

sea, we commence the ascent of the Sierra Nevada, by a gradual slope, first passing through a region wooded to about half the mountain's height with oak, which is succeeded by a forest of gigantic pines, cedars and cypress, and which conducts us to the naked granite and perpetual snows of its summits. At the north end of the Sacramento valley is another higher valley, of about 100 miles in length, and some thousands of feet in elevation, heavily timbered, and containing arable valleys. The Sierra Nevada forms a continuation of the Cascade Range of Oregon, and extends almost directly south till they unite with the coast range in about 34° N. Lat. They form the eastern boundary of California, between 39° and 41° of N. Lat. The Emigrants' Pass, in about 39° N. Lat., is 7,200 feet high, but there are peaks in the range which reach an elevation of 15,500 ft. Some volcanoes are said to have been discovered in the Sierra Nevada. The eastern slope ascends from a base of 4,000 ft., and is much more rigorous in climate. The western slope is covered with grass at all seasons of the year, and scored with as many fertile valleys as there are streams and rivers. On this slope, too, between 37° and 40° of N. Lat., are the celebrated gold diggings, towards which the eyes of the seekers after sudden affluence have been so eagerly turned since 1848, and it is estimated will soon yield \$100,000,000 annually. The gold is obtained by turning aside streams from their channels, and washing the sands; or from dry diggings either by washing or mining, or in lumps and coarse particles by pick-axes, &c. The gold found in the streams and in the dry ravines and plains, was evidently only the washings from the higher regions, and must necessarily be soon exhausted; but fortunately for the gold seekers, the auriferous quartz, probably in its original locality, has recently been discovered, and is not likely to be soon exhausted. Gold, too, has been found in the coast range, in the vicinity of San Jose and Monterey. Quicksilver mines also are known to exist of great richness, in the vicinity of the former place. Silver has been discovered in two or three localities, and lead in several places; but none of these have as yet received much attention. Iron, too, has been found recently.

Climate and Meteorology.—The climate of California is much milder, even at considerable elevations, than in the same parallels on the Atlantic coast. Though many degrees above the tropics, the seasons are divided into rainy and dry, rather than into the four seasons of similar latitudes elsewhere. The rainy season lasts from December to March. In the latter part of the dry season, where there is not irrigation—as is the case mostly west of the Sacramento and San Joaquin—every thing is destroyed by the drought. In Southern California, in February the grass begins to spring up, and vegetation generally to put forth. The western slope of the Sierra Nevada has a milder temperature than the valley of the Sacramento, being more sheltered by the mountains from the cold winds from their summits. At San Francisco and other parts near the

Fâte, fâr, fáll, fât; mê, mêt; pine or pîne, pîn; nõ, nõt; õ as in *good*;

coast, cold bleak winds, charged with fogs from the ocean, prevail during the summer, and render it really more unpleasant in climate than in the winter season, when the N. W. winds do not prevail. During 75 days that observations were kept near the Golden Gate by the Exploring Expedition, S. W. winds prevailed 44 days; N. W. 13 days; W. 4 days; S. E. 5 days; calm 5 days. These 75 days were between Aug. 18th and Oct. 31st. The mean temperature from May 27th to June 6th, averaged 61°; highest point 86°; lowest 48°. At New Helvetia, at the same time, it rose as high as 114°. At 30 miles from the coast, especially in the valley of San Juan, the climate is delightfully equable, resembling the south of Spain. The valleys of the Sacramento and San Joaquin, particularly the west side of the latter, are very hot in the dry or summer season. According to observations made by Fremont, in the San Joaquin valley, between the middle of December and the middle of June, the mean temperature at sunrise was 29°, and at sunset 52°; from the 10th to the 22d of March, 38° and 56° at sunrise and sunset. At Deer Creek, in 40° N. Lat., during 6 days between the 30th of March and 4th of April, the temperature was 48° at sunrise, 59° at 2 P. M., and 52° at sunset. At the three Buttes, in 39° N. Lat., 64° at sunrise, 90° at 2 P. M., and 80° at sunset, at an elevation of 800 ft. At the head of Kern river, in lat. 35° 30', mean temperature between Dec. 27th and Jan. 17th, was 26° at sunrise, noon 60°, sunset 52°. Near Monterey, early in March, sunrise 44°, 2 P. M. 62°, sunset 53°; elevation 2,200 ft.

Productions, Agriculture, &c.—Though so much of California, as has been observed, is unproductive, yet there is a portion of it luxuriantly fertile, but subject to the great drawback of long droughts in the autumn, when even the turf is parched to an impalpable powder. But the rains return between November and March, and restore verdure and health to vegetation. Where irrigation can be practised, the evils of the drought are compensated by abundant returns for additional labor—as the southern part has the climate and productions of Italy. Here may be cultivated the olive, the banana, the orange, the grape, pears, peaches, pomegranates, quinces, Indian corn, tobacco, and cotton. In the north wheat flourishes; and the moisture of the coast favors the potato. The fertile parts are mainly found in the bottoms of the great rivers and their affluents, and in the valleys and plains of the coast region. Over these, in their native state, is found a rich growth of wild oats. On the western slope of the Nevada, grass grows at all seasons of the year.

The forest trees of California consist mainly of oak, cypress, cedar, pine, and fir, with some sycamores, willow, cotton-wood, a peculiar species of white oak, with long acorns, (which form a staple of food with the Indians,) ash, and a remarkable tree peculiar to California called the Madrono, an evergreen 60 feet in height, and 4 feet in diameter, with a smooth reddish bark. These forests grow on the slopes of the Nevada, on the banks of the streams, and on the district

ou, as in *our*; th, as in *thin*; TH, as in *this*; N, nearly like *ng*.

near the coast—both mountain and plain. The cypress, pine and fir of this region attain an enormous size. Fremont measured a cypress near Monterey, whose altitude was 275 feet, and diameter 15 feet, 3 feet above the base.

Among the wild animals are grizzly bears, elks, deers, antelopes, and wild horses. Great abundance of salmon are found in the rivers.

The commerce of California is extensive, and the harbour of San Francisco is thronged with shipping from the Atlantic ports of the Union, from England, from Australia, and other parts of the world. There is little to export of her native products except gold, which is freighted in steamers to New York. The other trade is confined to supplying the wants of the inhabitants, as even the materials for building have as yet mostly to be imported, as well as their food, clothing, machinery, &c. The arrivals from California in 1851, at different ports on the Atlantic shore of the Union, were 35; the clearances for California amounted to 115. The Sacramento is navigable at all times to Sacramento City, and except in the dry season, for 200 miles. The San Joaquin is navigable for vessels of 400 tons, to Stockton, 65 miles; and for smaller vessels to Stanislaus, perhaps 100 miles further.

Manufactures.—California has as yet but few manufactures.

History, Government, &c.—The north part of California was discovered by Sir Francis Drake, in 1578; but was first colonized by some Spaniards in 1768. After the Mexican revolution, California formed a province of that country until 1836, when it rebelled, drove out the Mexicans, and formed an independent congress. By the treaty of peace of 1848, after having been the scene of several sanguinary skirmishes during the war with Mexico, it became a part of the United States, and in 1850 was admitted into the American Confederacy as a sovereign state.

The constitution of California is similar to that of the northern states; slavery is excluded. The governor is elected for two years, and receives \$10,000 per annum; and a lieutenant-governor for the same period. The senate consists of sixteen members, elected for two years; and the house of representatives of thirty-six members, elected for one year—all elected by the people.

The judiciary consists of a Supreme Court, composed of a chief-justice and two associates, receiving \$10,000 per annum each, and elected for six years by the people; and of district courts presided over by judges elected for a like period by the people, and receiving \$7,500 per annum. A county judge is elected for four years, to act as judge of probate, and to hold county courts, and with two justices of the peace to hold criminal sessions.

Education is intrusted to a state superintendent, who holds his office for three years. 500,000 acres of public lands are appropriated to educational purposes.

Towns.—San Francisco, the commercial metropolis of California, is situated on the N. W. shore of the southern arm of the bay bearing its own name. It stands on a plain about half a mile wide, gently inclined towards the bay, with numerous hills behind it. It is regularly laid out with streets, crossing each other at right angles. The houses are mostly frame, but since the destructive fires that have occurred, several times laying large portions of the city in ruins, brick and iron are becoming more extensively used. The better class of frame houses are painted white, with green blinds, presenting the appearance of the houses in New England. The soil on which the town is built is very sandy, and around the city, particularly the northern part, are numerous sand hills. Along the water's edge, many of the stores and warehouses are built on piles driven into the water. Near the southern end of the town is a high hill or butte, (pronounced *bute*,) called Telegraph Hill, having an elevation of 1,000 feet or upwards, and from the summit of which a very extensive view may be had of the surrounding country. In the centre of the city is a large public square, which is called by its Spanish name, "plaza," (*plah'-sa*.) The inhabitants of San Francisco have been variously estimated at from 25,000 to 40,000; but there is so large a mass of floating population, that it would be impossible, even by taking a census, to state the number with any exactness.

Sacramen'to City, the present capital, is favourably situated on the Sacramento river, in the midst of a level country, and on one of the richest soils in the world. In it and in its vicinity are perhaps the finest gardens in California. Suttersville, a village, formerly two miles further up, is now joined with it, and the two may properly be regarded as a single town. Sacramento City is about 80 or 90 miles N. E. of San Francisco, and is the principal entrepot of trade for furnishing provisions to the northern mines. The entire population is estimated at 12,000.

Marysville, on Yuba river, just above its junction with Feather river, is situated 70 miles N. of Sacramento City, at the head of steamboat navigation. It is an important trading-post for the northern mines. Pop. about 5,000.

Stockton, the third city in California, situated on Stockton Slough, three miles from the San Joaquin, is about 70 miles E. by N. of San Francisco, in a direct line. Vessels of 400 tons burden may ascend to Stockton. It is a place of great activity, and a depot for the southern mines. Pop. estimated from 6,000 to 10,000.

Sono'ra, situated in the richest mining region in California, 160 or 170 S. E. by S. from San Francisco, is the capital of Tuolumne county, and has a population of from 3,000 to 8,000.

San Jose', (*san-ho-sa'*), the former capital of California, is beautifully situated in Santa Clara valley, seven miles from the head of San Francisco bay. Though the town stands in a plain, snow-capped mountains may be seen in the distance on every side of it, during the whole year. The climate is perhaps the most delightful in California.

It is about 45 or 50 miles S. E. from San Francisco. Pop. about 4,000.

Neva da City, (nà-váh'-dâ,) a very important mining town is situated on Deer creek, an affluent of the Yuba river, about 190 miles N. of San Francisco.

Benicia, (bâ-nish'-e-a,) on the strait of Carquines, is a small town, but is important as the seat of the arsenal and other government works. The Pacific Steam Company have also a station here for refitting their ships. Pop. from 3000 to 5000.

CALIFORNIA, GULF OF, on the W. coast of Mexico, extends from about 23° 30' to 32° N. Lat. Its length is above 700 m.; its breadth varies from about 40 to 150 m.

CALLAO, kâl-lâ'-o or kâl-yâ'-o, on the coast of Peru, is the seaport of Lima, from which it is 7 m. distant, by a good level road. It is the best fortress and the most convenient and safest port in Peru. Lat. 12° 3' S., Lon. 77° 14' W. Before the war of independence, it had a pop. of 4,000. (B.)

CAN/-A-DA, an extensive country of N. America, belonging to Great Britain, extending from 64° 15' to near 91° W. Lon. Its southern extremity (the S. point of Pelee Island, in Lake Erie), is in about 41° 45' N. Lat. On the N. its limits are not defined. It is usual to consider all the territory N. of the great lakes, which is drained by the rivers that fall into the St. Lawrence, as belonging to Canada. It is bounded on the N. by the British possessions round Hudson's Bay and by Labrador, E. by the Gulf of St. Lawrence, S. by New Brunswick and the United States, and W. by the British territories, between which and Canada the limits do not appear to be accurately defined. Canada was formerly divided into Upper and Lower, but the two provinces were united in 1841, by an act of the British parliament. As, however, this country has been so long known by the names of the former provinces, it may not be improper to give these a passing notice. Upper Canada (now called Canada West) is situated on the right of the r. Ottawa, by which it is separated from Lower Canada, and extends westward along the chain of the great lakes. Area vaguely estimated at 140,000 sq. m. Pop. in 1835, 336,461. Capital, Toronto. Lower Canada (Canada East) lies chiefly on the left of the Ottawa, and extends on both sides of the St. Lawrence, to its mouth, in the Gulf of St. Lawrence. Area estimated at 200,000 sq. m. Pop. in 1830, 511,917. (M.) More than three-fourths of the inhabitants of Lower Canada are of French descent, and French is the prevailing language. Quebec was formerly the capital of this province and of all the British possessions in N. America. The entire pop. of Canada, according to the recent census, is about 1,300,000. Montreal is the present seat of government.—Adj. and inhab. CAN-A/-DI-AN.

CAN'-A-JO-HAR/-IE (-hâr/-re), the cap. of Montgomery co., N. Y., on the Erie Canal, 50 m. W. of Albany.

CAN'-AN-DAI/-GUA, a beautiful village of N. Y.; cap. of Ontario co., 208 m. W. of Albany. It is situated near the N. extremity of a lake of the same name, which is about 17 m. long. Pop. of the township, 6,143.

CAN'-A-RA, a prov. on the W. coast of Hindostan, between 12° and 15° N. Lat., and 74° and 76° E. Lon.

CA-NA/-RIJES (Sp. Canarias, kâ-nâ/-re-âs), a group of islands belonging to Spain, in the Atlantic, lying off the coast of Africa, between 27° 40' and 29° 30' N. Lat., and 13° 30' and 18° 20' W. Lon. The principal islands are Canary, Teneriffe, Palma, Ferro, Gomera, Fuertaventura, and Lanzarote, which will be treated of under their respective names.

CANTIRE. See CANTYRE.

CAN'-TON', a city of China, in the prov. of Quang-tong, of which Canton is a European corruption. It is situated on the Choo-kiang (ke-ang'), or Pearl River, 32 m. from its mouth. Like other Chinese towns, it is divided into two distinct parts, separated by a wall, called the Chinese or Old City, and the Tartar or New City. The streets of Canton are paved, and ordinarily very clean, but very narrow. The houses have but one story, and are built mostly of brick. This town is remarkable for having been, till recently, the only emporium of maritime commerce in China, to which Europeans were admitted. It is

CAPE OF GOOD HOPE, at the S. extremity of Africa, was discovered in 1493, by Diaz, the Portuguese navigator, who called it Cabo Tormentoso, or Cape of Storms. On his return home, the king of Portugal gave it the name of Cape of Good Hope, as an omen that the Portuguese had now a fair prospect of reaching India, the great object of their maritime expeditions. It is in Lat. $34^{\circ} 22' S.$ —A colony in S. Africa takes its name from the above cape. It belonged originally to the Dutch, but was formally ceded to Great Britain in 1815. The climate of this region is subject to great extremes; though the country is deluged with rains during the cold season, in the hot months nearly all the springs are dried up. The rivers are two shallow, or their current is two rapid for purposes of navigation. Nearly two-thirds of the land is destitute of vegetation, during the greater part of the year. The country, however, contains spots of extraordinary fertility. The principal productions are wheat, barley, and wine. Cape Town, the cap. of the colony, founded by the Dutch, in 1650, is situated on Table Bay, and has a castle of considerable strength. Lat. $33^{\circ} 55' S.$, Lon. $18^{\circ} 21' E.$ Pop. in 1834, 19,387. (P. C.)

CAPE VERD ISLANDS (Ilhas Verdas, eel/-yàs vèr/-dàs), so called by the Portuguese, because the sea to the W. of them is covered with gulf-weed, so as to present some resemblance to extensive meadows. This group is about 300 m. from the W. coast of Africa, between $14^{\circ} 17'$ and $17^{\circ} 19' N.$ Lat., and $22^{\circ} 10'$ and $25^{\circ} 30' W.$ Lon. There are 14 islands; 9 of them are inhabited, of which Sam-Tiago, S. Nicolao, Boa Vista, and S. Antao are the most important. They belong to Portugal.

CAPE VIN-CENT, a village and port of entry of N. Y., in Jefferson co., on the St. Lawrence, near the N. E. extremity of L. Ontario.

CAPRI, kâ/-pre, (Anc. Ca/preæ,) a beautiful rocky island in the Mediterranean. 8 or 9 m. in circuit, and about 20 m. due S. from Naples. Among other curiosities, it contains a singular and romantic grotto, which appears to have been a favourite resort of the emperor Tiberius, who resided a long time in Capreæ. This cave can be entered only from the sea, by a very narrow opening. For a full description of it, we would refer the reader to No. 147 of the Penny Magazine. Lat. $40^{\circ} 32' N.$, Lon. $14^{\circ} 14' E.$ Pop. about 3,000. (P. C.)

CAP/-U-À, or kâ/-poo-à, a strongly fortified archiepiscopal t. of Naples, in Terra di Lavoro, situated on the left bank of the Volturno, 15 m. N. W. of the capital. The modern Capua does not occupy the same site as the ancient, but that of a much inferior t., called by the Romans Casilinum. The ruins of the ancient Capua are to be seen in the neighbourhood. Lat. $41^{\circ} 7' N.$, Lon. $14^{\circ} 11' E.$ Pop. about 8,000. (B.)

* In familiar discourse, we very often hear this name accentuated on the first syllable; e. g. in the phrase, "a Cashmere shawl." Cashmere, in such cases, may be considered simply as an English word, having become thoroughly anglicized. (See Int. XII., Obs. 2.) When, however, the country itself is spoken of, the almost invariable practice of the best speakers, as well as the usage of the poets, will, we believe, be found to justify the pronunciation above given.

CHARLESTON, a port of entry, and the largest city of S. C.; cap. of the above dist., on a tongue of land between the rivers Ashley and Cooper, which unite immediately below the town, and form a spacious harbour, communicating with the ocean at Sullivan's Island, 7 m. below. The town is regularly built, and many of the streets present a handsome appearance. Charleston is connected with Hamburg, on the Savannah, by a railroad, 135 m. in length. Among the numerous charitable establishments of Charleston, may be cited the Orphan Asylum, which is amply endowed, and is one of the most remarkable buildings in the place. Of the literary institutions, we may mention the Charleston College, founded in 1795, and the Charleston Library, which contains about 20,000 vols. The citizens of Charleston are distinguished for their hospitality and refinement, and perhaps no place in the United States affords more agreeable society. In winter this city is particularly pleasant as a residence, and is much resorted to by persons from other parts of the Union. Lat. 32° 46' N., Lon. 79° 57' W. Pop. 42,985.

CHER'-O-KEES', a noble and once powerful tribe of Indians, who formerly possessed the southern portion of the Appalachian mountains and a large tract of country on both sides of this range. In 1809 their number amounted to 12,359; but it had since considerably diminished, when, at length, in 1838, all the Cherokees who were in Georgia, constituting a large majority of those who still remained, were removed to the W. of the Mississippi, by the order of the U. S. government. The Cherokees have been considered the most civilized of all the American Indians. They have a written language; the alphabet, which was invented by a native Cherokee, consists of 85 characters. Previously to their expulsion from Georgia, some of them are said to have become excellent and thriving farmers, so as to bear an advantageous comparison with the most skilful and industrious of this class, in the southwestern states.

CHILI, chil/-le, (Sp. Chile, chee/-là,) one of the new republics of S. America, lying along the coast of the Pacific, between 25° and 42° S. Lat.; but the archipelago of Chiloë, which belongs to it, extends about two degrees farther S. It is bounded on the N. by the desert of Atacama, which belongs to Bolivia, E. by the republic of La Plata, from which it is divided by the Andes, and on the S. by Patagonia. But the southern limit of Chili, properly speaking, is the r. Bio-bio, by which it is separated from Araucania, which is still independent. Length near 800 m.; breadth varying from 90 to 200 m. Area estimated at 130,000 sq. m. Pop. 1,400,000. (B.) The climate of the central part of Chili may, with respect to temperature, be compared to that of Italy; though it varies much in different districts, it is everywhere healthy. This country, however, is subject to strong periodical gales. In the beginning of the rainy season (May and June), the wind often blows with great violence from the N. W. During eight or nine months it blows from the S., and frequently with great force, especially in autumn, that is from February to April. The vegetable productions of Chili do not, for the most part, materially differ from those of other countries within similar latitudes; the extreme dryness, however, of the air in the northern districts is unfavourable to the sugarcane and to most intertropical plants. Probably no country is more subject to earthquakes than this. In the northern district slight shocks are felt almost every day; they occur more frequently along the coast than in the interior. This republic became independent in 1818. The cap. is Santiago.—Adj. and inhab. CHIL'-I-AN. The Spanish appellation CHILENOS, che-là/-noce, is also employed by some English writers to designate the inhabitants.

CHIL-LI-COTH'-E, the cap. of Ross co., Ohio, situated on the Scioto r. and the Ohio and Erie Canal, 85 m. E. by N. from Cincinnati. Pop. 7,098.

CHILOE, cheel-o-à/, almost chil-way/, an i. on the W. coast of S. America, belonging to Chili, between 41° 48' and 43° 50' S. Lat., and 73° 20' and 74° 30' W. Lon. Its length is about 120 m.; its greatest breadth 60 m.

CHIMBORAZO, cheem-bo-rá/-so, a mountain in Ecuador, till recently regarded as the highest in S. America; but it is now ascertained that the Nevado de Sorata exceeds it by nearly 4,000 ft. The Chimborazo is about 3,350 toises, or 21,426 English ft. above the level of the sea. Lat. about 1° 30' S., Lon. 79° 5' W.

CHI'-NA, an extensive country in Eastern Asia, bordering on the Pacific, and constituting the principal portion of the Chinese empire. It lies between 18° and 41° N. Lat., and 98° and 124° E. Lon. Its length, from S. E. to N. W., is above 1,400 m.; breadth from 900 to 1,300 m. The area is estimated at about 1,298,000 sq. m. On the northern frontier, China is inclosed by the great wall, about 1,400 long, and 20 ft. high; it is believed to have been built about 200 years before the Christian era. Before the arrival of Europeans, the norther portion of China was called by the neighbouring nations of central Asia, CATH-AY', under which name it became known to the Russians, while the inhabitants of India called the southern part Chin, whence is derived the ordinary European name. The Chinese name it Chon-Koo, or the "centre of the world." The climate of this country differs greatly from that of Europe within the same latitudes. The mean temperature is considerably lower, while the extremes of heat and cold in the different seasons are much greater. In this respect, the climate of China may be considered as bearing a general resemblance to that of the United States. If the difference in temperature in the same latitudes between the E. and W. coast of N. America, is less striking than between China and the western part of Europe, it may, perhaps, be attributed to the greater breadth of the eastern continent, in consequence of which, those influences that cause the western sides of continents to be warmer than the eastern, manifest themselves in their fullest force. The gulf stream, also, in all probability contributes something towards moderating the temperature of our climate, especially along the coast. The soil of China is, in general, productive, and some parts are extremely fertile. The country is watered by numerous rivers. The Imperial Canal, a work which excites the admiration of travellers, commences in about 30° N. Lat., at Hang-tcheo-foo, and extending, in a northerly direction, perhaps 700 m., terminates at Lin-tchin-cheoo. It appears to have been constructed both for the purpose of internal navigation and of draining, and irrigating some parts of the adjacent country. The vegetable productions of China are highly interesting; among them we may mention a superior species of orange, which, when ripe, has a deep crimson rind, quite detached from the fruit; the *Nelumbium*, a beautiful flower, of which the seeds resemble, in form and size, acorns without their cups, and have the flavour of nuts, while the root is sliced and eaten as fruit; and the tallow tree, the *Croton sebiferum*, from the seeds of which the vegetable oil is obtained; it is like wax, and, in its natural state, is of snowy whiteness. Silver mines are abundant in China, but are little worked; gold is obtained from the sands of some of the rivers, but no gold or silver money is coined. (M. B.) The government of China is an absolute despotism. The emperors of the present or Mantchoo dynasty, sprung from a union of the eastern Tartars and Mongols, have been in possession of the sovereignty since the year 1644. Of the population of this great country, the estimates vary exceedingly. According to a census which is stated to have been taken by the Chinese government in 1812,

ou, as in *our*; th, as in *thin*; TH, as in *this*; n. nearly like *ng*.

the entire population of the empire amounted to more than 360,000,000. Balbi estimates it at 170,000,000.

The Chinese empire comprises, besides China proper, Chinese Tartary, including the countries of Mongolia and Mantchooria, Little Bucharia, Thibet, and the peninsula of Corea. Peking is the capital of China proper, and of the whole empire.—Adj. and inhab. CHI-NESE' and CATHAY'-AN (poetical).

CHIN INDIA, a name given to the region situated between China and Hindostan, comprehending the Birman empire, the kingdoms of Tonquin, Cochin China, Cambodia, Laos, Siam, and the peninsula of Malacca. It is often called the Peninsula beyond the Ganges. Little is known of these countries, and their political divisions and boundaries are very uncertain.

CIENFUEGOS, se-en'-foo-â'-gòs, or fwâ'-goce, a flourishing t. on the S. coast of Cuba, on a bay called Xagua (Hâ'-g'wâ), which forms one of the finest harbours in the world. It was founded about the year 1818, and named in honour of Cienfuegos, who was then captain-general of Cuba. Lat. about 22° 15' N., Lon. near 81° W. Pop. 3,500.

CINCINNATI* the metropolis of the State of Ohio, and capital of Hamilton Co., is situated on the Ohio r., about 500 m. from its mouth, 116 S. W. from Columbus, and 497 m. from Washington. Lat. 39° 6' N. Lon. 84° 27' W. It is the most populous city of the Western States, and the fifth in population in the whole Union. During the last forty years its growth has been extremely rapid. In 1800 it contained 750 inh.; in 1840, 46,338; and in 1850, 116,108; exclusive of the suburbs on the left bank of the river.

It is beautifully situated near the extremity of a valley, enclosed on the north by hills, which rise gently to the height of 300 feet, and present from their summits delightful views of the city and the river, which is here about 800 yards wide. The town is built on two plateaus, the highest of which is about 50 feet above the other, and 108 feet above low-water mark. The average difference between high and low water here is about 50 feet. The shore is supplied with floating wharves, adapted to the rise and fall of the water, which render the landing at all times convenient.

The corporate limits include about 4 sq. miles. The city is well built, a large portion of the houses being of brick or stone. The streets cross each other at right angles, and are wide, straight, and well paved. Among the principal buildings may be mentioned the court-house, the edifice of the Franklin and Lafayette Banks, built on the model of the Parthenon; the Cincinnati College, with a marble front of the Doric order; and several fine churches. The Observatory has one of the best telescopes in the country. The Catholics have a college with a library of 6300 volumes. Lane Seminary, a Presbyterian institution, two miles from the city, has a library of 10,500 volumes; and the Mercantile Library contains over 10,000 volumes. Among the charitable institutions are two orphan asylums, a hospital, and a lunatic asylum which will accommodate 250 patients.

* This is frequently pronounced, contrary to all principles of correct pronunciation, *sin-sin-at-tüh*, an error which cannot be too carefully avoided.

Cincinnati possesses great facilities for communication with the surrounding country. Besides the Ohio river, which is the main thoroughfare between the Atlantic States and the Mississippi valley, the Miami canal connects it with Lake Erie, and several lines of railroad are already completed, which extend to Columbus, Cleveland, and Sandusky. Others are in progress which will connect it with St. Louis, Pittsburg, and the Atlantic seaports. This is the greatest pork-market in the Union. The value of the pork received here in a single year is about 4,000,000 dollars. During the year ending Sept. 1, 1851, 233 steamboats were employed in the commerce of Cincinnati, and the number of steamboat arrivals in that year was 3,698.

The manufactures are various and important. It contained in 1851, 5 cotton-factories, 9 paper-mills, 44 iron-foundries and engine-shops, which produce annually \$3,676,000; 34 oil and stearine factories, product \$3,015,000; 33 pork and beef establishments, product \$5,760,000; 40 wine manufactories; 62 tobacco factories, product \$931,000; 12 publishing offices, product \$1,246,000; and 7 boat-yards, in which 31 steamboats were built in that year.

In ordinary seasons, the navigation is open all winter, though partially obstructed by floating ice. The river was frozen over in 1838-9, and again in the winter of 1851-2, when it remained closed for 9 successive days, and the mercury sank to 10° below zero.

The mean annual temperature is 53°. The climate is adapted to the production of the finest fruits of the temperate regions, with which the market is abundantly supplied. The grape especially is cultivated extensively in this vicinity.

CO/-CHIN CHINA, or the empire of An-nam, is situated in Chin-India, of which it forms the eastern portion. It extends from $8^{\circ} 40'$ to about $23^{\circ} N.$ Lat., and from 102° to $109^{\circ} 20' E.$ Lon. Its length, from N. to S., is about 980 m.; its breadth varies from 100 m. to 300 m. Area estimated at 147,000 sq. m. The name Cochin China is unknown to the inhabitants, having been bestowed by the Portuguese. The natives call it Drang-Trong, *i. e.* "the central country." This appellation, however, is restricted to Cochin China Proper; Tonkin is called the "external country." These two countries are named by the inhabitants An-nam or Anam. Tonkin occupies the northern, and Cochin China Proper the southern region; the boundary line between them is in about $19^{\circ} N.$ Lat. The most southern portion of Cochin China Proper once formed a separate country, under the name of Tsiampa, tse-âm/-pâ or Chiampa. The empire of An-nam comprehends a part of Cambodia and several other territories. Little, however, is known respecting them. The pop. is estimated, by Balbi, at 12,000,000. The inhabitants of Cochin China belong to the same race as the Chinese and Mongols. They have made some progress in most of the arts of civilized life, and, in their mode of living and general character, appear to resemble the Chinese. They are said to excel in naval architecture, and the lacker-ware made at Tonkin is considered by some as preferable to that of Japan. Hué is the cap. of Cochin China and of the whole empire. Adj. and inhab. COCHIN CHINESE, which, however, should be restricted to Cochin China Proper. AN-NAM-ÈSE/ or ANAMESE is the more general appellation.

COLOMBIA, ko-lom'-be-â is the name which was adopted by the northern countries of S. America in 1819, when New Granada and Venezuela united, and established one central government, for the purpose of resisting the power of Spain. In 1829, Venezuela renounced the union, and constituted itself a separate republic. After the resignation of Bolivar, in 1830, it again joined New Granada, but this union lasted only a short time. In November, 1831, a new separation took place: at the same time it was decided that the former prov. of Quito should constitute a separate government, under the name of Ecuador. Thus Colombia was divided into the three republics, Venezuela, New Granada, and Ecuador.

CONCAN, *konk'/kən*, a dist. of Hindostan, extending along the Malabar coast, between $15^{\circ} 50'$ and $20^{\circ} 15' N.$ Lat., and divided into Northern and Southern Concan.

CONCEPTION, *con-sep'/shun*, (Sp. *Concepcion*, *kon-thep-the-one'*), a t. of Chili, situated about 7 m. from the shores of an extensive bay of the same name. In 1835 the whole town was laid in ruins by an earthquake. Previously to this catastrophe, the pop. was estimated at above 10,000. (B.) Lat. $36^{\circ} 49' S.$, Lon. $73^{\circ} 5' W.$

CONCORD, *kong'/kɔrd*, the seat of justice of Merrimack co., N. H., and the cap. of the state, is situated on the W. bank of the Merrimack r., 62 m. N. N. W. of Boston. Lat. $43^{\circ} 12' 29' N.$, Lon. $71^{\circ} 29' W.$ Pop. 8,576.

CON-COR'-DIX-A, a parish in the N. E. part of La., bordering on the Mississippi r. Pop. 7,758. Seat of justice, Concordia.

CONDÉ, *kon'de* or *kɔn'dá'*, an important fortress on the northern frontier of France, in the dep. of Nord, situated on the Escaut (Scheldt), 124 m. N. N. E. of Paris. Lat. $50^{\circ} 28' N.$, Lon. $3^{\circ} 35' E.$ Pop. in 1832, 3,498. (P. C.)

CONECUH, *ko-nee'/kəh*, a co. in the S. part of Ala., intersected by a river of the same name, and bordering on Florida. Pop. 9,322. Co. t. Sparta.

CONGAREE, *kong'-gə-ree'*, a r. of S. C., formed by the union of the Saluda and Broad rivers, which unites with the Wateree to form the Santee.

CONGLETON, *kong'-g'l-tɔn*, a t. of England, in Cheshire, 30 m. E. of Chester. Pop., including an area of about 4 sq. m., 9,222.

CONGO, *kong'/go*, a name which, in its most extensive application, comprehends the whole region lying along the W. coast of Africa, including Loango, Congo Proper, Angola, and Benguela. Congo Proper extends from the r. Congo, in about Lat. $6^{\circ} S.$, to the r. Dando, in Lat. $8^{\circ} 20' S.$ Its interior limits are not known. The climate of this country, though sometimes very fatal to the European constitution, appears not to be subject to great extremes of temperature. The soil, in some parts, is represented as very fertile, and produces yams, maize, sugar-cane, and other tropical plants.

CONGO, otherwise called the ZAIRES, *zə-ee'/rə*, a large r. in the S. W. part of Africa, flowing into the Atlantic, in about $6^{\circ} S.$ Lat. It was partially explored by Captain Tuckey in 1816. Its breadth, for some distance from the sea, is not less than 5 or 6 m.; at the mouth, no bottom was found in the middle of the stream with a line of 160 fathoms. He ascended it to the distance of about 280 m., and was surprised to find that it did not receive the water of any other stream in the whole distance along which the survey extended; he was inclined to believe that there must be some under-ground communication, by which it was supplied with water.

CONNAUGHT, *kon'-naut*, a prov. in the W. of Ireland, comprising the

counties of Galway, Mayo, Roscommon, Leitrim, and Sligo. Pop. in 1831, 1,340,914. (P. C.)

CONNECTICUT, *kon-net/-e-kut*, the largest r. of New England, rises on the borders of Canada, and, running S., divides New Hampshire from Vermont, then passing through Massachusetts and Connecticut, flows into Long Island Sound. Its whole length is about 400 m.; it is navigable for sloops to Hartford, about 50 m.

CONNECTICUT, one of the thirteen original states of the Union, situated between 41° and $42^{\circ} 3' N.$ Lat., and $71^{\circ} 55'$ and $73^{\circ} 50' W.$ Lon.; bounded on the N. by Massachusetts, E. by Rhode Island, S. by Long Island Sound, and W. by New York; and divided into 8 counties.* Its length, from E. to W., is about 93 m.; its greatest breadth, from N. to S., about 68 m. Area, 4,664 sq. m. Pop. 370,791. The seat of government is divided between Hartford and New Haven.

CON-STANCE, (Ger. *Constanz*, *kon/-stànts*; Lat. *Constan'tia*), an ancient fortified t. in the S. of Germany, belonging to Baden, situated on the S. bank of the Lake of Constance. It was a very important place in the middle ages, but is now much decayed. The name is derived from Constantius (father of Constantine the Great), by whom it is said to have been founded. Lat. $47^{\circ} 36' N.$, Lon. $9^{\circ} 9' E.$ Pop. 5,300. (B.)

CONSTANCE or CONSTANZ, called also Bodensee, *bò/-den-sà'*, *i. e.* the lake or sea of Bodmann, (an ancient castle on its banks,) a large lake lying between Switzerland and Germany, extending from $47^{\circ} 28'$ to $47^{\circ} 47' N.$ Lat., and from $9^{\circ} 2'$ to $9^{\circ} 45' E.$ Lon. Its length is about 45 m.; its greatest breadth about 13 m. It is 1,283 ft. above the level of the sea, and its greatest depth is stated at 964 ft. It was anciently called *La'cus Briganti'nus*, from the *Brigan'tii* who dwelt on its banks. There was a Roman station near the S. E. extremity of the lake, called *Brigantium* or *Brigantia*; the modern name is *Bregenz* (*brà/-gènts*).

CON-STAN-TI-NO'-PLE, (Turk. *Stâm-bool'* in common language, and *Constantinieh*, *kon-stân-te-neo'-eh*, in documentary writing; Gr. *Κωνσταντινοπολις*; Lat. *Constantinop/olis*; *i. e.* the "city of Constantine;") a great and celebrated city, the imperial seat of the Ottoman government, situated between the Euxine and the Sea of Marmora, on a triangular promontory which projects from Europe into the Bosphorus. Its situation combines the advantages of great strength as a fortress, with great convenience and security as a seaport, and is, at the same time, healthy and beautifully picturesque. Constantinople is built upon the site of the ancient Byzantium, having been founded about the year 328, by Constantine the Great, who made it his own residence and the cap. of the Eastern Empire. It was taken by the Turks, under Mahomet II., in 1453, since which time it has been the cap. of the Ottoman dominions. Among a great number of magnificent edifices which this city contains, the Mosque of St. Sophia is perhaps the most deserving

notice. It was a church, founded, more than 13 centuries ago, by the emperor Justinian, but afterwards, when the Turks acquired possession of Constantinople, was converted into a mosque. It is an immense building, and will conveniently contain, it is said, 100,000 persons. Its cupola has served as a model for those which have since been erected at Venice, Pisa, and Rome. The mosque, however, of the sultan Ahmed surpasses that of St. Sophia, both in beauty and grandeur, and is regarded as altogether the most magnificent structure in the Turkish metropolis. Constantinople is protected on the land side by walls, which are so lofty, that from the road, which passes under them, the eye can scarcely catch a glimpse of the mosques and minarets of the city. On this side there are six gates. The town was formerly defended, it is said, by 180 towers, of which not more than 120 are now standing. The harbour of Constantinople, called the port of the Golden Horn, is safe, capacious, and beautiful. It is formed by an arm of the Bosphorus, which projects on the European shore, between the city and its suburbs, Galata (gâ'-lâ-tâ), and Pera (pâ'-râ). The Mosque of St. Sophia is in Lat. $41^{\circ} 1' 27''$ N., and Lon. $28^{\circ} 55' 24''$ E. Pop. estimated by Balbi at 600,000.—Adj. and inhab. CON-STAN-TI-NO-POL'-I-TAN, BYZANTINE, and BYZANTIAN. (See BYZANTIUM.) (Turk. Stâm'-bool-lee'.)

CON'-WAY or CON'-WY, a r. of Wales, which flows into the Irish Sea, at Aberconway, in Lat. $53^{\circ} 18'$ N., Lon. $3^{\circ} 50'$ W.

CONWAY, a co. in the N. part of Ark., bordering on the Arkansas r. Pop. 3,583. Co. t. Lewisburg.

COOCH BAHAR (bâ-har'), a principality of Hindostan, occupying the N. E. extremity of the prov. of Bengal.

COOK, a co. in the N. E. part of Ill., bordering on L. Michigan. Pop. 43,385. Co. t. Chicago.

COO-MAS'-SIE, a large t. in the W. of Africa, cap. of the empire of Ashantee. It is nearly 4 m. in circuit. The streets are wide, regular, and very clean, but the houses are for the most part built of reeds. Lat. $6^{\circ} 51'$ N., Lon. $1^{\circ} 42'$ W. Pop. estimated by the Ashantees at above 100,000, but this is probably an exaggeration. (P. C.)

COOPER, a co. in the W. central part of Mo., bordering on the Missouri r. Pop. 12,950. Co. t. Booneville.

COOS, a co. forming the N. extremity of N. H. Pop. 11,853. Co. t. Lancaster.

Old and New Town. The latter, named also Frederikstad, is truly superb, and may be compared to the most magnificent portions of the finest capitals of Europe. Among the multitude of remarkable buildings which Copenhagen contains, we may cite the royal palace of Christiansborg, equally extraordinary for its architecture and its vast dimensions. It contains a magnificent palace-church, the royal galleries of paintings, natural history, &c., and a library of 400,000 vols. Among the great number of literary and scientific institutions, for which the Danish capital is distinguished, may be mentioned its celebrated university, one of the most richly endowed and most flourishing in Europe. It is attended on an average by 700 students. Copenhagen is well fortified, being surrounded by ramparts and ditches, and defended by 24 bastions, besides outworks, and on the side towards the sea by a very strong citadel. It has an admirable harbour which is the great naval station of Denmark, and is capable of containing above 500 ships. Kjöbenhavn signifies "buying or trading port;" this place, however, no longer possesses that commercial distinction which formerly rendered its name so appropriate. Its general trade has much declined of late, principally in consequence of Altona being a free port, which Copenhagen is not. The observatory of the university is in Lat. 55° 40' 53" N., Lon. 12° 34' 57" E. Pop. above 115,000. (B.)

CO-PĪ-ĀH, a co. in the S. W. part of Miss., bordering on Pearl r. Pop. 11,794. Co. seat, Gallatin.

CO-PI-Ā-PO', a t. in the N. part of Chili, with rich copper-mines. Lat. 27° 20' S., Lon. 70° 30' W.

and Colo'nia Patri'cia, or simply Patricia); an ancient and celebrated city of Spain, in Andalusia, on the N. bank of the Guadalquivier, 180 m. S. S. W. of Madrid. While in the possession of the Moors, from 755 to 1234, it was a distinguished seat of learning, and the terror and admiration of Europe. It then contained 300,000 inhabitants. It was also the centre of an extensive trade, and noted for the preparation of the goat skins called *cordoban*.* Since the expulsion of the Moors, Cordova has fallen into decay, though it still ranks among the important places of Spain. Corduba was the birth-place of the two Senecas, and of the poet Lucan. Lat. 37° 52' N., Lon. 4° 45' W. Pop. 57,000. (B.)—Adj. and inhab. COR'-DO-VESE'; and COR'-DU-BESE', when the ancient town is referred to.

CORDOVA, an important t. of S. America, nearly in the centre of the republic of La Plata; cap. of a prov. of its own name, on the r. Primero (pre-má'-ro). It is the centre of an extensive trade. Lat. about 31° 20' N., Lon. 64° W. Pop. estimated at 15,000. (B.)

CO-RE'-A, a large peninsula on the E. coast of Asia, whose sovereign is tributary to the emperors of China and Japan, but otherwise independent. The country subject to the sovereign of Corea extends from about 34° to 43' N. Lat., and from 124° to 134° E. Lon. Its length, from N. to S., is near 630 m.; the average breadth may be about 150 m. Kingkitao (king-ke-tá'-o), the cap., is said to be a large city. Lat. about 37° 15' N., Lon. 127° 25' E.—Adj. and inhab. CO-RE'-AN.

CORFU, kor'-foo' or kor'-fu, (Mod. Gr. Κορφοί, korphoi, pronounced kor-fee'; Anc. Gr. Κορυφα; Lat. Corcy'ra;) an i. which lies off the coast of Albania, extending from 39° 51' to 39° 21' N. Lat., and 19° 36' to 20° 8' E. Lon. The length is about 38 m.; greatest breadth nearly 20 m. The area is about 227 sq. m.

CORFU, the cap. of the above, as well as of the whole Ionian republic, is situated on a promontory, on the E. side of the island. It is surrounded with walls, and strongly fortified. This town is the residence of an archbishop, and the seat of a university, first opened in 1824, with the four faculties of theology, law, medicine, and philosophy, and fourteen professors. The lectures are given in modern Greek. The harbour of Corfu is one of the best in the Levant. Lat. 39° 38' N., Lon. 19° 56' E. Pop. of the town and suburbs, 15,800. (P. C.)

COR'-INTH, (Anc. Corin'thos,) a small t. of Greece, near the isthmus which connects the Morea with the main continent. In the early part of the present century, its population and commerce were considerable, but it was almost destroyed during the war. A few scattered ruins are the only relics of that magnificence which was once the admiration of the civilized world. Lat. 37° 56' N., Lon. 22° 53' E.—Adj. and inhab. COR-IN'-THI-AN.

CORK, a co. occupying the S. extremity of Ireland, in the prov. of Munster. Pop. in 1831, 703,716. (P. C.)

CRACOW, krá/-co, a republic of Europe, formerly constituting a part of the kingdom of Poland. Its existence, as an independent state, dates from the congress of Vienna, in 1815, when the three great powers, Austria, Russia, and Prussia, not being able to agree to which of them it should be assigned, determined to form it into an independent republic, under their joint protection, guaranteeing to it perpetual neutrality and inviolability of its territory, except in the case of its affording an asylum to deserters, or offending against any of the three protecting powers. It lies on the northern bank of the Vistula, and contains an area of about 490 sq. m. Pop. 114,000. (B.)

CRACOW (Polish, Kraków, krá/-koof; Lat. Craco/via); the chief t. of the above, is situated on the Vistula, at its confluence with the Radeva (rá-dá/-vâ). This ancient capital of Poland received its name from Kracus, duke of the Poles and Bohemians, who is said to have founded it, about the year 700. Formerly the limits of the city were much more extensive than now, and the pop. amounted to thrice the present number. The most striking of its ancient monuments is the cathedral, the finest in Poland. Here the kings of Poland were crowned, and here are the tombs of most of the Polish monarchs and heroes; among others, we may mention those of Sobieski and Kosciusko. Lat. of the Observatory, 50° 3' 49" N., Lon. 19° 58' 6" E. Pop. above 25,000. (B.)—Adj. and inhab. CRA-co/-VI-AN.

CUMANA, koo-mâ-nâ/, a fortified t. of S. America, in the republic of Venezuela, cap. of the dep. of Maturin. It is situated above a mile from the sea, at the entrance of the Gulf of Cariaco, with a capacious and safe harbour. Lat. 10° 28' N., Lon. 64° 9' W. Though it is much decayed, its pop. still amounts to near 10,000. (B.)

CU-MA/-N-IA, GREAT, (see Int. XI.) or KUMANIA, (Hung. Nagy Kunság, nõdy* koon-shâág,) an independent dist. of Hungary, in the prov. "beyond the Theiss," between 47° and 47° 40' N. Lat., and 20° 30' and 21° 10' E. Lon. (P. C.) The area is about 424 sq. m. The whole surface is a low plain, and rendered so swampy by the inundations of the rivers, that nearly one-half of Cumania is a mere bog. There are here no large land proprietors or feudal lords, as in most parts of Hungary; the people have an independent jurisdiction of their own, and send representatives to the Hungarian diet. The Cumanians are a robust, athletic race, and very fond of rural pursuits, and are altogether a rich, happy, and independent people. The pop. amounts to about 43,000, of whom 37,000 are Protestants. Great Cumania contains one market town, Kardzag-uj-Szállás (kõrd-zõg-oo-e-sââl-lâás). Lat. 47° 20' N., Lon. 20° 55' E. Pop. 11,100. (P. C.)

CUMANIA, LITTLE, (Hung. Kis Kunság, kish koon-shâág,) a dist. of Hungary, in the prov. "this side the Theiss." It consists of several detached portions of land, with an aggregate area of about 1,000 sq. m., so that it is more than twice as large as Great Cumania.† Pop. about 53,000. (P. C.) The general character of the country, as well as of the inhabitants, corresponds with that given under the head of Great Cumania. Their largest town is Felegyháza (fâ-lâdy*-hââ-zõh). Lat. about 46° 43' N., Lon. 19° 54' E. Pop. 12,970. (P. C.)—Adj. and inhab., relating to both districts, CU-MA/-NI-AN.

CUM/-BER-LAND (Lat. Cum/bria), a co. in the N. of England, bordering on Scotland and Solway Frith. Pop. 178,038.—Adj. and inhab. CUM/-BRI-AN.

Cuzco, koos'-ko, an ancient t. of S. America, in Peru, about 250 m. from the coast of the Pacific. Before the arrival of the Spaniards, it was the cap. of the extensive empire of the Incas, and is said to have been built by the founder of the empire, Manco Capac, in the 10th or 11th century of our era. Upon a lofty hill, a little N. of the city, are the ruins of a great fortress erected by the Incas, for the protection of their capital. Many parts of it are still in a state of perfect preservation. They consist of stones of extraordinary size, placed one upon another, without cement, but fitted with such nicety as not to admit the insertion of a knife between them. It would appear that Cuzco exceeds Arequipa in population, though some of the most respectable geographers call the latter the second town of Peru. It is the seat of a university. Lat. 13° 33' S., Lon. 72° 4' W. Pop. above 40,000. (P. C.)

CY'-PRUS, (Gr. Κυπρος; Turk, Kib'-ris',) a large i. in the Mediterranean, situated near the coasts of Syria and Asia Minor, between 34° 32' and 35° 44' N. Lat., and 32° 16' and 34° 41' E. Lon. Its length is about 140 m.; its greatest breadth about 56 m. In 1571, Cyprus was wrested from the Venetians by the Turks, in whose possession it has remained ever since. Two-thirds of the inhabitants are Christians, who are cruelly oppressed by their Turkish masters; under whom, Cyprus, from being one of the most fertile and beautiful spots in the world, has been converted almost into a desert. Pop. estimated at above 60,000. (E. G.)—Adj. and inhab. CYP'-RI-AN and CYP'-RI-OT'. The former should be employed only when ancient Cyprus is referred to.

CZERNIGOW. See TCHERNIGOF.

CZERNOWICE, chër'-no-vit'-sêh, or TSCHERNOWITZ (chër'-no-wits', sometimes improperly written Czernorvicz), a t. of Austrian Galicia, cap. of a circle of the same name, on the Pruth. Lat. 48° 15' N., Lon. 26° 10' E. Pop. about 7,300. (P. C.)

CZIRKNICZ or **ZIRKNITZ**, tsëërk'-nits, a small t. of Illyria, near a lake of the same name about 20 m. in circumference, and intersected by the parallel of 45° 45' N. Lat., and the meridian of 14° 23' E. Lon. This lake is remarkable for the great variation in the height of its waters. The bottom, which is formed of limestone rock, is full of clefts and fissures, through which the water passes at about forty different openings, into subterraneous channels and caverns, and goes to supply the neighbouring streams. Frequently, during the dry season, the bottom of the lake is covered with luxuriant herbage, which is made into hay. Some parts are sown with millet and buckwheat. The depth of the Lake of Czirknicz, in the deepest part, is only about 56 ft. In Jan., 1834, the waters left the lake, and did not return till March, 1835; an occurrence which, for the long cessation of the waters, is said to be unprecedented.

DAC'-CA, a large manufacturing t. of Hindostan, formerly the cap. of Bengal, on a branch of the Ganges, called *Booree Gunga* or Old Ganges. Lat. 23° 44' N., Lon. 90° 29' E. Pop. estimated by Hamilton

DALMATIA, dal-mâ'-she-â, a kingdom belonging to the crown of Austria, situated between 42° and 45° N. Lat., and 14° 30' and 19° E. Lon.; bounded on the N. by Hungary, N. E. and E. by Turkey, and S. W. by the Adriatic. The area is estimated at 5,098 sq. m. Pop. 320,000. (P. C.) Zara is the seat of government.—Adj. and inhab. DALMATIAN, dal-mâ'-she-ân.

DÂL'-TON, a small t. of England, in Lancashire, about 18 m. W.N.W. of Lancaster.

DA-MAS'-CUS, (Arab. Shâm-el-Kebeer, *i. e.* Damascus the Great,) a celebrated city of Syria, cap. of a pashalic of the same name, situated in the fertile plain at the E. base of that chain of mountains called the Antilibanus Mountains, about 190 m. S. by W. from Aleppo. It is one of the most ancient towns in the world, having existed in the time of Abraham (Gen. xiv. and xv.). Besides the title of *kebeer* (great), that of *sher-eeft* (venerable or holy) is sometimes given to it.† Its ancient name was Damesk. Damascus is celebrated for the number of its orchards, and the abundance of exquisite fruits which they produce; whence the Arabs regard it as one of their four terrestrial paradises.

SCOTT'S *Bridal of Triermain*, Canto III.

This, as we are informed, corresponds to the native accentuation.

† In this and similar cases, the article *el* is changed in sound to *es*, so as to correspond with the initial letter of the word to which it is prefixed; accordingly, Sham-el-Shereef is to be pronounced sham-es-shereef. When Sham is used to designate the country of Syria, the article is usually employed, *e. g.*, El Sham, pronounced es-sham.

DAM-I-ET/-TA, (Arab. Dâ-mî-ât' or Dum-yât'), a t. of Lower Egypt, on the right bank of one of the principal branches of the Nile, about 6 m. above its mouth. The name is derived from Thamiatis, which was a small town under the Byzantine emperors. After the conquest of the Saracens, it was surrounded with strong walls, and became one of the most commercial and wealthy towns of Egypt. It was thrice taken by the Christians in the middle ages, (once by Roger, of Sicily, and twice by the crusaders,) and as often recovered. At last, to prevent any other attacks from this quarter, the sultans of Egypt razed it to the ground and removed the inhabitants about 4 m. further inland. Hence arose New Damietta. This place, though much decayed, is one of the best built towns in Egypt; and its manufactures and commerce are still considerable. Lat. $31^{\circ} 26'$ N., Lon. $31^{\circ} 50'$ E. The pop. is estimated by Balbi at about 20,000, though many others make it much higher.

DAM/-PIER'S BAY or SHARK BAY is situated on the W. coast of New Holland, near 25° S. Lat., and 114° E. Lon.

DANBURY, dan/-ber-re, a t. of Conn., in Fairfield co., 29 m. in a straight line W. by N. of New Haven, noted for its manufacture of hats. Pop. of the township, 6,962.

DANT/-ZIC, (Ger. Danzig, dânt/-sig; Polish, Gdansk,) a city of Prussia, the cap. of a large circle of the same name, situated on the left bank of the principal arm of the Vistula, about $3\frac{1}{2}$ m. from the shores of the Baltic. Dantzic is the seat of a number of literary and scientific institutions, among which we may mention the academical gymnasium, with seven professors, and the public library, which contains 30,000 vols. Its manufactures are considerable. It is one of the strongest fortresses, and is the first emporium of maritime commerce in the Prussian dominions. Lat. $54^{\circ} 21'$ N., Lon. $18^{\circ} 38'$ E. Pop. above 62,000. (B.)

DAN/-UBE or DAN/-AW, (Gr. Ἰστρος; Lat. Danubius and Ister; Ger. Donau, dô/-nou; Hung. Duna, doo-nõh;) a large r. of Europe, second only to the Volga. It originates on the E. declivity of the Black Forest (Schwarzwald), about 24 m. from the banks of the Rhine, in $48^{\circ} 6'$ N. Lat., and $8^{\circ} 9'$ E., at an elevation of near 3000 ft. above the level of the sea. Its general course, to near Waitzen, in Hungary, is easterly, from Waitzen to the influx of the Drave (Lat. $45^{\circ} 33'$ N., Lon. $18^{\circ} 58'$ E.) it is almost due S.; thence nearly E. by S. till it reaches the 28th degree of E. Lon., where it suddenly changes its direction to the N., and, after a course of about 90 m., again flows easterly and empties

Fåte, fâr, fâll, fât; mè, mêt; pine or pîne, pîn; nô, nôt; öö as in *good* ;

itself into the Black Sea, by several mouths. Its whole course is estimated at about 1,770 m. It is navigable for large ships as far as Silistria; but there are rapids near New Orsova, where it leaves the Austrian dominions, which it is impossible for any vessel to ascend, although those drawing not more than 2½ ft. water may sometimes descend. The navigation is also impeded in the upper part of its course, by a great number of rocks, and, lower down, by sand banks. This river is remarkable for its winding course and for the multitude of its islands.

WORDSWORTH'S *Excursion*, Book VII.

DAR'-DAN-ELLE/. The Dardanelles are fortifications erected on each side of the Hellespont, which is called, from them, the Strait of the Dardanelles. These fortifications originally consisted of four castles, two on each side of the strait, but, since the beginning of the present century, they have been improved and increased in number. Some of the guns are very large; one of them takes, for a single charge, 330 lbs. of powder. The name *Dardanelles* is in all probability derived from Dardanus or Dardania, an ancient town near the Hellespont, built by Dardanus, the ancestor of Priam.

THE STRAIT OF THE DARDANELLES OF HEL'-LES-PONT', which connects the Sea of Marmora with the Ægean Sea, is above 50 m. in length, and from 2 to 10 m. in breadth.

DAR'-FOOR' (Darfur), a country of central Africa, situated between 10° and 16° N. Lat., and between 26° and 30° E. Lon. Its extent and real boundaries are very imperfectly known. It may be considered as a large oasis, lying in the S. E. part of Sahara. **FOOR** appears to be the proper name, as *dar*, in the native language, signifies country in general. **DARFOOR**, however, seems to be established by universal usage.—The inhabitants are negroes; in religion they are Mahometans. The government is a despotism. Cobbe is the capital, and has a pop. of about 6,000. (B.)—Inhab. **FOOR'-I-AN** (Furian).

The waters of the Lake Asphaltites are pungent and bitter. Asphaltum floats upon its surface, and covers the whole extent of its shores. The Jordan flows into it at its N. extremity, but the lake has no outlet. Near the southern portion of the Dead Sea is a low mountain ridge, about 150 feet high, which is one mass of solid rock-salt, covered with layers of soft limestone and marl. Several of the streams which flow into the sea in this part, are salt as the saltiest brine. It appears from the researches of a late writer, Russegger, that the Dead Sea is 1,341 French, or 1,429 English feet below the level of the Mediterranean! (P. C.)

The area is calculated at 360,000 sq. m. The climate of Ecuador, as might be expected, varies considerably in different regions. In the valley of Quito the seasons are scarcely distinguishable. The mean temperature of the day, all the year round, is between 60° and 67°, and that of the night between 48° and 52° of Fahrenheit. The winds blow continually, but never with great violence. During the whole morning, till 1 or 2 o'clock, the weather is generally delightful, and the sky serene; but, after this, the vapours begin to rise, which are followed by dreadful tempests of thunder and lightning, with torrents of rain. At sunset, the weather usually clears up, and the nights are as serene as the mornings. Sometimes, however, the rain continues several days. The season between September and May is called the winter, and the remainder of the year the summer. The winter is only distinguished by a somewhat greater quantity of rain, and the summer by a greater number of fine days. The valley of Quito has a mean elevation of about 9,600 ft. above the sea, which may account for the climate being comparatively so cool. In those parts of Ecuador, which lie near the sea, the thermometer ranges much higher. The animal and vegetable productions of this country do not appear to differ from those of the

EDINBURGH, ed'-in-bur'-ūh, the metropolis of Scotland, is situated in the northern part of a co. of the same name, about 1½ m. from the Frith of Forth, and 337 m. N. by W. from London. Edinburgh is divided, by a valley, into two parts, the Old and the New Town. The former is irregularly built, the streets are narrow, and some of them are very dirty. In this part, the houses have sometimes 12 and even 14 stories. The New Town, on the other hand, is built with great regularity, with wide and handsome streets, and will bear a comparison with the finest capitals of Europe. Among the remarkable edifices of Edinburgh, we may mention the palace of Holyrood, the ancient residence of the Scottish kings; and the castle, situated at the western extremity of the Old Town, on a rugged rock which rises on three sides, from a level plain, abruptly, to a height varying from 150 to 200 ft. In some parts, the precipice is perpendicular, and even overhangs its base. The summit is crowned with military works, which, contrasted with the sublime and rocky scenery beneath, give an aspect to the whole inexpressibly grand and romantic. The castle, with its works, occupies an area of 7 acres, and is separated from the town by an open space nearly 300ft. square. Edinburgh has several noble charitable institutions, among which may be cited the Royal Infirmary, Heriot's Hospital, the Institution for the Deaf and Dumb, and the Asylum for the Blind. The multitude of its learned societies, its celebrated university, one of the first in Europe, the various and important publications which are continually issuing from its presses, and its numerous

periodicals, among which the "Edinburgh Review" is especially distinguished, appear fully to justify the appellation of "the modern Athens," which has frequently been bestowed upon the Scottish capital. The name of Edinburgh is supposed by some to be derived from Edwin, a king of Northumberland, in the time of the Heptarchy. This derivation is supported by the fact that the town was anciently called EDWINEBURG or EDWINEBURCH. The castle of Edinburgh was long called by the name of *Castellum* or *Castrum Puellarum*, i. e. the "maidens' castle," in consequence, it is said, of its having been the residence of the daughters of the Pictish kings. E'-GYPT (Gr. *Αἴγυπτος*; Lat. *Ægyptus*; Hebrew, Mizr or Mizraim; Arab. Mâsr or Musr; Coptic, Cham or Khem); a country occupying the N. E. part of Africa, situated between 24° 8' and 31° 32' N. Lat., bounded on the N. by the Mediterranean, E. by the little r. El Arish, on the border of Palestine, the desert of Idumea and the Red Sea, S. by Nubia, its southern limit, from the oldest time, having been fixed at the cataracts of Asswan (Assouan), and W. by the Libyan desert. Its length, from N. to S., is about 520 m.; its breadth is difficult to determine; if it be considered to extend from the Red Sea to the most westerly of the oases belonging to Egypt, it will amount to between 300

and 400 m. Egypt may be regarded as essentially consisting of the valley of the Nile and the Delta, as these are the only parts, except the oases, where there is a settled population. Following the windings of the river, the length of the valley of the Nile, from Asswan to the southern extremity of the Delta, is about 500 m. The breadth varies considerably, but it is seldom more than ten miles, and in many places, especially in Upper Egypt, is not two, including the breadth of the river, which varies from 2,000 to 4,000 ft. This valley is bounded on both sides by a ridge of rocky hills, which rise in some places more than 1,000 ft. above the level of the river. The cultivable land does not extend on either side of the Nile to the base of this ridge. Between the narrow tract, which is fertilized by the overflowing of the river, or by artificial irrigation, and the neighbouring mountains, there is a strip of drifting sand, which, in many places, appears to encroach upon the cultivated ground. The mountain ridges, which enclose the Nile, as above described, separate near Cairo; the eastern one leaves the valley first, and, turning off abruptly, runs towards the N. extremity of the Red Sea. Afterwards the r. enters a wide and low plain, which, from its triangular form, received from the Greeks the name of Delta. (See DELTA.) Here the Nile divides into two branches, that of Rosetta and that of Damiat. Anciently the right side of the Delta was formed by the Pelusiac branch, which detaching itself from the river higher up, flowed to Pelusium, at the E. extremity of Lake Menzaleh. This branch is now, in a great measure, choked up, though it still serves partly for purposes of irrigation. The river at Rosetta is 1,800 ft. wide, and at Damietta (Damiat), about 800. The extreme length of the Delta, from N. to S., is about 100 m.; the distance from Rosetta to the Damiat mouth is about 84 m. The Delta, however, must be regarded as extending in breadth considerably beyond these limits, and may properly be said to include all that tract below the termination of the valley of the Nile, which is irrigated by that river, or by the various canals which are connected with it.

Egypt is commonly divided by geographers of the present day into three regions; viz., BAHARI (bâh'-ree), or Maritime, VOSTANI (vos-tâ'-nee), or WUSTANEE, or Middle, and SAID (sâ'-eed'), or Upper Egypt. Bahari corresponds with the division ordinarily called Lower Egypt, which comprises the whole of the Delta, including Cairo and its environs. Vostani or Middle Egypt is understood to extend from the neighbourhood of Cairo to near 27° 30' N. Lat.; while Said comprehends all the remainder of the country, as far S. as the cataracts of the Nile. The entire area of that portion of Egypt which is susceptible of cultivation, is computed at 17,000 sq. m. The climate of this country, during the greater part of the year, is salubrious. The exhalations however, which rise from the soil after the inundations, render the latter part of autumn less healthy than the other seasons of the year. Rain is a very uncommon occurrence in Middle and Upper Egypt; the only supply of water for the animal and vegetable kingdoms which can be relied on, being derived from the Nile. In Lower Egypt, along the

Mediterranean coast, showers are not unfrequent during the winter season.

Without attempting to give even an outline of the history of this country, the most ancient abode of civilization respecting which we have any distinct and satisfactory information, and which holds so important a place in the history of all the more powerful nations of antiquity, we will merely state, that Egypt was conquered by the Saracens, under the caliphate of Omar, about the year 638; afterwards, in 1517, it fell into the hands of the Turks, to whom it was subject, at least nominally, till the French invasion in 1798. Bonaparte took possession of the country, under the pretence of delivering it from the tyranny of the Memlooks. These constituted a sort of military aristocracy, formidable to their Turkish rulers, and most oppressive towards the common people. After the French were expelled by the English, in 1801, Egypt again came into the possession of the Turks, and again the Memlooks displayed their insubordination, and exercised their tyranny. At last the present pasha, Mehemet Ali, contrived to collect most of the beys, with their principal officers, within the citadel of Cairo, under pretence of an entertainment, where he had them all massacred, in March, 1811. The power of the present ruler, though founded in perfidy and violence, has, on the whole, been exercised with justice and wisdom. That ambition and those abilities which have raised him to the independent sovereignty of Egypt and the neighbouring parts of Asia, have been laudably directed towards the political and intellectual amelioration of his people. He is said to administer impartial justice to all his subjects, without regard to race or religion. He has established regular judicial courts and a good police, has done away with torture and other barbarous punishments, and has promoted instruction, by establishing schools and colleges for the arts and sciences, and for military and naval tactics. He has endeavoured, with some success, to remove the prejudices of his subjects against the arts and learning of Europe, and to introduce the European improvements in manufactures and machinery. The government of Egypt, however, is still absolute, in the strictest sense of the word, though the present pasha has chosen to govern, for the most part, according to forms and regulations which he himself has established. The pop. is estimated at 2,000,000. (P. C.) Cairo is the capital.—Adj. and inhab. EGYPTIAN, e-jip'-shun; (Arab. Mus'-ree.)

EHRENBREITSTEIN, à'-rən-brīte/'stīne, an important and celebrated fortress of Germany, in the Prussian prov. of the Lower Rhine, situated on the right bank of the Rhine, opposite to Coblenz, on the summit of a rugged and precipitous rock, which rises 772 ft. above the level of the river. At its base stands the little t. of Thal-Ehrenbreitstein (tāål à'-rən-brīte/'stīne); *i. e.* the "Ehrenbreitstein of the valley," with a pop. of 2,400. (B.) Ehrenbreitstein is connected with Coblenz, by a bridge of boats, and is usually regarded as one of the suburbs of that city.

ERLANGEN, ěr/-lång-ĉn, a walled t. of Bavaria, with a celebrated protestant university, founded in 1743. There are, connected with this, an ecclesiastical seminary, a polytechnic school, a fine chemical laboratory, a library of above 100,000 vols., besides other literary and scientific establishments. The newer portion of Erlangen may vie with the best-built towns of Germany. Lat. 49° 36' N., Lon. 11° 4' E. Pop. about 12,000. (B.)

ERLAU, ěr/-lou, (Hung. Eg/-er; Lat. Ag/ria,) a fortified archiepiscopal t. of Upper Hungary, cap. of the co. of Heves (hev-esh), is situated in the midst of a beautiful and richly-cultivated country, rather more than 70 m. N. N. E. of Pesth. Lat. 47° 55' N., Lon. 20° 23' E. Pop. above 17,000. (B.)

ERNE, LOUGH, lóh ern, a L. of Ireland, situated principally in the co. of Fermanagh. It is usually considered as divided into the Upper and Lower Lake. The two are connected by a narrow channel, perhaps 7 m. long, which might properly be called the river Erne. The lower lake is about 10 m. long and 5 m. wide; the other is not above 1½ m. long.

ERZROOM (Erzrum) or ARDZ-ROOM; *i. e.* the "land of Rome,"* an

* The name was probably given by the Turks, in contradistinction to other conquests made near the same time, among nations who had no connexion with Rome. It will be recollected that the Byzantine empire, from which this part of Asia was wrested, was originally a portion of the great Roman empire; and it appears to have been still regarded in that character by the surrounding nations.

important commercial t. of Turkish Armenia, cap. of a pashalic of the same name, situated in an extensive and fertile plain, not far from the Kara Soo, or W. branch of the Euphrates. In the early part of the present century, the pop. of this city was estimated at 100,000, but, after being occupied by the Russians, a few years ago, it was almost deserted by its inhabitants. Since its restoration to the Turks, however, it has been gradually recovering its population and prosperity. Lat. 39° 57' N., Lon. 41° 15' E.

ERZGEBIRGE, erts/-ga-bëër/-gêh, *i. e.* "ore mountains," a chain of mountains in Germany, which extend along the boundary line between Bohemia and Saxony. It is rich in metals of almost every kind. Silver is obtained in considerable quantities; lead and cobalt are abundant. The tin mines of Saxony, in this region, are the most valuable on the continent of Europe, and yield annually 140 tons. Arsenic, antimony, bismuth, manganese, calamine, copper, and mercury, are found here. Gold, also, occurs, but in very small quantities. The length of the chain is about 100 m.

ES-CAM/-BĪ-Ā, a r. which rises in Ala., and, passing into Florida, joins the Conecuh. The river thus formed, falls into Pensacola Bay. It is usually called the Escambia, though above the junction the Conecuh is the principal stream.

ESCAMBIA, a co. forming the W. extremity of Florida, bordering on the above r. Pop. 4,351. Co. t. Pensacola.

ESCURIAL, ês-koo-re-âl/, a small t. of Spain, situated in the kingdom of Toledo, 27 m. N. W. of Madrid, remarkable for a vast and magnificent edifice, founded by Philip II., in commemoration of the victory gained over the French, at St. Quentin, in 1557. It is laid out in the form of a gridiron; the royal residence forms the handle, which is attached to a rectangle 640 ft. long, and 580 wide; in this part the average height, to the roof, is 60 ft. At each angle, there is a square tower, 200 ft. high. The whole number of windows in the establishment is not less than 4,000. The Escorial comprises a royal residence, a monastery, a college, a rich library, and a noble church, of which the dome is 330 ft. in height, besides several other minor compartments. It was built in the form of a gridiron, it is said, because St. Lawrence, on whose anniversary the victory was won, suffered martyrdom on an instrument of that kind. Lat. 40° 36' N., Lon. 4° 8' W.

ESNĒ, es/-nêh' or es/-nâ', (Anc. Latop'olis,) a commercial t. of Upper Egypt, on the left bank of the Nile, remarkable for its ruins, especially for those of an ancient temple, with a supposed representation of the Zodiac, which (as the position of the constellations therein figured does not at all correspond to the present appearance of the heavenly bodies) has led some philosophers to infer, that it must have been constructed at an extremely remote epoch. One celebrated *savant*, M. Dupuis, came to the conclusion that this temple, as well as that of Denderah, could not be less than 15,000 years old. It was, however, supposed that the Zodiac of Esné was the more ancient by several centuries. But M. Champollion, who is so justly distinguished for having unlocked

the mysteries so long concealed in the Egyptian hieroglyphics, considers himself authorized, by a number of facts, to infer that this, on the contrary, is the newest of all the ancient temples which still exist in Egypt. It is probably not 2,000 years old. Lat. 25° 19' 39" N., Lon. 32° 34' 30" E. Pop. estimated at 4,000. (B.)

ESQUIMAUX, es'-ke-mō', a nation consisting of various tribes, who inhabit the northern portions of America. They differ greatly from the other savage tribes of this continent, both in language and personal appearance. In stature they are diminutive, seldom exceeding five feet. Their faces are broad, and approach more to the rounded form than those of Europeans. They have high cheek bones, large mouths, and thick lips. They are said not to be deficient in mechanical ingenuity.

ETIENNE, SAINT, sânt êt'-e-enn', an important t. of France, in the dep. of Loire. Its increase, of late years, has been very great. The town owes its prosperity to its situation in the coal district, though the colliers belong rather to the neighbourhood, than to the t. itself. The coal is abundant, and of good quality. St. Etienne has some important manufactures, especially in hardware. Fire-arms are made here on a more extensive scale than in any other town in France. Lat. 45° 26' N., Lon. 4° 23' E. Pop., including that of the suburbs, 52,000. (B.)

ET'-o-wĀH (generally called Hî'-tow-ah, and sometimes written *Hightower*), a r. in the N. W. part of Ga., one of the branches of the Coosa.

EU, uh, a t. of France, in the dep. of Lower Seine, 91 m. N. N. W. of Paris. In the middle ages it was a strong and flourishing place, but it has since sunk into decay. The massive ruins of the walls and towers still remain. Pop. in 1832, 3,356. (P. C.)

EUPEN, oi'-pen, (called Néau, nâ'-ô', by the French), a flourishing t. in the Prussian prov. of the Lower Rhine. Lat. 50° 39' N., Lon. about 6° E. Pop. about 11,300. (P. C.)

EUPHRATES, u-frâ-têz, (Turk. Frât,) a large r. of W. Asia, which is formed near 39° N. Lat., and 39° E. Lon., by the union of two rivers, to both of which the name of Frat is occasionally applied; viz., the Moorâd (Murad), or S. branch, and the Kârâ Soo (Sû), or N. branch of the Euphrates. The Kara Soo, or the Frat, properly speaking, rises N. of Erzroom, in about 40° 30' N. Lat., and 41° 30' E. Lon. The upper portion of the Euphrates has a very circuitous course, but its general direction is about S. E. It joins the Tigris in about 31° N. Lat., and 47° E. Lon., to form the Shatt-el-Arab. Its whole length is estimated at 1,360 m. One of the steamers in the Euphrates expedition of 1836, 7, and 8, ascended as far as Beer (Bir), about 37° N. Lat., and 38° E. Lon.

FLOR'-ENCE, (It. Firenze, fe-ren'-zâ, or Fiorenza, fe-o-ren'-zâ: Anc. Floren/tia,) an archiepiscopal t. of Italy, the cap. of the grand-duchy of Tuscany, is situated on both sides of the r. Arno, in the midst of the delightful and highly cultivated Valdarno (or Val d' Arno, *i. e.* "Vale of the Arno"), about 145 m. N. by W. from Rome. It is, on the whole, one of the most beautiful cities in Europe, though many of the streets are narrow, and the architecture of several of its palaces reminds one of the fortresses built in the middle ages. The churches of Florence are among the most magnificent in Christendom; Santa Maria del Fiore, (sân'-tâ mâ-ree'-â del fe-o'-rà) called also the *Duomo*,* (doo-o'-mo,) deserves particular mention. Its dome will bear a comparison with that of St. Peters, at Rome, and actually served as a model to Michael Angelo for erecting the magnificent cupola of that far-famed cathedral. The Tuscan capital contains numerous institutions for the promotion of the arts, sciences, and literature, among which we may cite the Imperial Academy of Fine Arts, the Medical and Surgical College attached to the Hospital of Santa Maria Nuova (noo-o'-vâ), and the gallery of paintings and the library, in the palace Pitti (pit'-te),

the residence of the grand-duke. This library contains 70,000 printed vols. and 1,500 manuscripts; among others, the correspondence of Machiavelli and Galileo. There is another library in the Palazzo Vecchio* (pâ-lât/-so vek'-ke-o) or the town-house, which was anciently the seat of the government of the Florentine republic, containing 150,000 printed vols. and 12,000 manuscripts. In the same building there is contained one of the richest existing collections of sculptures, paintings, medals, and other works of art. Florence holds a conspicuous place in the history of modern Italy. It was founded by a colony of soldiers, sent out by Octavius, afterwards the first Roman emperor. It does not appear to have attained to any very great importance till in the early part of the 12th century, when, like the other towns of Tuscany, it began to govern itself as an independent republic. Soon after it became distinguished as the principle theatre of the famous contest between the Guelphs and Ghibelines. It remained in the enjoyment of a precarious and turbulent liberty, interrupted occasionally by temporary subjection to some of the more powerful neighbouring states, till about the year 1434, when the house of Medici began to exercise the chief authority in the commonwealth. The republican forms, however, continued to be respected during the administration of the first house of Medici; but the foreign wars, which desolated Italy in the 16th century, at length effected the fall of the Florentine republic; and the first line having become extinct, a member of a lateral branch of the Medici was placed by Charles V. as duke of Florence. The Observatory of Sante Giovanni (sân/-to jo-vân'-ne) is in 43° 46' 41" N. Lat., and 11° 15' 54" E. Lon. The pop. of Florence, including the whole commune, amounts to 106,890. Adjective and inhab. S. and W. by the Gulf of Mexico; it contains 28 counties.* Its length, from N. to S., from Cape Sable to the mouth of St. Mary's r., is about 400 m.; breadth of the northern part, 354 m.; greatest breadth of the peninsula, 172 m. The area is estimated at 55,000 sq. m. Pop. 87,401, of whom 47,167 are whites, 925 free coloured, and 39,309 slaves. Ponce de Leon discovered this country in 1512, on Palm Sunday (called in Spanish Pasqua Florida), and from this circumstance bestowed upon it its present appellation. During a great part of the 16th century, the name was applied indefinitely to the S. E. coast of N. America, but was finally restricted to what now constitutes the state of Florida. That portion which lies W. of the r. Appalachicola, was formerly designated West Florida; the remainder, including the peninsula, East Florida.

FOO'-LAH (or Foulah). The Foolaahs are a nation widely spread along the W. coast of Africa, occupying the countries N. of C. Palmas as far as the banks of the r. Senegal. Their principal kingdoms are Foota Toro, Bondoo, Fooladoo, Kaarta Ludamer, and Casson. The Foolaahs, especially those who inhabit the countries which border on the Moorish territories, approach nearer to Europeans in their complexion and general features, than any of the other tribes of W. Africa, except the Moors. Those of Bondoo are described as being of the middle size, well made, and very active, with hair less short and woolly than that of the negroes. In speaking of the negro nations, they always rank themselves with the white people.

 as Londonderry.

FRANCE (Anc. Gal/ia or Gaul; Fr. La France, là frânce); one of the
 largest and most powerful countries of Europe, occupying the W. part
 of the continent, is situated between 42° 20' and 51° 5' N. Lat., and
 4° 49' W. and 8° 16' E. Lon. Bounded on the N. W. and N. by the
 English Channel and the kingdom of Belgium, E. by Germany, Swit-
 zerland, and the Sardinian states, S. by the Mediterranean and the
 Pyrenees, which separate it from Spain, and W. by the Bay of Bis-
 cay and the Atlantic. Its extreme length, from S. E. to N. W. is
 about 680 m.; its greatest breadth, from N. E. to S. W. is about 630 m.
 The area is computed at 200,925 sq. m., and if we include the Island of
 Corsica, which is now incorporated with France, it will amount to about
 204,711. The entire population, according to the census of 1846, was
 35,401,700. France is divided into 86 departments or prefectures,
 which are again divided into 363 sub-prefectures or arrondissements;

ou, as in *our*; th, as in *thin*; TH, as in *this*; n, nearly like *ng*.

these are still further sub-divided into cantons and communes. Each department is under the administration of an officer called a prefect (préfet, præ'fa'); the arrondissements are under sub-prefects (sous-préfets, soo'præ'fá'). Paris is the seat of government.

The surface of France is very diversified. The northern and western regions are occupied by a plain of vast extent, interrupted only by small elevations. There are several chains of mountains near the eastern border, among which are the Vosges, Mt. Jura, and the Cottian Alps. The highest mountain of France is one of the latter group, which has an altitude of 2,163 toises, or 13,700 feet, above the level of the sea. (B.) In the south, the Cevennes extend along the western side of the basin of the Rhone. The soil is generally fertile and the climate affords in perfection the finest fruits of the temperate zone. The principal productions are wheat, rye, maize, oats, potatoes, and the grape. The olive is extensively cultivated in the south, and the rearing of silk-worms forms an important branch of industry. Among the indigenous trees are the apple, pear, chestnut, oak, ash, elm, beech, poplar, and fir. The forests occupy scarcely one-seventh part of the surface. There is probably no country in which the landed property is divided into smaller parcels. Manufacturing industry has made great progress in France, and the arts are brought to a high state of perfection. The most important productions of this department are cotton, silk, and woollen stuffs, hardware, jewelry, porcelain, and chemical substances. The French excel particularly in the manufacture of broadcloth, silks, paper, and fancy articles.

Considered in relation to commerce, France is the second state of Europe. In 1850 the value of the imports was \$151,162,880, and that of the exports, \$217,509,600. Among the chief articles of export are silks, muslins, woollens, wine, brandy, madder, and leather. The products of the soil and of manufactures supply the objects of an immense internal trade, which is facilitated by numerous canals and railways. The aggregate length of the latter, in 1850, was more than 1800 miles. A large majority of the people are Roman Catholics, but there is no religion established by law.

The government, which for many years has been very unsettled, is at present nominally a republic, but in reality a self-constituted dictatorship. The last monarchy ended on the 24th of February, 1848, when a revolution occurred by which Louis Philippe was compelled to abdicate the crown. A provisional government was formed, of which Lamartine and Arago were prominent members, under whose auspices a republic was proclaimed, and a national assembly convened by universal suffrage. The union of church and state was dissolved, and titles of nobility abolished. A constitution was adopted by which the legislative power was vested in a single chamber of deputies. Louis Napoleon, in December, 1848, was elected president for four years; and, according to the constitution, was not eligible for a second term. On the second of December, 1851, the president, by the aid of a venal soldiery, and by a flagrant act of usurpation, dissolved the legislative assembly, imprisoned and banished many of the members, and as-

Fâte, fâr, fáll, fât; mè, mêt: plne or pîne, pîn; nõ, nõt; õõ as in *good*;

sumed the part of absolute dictator. The freedom of the press and of speech were suppressed, and hundreds were massacred in the streets of Paris. A new constitution has since been imposed on the nation, which retains some republican forms, but subverts the foundations and chief defences of public liberty. The legislative power is exercised jointly by the president, the senate, which is appointed by him, and the legislative body, the members of which are elected for six years, and receive no salary. The president alone appoints to all offices, has the initiative of all laws, declares war, concludes treaties, and claims the right to designate the citizen whom he thinks most worthy to succeed him. The name of France is derived from the Franks, (*i. e.* freemen,) a confederacy of various German nations, who overran Gaul, on the decline of the Roman power, and who afterwards were united under one head by Clovis, about the beginning of the 6th century.—Adj. FRENCH; inhab. FRENCH'MAN.

FRANCE, ISLE OF, (Fr. *Ile de France*, eel *dəh* frãnce;) formerly a prov., is now divided into the depts. Aisne, Oise, Seine, Seine and Oise, and Seine and Marne. It received its appellation from the circumstance of its being almost surrounded by the rivers which give name to the above depts., and by some other smaller streams.

FRANK/-FORT (Ger. Frankfurt; fränk'/-föört,) ON THE MAIN, a celebrated city of Germany, the cap of a small republic of the same name, and of the whole Germanic confederation, is situated about 270 m. W. S. W. from Berlin, and 50 m. E. by S. from Coblenz. It stands on the right bank of the r. Main, across which there is a bridge, connecting it with Sachsenhausen (sák'/-səŋ-hou'/-zən), one of its suburbs. Among the more remarkable edifices of Frankfort, may be mentioned the ancient cathedral, where the German emperors were formerly crowned; and the Rømer (now usually written Römer), in which is contained the Wahlzimmer (wáål'/-tsim'/-mər), or Hall of Election, where the electors were wont to assemble for the purpose of electing the emperors of Germany: next to the Wahlzimmer, is the Kaisersaal (ki'/-zər-sáål'), or Imperial Hall, in which the emperor, after his election, held his public dinner. Frankfort possesses a medical institute, founded in 1763, by the liberality of Dr. Senkenberg, to which is attached a botanic garden; the Senkenberg Society of Naturalists, with an extensive museum, is united to the above institution: a philosophical society: Støedel's Institute of the Fine Arts, which contains a choice collection of paintings: a public library, of 60,000 vols., &c. The territory of the republic of Frankfort contains an area of about 91 sq. m. with which it is connected by a railroad. Lat. $38^{\circ} 34' N.$, Lon. $77^{\circ} 38' W.$ Pop. 4,062.

FRED'-ER-IC-TON, the cap. of New Brunswick, situated on the r. St. John, at the head of sloop navigation. It is the seat of the College of New Brunswick. Lat. $46^{\circ} 3' N.$, Lon. $66^{\circ} 45' W.$ Pop. about 3,000. (P. C.)

FREIBERG, frī/-bĕrg, a walled t. of Germany, cap. of the Saxon circle of Erzgebirge, or Ore-mountains, and the centre of administration for the Saxon mines. It is situated near the east branch of the r. Mulde (mōöl/-dĕh), about 1,200 ft. above the level of the sea. Freiberg has a mining academy of considerable celebrity, with a museum, which takes its name from the illustrious Werner, by whom it was founded, and a most valuable collection of models relative to the art of mining. Lat. $50^{\circ} 55' N.$, Lon. $13^{\circ} 19' E.$ Pop. 12,000. (B.) In 1540 it is said to have amounted to 40,000. (P. C.)

FREI-BURG or frī/-böörg, an archiepiscopal t. of Germany, in the grand-duchy of Baden, cap. of the circle of the Upper Rhine, and the seat of a celebrated university, is situated about 100 m. S. W. of Carlsruhe. One of the most remarkable objects in this town is the Münster, or Cathedral, probably the most beautiful and perfect specimen of Gothic architecture in Germany. Freiburg contains a great number of literary and scientific institutions, and several charitable establishments. Lat. $48^{\circ} N.$, Lon. $7^{\circ} 53' E.$ Pop. 15,000. (B.)

FREISING, frī/-zing, or FREISINGEN, frī/-zing-ĕn, a t. of Bavaria, about 20 m. N. N. E. of Munich, chiefly remarkable on account of its school for the blind, and other institutions for education. Lat. $48^{\circ} 24' N.$, Lon. $11^{\circ} 45' E.$ Pop. 3,200. (B.)

FREISTADT, frī/-stätt, a t. of Upper Austria, important on account of its position on the railroad which connects Gmund with Budweis, in Bohemia. Lat. $48^{\circ} 29' N.$, Lon. $14^{\circ} 22' E.$ Pop. 2,000. (B.)

FRÉJUS, frà'-zhūce/, (Anc. Fo'rum Ju'lii,) a t. of France, in the dep. of Var, situated on the coast of the Mediterranean, near the mouth of the r. Argens (ar'-zhân'). In the time of Augustus it was a large and handsome city, and was then the ordinary station of the Roman fleet in Gaul. There are some remains of the ancient ramparts, which appear to have enclosed a site five or six times as large as that occupied by the present town. Two of the Roman gates still remain, besides many other ruins. The name, Fréjus, is a corruption of Forum Julii; in the dictionary of Expilly, published in the middle of the last century, it is spelled *Fréjuls*. Lat. $43^{\circ} 26' N.$, Lon. $6^{\circ} 44' E.$ Present pop. about 2,500. In the time of the first Roman emperor it amounted to 100,000. (B.)

the N.W. part of Switzerland, bordering on the L. of Neufchâtel. The area is computed at 588 sq. m. Pop. in 1834, 89,192. (P. C.)

FREYBURG or FRIBOURG, the cap. of the above, situated on the Sarine (sâ'-reen/), or Saane (sââ'-neh/), a tributary of the Aar, about 17 m. S. W. of Bern. A part of the town is built upon a steep declivity of rock, where the roofs of several houses serve as a pavement for the street above. There is an iron suspension bridge over the Sarine, 885 ft. in length, and 170 ft. above the level of the river. It was erected in 1834, and is one of the finest in the world. Among the scientific and literary institutions of Freyburg, the Lyceum with a professorship of common and civil law; the Gymnasium; the College of the Jesuits; the Public Library; and the Cabinet of Natural History; may be mentioned. Lat. 46° 48' N., Lon. 7° 9' E. Pop. in 1834, 8,535. (P. C.)

FREYSTADT. See FREISTADT.

FRIEDLAND, freed/-land or fret/-lânt, a small t. in the N. extremity of Bohemia, from which the celebrated Wallenstein took the title of duke. Lat. 50° 57' N., Lon. 15° 8' E.—Also, a town of E. Prussia, on the Alle, remarkable for a victory gained by Bonaparte over the Russians and Prussians, in 1807, which led to the peace of Tilsit. Lat. 54° 26' N., Lon. 21° 1' E.

FRIENDLY or TONGA (tong/-a) ISLANDS, a group in the Pacific, situated between 18° and 23° S. Lat., and 173° and 176° W. Lon. The inhabitants belong to the Malayan race. They are represented as an industrious, ingenious, and brave, but treacherous people. Their number is estimated at 200,000. (P. C.) The name of these islands was bestowed by Cook, because the inhabitants received him in so friendly a manner, though it is now known that they intended to kill him, and seize his vessels.

FRIESLAND, freez/-land, or VRIESLAND, or FRIESIA, free/-zhe-a, a prov. occupying the N. N. W. extremity of Holland. It is sometimes called, though not by Hollanders, West Friesland, in order to distinguish it from East Friesland, in Hanover. The area of Friesland is about 1,030 sq. m. The pop. is estimated at 221,000. (P. C.) Leeuwarden is the chief town.—Adj. FRIESIC, free/-zik, and FRIESIAN or FRISIAN, free/-zhe-an; inhab. FRIES/-LAND-ER, and FRISIAN* or FRIESIAN.

FRIESLAND, EAST, or AURICH, ou/-rik, a principality in the N. W. part of Hanover. Emden is the chief town.

FRIO, free/-o, a cape on the S. E. coast of Brazil. Lat. 22° 54' S. Lon. 41° 36' W.

* FRISIAN properly relates to the nation who formerly inhabited this and the neighbouring regions, and who are mentioned by Tacitus under the name of Frisii. They appear to have been a tribe of Germans. Those of their descendants who are settled among the small islands on the western coast of Sleswick, preserve not only the name of Frisians, but many vestiges of their customs and dress. The Friesic language, which is quite distinct from the Dutch, in many points bears a striking resemblance to the English.

FRISCHE HAFF, frish/-əh háff, *i. e.* "fresh bay;" or **FRISCHE SEE** (say), *i. e.* "fresh sea," an arm of the Baltic, lying between 54° 14' and 54° 43' N. Lat., and 19° 10' and 20° 30' E. Lon. Its length is near 60 m.; its greatest breadth is about 13 m. A number of rivers fall into this Haff, among which are two arms of the Vistula. It is connected with the sea by a strait called the Gatt, only about 12 ft. deep, and 3,000 ft. wide, and is separated from the Baltic by a strip of land called the Frische Nehrung (nà/-rööng). Its name appears to have been given to it on account of the freshness of its waters—the necessary consequence of its receiving so many considerable streams, while the passage by which it communicates with the Baltic is so limited that it is impossible for the salt waters of that sea to be mingled with the contents of the Frische Haff to any considerable extent.

FRIULI, fre-oo/-le,* (It. pron. free/-oo-le,) the most eastern prov. of Northern Italy, forming a part of the Venetian territory. *Friuli* appears to be derived from the ancient Forum Julii, a Roman colony said to have been founded here by Julius Cæsar.

GA/-ZÀ, an ancient t. of Palestine, situated near the borders of the desert which separates this country from Egypt, about 3 m. from the Mediterranean. Lat. 31° 27' N., Lon. 34° 27' E. Pop. between 3,000 and 4,000. (P. C.)

GE-AU/-GA, a co. near the N. E. extremity of Ohio. Pop. 17,827. Co. t. Chardon.

GEEL, gheel, (Dutch pron. hale,) a t. of Belgium, in the prov. of Antwerp, remarkable for the great number of persons afflicted with insanity, who are sent thither from the surrounding country, to board in private families. The inhabitants, generally speaking, appear to possess great skill in the treatment of this malady, which forms the principal part of their occupation. Lat. 51° 10' N., Lon. 4° 58' E. Pop. about 7,000. (P. C.)

GEFLE, yev'-là, a seaport t. of Sweden, situated at the mouth of a little stream which flows into the Baltic, important on account of its commerce, its dock-yards, and the number of its merchant vessels. It is regarded as the third seaport of Sweden. Here is a celebrated gymnasium. Lat. 60° 40' N., Lon. 17° 8' E. Pop. 8,000. (B.)

GEL/-DERS or GUELTERS, (Dutch, Geldern, hel'-dern,) called also GEL/-DER-LAND, a prov. in the E. part of Holland, bordering on the Prussian dominions. The area scarcely exceeds 2,000 sq. m.. Pop. in 1824, 279,226. Capital, Arnhem. The ancient duchy of Gelders was considerably larger than the present province. One division of it, called Upper Gelders, remained subject to Spain after the successful revolt of the maritime provinces of the Netherlands; and a part of this, including the town of Gelders, now belongs to Prussia.

GEN'-ES-E/-O, the seat of justice of Livingston co., N. Y., situated on the r. Genesee, about 25 m. S. by W. of Rochester.

GEN'-E/-VA, (Ger. Genf, ghenf; Fr. Genève, zhên-ave'; It. Ginevra, jin-â/-vrâ,) a celebrated city of Switzerland, the cap. of a canton of the same name, situated on both sides of the Rhone, where it issues from L. Lemán. The larger part of the town is on the S side, but a portion is built on an island in the river, which is joined to the two banks by bridges. A smaller island, at the very point where the Rhone issues from the lake, is planted with trees, and forms a public promenade. A handsome suspension bridge has recently been thrown across the river. The town is regularly fortified, with ramparts, ditches, and bastions. As a seat of learning, Geneva holds a distinguished rank among the European cities. Its academy, or rather university, founded by Calvin, has the four faculties of theology, law, science, and belles lettres, with forty professors. The Botanic Garden is considered as the first establishment of the kind in Switzerland. Our limits will not permit us to mention even the principal among its numerous literary and scientific institutions; yet we may briefly notice the various collections in the sciences of mineralogy, entomology, botany, &c., especially the botanical library, and the magnificent herbarium of M. De Candolle, which contains not less than 58,000 different species, and may be regarded as the finest collection of the kind which has ever been made. The manufacturing industry of Geneva is chiefly directed to the construction of clocks and watches, and to works in jewelry. It would be difficult to name another town of equal size which has produced so many distinguished persons as Geneva; among these may be mentioned Saussure, Rousseau, Madame de Staël, and Sismondi. Geneva is one of the oldest cities in Western Europe, and is mentioned under its present name, in Cæsar's Commentaries on the Gallic war. (Lib. I., 7 and 8.) After the reformation, it became, under the auspices of John Calvin, one of the principal rallying points of the reformed communion, so as to be styled by some "the Rome of the Protestants." Much of its present moral and intellectual elevation must be ascribed to the strong impression which Calvin stamped upon it three centuries ago. The Observatory is in 46° 11' 59" N. Lat., and 6° 9' 22" E. Lon. Pop. in 1834, 27,177. (P. C.)—Adj. and inhab. GEN'-E-VESE'.

GENEVA, a village of N. Y., beautifully situated at the N. end of Seneca Lake, on the R. R. between Albany and Buffalo.

GENEVIEVE (jen'e-veev') ST., a co. in the E. S. E. part of Mo., bordering on the Mississippi. Pop. 5,313. Co. t. St. Genevieve.

ĜEN'-O-A* (the Gen'ua of the ancient Romans; It. Genova, jen'-o-và; Fr. Gênes, zhain); an archiepiscopal city in the N. W. part of Italy, formerly the cap. of the celebrated republic of this name, situated at the foot of the Northern Apennines, in the recess of a wide gulf on the Mediterranean, to which it gives its name. It is strongly fortified on the land side, being enclosed by a double line of fortifications. Though, in general, irregularly and badly built, it contains many fine edifices; the palace Durazzo, and that of Andrew Doria are among the most remarkable. Genoa has several important literary and scientific institutions; the University, with its twenty-nine professors, the Academy of Fine Arts, and the Institution for the Deaf and Dumb, are perhaps the most deserving notice. The territory of the old republic now forms a part of the kingdom of Sardinia, under the name of the duchy of Genoa. The climate of this region is healthy, and the atmosphere remarkably pure. The Genoese are a shrewd, active, frugal, industrious, and still eminently commercial people. The town is in Lat. 44° 25' N., Lon. 8° 58' E. Population about 100,000. Adj. and inhab. ĜEN'-O-ESE'.

GEORGE, LAKE, a lake in the E. N. E. part of N. Y., situated between the counties of Washington and Warren; it is 33 m. in length, and about 2 in breadth. Its outlet, which is 3 m. long, flows into Lake Champlain. It is studded with small islands, and its waters are remarkably pure and transparent: these circumstances, together with the wild and lofty hills by which it is surrounded, render it almost unequalled for picturesque and romantic beauty.

GEORGE, ST., (Port. Sam Jorge, soung zhor'-zhà,) an i. of the Azores, intersected by the parallel of 38° 30' N. Lat., and the 28th meridian of W. Lon. Length above 30 m.; mean breadth only 4 or 5 m.

GEORGE'-TOWN, formerly STABROEK (stã'-brook), the cap. of British Guiana, situated near the mouth of the r. Demerara. It formerly belonged to the Dutch. Lat. about 6° 48' N., Lon. 58° 7' W. Pop. about 10,000. (B.)

GEORGETOWN, a dist. in the S. E. part of S. C., intersected by the Great Pedee r., and bordering on the sea. Pop. 20,647. Co. t. Georgetown.

GEORGETOWN, a port of entry, cap. of the above situated on Win-yaw Bay, at the mouth of the Great Pedee r. Lat. 33° 21' N., Lon 79° 17' W. Pop. estimated at above 3,000.

GEORGIA, jor'-je-a, (called by the Russians Grusia, groo'-se-â,) a considerable country of Asia, situated between the Black Sea and the Caspian, and extending from 38° 18' to 43° 52' N. Lat., and from 39° 43' to 50° 14' E. Lon. These, however, are to be understood as the limits of the Russian prov. of this name. Georgia Proper is considerably less extensive. There is some diversity among geographers respecting its boundaries; but it appears to have included originally nearly the whole of the southern declivity of the Caucasus, from the Caspian to the Black Sea. The origin of the name is unknown: some derive it from the r. Koor (Kur), which intersects nearly the whole extent of this fine country. The Persians call it Goorgistan. The climate of Georgia is mild and, in general, very healthy. The Georgian girls, like those of Circassia, are celebrated for their beauty, though their complexion is said to be less delicate, and their figure less graceful. This country produces many excellent fruits, among which are peaches, apricots, and figs. The vines are abundant, and of a good quality; the wine that is made from them is mostly sent to Persia. The pop. of Georgia Proper is estimated at 300,000. (M. B.) Capital, Tiflis.—Adj. and inhab. **GEOR'-GI-AN**.

GEORGIA, one of the thirteen original U. S., between 30° 21' and 35° N. Lat., and 81° and 85° 50' W. Lon; bounded on the N. by North Carolina and Tennessee, N. E. by South Carolina, E. and S. E. by the Atlantic, S. by Florida, and W. by Alabama; and divided into 94 counties.* Length, from N. to S., about 300 m.; greatest breadth, from E. to W., near 250 m. The area is estimated at 62,000 sq. m. Pop. 905,999, of whom 521,438 are whites, 2,880 free coloured, and 381,681 slaves. Milledgeville is the seat of government.

GERA, grâ'-râ, a t. of Germany, the seat of government for the Reuss principalities, which are on the W. border of Saxony. It is also the seat of a Protestant consistory. Lat. 50° 53' N., Lon. 12° 4' E. Pop. about 9,000. (B.)

To distinguish it from other places of this name, the town is often called St. Germain en laye (ân là), *i. e.* "in the lane or passage," probably referring to its position on one of the roads leading to the forest. GER-MAN-Y (Lat. Germa/nia; Ger. Deutschland, doich/-lânt; Fr. Allemagne, âll'-mân/); an extensive country of Europe, situated between 45° 30' and 55° 50' N. Lat., and 4° 45' and 22° 54' E. Lon. These limits have reference to all the territories comprised in the Germanic confederation, including some districts which do not belong to Germany Proper; *e. g.* Luxemburg, and Friuli. According to the more strict application of the name, Germany is bounded on the N. by the Baltic, E. by Poland, Galicia, and Hungary, S. by Croatia, Illyria, Italy, and Switzerland, and W. by France, Belgium, and Holland. Its length, from the Netherlands to the E. part of Prussia, is upwards of 700 m.; its breadth is very unequal; measuring from N. to S., from the Baltic to the southern limit of Tyrol, it amounts to near 600 m. The area is stated at 284,000 sq. m. Before the French Revolution, the German empire was divided into nine circles; namely, those of Austria, Bavaria, and Suabia, in the S.; Franconia, Upper Rhine, and Lower Rhine, in the middle; and Westphalia, Upper Saxony, and Lower Saxony, in the N. Other countries, however, were considered as forming parts of the empire, of which the principal were Bohemia, Silesia, Moravia, and Lusatia. The present Germanic confederation, as established by an act of the Congress of Vienna, on the 8th of June, 1815, consists of thirty-eight independent states. The central point and organ of the confederation is the Federative Diet, which sits at Frankfort on the Main. It exercises its authority in a double form: 1st, as a general assembly, termed Plenum; and, 2dly, as a minor council, called the Federative Diet Ordinary. The Plenum meets only when an affair relating to all the confederation is to be decided. It has seventy votes, of which four belong to Austria, and as many to each of the five German kingdoms; the other states, according to their respective importance, have three, two or one vote each. The Federative Diet Ordinary possesses in all seventeen votes, out of which eleven principal states have each a single vote, and the remaining twenty-seven only six joint votes. Austria presides in both assemblies, and decides in case of equality. The objects of the Germanic confederation are mutual defence against a common enemy, and the preservation of internal security and peace among the confederated states, which have no right to declare war on each other, but must submit their differences to the decision of the Diet. The following is a list of the states, with the number of votes which each possesses in the general assembly.

The following is a list of the Austrian, Prussian, Dutch, and Danish possessions comprised in the Germanic confederation:

AUSTRIAN.—The archduchy of Austria, the duchies of Salzburg, Styria, Carinthia, Carniola, Austrian Friuli, the territory of Trieste, the county of Tyrol, with Vorarlberg, the kingdom of Bohemia, the margraviate of Moravia, and Austrian Silesia.

PRUSSIAN.—The provinces of Brandenburg, Pomerania, Silesia, Prussian Saxony, Westphalia, and the provinces of the Rhine.

DUTCH.—The grand-duchy of Luxemburg.

DANISH.—The duchies of Holstein and Lauenburg.

Nothing is known of the early history of Germany, except what we derive from the Romans. In the time of Julius Cæsar, the Germans (Germani) were regarded as the most formidable and warlike of all the European barbarians. To this character they appear to have been indebted for the appellation by which they were known among the surrounding nations. *Wehrman*, i. e. "war-man," was changed by the Romans into *German*, as they probably had no other mode in which they could indicate more nearly the sound of the barbarian name.* In the early part of the third century the Alemanni or Allemanni appear as one of the most conspicuous and powerful of the German na-

* It is curious to observe how often *w*, in a Teutonic language, is changed to *g* in a Romanic. Among many other instances, we may cite the following: Ger. *wehr*, Sp. *guerra*, Fr. *guerre*; Eng. *ward*, Sp. *guarda*, Fr. *garde*; Eng. *waste*, Sp. *guastar*, Fr. *gâter* (originally *gaster*); Eng. *wager*, Fr. *gager*; Eng. *warrant*, Fr. *garantir*. tions, if they were not rather a union of various nations, as their name (Allemanen, *all men*, or *all sorts of men*), would seem to imply. Though often defeated, the Allemanni harassed almost continually the Roman frontier on the side of Germany, during the decline of the Western empire. But having, in a sanguinary battle, been utterly routed by the Franks, under Clodwig, in 496, they were afterwards united to the Suevi, and with them consolidated into a dukedom, called the Duchy of Allemannia. From the Allemanni the French and Spanish names of Germany, *Allemagne* and *Alemania*, are derived. The Germanic empire dates from the time of Charlemagne, by whom it was founded, in the latter part of the 8th century. Conrad, the first duke of Franconia, was elected emperor about the year 911, from which time the crown of Germany remained elective till 1806, when Francis II. abdicated the imperial crown of Germany, and declared the dissolution of the Germanic empire. After the dethronement of Napoleon, in 1815, the new system of general government, called the Germanic confederation, was established, as already explained.—Adj. ÇER/-MAN and ÇERMAN/-IC; inhab. GERONA, HÀ-FO/-NÀ, a t. of Spain, in Catalonia, the cap. of a dist. of the same name, and formerly important on account of its fortifications. Lat. 42° 2' N., Lon. 2° 47' E. Pop. 6,000. (B.)

GERS, zhare, a dep. in the S. of France, intersected by a small r. of the same name, which flows into the Garonne. Pop. 312,882. (B.) Capital, Auch.

GEX, zhex, a small t. of France, near the frontiers of Switzerland, 11 m. N. by W. from Geneva, in a dist. of the same name, which forms a part of the dep. of Ain.

GHADAMIS, ghâ-dâ/-mîs, or ghâ-dâms/, a commercial t. of N. Africa, in an oasis of the same name, which is tributary to Tripoli. It is a rendezvous for caravans travelling from Tripoli to Timbuctoo. Lat. about 29° 50' N., Lon. near 11° E.

GHAUTS, Mountains of Hindostan, which are usually divided into the Western and the Eastern Ghauts. The Western Ghauts extend along the W. coast of Hindostan, from the r. Tapty, on which Surat stands, to about 11° N. Lat., and form the boundary of the table land of the Dekkan on the side towards the Indian Ocean. The Eastern Ghauts, which separate the table land of the Dekkan from the low and level country along the Bay of Bengal, extend from about 12° to 18° N. Lat. To another mountain ridge, which bounds the table land of the Dekkan on the S., and which has only been explored within the last twenty-five years, the name of Southern Ghauts has recently been applied. The word *Ghaut* literally signifies a "mountain pass."

Scheldt, 31 m. W. S. W. from Antwerp, and 30 m. N. W. from Brussels. It is intersected by a great number of navigable canals, through which it communicates with most of the important towns of the Low Countries. The Sas-van-Ghent Canal (first opened for use in 1828), which runs towards the N. into Zealand, connects Ghent with the W. Scheldt, and allows vessels from the sea, drawing 18 ft. of water, to enter the city. In the centre of the town a magnificent basin has lately been excavated, which is connected with the above canal, and is capable of containing 400 vessels, of 900 tons each. Ghent is a handsome and well-built city, and is surrounded by walls with seven gates. This town appears to have existed as early as the 5th century. It was formerly much more populous than at present. During the reign of the emperor Charles V., who was born here, Ghent contained 175,000 inhabitants (P. C.) Towards the end of the 13th century, it is said to have exceeded the capital of France, in extent and population. Besides the University and the College, Ghent possesses a royal academy of drawing, sculpture, and architecture; a royal society of agriculture and botany; and various other establishments for the promotion of literature, science, and the arts. Lat. 51° 3' N., Lon. 3° 44' E. Pop. 84,000. (B.)

GHOO'-GHOO'-LA, a valley in Afghanistan, 30 or 40 m. N. W. of Cabool, remarkable for two rude colossal statues, one of a male, about 120 ft. in height; the other of a female, about 70 ft.

GIBRALTAR, je-braul'-ter, (Sp. pron. he-brâl-tar': Anc. Cal'pe,) a fortified rock in the S. extremity of Spain, which is connected with the continent by an isthmus of low sand, and almost surrounded by the waters of the Mediterranean, forming a promontory, 3 m. in length, from N. to S., and from 1,200 to 1,400 ft. in height. Towards the S., it terminates in what is called Europa Point. In the early part of the 8th century, an army of Saracens, under the command of Tarif, landed here, and erected a castle on the shoulder of the rock, which was called by the invaders Gibel-Tarif (*i. e.* the "mountain of Tarif"), whence, in all probability, the present name is derived. The ruins of the Moorish castle are still to be seen. At present, Gibraltar is perhaps the strongest and most remarkable fortress in the world. Besides other fortifications, of extraordinary strength, there are two excavations, called galleries, wrought in the solid rock, which are sufficiently capacious to contain the whole garrison in time of siege. They are narrow, and extend from two to three miles in length. Along these galleries, at intervals of every twelve yards, are port-holes, bearing on the isthmus and bay. Gibraltar is a free port, and forms a convenient entrepôt for merchandise destined for the neighbouring provinces of Spain and Africa. The Bay of Gibraltar, lying W. of the promontory, is commodious, and secure from all the more dangerous winds. It is near 8 m. in length; its greatest breadth is about 5 m.; its depth, in the centre, exceeds 100 fathoms. The town of Gibraltar is situated near the foot of the hill, at its N. W. side. Lat. 36° 6' 30" N., Lon. 5° 19' W. Pop. estimated at about 16,000. (P. C.)

GLARUS, the cap. of the above canton, is situated on the r. Linth, which flows into the lake of Wallenstadt. It contains a Protestant college, and about 4,000 inhabitants. (P. C.) Lat. 47° 2' N., Lon. 9° 2' E.

GLAS'-GÔW, a city of Scotland, in Lanarkshire, situated on the N. bank of the Clyde, 43 m. W. by S. from Edinburgh. In extent and population, as well as in commerce and manufactures, it is the first town of Scotland. Three different canals terminate in Glasgow; through one of them, the Forth and Clyde Canal, it has communication with Falkirk, Grangemouth and Edinburgh. The town is, in general, regularly and handsomely built; the streets are large, clean, and well paved, and adorned with a number of fine edifices, both public and private. The ancient cathedral stands in the highest part of the city, and is considered as the finest specimen of Gothic architecture among the churches of Scotland. Among the various scientific and literary institutions of Glasgow, we may mention the University, which was attended, in 1826-7, by 1,027 students; the Hunterian Museum, with a superb collection of anatomical preparations, and the institution founded by Professor Anderson, of which it is the object to furnish, at a very moderate expense, a regular course of instruction, by popular lectures, to persons not wishing, or not able, to enter any of the universities. Glasgow exhibits an astonishing augmentation in the number of inhabitants, of late years. The pop. of 1841, which, including the suburbs, amounted to 274,324, exceeded that of 1831 by more than 72,000. In 1780, the town contained only 42,832 inhabitants. (E. G.) The Observatory is in Lat. 55° 51' 32" N., Lon. 4° 17' 54" W. (P. C.)

PORT-GLASGOW is situated in Renfrewshire, on the Frith of Clyde, about 20 m. below Glasgow. The citizens of the latter town having experienced great inconvenience from the want of a seaport, founded a harbour here in 1668, and afterwards obtained a charter from the crown, constituting it a free port. Pop. 6,973.

GLATZ (Polish, Klodz'-ko), a fortified t. of Prussian Silesia, cap. of a circle of the same name on the Neisse (nî'-cch). It is surrounded by a double wall. Lat. 50° 25' N., Lon. 16° 37' E. Pop., exclusive of the military, 6,400. (B.)

Hydrabad, celebrated for its diamond mines. It appears, however, that these mines, mentioned so frequently by geographers as well as others, *have never had an existence*. The "diamonds of Golconda" are thus designated, from having been wrought in this town, which was, for many centuries, distinguished for its traffic in those precious stones. (B.) Golconda is situated a few miles to the W. of the city of Hydrabad. Lat. 17° 23' N., Lon. 78° 26' E.

GOLDBERG, golt/-bèrg, a manufacturing t. of Prussian Silesia. Lat. 51° 4' N., Lon. 15° 56' E. Pop. 6,400. (B.)

GOLD COAST, a part of Guinea, the limits of which are not exactly defined. In its most extensive application, the name comprises a maritime tract extending from the little r. Assinee (about 3° 20' W. Lon.) to the eastern mouth of the r. Lagos, (4° 20' E. Lon.) That portion, however, which lies E. of the r. Volta, is often called the Slave Coast. Some writers describe the Gold Coast as limited on the W. by Cape Three Points (about 2° 10' W. Lon.); others make Cape Apollonia the western boundary. Of all parts of Guinea, and indeed of the African coast, this is the one where European settlements and trade have been carried to the greatest extent. Its name sufficiently indicates the cause. It appears, however, that the gold for which this region formerly enjoyed an exaggerated celebrity, was chiefly procured from other portions of Africa.

GOLNOW, golt/-nov, a t. of Prussia, in Pomerania, 18 m. N. E. of Stettin. Pop. 3,600. (B.)

GOM-BROON', called, also, BUN'-DER AB-BAS'/-SI, a t. of Persia, situated at the entrance of the Persian Gulf, opposite to the far-famed island of Ormuz. Formerly it carried on an extensive trade, and its population is said to have amounted to 30,000; it is now reduced to 3,000 or 4,000. (P. C.) According to Balbi, it is still populous during the winter season. Lat. about 27° 12' N., Lon. 56° 3' E.

GOMERA, go-mà/-rà, one of the Canary Islands, situated between 28° and 28° 13' N. Lat., and 17° 15' and 17° 35' W. Lon. It is about 20 m. long, and contains an area of 10½ sq. leagues. Pop. 11,742. (P. C.)

GONAYVES, LES, là go'-nive', a small seaport t. of Hayti, cap. of the dep. of Artibonite. Lat. 19° 20' N., Lon. 72° 30' W.

GON'-DAR, a city of Abyssinia, formerly the cap. of the whole empire; at present the chief town of the kingdom of Amhara, is situated in a plain between 20 and 30 m. N. of Lake Dembea. The houses are mostly covered with straw; they are isolated, so that the city occupies a large space in proportion to the number of inhabitants. Lat. about 12° 30' N., Lon. 37° 32' E. Pop. 6,000 (B.); others, however, have estimated it much higher, but have probably been deceived by the extent of ground which the town occupies.

GOOCH'-LAND, a co. in the E. central part of Va., N. of, and bordering on James r. Pop. 10,352. Seat of justice, Goochland c. h.

running from Argyleshire, on the Atlantic, across the island, into Aberdeenshire, on the German Ocean, and then forming another ridge in a north-westerly direction, extends to the county of Moray, and the borders of Inverness. There appears, however, to be considerable diversity among geographers respecting the application of the name Grampian. The term is not used by the natives of that part of Britain. It is derived from the Mons Grampius, mentioned by Tacitus in his *Agricola*. In its most extensive application, it appears to comprehend all the mountain ranges N. of a line drawn from the Frith of Clyde to the Frith of Tay, thus including all the higher mountains of Scotland. Ben Ne^{vis}, in Inverness-shire, is the highest of the Grampian system, and of all the mountains in Great Britain, rising 4,368 ft. above the level of the sea. Ben Mac Dhu, situated in the W. part of Aberdeenshire, is second only to Ben Nevis, having an elevation of 4,305 ft. above the sea; Ben Cruachan (croo'-kan), in Argyleshire, S. of Loch Etive, is 3,669 ft. high. Ben Lō'-mond, in Stirlingshire, is perhaps the best known of the mountains of Scotland, on account of its forming the southern extremity of the Highlands. It rises 3,197 ft. above the level of the sea. Ben Ven-u', in Perthshire, extends along the southern shores of Loch Katrine, and presents the most striking features in the picturesque scenery for which that lake is so remarkable. Ben Vorlich (vor'-lix) or Vairlich, in Perthshire, is second only to Ben Venu, among all the mountains of Scotland, for wild and variegated scenery.

GRAN, grân, (Hung. Esztergom, es-têr-gom,) an archiepiscopal and royal free t. in the central part of Hungary, cap. of a co. of the same name, is situated on the right bank of the Danube. At the foot of the castle, which stands on an island in the river, connected with the town by a flying bridge, is an establishment for warm baths. Lat. 47° 47' N., Lon. 18° 45' E. Pop. about 10,950. GRANADA, grân-â'-dâ,* (Sp. pron. grâ-nâ'-dâ,) a kingdom or prov. of Spain, in Andalusia, bordering on Murcia and the Mediterranean. It is sometimes called Upper Andalusia.

GRANADA, an archiepiscopal city of Spain, the cap. of the above, is situated near the river Genil (hâ-neel'), in the midst of a plain celebrated for its fertility and for its delicious climate. This town was built by the Saracens, in the 10th century. After the overthrow of the kingdom of Cordova, Granada became, in 1238, the cap. of the new kingdom and the last bulwark of the Moslems in Spain. Towards the close of the Moorish dominion, its population amounted to 400,000 (B.), and, in 1491, its walls were defended against the armies of Ferdinand and Isabella, by 100,000 men; but it was at last reduced, on the second day of the year 1492. The Alhambra, formerly the palace and fortress of the Moslem kings, an edifice of almost unequalled magnificence, is

The house of commons consists of men elected by the different counties, cities, boroughs, and universities, to represent them in parliament. It is required by law that the candidates be possessed of a certain amount of property, excepting the sons of peers, and those who are to represent the universities. The number of members of the house of commons, at present, amounts to 658, of whom 471 are chosen by England, 29 by Wales, 53 by Scotland, and 105 by Ireland.—Adj. BRIT'-ISH; inhab. BRIT'-ON.

GREECE, (Anc. Gr. Ἑλλάς, *Hellas*; Lat. Græ'cia,) a country in the S. E. part of Europe, once distinguished above all others as the seat of civilization, learning, and the arts. Passing over that period of Grecian history which was so brilliant, and is so well known, we will merely observe that, after undergoing various vicissitudes, during the decline of the Roman power, Greece at last became permanently incorporated with the Ottoman empire, on the fall of Constantinople, 1453, and remained in this condition till 1821, when the last successful struggle for Grecian freedom commenced. After a long and sanguinary contest, through the interference of England, France, and Russia, the independence of Greece was at length recognised by the Turkish sultan, in 1829. The present kingdom of Greece is situated between 36° 23' and 39° 14' N. Lat., and 20° 43' and 24° 35' E. Lon., including the island of Negropont. The northern boundary of the continental portion extends, in a somewhat tortuous line, from the Gulf of Volo, on the E., to the Gulf of Arta on the W. A considerable part of it is formed by the mountain ridge called Othrys, which runs nearly E. and W., a little N. of the 39th parallel. All the principal islands of the Ægean Sea lying W. of the 26th meridian of E. Lon., with the exception of Crete, belong also to the kingdom of Greece. Area estimated at 18,500 sq. m. Pop. 700,000. (B.) The government is a limited hereditary monarchy, under the protection of England, France, and Russia. Athens is the capital.—Adj. and inhab. GREEK and GRECIAN, gree'-shun.

GREEN'-LAND, (Dan. Grön'-land or Groenland, being the same in signification with the English name.) It appears to be now ascertained that Greenland is not, as was formerly supposed, a peninsula of the new continent, but an insular group, consisting of two or three large islands, surrounded by several other smaller ones. (B.) That portion which is the best known is situated between Iceland and the American continent. The most southern point is Cape Farewell, Lat. 59° 49' N., Lon. 43° 54' W. A large portion of the eastern, as well as the whole northern coast, is still unexplored. The whole country may be regarded as one enormous mass of rocks; in many places it rises close to the water's edge into precipitous and lofty mountains, crowned with inaccessible cliffs. The climate, as might be expected, is extremely cold, but is considered very healthy. Generally speaking, July is the only month in which there is no snow. Graah observes that, on the eastern coast, S. of 65° N. Lat., in 1830, the sea every night was covered with a crust of new ice, as early as the close of August. He states, however, that in February, the thermometer did not sink lower than 6° below the zero of Fahrenheit. Vegetation must, of course, be very scanty in such a country and climate. It appears that no kind of grain succeeds here. Potatoes are planted only towards the most

southern extremity. The only domestic animal of the Greenlanders is the dog, which is used to draw the sledges. Rein-deer, hares, foxes, and white bears appear to be the only wild animals among quadrupeds. Land-birds are not numerous, but sea-fowl are exceedingly abundant, as are also many kinds of fish. Greenland belongs to the crown of Denmark.—Inhab. GREEN'-LAND-ER.

GREEN'-OCK, an important manufacturing and commercial t. of Scotland, in Renfrewshire, on the S. side of the Frith of Clyde, 21 m. W. by N. from Glasgow. The harbour has sufficient depth of water for the largest vessels, and good anchorage. Steamboats run daily from this town to Belfast, in Ireland. Lat. 55° 58' N., Lon. 4° 44' W. The pop., according to the last census, amounts to 36,135, exceeding that of 1831 by more than 9,000.

GREENS'-VILLE, a co. in the S. E. part of Va., intersected by the Meherrin r., and bordering on N. C. Pop. 5,639. Co. t. Hicksford.

GREEN'-UP, a co. forming the N. E. extremity of Ky. Pop. 9,654. Co. t. Greenup.

GREEN'-VILLE, a dist. in the N. W. part of S. C., bordering on N. C. Pop. 20,156. Seat of justice Greenville c. h.

GREENWICH, grin'-idge, a t. of England, in Kent, situated on the right bank of the Thames, 5 m. E. S. E. of London. Here is a hospital for disabled seamen, which is considered one of the finest in the world, containing accommodations for about 3,000 persons. The money received from visitors and from other sources is appropriated to the support of a school, in which about 200 of the children of the inmates are instructed in those branches which relate to a seafaring life. Greenwich is also distinguished as the seat of the Royal Observatory, from the meridian of which, English astronomers and geographers compute the longitude. Lat. 51° 28' 39", Lon. 0° 0' 0". Pop., including an area of about 3 sq. m., 29,755.

GREIFSWALDE, grifs'-Wal'-deh, formerly GRIPESWOLD, a t. of Prussia, in Pomerania, situated near a little bay which projects from the Baltic. Here is a university, the buildings of which constitute the chief ornament of the town. It has thirty professors, and a library of above 32,000 vols. Lat. 54° 4' N., Lon. 13° 33' E. Pop. 8,000. (B.)

GRENADA, gren-à'-da, one of the Lesser Antilles, about 20 m. long and 9 m. broad. It is intersected by the 12th parallel of N. Lat., and by the meridian of 61° 45' W. Lon. Pop. in 1834, 25,422. (P. C.)

GREÑ'-OBLÉ', a fortified city of France, the cap. of the dep. of Isère, and formerly of Dauphiné, on the r. Isère, 296 m. S. S. E. of Paris. This place is famous for the manufacture of gloves, which, according to official documents, amounts to 3,600,000 pair annually. Among the various literary and scientific institutions of Grenoble, may be mentioned the *Académie Universitaire*, the *College Royal*, and the Society of Science and Arts. In the time of the Romans this town was known by the name of Cularo, which was afterwards, in the fourth century, changed, in honour of the emperor Gratian, to Gratianopolis, of which

the modern Grenoble is a corruption. Lat. $45^{\circ} 12' N.$, Lon. $5^{\circ} 44' E.$ Pop. 26,000. (B.)

GRINDELWALD, grin/-dɛl-wält', a village of Switzerland, in the canton of Berne, situated in a romantic valley of the same name, which is intersected by the parallel of $46^{\circ} 39' N.$ Lat., and the 8th meridian of E. Lon. In the vicinity is the immense glacier of Grindelwald.

GRISONS, gre'-zɔn', (Ger. Graubündten, grou/-bünt-ɛn,) the largest* canton of Switzerland, occupying the S. E. extremity of that country. Its greatest length, from E. to W., is about 87 m.; its greatest breadth, from N. to S., is about 54 m. The area is computed at about 3,000 sq. m. Pop. 96,000. (P. C.) Capital, Coire. *Grisons* in French signifies "gray," and *Graubundten* in German, the "gray allies." The name originated in the following circumstance. In the year 1424, the chief inhabitants of this portion of the country, having become weary of the oppression of their feudal lords, met under a large maple, in a forest near the village of Trons, and entered into a solemn compact to defend each other's property and persons, and to oblige their lords to respect the same. This was called the Gray League (Graubund, grou/-boont), from their being dressed in gray frocks. The maple tree of Trons remained standing till near the close of the last century: it was felled during the French invasion.

GROD'-NO, an ancient t. in the S. W. part of European Russia, the cap. of a gov. of the same name, situated on the Niemen, 156 m. N. E. of Warsaw. The Polish and Lithuanian Diets were formerly sometimes held here. Lat. $53^{\circ} 40' N.$, Lon. $23^{\circ} 50' E.$ Pop. above 10,000. (P. C.)

GRON'-ING-ɛN or hrō/-ning-ɛn, a prov. occupying the N. extremity of Holland, bordering on the kingdom of Hanover and the German Ocean. The area is 770 sq. m. Pop. in 1824, 153,860.

GRONINGEN, the cap. of the above, and the most important town in the N. of Holland, is situated on the Hun/-sɛ, about 12 m. from its entrance into the Lauwer Zee (lou/-wer zay). The great church of St. Martin is the most remarkable edifice. Among the literary and scientific institutions of Groningen, the University and the Botanic Garden may be mentioned. GUADALAJARA or GUADALAXARA, ġwâ`-dâ-lâ-hâ/-râ, a manufacturing t. of Spain, in New Castile, the cap. of a prov. of the same name, is situated on the r. Henares, a branch of the Jamara, 33 m. N. E. by E. of Madrid. Pop. 7,000. (B.)

GUADALAJARA or GUADALAXARA, a large and handsome city of Mexico, the cap. of the state of Xalisco, situated on the r. Santiago. The streets are regular and spacious; there are fourteen squares and twelve fountains, and many fine edifices. The town contains several convents, and a number of churches, among which the Cathedral is perhaps the most remarkable, being considered one of the most magnificent in Mexico. Guadalaxara has a university and several other institutions for education. Four newspapers were published here in 1826. Lat. 21° 9' N., Lon. 103° 2' W. The pop. is variously estimated; Balbi gives 45,000, but some rate it as high as 70,000.

GUADALOUPE, gau`-da-loop/ or ġâ`-dâ`-loop/, an island, or, more correctly, two islands, divided from each other by a very narrow channel, belonging to the group of Lesser Antilles. It is from 60 to 70 m. in length; its greatest breadth is about 25 m. (P. C.) The most important town is Basse Terre, situated near the S. W. point of the island. Lat. 15° 59' N., Lon. 61° 45' W.

GUADALQUIVIR, commonly pronounced in English gau`-d'l-quiv/-er, (Sp. pron. ġwâd-âl-ke-veer/; Anc. Bætis;) or the "Great River,"* a r. in the S. of Spain, which rises in the mountains on the N. E. confines of Granada, and, running in a very circuitous course, falls into the Atlantic, in about 36° 44' N. Lat., and 6° 20' W. Lon. Its length is above 300 m. It is navigable for vessels of 100 tons to Seville.

GUADIANA, gau-de-an/-a or ġwâ-de-â/-nâ, (Anc. Anas,) a r. of Spain, which rises in New Castile, and flowing easterly into Portugal, and afterwards forming a part of the boundary between Spain and Portugal, falls into the Atlantic, in about 37° 10' N. Lat., and 7° 14' W. Lon.

GUANAXUATO, ġwâ-nâ-hwâ/-to, a t. of Mexico, cap. of a state of the same name, situated on the table land, 6,835 ft. above the level of the sea, and surrounded by the richest silver mines in the world, to which it owes its origin and present magnificence. These mines from 1766 to 1820 produced not less than 225,935,736 Spanish dollars. Lat. 21° N., Lon. 100° 55' W. The pop. of this place was exceedingly reduced by the war of independence, but at present it is said to amount to 60,000, including that of the suburbs. (B.)

GUANCAVELICA, ġwâŋ`-kâ-vâ-lee/-kâ, also written HUANCABELICA, a t. of Peru, situated at the height of 12,312 ft. above the level of the sea,

* The name is of Moorish origin. *Guad*, which forms the prefix of the names of so many streams in the S. of Spain, is essentially the same word as *Wad* or *Wady* (see Int. XXVII., 10.), and signifies "river;" *al-quvir* is merely a corruption of the Arabic *al-kebeer* (or *al-kebir*); i. e. "the great."

GUASTALLA, gwâs-tâl`-lâ, a fortified t. of Italy, in the duchy of Parma. Lat. 44° 55' N., Lon. 10° 40' E. Pop. estimated at 6,000. (B.)

GUATEMALA, gau`-te-mâ`-lâ or gwâ-tâ-mâ`-lâ, formerly a prov. of Spanish America, occupying the territory now included in the republic of Central America. Also, the name of two towns in this republic, distinguished as Ancient and New Guatemala.

ANCIENT GUATEMALA, or GUATEMALA LA ANTIGUA, or simply LA ANTIGUA (lâ-ân-tee`-gwâ), the cap. of the state of Guatemala, is built near the site of Old Guatemala (Guatemala la Vieja, —ve-â`-hâ), which was destroyed in 1541, it is said, by enormous masses of water bursting forth from a neighbouring volcano, called, from this circumstance, the *Volcano de Agua* (vol-kâ`-no dà â`-gwâ), or the "water volcano." Guatemala la Antigua has suffered greatly from earthquakes, as well as from two neighbouring volcanoes. Its pop., however, is still considerable, amounting, according to Balbi, to 18,000. Lat. about 14° 26' N., Lon. 90° 23' W.

NEW GUATEMALA or GUATEMALA LA NUEVA (nwâ`-vâ), the cap. of the federal district of Central America, and, provisionally, of the whole confederation, is situated about 30 m. E. N. E. of the preceding. The streets are regular, crossing each other at right angles, and are 40 ft. in width. The houses have only one story, on account of the frequent earthquakes. Guatemala is the residence of an archbishop. It contains several literary and scientific institutions, among which we may mention the University, the Academy of Fine Arts, and the Public Library. Lat. about 14° 35' N., Lon. 90° 10' W. The pop., including that of the immediate environs, is computed at about 50,500. (B.)

GUAXACA. See OAXACA.

GUAYAQUIL, gwî-â-keel', an important seaport t. of S. America, in Ecuador, and the cap. of a dep. of the same name, is situated on the r. Guayaquil, about 40 m. from its entrance into the Pacific. Vessels of considerable size can readily sail up to the town, at high tide, which, at the full and change of the moon, rises 24 ft. The harbour of Guayaquil is the ordinary station for the navy of the republic. Lat. 2° 11' N., Lon. 79° 56' W. Pop. estimated at 22,000. (B.)

GUIANA, ge-â/-nâ, **GUYANA** or **GUAYANA**, a name applied to the N. E. portion of S. America, extending along the coast from the r. Orinoco, or near it, to the r. Oyapok. It is divided into English, Dutch, and French Guiana.

ENGLISH GUIANA lies the farthest west, and is separated from Dutch Guiana by the r. Corantyn (ko'-ran-tine'). On the side towards Venezuela, the boundary has never been determined: it may perhaps be considered to lie about midway between the Essequibo (es-se-kâ/-bo—less correctly, Essequibo), and the Orinoco. Pop. in 1834, 96,581. (M.) Capital, Georgetown.

DUTCH G. or **SURINAM**, soo'-re-nam', borders English Guiana on the E., and is divided from French Guiana by the r. Maroni (mâ-ro-nee'). Pop. probably 65,000. (M.) Capital, Paramaribo.

HAARLEM, HAERLEM, or HARLEM, hāār/-lem, a city of the Netherlands, cap. of North Holland, situated about 11 m. W. of Amsterdam, on the navigable river Spaaren (spāār/-en), which runs from the lake of Haarlem into the river Y. It is fortified in the old style, and was formerly considered a place of great strength. Haarlem was a flourishing manufacturing town in the middle of the 12th century, and acted an important part in the wars between the Dutch and Frieslanders. It attained its highest prosperity in the 17th century, since which time it has greatly declined. Its manufactures, once among the most celebrated in Europe, have fallen into decay. It is still renowned for its gardens, the flowers from which constitute an important object of commerce. Haarlem possesses a number of literary and scientific institutions, among which are an anatomical theatre, an academy of painting, sculpture, and architecture, a public library, and a fine botanic garden. Lat. 52° 23' N., Lon. 4° 38' E. Pop. about 22,000. (B.)

HAARLEMMER MEER, hāār/-lem-mer mair, or THE LAKE OF HAARLEM, situated between the town of Haarlem and Amsterdam, is about 18 m. long, and from 4 to 7 wide, but is said to be only 6 ft. deep.

HAGUE, haig, (Dutch, S'Gravenhaag, s'grá/-ven-hååg,) a large and beautiful town in the Netherlands, the cap. of South Holland, is situated about 3 m. from the sea; communicating, by means of canals, with all the principal places of the kingdom. It is not regularly fortified, but surrounded with a moat, with drawbridges over it. Many of the streets are planted with rows of trees, and paved with coloured bricks. Among the remarkable buildings may be mentioned, the king's palace, distinguished rather for its great dimensions than for the beauty of its architecture; and the palace of the Prince of Orange. The Hague contains a royal museum, with a gallery of paintings, a royal library, and various other literary and scientific institutions. This place, though traversed by a great number of canals, has but little commerce, and its manufactures are not numerous; its importance is chiefly owing to its having been the cap. of the Netherlands, and to its still being one of the residences of the king, and the seat of the supreme court of justice of the kingdom. *S'Gravenhaag* signifies literally "the count's wood," and appears to have owed its origin to a hunting seat of the counts of Holland, situated in a wood. This, however, became a palace as early as 1250, and around it many other houses were soon erected. The Hague is about 32 m. S. W. of Amsterdam. Lat. 52° 5' N., Lon. 4° 16' E. Pop. above 55,000. HAINAN, hî-nan', an important i. in the China Sea, near the S. extremity of the prov. of Canton (Quang-tong), to which it belongs, and from which it is divided by the channel of the Junks, which is only 15 or 16 m. wide. (P. C.) It lies between 18° 10' and 20° 6' N. Lat., and 108° 30' and 111° 5' E. Lon. Length about 180 m.; greatest breadth about 100 m. The area is estimated at above 16,000 sq. m. Khioong-tcheo (ke-oong/-cheo'), the cap., situated on the N. coast, is said to contain 200,000 inhabitants. (P. C.) The interior is occupied by independent savages.

HAINAULT, à'-nô', (Flem. Henegouwen, hen-e-hou/-wën,) a prov. in the S. of Belgium, bordering on France. The area is 1,438 sq. m. Pop. in 1830, 604,957. (P. C.)

HALBERSTADT, hâl/-ber-stått', a t. of Germany, in the Prussian government of Magdeburg, cap. of a circle of the same name. It has a number of institutions for education, and a superb cathedral, dedicated to St. Stephen. Lat. 51° 54' N., Lon. 11° 4' E. Pop. about 17,000. (B.)

the township of Halifax, and parts of the townships of N. and S. Owsram, 26,694.

HALIFAX, the cap. of Nova Scotia, situated on Chebucto Bay, with a harbour spacious, secure, and accessible at all seasons of the year. It is regularly built, with wide and straight streets, though the houses are mostly of wood. Among the public edifices, the most remarkable is the Province Building, said to be the finest structure in British America. It contains chambers of meeting for the legislative bodies, the custom-house, the offices of the provincial government, and the superior law courts. Halifax contains a well-appointed naval arsenal, and a harbour sufficiently large for 1,000 vessels to ride in safety, which is the ordinary station of the navy in time of war. This town has a college and several other institutions for education. Lat. 44° 40' N., Lon. 63° 37' W. Pop. in 1833, exclusive of the military, about 18,000. (M.)

HALIFAX, a co. in the S. part of Va., bordering on N C. and the r. Staunton. Pop. 25,962. Seat of justice, Halifax c. h.

HALL, håll, a t. of Tyrol, with extensive salt-works. The rock-salt is brought from the Salzberg (sålts/-bërg), *i. e.* "Salt-mountain," which is 10 m. distant, and above 5,000 ft. in height. Lat. 47° 18' N., Lon. 11° 31' E. Pop. 5,000. (B.)

HALL, SWABIAN, in the kingdom of Würtemberg, formerly a free imperial city, is situated about 34 m. N. E. of Stuttgart. It contains some valuable salt-works, and about 6,500 inhabitants. (B.)

HALLE, håll/-lëh, the principal t. in the government of Merseburg, in Prussian Saxony, remarkable for its salt-works and other manufactures, its commerce, and especially for its literary and scientific institutions, among which the University stands pre-eminent. This has above 40 professors; the number of students fluctuates between 800 and 900; at one time it amounted to 1,300. Of the numerous charitable establishments of Halle, the Orphan Asylum (Waisenhaus, wi/-zen-house'), founded by Francke, deserves to be particularly mentioned. The workmen engaged in the salt-works are called Hal-lö/-rën (sing. Hallör), and are a peculiar race, distinguished by their physiognomy, costume, and customs, supposed to be descended from the aboriginal inhabitants. They enjoy many privileges and immunities. Lat. 51° 29' N., Lon. 11° 58' E. Pop. of Halle itself, about 17,000 (P. C.); including its immediate environs, 26,000. (B.)

HALLOWELL, hol/-lo-well, a flourishing t. of Kennebec Co., Maine, on the r. Kennebeck, 2 m. below Augusta. Lat. 44° 17' N., Lon. 69° 50' W. Pop. 4,769.

about 75 m. from the German Ocean. The origin of this town is attributed to Charlemagne. It had attained to considerable commercial importance at the beginning of the 12th century. In the 13th, it concurred in the formation of the Hanseatic league. (See HANSE TOWNS.) It suffered extremely from its occupation by the French, during the early part of the present century, especially in 1813 and 1814; in consequence of which, its population was reduced to about 60,000, though it appears, at the present time, to have entirely recovered from the loss which it then sustained. Like most of the old towns of Germany, Hamburg is well fortified. The greater part of the city is irregularly built, and presents but a gloomy appearance, though, in the newer portion, there are several pleasant streets and fine buildings. The most remarkable edifice is, perhaps, the church of St. Michael; it is capable of accommodating 6,000 persons (M.); the steeple is said to be 456 ft. in height. This city contains a number of literary and scientific institutions, among which are two gymnasia, an anatomical institute, a fine botanic garden, and a public library, called the City Library, with nearly 200,000 vols., besides 3,000 manuscripts. Our limits will not permit us to mention even the principal among the multitude of charitable institutions which Hamburg possesses; suffice it to say, that they are on the most liberal plan, and managed in the most exemplary manner. The city of Hamburg, with its territory, constitutes a sovereign state, which is a member of the Germanic confederation. The government is republican. The territory, which contains about 150 sq. m., is bounded on the S. by the Elbe, on all other sides by the Danish possessions of Holstein and Lauenburg. The entire pop., in 1826, according to Balbi, was 148,000. The present pop. of the city is above 137,000. Lat. 55° 33' N., Lon. 9° 59' E.

HANG-TCHEOO (or -tcheou), a large commercial city of China, situated near the mouth of the r. Tsien-tang, with a harbour; it has fortifications, with a numerous garrison, and a population which is estimated at between 600,000 and 700,000. (B.) Lat. about 30° 10' N., Lon. 119° 12' E.

HAN'-O-VER, (Ger. Hannover, hán-no'-ver,) a kingdom in the N. W. of Germany, situated between 51° 18' and 53° 52' N. Lat., and 6° 48' and 11° 40' E. Lon.; bounded on the N. W. by the German Ocean, N. and N. E. by the Elbe (which separates it from the territories of Hamburg, Denmark, and Mecklenburg) and by Mecklenburg, E. and S. E. by Prussia and Brunswick, S. W. by Hesse-Cassel, Lippe, and the Prussian territory of Westphalia, and W. by Holland. It may be regarded as consisting principally of three portions, the two larger of which lie within nearly the same latitudes, and are almost, though not quite, divided from each other by the grand-duchy of Oldenburg; the third is much smaller, and is separated from the more easterly of the other two by the territory of Brunswick. HANOVER, the cap. of the above kingdom, and of the principality of Calenburg, is situated on the r. Leine (*li/-reñh*), which is navigable from the town to its junction with the Weser. The city consists of three parts; the Old Town, the Ægidian New Town, and the New Town on the left bank of the river. The walls, with five gates, were partly levelled in 1780, and laid out in streets. Among the numerous scientific and literary institutions of Hanover, may be cited the Lyceum, and the City Library with 40,000 vols. Lat. 52° 22' N., Lon. 9° 43' E. Pop. above 28,000. (B.)

HANOVER, a t. of Grafton co., N. H., the seat of Dartmouth College, which was founded in 1770, and received its name from the Earl of Dartmouth, one of its principal patrons. It has a library of 16,500 vols.; number of students, 340. The New Hampshire Medical School, founded in 1797, is connected with the above.

HANOVER, a co. in the E. part of Va., N. of Richmond. Pop. 15,153. Seat of justice, Hanover c. h.

HANSE TOWNS, called also the HANSA and HANSEATIC LEAGUE, a celebrated commercial confederacy, which derives its name from the ancient German word *Hanse*, signifying an "association for mutual support." In the middle ages, Hamburg, Lübeck, and afterwards Brunswick, Dantzic, Cologne, Bremen, and a great number of other towns, entered into an alliance, in order to defend their commerce against the numerous banditti and pirates, who then infested Germany and the neighbouring seas. This alliance was termed the Hanseatic League. The confederated or Hanse towns, were each bound to contribute towards maintaining ships and soldiers for their mutual protection, not only against pirates and robbers, but also against the encroachments, oppression, or rapacity of the neighbouring nobles and kings. The number of towns composing the league fluctuated; at one time it is said to have amounted to 85, among which were Bergen in Norway, Berlin, Königsberg, and Cracow. This powerful confederacy formed the first systematic plan of commerce known in the middle ages. The cities enjoyed in England the privilege of exporting goods duty free, and in Denmark, of importing them duty free. Their alliance was coveted, and their hostility feared, by the greatest powers. Several kings were defeated, and one (Magnus of Sweden) was deposed by them. Lübeck was the place of assemblage, and was regarded as the capital of the league, and issued the summons for the regular assemblies of the deputies from all the cities, which were held once in three years; and also for the extraordinary assemblies generally held once in ten years. The epoch of the dissolution of the confederacy may be stated at 1630. However, Hamburg, Lübeck, and Bremen, still constitute an association of a similar character, and, with Frankfort on the Main, are called the free Hanseatic cities of the Germanic confederation.—Adj. HARWICH, usually pronounced hâr'-ridge, a seaport t. of England, in the co. of Essex, 66 m. E. N. E. of London, with a good harbour and a light-house. The name is derived from two Saxon words, *here*, signifying "army," and *wic*, a "fortification;" whence it is inferred that it was once the station of a Saxon army. At present the town appears to be on the decline. Pop., including an area of 3 sq. m., 3,829.

HAV-AN'-A (Sp. pron. â-vâ'-nâ), the cap. of Cuba, is situated on the N. coast of the island. Its harbour, which is very spacious and one of the most secure and commodious in the world, communicates with the sea by a channel rather more than half a mile in length, and from 300 to 350 yards wide, with a depth varying from 8 to 10 fathoms. This channel is protected by two strong fortresses, and a series of fortifications along both shores. The harbour itself is surrounded by heights which shelter it from every wind. Seen from the entrance of the port, Havana presents a beautiful and charming spectacle, but the interior of the town is far from fulfilling the expectations excited in the traveller by the external view. The streets are narrow, crooked, and generally unpaved; and, in the rainy season, they are full of mud. The town is defended by numerous fortifications, which, with the advantage of its natural position, render it one of the strongest fortresses in the world. Havana possesses a university, a botanic garden, and various other literary and scientific institutions. In one of the churches of this town are deposited the remains of Christopher Columbus. Lat. $23^{\circ} 9'$ N., Lon. $82^{\circ} 23'$ W. The pop., including that of the suburbs, was, in 1827, 112,023. (B.) It is now about 150,000.

fortified seaport t., and, after Marseilles, the most important commercial t. of France (B.), is situated on the right bank of the Seine, at its mouth, in the dep. of Lower Seine, about 110 m. W. N. W. of Paris. Before the time of Louis XII., it was a mere fishing town, with a small chapel, dedicated to Notre Dame de Grace (our Gracious Lady), and was hence called Le Havre de Grace, or the "haven of grace." Louis laid the foundation of the importance of the place, since which time it has been gradually advancing to its present distinguished rank among the towns of France. Le Havre is the principal port of Paris; it has regular communication by packets with Southampton, Hamburg, Lisbon, New York, Vera Cruz, and Bahia. Steamboats ply between Le Havre, Rouen, and Paris. This place contains a public library, a museum of natural history, and various other literary and scientific institutions. Lat. 49° 29' N., Lon. 0° 7' E. Pop. in 1836, 25,618. (P. C.)

HAYTI or HAITI, hà'-te, (Fr. Haïti, à'-e'-te',) called also St. DOMINGO (do-ming'-go) and HIS-PAN-Y-o'-LA, next to Cuba the largest of the W. India Islands, is situated between 17° 41' and 19° 59' N. Lat. and 68° 25' and 74° 34' W. Lon. Its extreme length, from E. to W., is about 410 m.; its greatest breadth, from N. to S., is near 160 m. The area is computed at about 25,000 sq. m. The pop. in 1826 was, according to Balbi, 800,000, but some others estimate it considerably higher. Hayti is justly considered the most fertile island in the West Indies. There are several mountain ranges in the interior, the elevation of which has not been ascertained, but it is supposed the highest summits do not fall short of 8,000 feet. This island was discovered by Columbus, in his first voyage, and from him received the name of Hispaniola (is-pân-yo'-là), *i. e.* "Little Spain." It was called, afterwards, St. Domingo, from the town of this name, which was one of the first settlements made on the island. The name of Haïti was given to it by Dessalines, after he had expelled the French in 1803. It is said to be the original Indian name of the island, and to signify "mountainous." Hayti, till recently, formed a republic, with a president chosen for life, and assisted by a legislature, consisting of two houses, a senate and a house of representatives. But on the expulsion of the late president Boyer, the eastern or Spanish portion of the island separated itself

HEL-E'-NA, ST.,* an i. in the Atlantic Ocean, about 1,200 m. W. of the coast of Africa, chiefly interesting as the place of banishment of Napoleon, who was confined here from October, 1815, until his death, which occurred the 5th of May, 1821. James Town, the only town

* Some persons, aiming to be more accurate than ordinary speakers, place the accent on the first syllable—Hel'-e-na. This is unquestionably the correct accentuation of the name of St. Helena, the mother of Constantine the Great; and though it is perhaps probable that the island derived its appellation originally from her, the present pronunciation of its name is so thoroughly established that it would be idle to attempt to change it. It is perhaps scarcely necessary to corroborate, by other authority, what is so universally sanctioned by the practice of our best

HIMALAYAS, him'-a-li'-az, or HIMALAYA MOUNTAINS, extend along the N. E. border of Hindostan, and are situated between 27° and 35° N. Lat., and 73° and 98° E. Lon. The Dhawalaghiri (da-wål'-a-gher'-re), in about 29° N. Lat., and between 83° and 84° E. Lon., is supposed to be the highest of the Himalayas, and of all the mountains in the world, having an elevation of 4,390 toises, or above 28,000 English ft. The Himalayas are also frequently called the HIMMALEH (him-iná'-lęh) MOUNTAINS. *Himalaya* is a Sanscrit word, signifying the "abode of frost or snow." *Imaus*, the name under which at least a part of this vast mountain range appears to have been known to the ancients, had, according to Pliny, a similar signification.

HIN'-DOS-TAN', (*i. e.* in Persian, the "country of the Hindoos"), an extensive country in the S. of Asia, between 8° 4' and 35° N. Lat., and 67° and 91° E. Lon., extending from Cape Comorin, on the S., to the Himalaya Mountains on the N., and from the head of the Bay of Bengal, on the E., to the western border of the valley of Indus, on the W. The length, from N. to S., is near 1,900 m.; breadth, from E. to W., between 1,400 and 1,500 m. The eastern boundary is not definitely fixed. If, as some propose, we allow the possessions of the East India Company to determine its extent in that quarter, we shall obviously violate the natural though somewhat vague distinction between India Proper and Farther India, since, in that case, we must comprise within the limits of Hindostan, a considerable part of that region styled "the Peninsula beyond the Ganges," or "India beyond the Ganges." Malte Brun, who is justly regarded as one of the highest authorities in questions relating to geography, considers that region "which is watered by the Ganges and its tributaries," as properly belonging to Hindostan,

ou, as in *our* ; th, as in *thin* ; TH, as in *this* ; n, nearly like *ng*.

while he appears to include all the country immediately E. of this, in that division of Asia which he calls Chin India. It will be perceived that this is much the same as if he had made the head of the Bay of Bengal the eastern limit of Hindostan. The area of Hindostan is estimated at above 1,000,000 sq. m. The number of inhabitants is computed to exceed one hundred millions. (E. G.) According to Malte-Brun, the population of Hindostan is not less than 134,000,000; the P. C. estimates it at between 110,000,000 and 120,000,000. A large portion of this vast country is subject to the English. The East India Company shares with the king of Great Britain the sovereignty over almost all the provinces which combine to form the Anglo-Indian empire. This company, without possessing the title, enjoys nearly all the rights of royalty. Its authority, however, is dependent on the British Parliament, to which the officers of the East India government are directly responsible. The territory, under the administration of the company, is divided into three governments, designated as the presidency of Bengal, the presidency of Madras, and the presidency of Bombay. The inhabitants of Hindostan may be divided into three principal classes, viz.: the aborigines, the Asiatics of foreign extraction, and the Europeans. The first, or Hindoos, strictly speaking, are by far the most numerous. They are characterized by a multitude of peculiar customs and institutions, many of which appear to have been in existence from the most remote antiquity. Of these, one of the most remarkable is the distinction of *caste*.* The Hindoo writers recognise four pure and original castes, viz.: the brah'-mins or priests; the kshatriyas (shât'-rê-âs) or soldiers, including the princes and sovereigns; the vaisyas (vi'-se-âs), consisting of agriculturists and shepherds; and the sudras (soo'-drâs) or labourers. Besides these four original classes, there are a great number of impure races which have sprung from the mixture of the pure castes. One of the best known is that of the pariahs (pâ'-re-âs), who form a very numerous class. They are among the most abject of all the people of Hindostan, and are often subjected to the most cruel and degrading servitude. The different races are kept distinct from each other by the most rigorous laws. No person, whatever be his merit or genius, can, in any case, rise above the caste in which he is born, though he may forfeit his birth-right by certain misdemeanors and crimes. It is not however, true, as has been frequently asserted, that every individual is obliged to marry in his own caste. A man is allowed to choose his wife out of any of the castes beneath him, but not from those above him. Thus a Brahmin may lawfully marry the daughter of a Sudra, though the offspring of such a marriage does not inherit the father's rank, but belongs to one of the mixed races. But a Sudra cannot form a legal marriage with the daughter of a Brahmin; and children sprung from such a union are considered far inferior in rank to those of a Brahmin and a Sudra woman. The ancient religion of the Hindoos is peculiar, and, in some respects, very remarkable; but

we must refer the reader to other sources for information on this point, as our limits will not permit us to enter upon a subject so intricate and extensive. We may, however, observe, that with the exception of the Brahmins, a majority of whom still adhere to the ancient faith, the sects into which the Hindoos are at present divided, are of comparatively modern origin; and that the various political changes resulting formerly, from the Mahometan, and, more lately, from the European conquests, by diminishing the authority of the Brahmins, have greatly contributed to the rise of new systems of belief among the common people, as well as facilitated the introduction of the religion of other nations. The number of Mahometans in Hindostan may be vaguely estimated at about 10,000,000. Most of these are supposed to be the descendants of Asiatic foreigners. It appears, however, that many of the Hindoos, without fully embracing the Moslem faith, have allowed their original doctrines and practices to be considerably modified by it. The two religions in some parts are on perfectly friendly terms, and the people apply frequently to one another's saints and deities, when their own appear to fail. The European inhabitants of Hindostan may be estimated at about 2,000,000. They are chiefly the descendants of Portuguese. The British, though they are in actual possession of nearly one-half of the country, and dictate to more than three-fourths of it, are said not to exceed 60,000.—Adj. and inhab. **HIN'-DOO.** **HINDUSTANI** or **HINDOSTANEE**, hin-dos-tâ'-ne, is an epithet applied to the language adopted after the Mahometan conquest, as the general means of communication between the Hindoos and Mahometans. It is based on an original Hindoo dialect, with which, however, many Persian and Arabic words have become incorporated.

HOL'-LAND, (Dutch pron. hol'-lânt; originally Ollant, *i. e.* "muddy or marshy land,") a kingdom in the W. of Europe, situated between $50^{\circ} 45'$ and $53^{\circ} 30'$ N. Lat., and $3^{\circ} 20'$ and $7^{\circ} 8'$ E. Lon., (not including the province of Luxemburg;) bounded on the N. by the North Sea, E. by Germany, S. by Belgium, and W. by the North Sea. Its greatest length, from N. to S., is about 185 m.; its greatest breadth, from E. to W., is about 120 m. The area is about 11,000 sq. m. The pop., in 1839, was 2,583,271. (P. C.) According to the census of 1844, it is stated to be 2,953,618. The face of this country is remarkably flat and low, some parts lying even below the level of the sea, against the inroads of which, they are protected partly by immense dikes or artificial banks of earth, and partly by sand-hills cast up by the ocean. From this natural peculiarity the name Netherlands, *i. e.* "Lowlands," is derived. Holland is divided into twelve provinces; viz., Brabant (North), Drenthe, Friesland, Gelders, Groningen, North and South Holland, Limburg, Luxemburg, Overyssel, Utrecht, and Zealand. The Hague is the ordinary residence of the king and court.—Adj. **DUTCH**; inhab. **DUTCH'-MAN** or **HOL'-LAND-ER**.

They are represented as a mild, timid people, perfectly harmless, honest, faithful, and capable of strong attachment. They are a good-natured, and, on the whole, a good-looking race, having, many of them, finely-formed foreheads and prominent features. Their hands and feet are remarkably small, while their limbs are in general well proportioned. Their great defect, or rather vice, is indolence, accompanied by its almost inseparable attendants, degradation and filth. The male Hottentots go nearly naked; the females wear an apron attached to a girdle round the waist, which, however, does not reach to the knees. Their dress is formed of the skin of some animal, commonly of sheep-skin. They lead a wandering life, living chiefly on the milk of their cattle. Their huts are constructed of mats stretched over a frame of sticks, in the shape of a bee-hive, and are easily removed on their pack-oxen, as they migrate from place to place. But few, however, of the tribes have preserved their independence and their original customs, unaltered by the neighbourhood of European civilization, and, we may add, of European vice and cruelty. The state of servitude to which many of these people were formerly subjected, particularly by the Dutch colonists, appears to have nearly deprived them of the little energy and spirit which they derived from nature, and to have greatly reduced the number of those dwelling within the limits of the colony. It is, however, proper to state that slavery was abolished, in this part of the British possessions, by an act which went into operation on August 1st, 1834. Some of the Hottentots, especially the Griguas or Griquas (*gree'-quas*), have made considerable progress in civilization, which they owe to the missionaries established among them.

HOUSATONIC, hoo'-sa-ton'-ik, a r. which rises in Mass., and, flowing southward through Conn., falls into Long Island Sound, about 14 m. S. W. of New Haven.

HOUSTON, hews'-ton, a co. in the S. central part of Ga., bordering on the r. Ocmulgee. Pop. 16,450. Co. t. Perry.

HUD/-SON or NORTH RIVER, one of the finest and most important rivers in the U. S., which rises in the N. E. part of N. Y., and, flowing nearly due S. in its general course, communicates with the Atlantic, about 10 m. below New York. Its whole length is estimated at about 300 m. It is navigable for the largest ships to the city of Hudson, about 130 m., and for sloops to Troy, 166 m.

HUDSON, a city of N. Y., the cap. of Columbia co., is situated on the E. bank of the Hudson, at the head of ship navigation, 130 m. above New York. Lat. 42° 14' N., Lon. 73° 46' W. Pop. 6,286.

HUDSON, a co. in the N. E. part of N. J., bordering on the Hudson r. Pop. 21,821. Co. t. Jersey City.

HUDSON'S BAY, a large bay, extending from the Atlantic westward nearly into the centre of British N. America, is situated between 51° and 64° N. Lat., and 76° and 95° 30' W. Lon. Its length, from S. S. E. to N. N. W., is nearly 1000 m.; its greatest breadth, from E. to W., about 600 m. It is connected with the Atlantic by Hudson's Strait, which is more than 300 m. long, and in its narrowest part is perhaps about 60 m. wide. The southern part, extending from about 51° to 55° N. Lat., is called James's Bay.

HUELVA, wel/-vå, a seaport t. of Spain, in Andalusia, the cap. of a prov. of the same name, is situated on a little bay projecting from the Atlantic. Lat. 37° 15' N., Lon. 6° 49' W. Pop. 8,000. (B.)

HUESCA, wes/-cå, (Anc. Os/ca,) a t. of Spain, in Aragon, chiefly remarkable for its university. Lat. 42° 6' N., Lon. 0° 19' W. Pop. 9,200. (M.)

HULL, or KINGS'-TON-UPON-HULL, an important seaport t. of England, in the E. Riding of Yorkshire, on the N. side of the estuary of the Humber, where it is joined by the r. Hull, 34 m. S. E. of York. This town communicates, by means of canals and railways, with York, Manchester, Liverpool, and all the other principal places of England. Its docks and basins are considered as among the finest in the kingdom. It is the great entrepôt of the commerce of the N. of England, and of that which this country carries on with the northern parts of Europe. The prosperity of this place has been greatly increased by the progress of steam navigation, of which it may be considered as the second great centre on the eastern coast. Hull forms a co. of itself, which contains an area of about 18 sq. m. Lat. 53° 45' N., Lon. 0° 20' W. Pop. of the town, 41,629; of the co., exclusive of the town, 3,544.

HUNGARY, hung/-gá-re, (Hung. Magyar-Ország, möd-yör or-sáág; Ger. Ungarn, ööng/-garn;) an extensive country of Europe, forming a part of the Austrian empire, situated between 44° 28' and 49° 36' N. Lat., and 16° and 25° E. Lon.; bounded on the N. and N. E. by Moravia and Galicia, E. by Transylvania, S. by Turkey, Slavonia and Croatia, and W. by Styria and Austria. Its extreme length, from E. to W. is about 420 m.; the greatest breadth, from N. to S., is about 330 m. The area is computed at 78,822 sq. m. Pop. uncertain, but estimated at upwards of 10,000,000. (M.) The kingdom of Hungary includes, besides Hungary Proper, Slavonia, Croatia, and several districts of less importance. The government is called a limited monarchy, but aristocracy is predominant, and the nobles have great power, while the great mass of the peasantry are in a state of extreme degradation. The kingdom of Hungary formerly included, besides its present territories, Transylvania, Dalmatia, and the Military Frontier; which countries, since their annexation to the crown of Austria, still go under the general name of the Hungarian dominions. The name, *Hungary*, is derived from the Hunni or Huns, a people of Asiatic origin, who invaded and took possession of the country immediately N. of the Danube, towards the close of the fourth century, during the reign of the Roman emperor Valens. The present Hungarians, however, are the descendants of the Magyars, another Asiatic nation, who established themselves here in the ninth century, whence the country is called Magyar-Ország, *i. e.* the "land of the Magyars."—Adj. and inhab. **HUNGARIAN**, hung-gá/-re-an.

ICE/-LAND (Is/-land in the native language), a large i. in the N. Atlantic, belonging to Denmark, situated between 63° 30' and 66° 40' N. Lat., and 16° and 24° 30' W. Lon. Its extreme length is about 250 m.; its greatest breadth about 200 m. The area is vaguely estimated at 40,000 sq. m. The pop. in 1834 was 56,000. (M.) The interior of Iceland is a dreary desert, without a single inhabitant. One mass of icy mountains, called Klofa Jökul (yö/-kul), in the S. E. part of the island, is said to have an extent of not less than 3000 sq. m. The rocks and mountains of this country appear to be chiefly of volcanic origin. In the year 1783, a mountain named Skaptar Jökul poured forth an immense quantity of lava, which destroyed no fewer than 20 villages and 9,000 people, amounting to more than one-fifth of the then population of the island. It was estimated that the whole of the lava discharged would be sufficient to cover an area of 1,400 sq. m. to the depth of 150 ft. Hecla, a celebrated volcanic mountain in the S. W. part of Iceland, about 30 m. from the sea, is 5,530 ft. in height. The Oeräfe Jökul is the loftiest mountain in Iceland, of which any accurate measurement has been made, having an elevation of 6,650 ft. (B.) Among the most remarkable natural curiosities of this country are the Geysers (gî/-sêrs) boiling springs, or rather water-volcanoes. One of these, called the Great Geysir, is said sometimes to project its contents

to the height of from 100 to 200 ft. The climate of Iceland is said to be mild, considering the latitude. Dr. Henderson found the winter that he passed here not severer than the mildest which he experienced in Southern Sweden and Denmark. It appears that corn was once cultivated to a considerable extent, but the inhabitants find it more to their advantage to attend exclusively to the rearing of cattle. Hay is the great harvest of Iceland. The common food of the people is butter, milk, and fish; fresh meat and rye bread are holy-day fare. Fish are very abundant. The reindeer, which were at first introduced from Norway, have greatly multiplied, and live in a wild state. Reikiavik (ri'-ke-a-vik), a little town on the W. coast, is regarded as the cap. of the island. Although its permanent population scarcely exceeds 500, it contains a number of institutions for education, three literary and scientific societies, and a library of 5,000 vols. In its immediate vicinity there is an observatory.—Adj. ICE-LAN/-DIC; inhab. ICE/-LAND-ER.

IN/-DI-A, the name given by the ancients to a country of indefinite extent, in the S. E. part of Asia. It appears to have included Hindostan Proper, the island of Ceylon, and the still undefined region of Farther India. The name is supposed to be derived from that of the Indus, Sind or Hind.—Adj. and inhab. IN/-DI-AN.

The name, EAST INDIES, has an application nearly co-extensive with that of India, though the former seems to be often employed somewhat loosely to denote, besides the Indian continent, not only Ceylon (which has always been considered as a part of India), but also many other islands of the eastern seas, especially those lying near the Asiatic coast, such as Sumatra, Java, Borneo, and the group of Japan.

INDIAN OCEAN, is situated between Africa, Asia, and Malaisia. Its greatest extent, from E. to W., is above 4,000 m.

IONA, e-o'-na, or Ic'-OLM-KILL', (the native name is I, pronounced like *ee*, and signifying "island,") one of the Hebrides, situated near the W. extremity of the island of Mull, intersected by the parallel of 56° 22' N. Lat., and the meridian of 6° 26' W. Lon. Length about 3 m. It is chiefly interesting on account of its ruins and historical remembrances. While western Europe lay buried in ignorance and barbarity, this island was remarkable as the seat of learning and of the Christian religion, which was introduced near the middle of the 6th century, by St. Columba, a native of Ireland. The name Icolmkill is a contraction of I-Columb-kill, *i. e.* the "island of Columba's cell or monastery," *kill* or *kil* signifying any religious residence.

The Mississippi forms the eastern, and the Missouri and Sioux the western boundary of the State: By the census of 1850, Iowa had 192,214 inhabitants; of whom 191,879 were white, and 335 coloured persons. There were 2044 deaths in the year ending June 30th, 1850, or a fraction more than ten in every thousand.

Iowa was divided in 1850, into 52 counties.*

Rivers.—Besides the Missouri and Mississippi, which wash its western and eastern boundaries, the principal rivers in Iowa are the Des Moines, Skunk, Iowa, Red Cedar, Wapsipinicon, Mako'queta, Turkey, and Upper Iowa. All these run in a S. E. direction, and, except the Red Cedar, which is a tributary of the Iowa, all empty into the Mississippi. The sources of the Des Moines, Red Cedar, and Upper Iowa are in Minnesota. The Des Moines, which is about 400 m. long, traverses the central part of the state from the N. boundary to the S. E. extremity. This river might be made navigable for 300 miles by very moderate improvements. The Iowa river is about 300 m. long, and is navigable for small steamboats to Iowa city, 80 miles from its mouth. The other rivers mentioned are from 100 to 200 miles in length, and several of them furnish abundant water-power. The tributaries of the Missouri river from this state are small.

There are no lakes in the state which seem worthy of notice in a general description.

Face of the Country, Soil, and Productions.—The surface of Iowa is generally composed of rolling prairies, and there is nothing within its limits that approaches to the height of a mountain. A plateau called the Coteau des Prairies,† extends from Minnesota into the N. W. corner of this state, and a small section on the Mississippi in the N. E. is too rugged for cultivation. The soil, in general, is extremely fertile and easy of cultivation; and the surface is diversified with prairies and woodlands in convenient proportions. Among the forest-trees are several species of oak, walnut, ash, elm, sugar-maple, hickory, locust, poplar and iron-wood. The grape, gooseberry, and wild plum are among the indigenous fruits.

By the census of 1850, there were in Iowa 814,713 acres of land under cultivation, producing 1,442,074 bus. of wheat, 8,475,027 bus. of Indian corn, 2,012 lbs. of tobacco, 363,398 lbs. of wool, 420 gals. of wine, 1,933,128 lbs. of butter, 198,444 lbs. of cheese, 84,598 tons

of hay, 1,280 tons of hemp, and 70,680 lbs. of maple-sugar. The value of the live-stock was \$3,602,709.

Rich mines of lead have been opened in the counties of Dubuque and Clayton, bordering on Wisconsin. The ore lies deeper than on the east side of the Mississippi. Zinc also is found in connection with the lead. Between the Wapsipin'icon and the Mako'queta rivers there is a tract which abounds in iron-ore, and immense beds of bituminous coal occur in several parts of the state, being a continuation of the great coal field of Illinois. Salt and saltpetre are among the minerals of this state.

Manufactures.—According to the census of 1850, there were 482 manufacturing establishments in Iowa, producing \$500 and upwards annually. The value of homemade manufactures at the same period was \$202,533.

Towns.—Ke'okuk, a flourishing commercial t., is situated on the Mississippi r., at the foot of the lower rapids, 205 m. above St. Louis, and 125 m. S. from Iowa city, lat. 40° 21' N. It is at the head of navigation for the largest steamers,—and owes its importance and rapid growth to this circumstance. The cargoes of steamboats ascending the river are here transferred to flat-boats, and drawn up the rapids by horses, while the steamboat passes over empty. Keokuk has daily communication with St. Louis, by a line of splendid steam-packets. The trade of this place in 1850 was estimated at \$5,000,000. The medical department of the Iowa university is located here. Pop. in 1850, about 4000.

Burlington, one of the oldest towns, and formerly the capital of the state, is situated on the Mississippi r. about 250 m. above St. Louis. It is pleasantly situated and regularly laid out. The houses are substantially built, and more than half of them are of brick. It has a good landing, and is a place of considerable trade. Pop. 4,080.

Muscatine City, situated on the Mississippi r., 312 m. above St. Louis, is rapidly improving in business and population. The first settlement was made here in 1836, and it now contains about 4,000 inhabitants. The west bank of the river at this place presents a series of bold rocky bluffs, and the situation is remarkably healthy.

Iowa City, the capital of the state, is situated at the head of navigation, on the Iowa river, about 80 miles from the Mississippi r. by water, and 30 in a direct line. The State capital is a fine building in the Doric style, and cost \$100,000. Pop. 1,250.

Dubuque (Du-book', oo as in *moon*) is an important town on the Mississippi r. about 460 m. above St. Louis, and in the midst of the lead-mining region. Pop. 3,700.

Davenport and Fort Madison, are also considerable towns, with a pop. of about 3,000 each and are rapidly improving.

Finances, Banks, &c.—The funded debt of the State is \$79,442. The ordinary expenses of government, exclusive of debts and schools, \$25,000 per annum. Assessed value of property in 1850, \$22,623,334. There is but one bank in the State, with a capital of \$200,000.

ou, as in *our*; th, as in *thin*; TH, as in *this*; N, nearly like *ng*.

Government.—The executive power is vested in a governor elected by the people for four years, and receiving \$1,000 per annum. The senate consists of 19 members, also elected for four years, and the house of representatives of 39 members, elected for two years. The legislature meets biennially, and the members receive \$2 per day for the first fifty days of the session, and but \$1 per day for the time they sit after that.

The judges of the Supreme Court are elected by the legislature for six years, and the judges of the District Courts, by the voters in their respective districts, for five years. A system of common schools is provided, and a superintendent of public instruction is directed by the constitution to be chosen by the people for three years. A revenue derived from public lands, and other sources, is set apart for the support of common schools. The fund in 1848 was \$132,908,52.

IOWA, a co. in Wisconsin, bordering on Illinois. Pop. 9,530.

IPSWICH, a t. of England, cap. of the co. of Suffolk, on the Orwell, a branch of the Stour, 63 m. N. E. of London. Pop. of the borough, with an area of nearly 11 sq. m., 25,384.

IPSWICH, a t. and port of entry of Mass., in Essex co., on a r. of its own name, and on the railroad connecting Boston with Portsmouth, 24 m. in a straight line N. E. of the former city. Lat. 42° 41' N., Lon. 70° 46' W. Pop. of the township, 3,000.

IRAK ADJEMI, e'-râk/ âj/-êh-me', an extensive prov. in the N. W. central part of Persia, nearly corresponding to the Great Media of the ancients. With the Arabians, *Irak* signifies Babylonia; *Adjemi* is their name for the Persians; the appellation of the prov., therefore, signifies "Persian Babylonia." (M. B.)

IRE-DELL, a co. in the W. part of N. C., E. of, and bordering on the Catawba r. Pop. 14,719. Co. t. Statesville.

IRE-LAND (Gr. Ἰεργη; Lat. Hibernia; Irish, *E'-rin*), a large i. in the N. Atlantic, lying W. of Great Britain, from which it is separated by the North Channel at the N., by the Irish Sea in the middle, and by St. George's Channel at the S. It is situated between 51° 25' and 55° 23' N. Lat., and 5° 27' and 10° 30' W. Lon. Its length, from N. N. E. to S. S. W., is near 300 m.; its greatest breadth, from E. N. E. to W. N. W., 185 m. The area is estimated at 28,800 sq. m. The pop. according to the census of 1841, was 8,175,273; in 1851 it was reduced to 6,515,794. (American Almanac.) Formerly, Ireland had a parliament of its own, which was subordinate to that of Great Britain; but, in 1800, the two were united, and afterwards received the title of the *Imperial Parliament of Great Britain and Ireland*, while the two countries, thus represented in one legislative assembly, were styled the United Kingdom. Ireland is divided into four provinces, viz.: Ulster in the N., Leinster in the E., Munster in the S., and Connaught in the W. These are subdivided into counties, of which Ulster contains 9

Leinster 12, Munster 6, and Connaught 5, amounting in all to 32. The administration of the government is vested chiefly in the lord-lieutenant and privy council, who are appointed by the crown. Dublin is the capital.—Adj. *I'-RISH*, and *HI-BER'-NĪ-ĀN* (poetical): inhab. *I'-RISH-MĀN* and *HIBERNIAN*.

IR-KOOTSK' (Irkutsk), a city of Asiatic Russia, cap. of a government of the same name, and of E. Siberia, on the Angara, which at this place is about 1,000 ft. wide. The houses are built chiefly of wood. Irkootsk contains a number of institutions for education; it also possesses some important manufacturing establishments and an extensive trade, being the great entrepôt for the commerce of the N. E. of Asia. Lat. 52° 16' N., Lon. 104° 20' E. Balbi estimates the pop. at not less than 25,000.

IR'-O-QUOIS', a co. in the E. part of Ill., bordering on Ind. Pop. 4,149. Co. t. Montgomery.

IR'-RĀ-WĀD'/-DY (or Irrawadi) *i. e.* the "great river," a large r. of Asia, which is supposed to have its source in Thibet, near the E. extremity of the Himalaya Mountains. Its general course is S., and after traversing the whole length of the Birman empire, it empties itself into the Gulf of Martaban, by several mouths. The entire length is estimated at 1,200 m. It may be ascended at all seasons of the year, by vessels of 200 tons, as far as Ava, near 22° N. Lat. and 96° E. Lon., a distance of perhaps 450 m., and, during the rainy season, several hundred miles further. From the apex of the Delta to some distance above Ava, the breadth of the Irrawaddy is seldom less than 1 m., and is sometimes 4 m.

IR'-TYSH' or *IRISH* (Russ. pron. *ěēr-tish'*), a r. in the N. W. part of Asia, which rises in the Chinese empire, and flowing through the lake Saisan or Dzaisan, falls into the Oby, in the Russian government of Tobolsk. Its whole length is perhaps 1,500 m.

IR'-VINE, a seaport t. of Scotland, in Ayrshire, situated on a r. of the same name, the estuary of which forms its harbour. It is about 23 m. S. W. of Glasgow. Pop. of the parish, 5,214.

IR'-WELL, a r. of Lancashire, in the N. W. of England, which flows into the Mersey.

IR'-WIN, a co. in the S. part of Ga., bordering on the Ocmulgee r. Pop. 3,334. Co. t. Irwinsville.

IS-A-BEL'/-LĀ, a co. near the centre of Mich.

ISCHIA, *is'-ke-â*, (Anc. *Æna'ria*, *Inar'ime*, and *Pithecu'sæ*.) a fertile and beautiful i. in the Mediterranean, belonging to the kingdom of Naples, situated scarcely 8 m. from the promontory of Misenum. It is about 7 m. long, and has an area of 21 sq. m. Pop. about 24,000. Ischia, the principal town, stands on the eastern part of the island, in Lat. 40° 43' N., Lon. 13° 56' E., and contains about 3,000 inhabitants. (M.)

ISMAIL, is-mâ-eel', an important fortress of Russia, in Bessarabia, situated on the Kilian arm of the Danube, about 43 m. from the Black Sea. It was taken from the Turks by Suwarrow, in 1790. Lat. 45° 21' N., Lon. 28° 50' E. Pop. 9,000. (P. C.)

ISPAHAN, is'-pâ-hân', or ISFAHAN, (commonly pronounced by the inhabitants spä-hôn',) a celebrated city, formerly the cap. of Persia, situated on the Zenderood, which is said to be about 600 ft. broad at this place, but which is afterwards lost in the sands of the desert. Though still a large city, Ispahan has greatly declined since the time of Abbas the Great, in the 17th century, when its population is said to have amounted to 700,000. At present, however, it appears to be rising slowly from its decay. Balbi estimates the number of its inhabitants at about 200,000, though many others rate it considerably lower. It is still considered as the first manufacturing and commercial town in Persia. Among the interesting structures of Ispahan, we may briefly notice, the royal palace, which contains within itself several other remarkable edifices; and the numerous noble bridges built over the Zenderood, some of which are fallen into stately ruins, while others are still almost entire. This city is the seat of several colleges, among which, that of the Royal Mosque, which may be styled a Mahometan university, is especially distinguished. Lat. 32° 24' N., Lon. 51° 50' E.

ISSOIRE, is'-swâr', a small t. of France, in the dep. of Puy de Dôme, 19 m. S. S. E. of Clermont. Pop. 5,741. (M.)

IS/TRI-A, a peninsula of the Austrian empire, in Illyria, formed by the Gulfs of Trieste and Fiume, bounded on the N. by Carniola.

IT/A-LY (Lat. Ital/ia; It. pron. e-tá/-le-á); a fertile and beautiful country of Europe, remarkable as the seat of the ancient Roman empire, and as the nursery of learning and the arts in the middle ages, is principally formed of a peninsula between the Mediterranean and the Adriatic, which extends from $37^{\circ} 56'$ to about 45° N. Lat., and from about 9° to $18^{\circ} 30'$ E. Lon. In figure it resembles a boot, of which the heel forms the S. E., and the top the N. W. extremity. Its length is about 600 m.; its greatest breadth (measuring from Ancona to the little point of land S. W. of the mouth of the river Albegna, ál-bane/-yá), is about 150 m. Besides the above peninsula, Italy includes a considerable territory N. of it, extending as far as $46^{\circ} 40'$ N. Lat. Considered according to its natural limits, the northern part of Italy comprehends all the southern declivity of the Alps, from the branch called the Cottian to that called the Julian Alps. But these national limits have been modified by political boundaries; so that at present this country is considered to extend from the Gulf of Trieste on the E. to the Rhone on the W. The boundary, however, does not follow this river farther S. than about $45^{\circ} 38'$ N. Lat. Italy then, in the most extensive application of the name, will reach from $37^{\circ} 56'$ to $46^{\circ} 40'$ N. Lat., and from about $5^{\circ} 40'$ to $18^{\circ} 30'$ E. Lon. The greatest breadth of the northern part, measuring nearly from E. to W., is about 380 m. The total area is estimated at about 100,000 sq. m. The population may be stated in round numbers at 20,500,000. Italy, with its dependent islands, is distributed, according to Balbi, into 13 political divisions; viz., Austrian Italy, Swiss Italy, the kingdom of Sardinia, the principality of Monaco, the duchies of Parma, Modena, and Lucca, the grand-duchy of Tuscany, the republic of San Marino, the Papal State, the kingdom of the two Sicilies, French Italy (the island of Corsica), and English Italy (the islands of Malta, Gozzo, &c.) These will be treated of under their respective names.—Adj. and inhab. ITALIAN, e-tal/-yun.

ITALY, AUSTRIAN, comprehends the N. E. portion of this country, and includes what is termed the Lombardo-Venetian kingdom, and, according to some geographers, the gov. of Trieste; but the latter more properly belongs to Illyria, of which kingdom it forms a part. Austrian Italy, in its strictest signification, extends from about $44^{\circ} 48'$ to $46^{\circ} 40'$ N. Lat., and from $8^{\circ} 32'$ to $13^{\circ} 44'$ E. Lon., being bounded on the N. W. and N. by Switzerland, Tyrol, and Illyria, E. by Illyria and the Adriatic, S., S. W., and W. by the Papal State, Parma, Modena, and the Sardinian territories. Length near 250 m.; greatest breadth above 120 m. The area is 18,063 sq. m. Pop. about 4,700,000. (M.) Milan is the seat of government.

ITALY, SWISS, comprehends that part of Switzerland in which the Italian is the prevailing language; namely, the canton of Tessin or Ticino, and some portions of Grisons and Valais.

ITH'-**A-CA**, a flourishing t. of N. Y., cap. of Tomkins co., situated near the S. extremity of the Cayuga Lake, at the termination of the Ithaca and Owego Railroad, about 34 m., in a straight line, S. of Auburn. During the summer season a steamboat plies daily between this place and the village of Cayuga, near the N. extremity of the lake. Pop. 6,909.

IVICA, IVIZA, or IBIZA, e-vee'/-sã or e-vee'/-thã, (Anc. Ebusus,) one of the Balearic Islands, situated about 46 m. S. W. of the nearest part of Majorca, between 38° 50' and 39° 7' N. Lat., and 1° 22' and 1° 46' E. Lon. It is about 25 m. long; its greatest breadth is near 14 m. Ivica, the cap., situated on the S. E. coast, is fortified, has a good harbour, and contains a pop. of about 6,600. (P. C.) The two islands of Ivica and Formentera were anciently called Pityu'sæ, a name supposed to be derived from the number of pine trees growing on them; *πίτυς* (pityus) in Greek signifying a "pine."—Adj. and inhab. IVICAN, e-vee'/-san.

IVORY COAST, a part of the coast of Guinea, extending from Apollonia, in about 2° 30' to about 7° 30' W. Lon. It owes its name to the great quantities of elephants' teeth brought here from the interior of the continent, to be sold to the European traders.

IVREA, e-vrã'/-ã, (Anc. Epore'dia,) a t. of northern Italy, in the Sardinian dominions, the cap. of a prov. of the same name, is situated on the Dora-Baltea (do'-rã bãl-tã'/-ã), a branch of the Po, 30 m. N. by E. of Turin. Pop. about 8,000. (P. C.)

JAP-AN/ (called Niph-on/ by the Japanese; Yang-hoo, and Je-pen or Je-poon by the Chinese†), an empire in the E. part of Asia, consisting of three large and a great number of smaller islands. It is situated between the 30th and 48th parallels of N. Lat., and the 129th and 150th meridians of E. Lon. The three principal islands are Niphon or Nipon, Keooseo (Kioussiou), and Sitkokf. Keooseo, the most western, is perhaps 200 m. long, with an average breadth of about 80 m. It is separated by the channel of Boongo, from Sitkokf. This island is estimated to be about 150 m. in length, and 70 m. in its average breadth. Niphon is by far the largest and most important of the Japanese islands. It is situated between 33° 30' and 41° 20' N. Lat., and 131° 20' and 142° 30' E. Lon. Its form is somewhat curved, and has been compared to the jaw-bone of an animal. Its length, following the curve, is nearly 900 m., and its mean breadth is estimated at above 100 m. Among the dependencies of Japan is the large island of Yesso (Jesso), lying N. of Niphon, between 41° and 45° 30' N. Lat., and 140° and 147° E. Lon. It is above 250 m. in length, with a mean breadth of perhaps 100 m. Balbi estimates the area of the Japanese empire at about 240,000 sq. m., and the pop. at 25,000,000. All these islands are very imperfectly known: not even the coasts are laid down with any degree of correctness. This is owing partly to natural and partly to political causes. Nearly all the coasts are very difficult of access, being surrounded by numerous rocks and islands, and by a very shallow sea. On the other hand, the Japanese government and laws are less favourable to intercourse with foreigners than those of any other country on the globe, China not excepted. The Chinese and the Dutch are the only foreign nations with whom the Japanese have any commercial intercourse. Of the three principal islands which constitute Japan Proper, Niphon is the best known. It contains a regular mountain chain, of which the highest summit is said to rise more than 12,000 ft. above the level of the sea. The climate, in a country extending over so

many parallels of latitude, must of course vary extremely. As a general remark, the weather in the Japanese islands may be said to be exceedingly changeable; rains are abundant all the year round, but especially so in the months of June and July. Violent gales and thunder-storms are common, and water-spouts are stated to be of frequent occurrence in the adjoining seas. Earthquakes have at different times destroyed a great part of the most populous towns. Only a few spots appear to be exempt from these terrible phenomena. Japan abounds in mineral wealth. Gold appears to be very plentiful in some of the provinces. Copper is extensively worked, and supplies the most important article of export. In no part of the world is agriculture carried to a higher degree of perfection than in Japan. The raising of rice is the principal object, but wheat, barley, and rye are also cultivated, though to a much smaller extent. The orchards are stocked with the fruit-trees of southern Europe, such as oranges, lemons, figs, chesnuts, pears, peaches, cherries, and grapes. Apples are not mentioned among the number of Japanese fruits. In their physical character, the people of Japan resemble the Chinese, belonging to the Mongolian race. Their complexion is yellowish; their hair is black, thick, and shining, and their eyes are small, oblong, and deeply sunk in the head. In point of capacity and industry, they appear to be inferior to none of the Asiatic nations. In education, especially in institutions for the instruction of the lower classes, they are perhaps equal to any people on the globe. Unlike the Chinese, whose unreasonable pride contemns all knowledge which has not originated with themselves, the Japanese adopt with willingness, and even avidity, the arts and sciences of Europe; but, unhappily, the government seems to do all in its power to check this tendency in the people. The higher classes appear generally to understand the Dutch language, and, through the newspapers of Holland, they become acquainted with the important occurrences as they transpire in Europe. The Japanese have adopted the European method in the projection and graduation of their maps and charts. They construct excellent clocks and watches; they also make telescopes and thermometers. Their lacker-ware is superior to that of every other country, and hence the name of "Japan," by which this manufacture is so generally known. As an evidence of the superior civilization of the Japanese, we may adduce the great attention which is paid to female education, and the general respect shown to that sex—a respect which is without a parallel among the nations of Asia. In their moral character, the people of Japan are represented as manly, honest, and brave, and as entertaining a high sense of honour. The prevailing religion is Boodhism, variously modified by other superstitions. The government is despotic; but the emperor himself is considered as subject to the laws, which are of long standing and cannot be easily changed. Yeddo (Jeddo) on the island of Nippon, is the capital.—Adj. and inhab. JAP'-AN-ĒSE'.

JASSY, yás'-se (Ger. Jasch, yásh), a t. of European Turkey, cap. of Moldavia, situated about 12 m. W. of the Pruth, on a small stream which flows into that river. Before the late war, and the two confla-grations of 1827, its population was estimated at near 40,000 (B.); at present it is said to amount to scarcely half this number. Jassy pos-sesses considerable trade: it is, moreover, the seat of a Greek archbi-shopric. Lat. 47° 8' N., Lon. 27° 30' E.

JAVA, já'-va, a large and fertile i. of Malaisia, situated between 5° 50' and 8° 50' S. Lat., and 105° 10' and 114° 30' E. Lon. Its length is about 660 m.; its greatest breadth is above 130 m. The island of Madura (má-doo'-ra), near the N. E. extremity of Java, is commonly included with the latter. It is about 90 m. long, and 30 m. wide, and is separated from Java by the Strait of Madura, which, in the narrow-est part, is only 1 m. wide. The area of both is estimated at 50,000 sq. m. The pop. in 1815, amounted to about 4,620,000 (P. C.); at present, it probably exceeds 5,000,000. The greatest part of Java is in possession of the Dutch. Batavia is their capital. The S. coast and the adjacent countries are subject to two native princes. whose domi-nions occupy about one-fourth of the whole island. Or of these sove-reigns, called Soo-soo-hoo'nán, or emperor, has his residence at Soora-kerta, a town containing about 105,000 inhabitants (P. C.); Yugya-kerta (or, as some write it, Djokjo-kerta), the capital of the other prince, or sultan, stands near the southern coast, in about 110° 20' E. Lon. Pop. 90,000. The native Javanese belong to the Malay race,

in civilization, they are much superior to all other nations of Malaisia. In some kinds of manufacture, and especially in agriculture, they possess considerable skill, though they are inferior, in these respects, to the Chinese, and perhaps to the Hindoos. Their religion is a mixture of Mahometism and Boodhism. Java is extremely well adapted for an extensive commerce. The island itself not only abounds in the various productions common to the tropics, but the northern coasts, which lie opposite to the richest countries of Asia, are accessible to vessels all the year round. Besides this, the Dutch government has made it the centre of all the trade which Holland carries on with its extensive settlements in the Indian Archipelago. Favoured by these circumstances, the commerce of Java has increased astonishingly within the last few years. From 1828 to 1837, inclusive, the amount of almost every important article exported, augmented regularly and rapidly; that of nutmegs and rice was more than doubled, that of coffee trebled, while there was more than 30 times as much indigo, and about 26 times as much sugar exported in 1837 as in 1828.—Adj. and inhab. watered plain, about 140 m. S. of Angora. Though at present much decayed, this town is still important on account of its manufactures, and its numerous madressas or colleges; it contains, also, some highly interesting remains of antiquity. Lat. $37^{\circ} 50' N.$, Lon. $32^{\circ} 45' E.$ Pop. estimated at about 30,000. (B.)

KÖNIGINGRÄTZ, kô/-nig-in-grets, or KÖ/-NIG-GRÄTZ, (Bohemian, Kralowý Hradec, krâ-lo/-ve hrâ-dets/,) a fortified t. of Bohemia, the cap. of a circle of the same name, situated on the Elbe, 63 m. E. by N. of Prague. Pop., exclusive of the military, 6,000. (B.)

KÖNIGSBERG, ken/-igs-berg, (Ger. pron. kö/-nigs-bèrg,) a large city of Germany, cap. of Prussia Proper, on the Pregel, near its entrance into the Frische Haff. A bar at the mouth of the river prevents vessels drawing more than 5 or 6 ft. water from ascending to the city, so that the port of Königsberg is properly at Pillau (pil/-lou), situated at the junction of the Frische Haff with the Baltic. The impression which the interior of the town makes on a stranger is not favourable. The streets, though straight, are, for the most part, narrow, dirty, and badly paved, while the few handsome public or private edifices are scattered over the whole city. Among the literary and scientific institutions of this town, we may mention the University, founded in 1544, and attended at present by about 450 students.—The celebrated Kant, who was born at Königsberg, in 1724, and died here in 1804, was one of its professors;—and the Observatory, which has of late years attained great celebrity from the astronomical observations of Professor Bessel. There are besides, three gymnasia, with numerous other schools. The Observatory is in $54^{\circ} 42' 50'' N.$ Lat., and $20^{\circ} 30' 7'' E.$ Lon. Pop. above 68,000. (B.)

KOOR, written also KUR, (Gr. *Κυρος*, *Kyros*; Lat. *Cy/rus*,) a r. of W. Asia, which rises in the Turkish dominions, near $40^{\circ} 40' N.$ Lat., and $42^{\circ} 40' E.$ Lon., and, flowing north-easterly, passes into the Russian prov. of Georgia, then changes its course, and runs south-easterly to the Caspian Sea, which it enters by several mouths, near $39^{\circ} 15' N.$ Lat., and $49^{\circ} E.$ Lon. Its entire length is about 560 m.

KOORDISTAN or KURDISTAN, koor-dis-tân/, *i. e.* the "country of the Koords," an extensive country in the western part of Asia, situated partly in the Turkish dominions and partly in Persia; being bounded on the N. by Armenia, E. by Azerbaïjan and Irak Adjemi, S. by Khoozistan and the pashalic of Bagdad, W. by Algezira or Aljezeereh (Mesopotamia) and Diarbekir. Length about 300 m.; breadth perhaps 150 m. The inhabitants are mostly shepherds, though some are employed in agriculture and the mechanic arts. The Persian Koords are said to be for the most part wandering tribes, while those of Turkey have generally fixed habitations. Like their ancestors, the ancient Karduchi, the Koords are active, brave, and impatient of control. Though nominally subject to the Ottoman or Persian government, they appear to pay but little respect to the orders of their sovereign. The Koordish women, unlike those of most other Asiatic nations, are said to be

treated with much respect, while marriage is regarded as a sacred and indissoluble tie.—Adj. **KOOR'-DISH**; inhab. **KOORD**.

KOORILE or **KURILE** (koo'-ril) **ISLANDS**,* a chain of small islands connecting the peninsula of Kamtchatka with the large islands which form the empire of Japan. They extend in length more than 700 m. The inhabitants are partly Kamtchadales and partly Ainos (i'-noce), a tribe which appears to belong to the same race as the Japanese.—Inhab. **KOO-RIL'-LI-AN**.

KOOR'-LAND (Courland or Kurland), a prov. in the W. part of Russia, bordering on the Gulf of Riga. Capital, Mittau.

KOORSK (Koursk or Kursk), a t. in the S. part of European Russia, the cap. of a gov. of the same name, with one of the first ecclesiastical seminaries in the empire. The prov. of Koorsk is remarkable for its fertility, and celebrated for its fine fruits; among which are melons, apples, cherries, and various sorts of plums. Watermelons are grown in the open fields. Lat. of the town, 51° 43' N., Lon. 36° 28' E. Pop. 24,000. (P. C.)

KOR'-DO-FAN, a country S. of Nubia, W. of, and bordering on the Nile.

KOSCIUSKO, kos-se-us'-ko, a co. in the N. part of Ind., on the head waters of the Tippecanoe r. Pop. 10,243. Co. t. Warsaw.

KOS-TRO'-MA, a manufacturing t. in the central part of European Russia, the cap. of a gov. of the same name, situated at the confluence of the r. Kostroma with the Volga. Lat 57° 46' N., Lon. 41° 13' E. Pop. about 10,000. (P. C.)

KRASNOYARSK, written also **KRASNOYARSK** and **KRASNOJARSK**, krás'-no-yarsk', a small but handsome t. of Asiatic Russia, cap. of the gov. of Yeniseisk, containing several excellent literary institutions. It is also a place of considerable tradé. Lat. 56° 1' N., Lon. 92° 21' E. Pop. about 4,000. (M.)

KREM'-NITZ (Hung. Körmezc Bányá, kör-méts bán-yōh), a t. of Hungary, important on account of its rich mines of gold and silver, and its mint. Lat. 48° 39' N., Lon. 18° 50' E. Pop. 10,000. (B.)

KREUZNACH, kroits'-nák, a t. of the Prussian states, 18 m. S. W. of Mentz. Pop. about 8,000. (B.)

KRISH'-NA or **KIST'-NA**, an important r. of Hindostan, which rises in the W. Ghauts, near 18° N. Lat., and 74° E. Lon., and flowing in a very tortuous course, falls into the ocean on the Coromandel Coast, by several mouths, near 16° N. Lat., 81° E. Lon. Its whole length is estimated at 700 m.

The strait by which it communicates with the Baltic is only about 1,200 ft. wide. The waters, like those of the Frische Haff, are fresh, and from similar causes. (See FRISCHE HAFF.) The narrow strip or bank of land which separates this Haff from the Baltic, is called the *Kurische Nehrung*.

KURLAND. See KOORLAND.

KUTAÏYEH or KOOTAIĀH, koo-tī'-yah, (Cotyæ'ium,) a t. of Asiatic Turkey, the cap. of the prov. of Natolia or Anatoli. Lat. 39° 25' N., Lon. 30° 15' E. Pop. estimated at 50,000. (B.)

LAALAND, lau'-lånd, or LOZ'-LAND, a fertile island belonging to Denmark, situated in the Baltic, between 54° 38' and 54° 58' N. Lat., and 10° 57' and 11° 52' E. Lon. It is about 36 m. in length, and 18 m. in its greatest breadth. Area, 460 sq. m. Pop. about 45,000. (P. C.)

LAB'-RA-DÖR', a vast peninsula in the E. part of British America; bounded N. by Hudson's Strait, E. by the Atlantic, S. by the Gulf of St. Lawrence and Cahada, and W. by Hudson's Bay. It extends from about the 50th to near the 63d degree of N. Lat., and from the 56th to near the 79th of W. Lon. Its extreme length, from E. S. E. to W. N. W., is about 1,100 m.; its greatest breadth, from E. to W., 900 m. Labrador is commonly described as one of the most dreary and naked regions of the globe, exhibiting scarcely anything but rocks destitute of vegetation. But though this be its appearance when seen from the coast, on penetrating into the interior the surface is found to be thickly covered with pines, birches, and poplars, while various sorts of delicious berries are said to abound. No country is better supplied with water; streams, as well as ponds and lakes, are extremely numerous. The native inhabitants of Labrador are limited chiefly, if not entirely, to the Esquimaux. The Moravian missionaries, who formed their first settlement among them in 1752, are said to have exercised a very beneficial influence upon these degraded people, improving both their moral and physical condition. The coast of Labrador was discovered in 1496, by Sebastian Cabot (as is supposed), and was afterwards named TERRA LABRADOR or "cultivable land," to distinguish it from Greenland.

LAC'-ÇA-DĪVES' or the LACCADIVE ISLANDS (called by the natives Lakaradeevh), a group of islets in the Indian Ocean, about 75 m. W. of the coast of Malabar, between 10° and 12° N. Lat., and 72° and 74° 30' E. Lon.

LACK'-Å-WÅN'-NÖCK or LACK'-Å-WÅN'-NÅ, a small r. of Pa., which flows into the Susquehanna, on the left. Nearly the whole course is within Luzerne co. On its banks are extensive mines of anthracite coal.

LADAKH, lâ'-dāk', a considerable country in the S. central part of Asia, between Cashmere and Thibet. Its length, from N. to S., is above 200 m.; its average breadth, 150 m. (M.) The inhabitants belong to the same race as the Thibetans. They are a very industrious and frugal people, and well acquainted with the arts of civilized life. They are said to possess extraordinary skill in agriculture, overcoming,

to a great extent, by industry, art, and the disadvantages of a mountainous country and naturally unproductive soil. Ladakh is usually considered as belonging to the empire of China, but, according to McCulloch, it never formed a part of the possessions of that power, though it was for a time a sort of tributary to the Mogul emperor. It afterwards became subject to Runjeet Singh, but, since his death, there is reason to believe that the country has recovered its former independence. The religion of Ladakh is similar to that of Thibet, Boodhism being the prevailing belief, though Makometanism is said to have made great progress of late. The government, as regards the people, is despotic, but the rajah has very little real power, being controlled by the jamas or priests, by whom he is occasionally deposed. Leh'la, (or Lei) la'-e, the capital of Ladakh, is the centre of an active commerce, which is carried on between the other countries of Asia. It is said to contain 1,000 houses (P. C.). Lat. about 33° 50' N., Lon. 78° 20' E.

LAD-ø'-GA, a L. of Russia, the largest collection of fresh water in Europe, is situated between 59° 52' and 61° 46' N. Lat., and 29° 50' and 32° 55' E. Lon. It is about 130 m. in length, and 75 m. in its greatest breadth. The area is estimated at 6,300 sq. m. It has several islands, chiefly towards the N. extremity, and is so full of rocks and quicksands that it is ill adapted to the purposes of navigation.

LAD-RONES' (Sp. pron. lãd-ro/-nês) or the LAD-RONE' ISLANDS, called also the MARIANNE ISLANDS, a group in the N. Pacific, situated between 13° and 20° 30' N. Lat., and 144° 40' and 146° 20' E. Lon. The principal island, Guajan, gwã-jãn', (Sp. pron. gwã-hãn',) called also Guam, gwãm, is about 80 m. in circumference, and contained, in 1816, a pop. of 5,389. (P. C.) The aboriginal inhabitants of the Ladrones, who, in the middle of the 17th century, are said to have amounted to 150,000, seem to have become almost extinct on some of the islands. From the extensive ruins found on Tinian (tee-ne-ãn') and Rotta, it appears evident that these islands were once inhabited by a people well acquainted with the arts of civilization. The Ladrones were discovered by Magellan, in 1521, and called Las Islas de los Ladrones, *i. e.* the "islands of the thieves," from the thievish disposition of the natives. They were also named the MARIANA ISLANDS, in honour of the queen of Philip IV. of Spain.

LAHN, lâan, a r. of Germany, flowing into the Rhine, near Coblenz.

LAHORE, lâ-hore', a prov., or rather kingdom, in the N. W. part of Hindostan, lying between 29° 30' and 34° 40' N. Lat., and 71° and 78° E. Lon. This territory was till recently governed by Runjeet Singh, who was completely independent of the British government, and the most powerful of all the native princes of India. His kingdom is geographically divided into two parts: 1st, the PUNJAUB (or Pânj-âb), *i. e.* the "five rivers," so named from its lying among the five great arms of the Indus; viz., the Sind or Indus Proper, the Jhylum or Behul (Anc. Hydaspes), the Chenaub or Chenâb (Anc. Acesi/nes), the Ravee (Anc. Hydraotes), and the Sutledge (Anc. Hysudrus), which takes the name of Gharra (Anc. Hyph/asis), after having received the Beas, which appears to have been considered by the ancients as the upper portion of the Hyphasis: 2d, KOHISTAN (ko-his-tân'), *i. e.* the "hill country." The Seiks, now the ruling power in this part of the world, first appeared as a sect of Hindoo religionists, about the middle of the 15th century; but, stung by persecution from the Mahometans, they turned their thoughts to warlike pursuits, and afterwards became a nation of formidable soldiers. Steel, from being an especial object of attention, was finally converted into one of their gods. Their supreme divinity was denominated by them "All Steel." Owing, however, to their continual dissensions, they were unable to make head against a powerful enemy, until the early part of the present century, when Runjeet Singh, having subdued the other Seik chieftains, established an independent kingdom, which he ruled with great energy and wisdom. He maintained an army of 80,000 men, of whom 50,000 were cavalry, disciplined according to the European system. (P. C.) But since his death, which occurred in 1839, no successor adequate to the task of government seems to have appeared, and it is not improbable that this territory will, at no distant period, be incorporated with the other British dominions of India.

LAHORE, the cap. of the above kingdom, situated on the Ravee, in the midst of a fertile and well-cultivated plain. This city is one of high antiquity, and was the residence of the first Mahometan conquerors of Hindostan, before they succeeded in establishing themselves in the central parts of the peninsula. Though greatly fallen from its ancient splendour, it is still a large and populous town, but nearly all the

LAN'-SING, cap. of the state of Michigan, situated in Ingham co., about 110 m. W. N. W. of Detroit.

LAON, lãn, a fortified t. of France, cap. of the dep. of Aisne, 78 m. N. E. of Paris, with a public library of 12,000 vols., besides other institutions. Lat. 49° 34' N., Lon. 3° 37' E. Pop. 7,826. (B.)

LAOS, lâ'-oce. The country of the Laos comprehends the central portion of Chin India, lying between 15° and 24° N. Lat., and 98° and 106 E. Lon. On the S. it borders on Siam and Cochin China, and W. on the Birman empire. Little is known with certainty respecting the interior of this country. The Laos seem to be the original stock of a nation which is widely dispersed over Farther India. They resemble the Siamese in the form of their bodies, in language, and in religion. Lantchang or Lant-Shang, the chief town, is said to be surrounded by a wall of stone, and to contain a garrison of 50,000 men, and a splendid court.

LAP-EER', a co. in the E. S. E. part of Mich. N. of Detroit. Pop. 7,029. Co. t. Lapeer.

LAP'-LAND, the most northerly country of Europe, occupying the N. and N. E. parts of the Scandinavian peninsula, the N. part of the Russian prov. of Finland, and the N. W. portion of the gov. of Archangel. It is difficult to assign its limits, as they correspond with no natural or political boundaries. It appears that in the twelfth and thirteenth centuries all the country N. of 64° N. Lat., between the White Sea on the E., and the Norwegian Sea on the W., was entirely in the possession of the Laplanders or *Lapps*. The people who have given their name to this region constitute a distinct and remarkable variety of the human race; they are of very short stature, seldom exceeding in height five feet and two or three inches; their copper complexion is rather the result of habitual residence in smoky huts than the character of the race.—Inhab. * The most contradictory accounts respecting the present condition and prospects of this colony, are to be found in works of a highly respectable character. McCulloch represents them in a very unfavourable light, while Balbi, who appears to base his statements on the testimony of impartial observers, says that they are tolerably prosperous (*assez prospère*), and that the noble object for which the colony was established—that of diffusing civilization and Christianity among the benighted Africans—has, to a considerable extent, already been attained. If we turn from these works to the publications of our own country, we shall find a more striking discrepancy to prevail.

Belgium, the cap. of a prov. of the same name, is situated on the Meuse, 54 m. E. by S. of Brussels. In its vicinity are inexhaustible mines of coal, which have been worked since the year 1178. Liege contains a university, founded in 1817, a *collège royal*, a mining school, and numerous other institutions for the promotion of science, literature, and the arts. Lat. $50^{\circ} 39' N.$, Lon. $5^{\circ} 32' E.$ Pop. 58,000. (B.)

LIEGE, a prov. taking its name from the above city, in the E. part of Belgium, and bordering on the Prussian dominions. Pop. 371,000. (P. C.)

LIEGNITZ, leeg/-nits, a t. of Prussian Silesia, the cap. of a circle and gov. of the same name, on the Katzbach (kâts/-bâk), a branch of the Oder. It contains a gymnasium, a royal equestrian academy, and other institutions. Lat. $51^{\circ} 12' N.$, Lon. $16^{\circ} 12' E.$ Pop. 11,000. (B.)

LIER, leer, (Fr. Lierre, le-air/) a manufacturing t. of Belgium, 10 m. S. E. of Antwerp. Pop. 13,000. (B.)

LILLE or LISLE, leel, an important manufacturing and commercial city of France, the cap. of the dep. of Nord, situated on the canal of the Deule (which communicates with the Lys), in the midst of a fertile and highly cultivated country. The town is well laid out, with nearly thirty market-places or other open spaces, and most of the streets are wide. Its admirable citadel, and other fortifications, render Lille one of the strongest cities of Europe. Of literary institutions, there are a considerable number, including a public library of 20,000 vols, a high school, &c. Lat. $50^{\circ} 38' N.$, Lon. $3^{\circ} 4' E.$ Pop. 72,005. (B.)

LIMA, lee/-mâ, an archiepiscopal city of S. America, formerly the cap. of the viceroyalty of Peru, and at present of the dep. of Lima and of the Peruvian republic. It is situated in a fertile and spacious valley, on a small r. called Rimac, which name has been corrupted by the Spaniards into Lima. The streets are regular and wide, but they are very badly paved. In the middle of the town is the Plaza Mayor (plâ/-thâ mî-ore/), or "great square," one of the finest in America, in which is a large fountain, with a bronze statue of Fame in the centre. Lima possesses a university, founded in 1571, a college of medicine and surgery, a national library, and several other institutions. Lat. $12^{\circ} 2' 34'' S.$, Lon. $77^{\circ} 7' W.$ Pop. 70,000. (B.)

LIM/-BURG (Fr. Limbourg, lâm'-boor/), a prov. in the E. part of the Netherlands, bordering on the Prussian dominions, divided since the revolution of 1830 between Holland and Belgium. Area of the Belgian prov., 970 sq. m. Pop. 227,000. Area of the part belonging to Holland, 530 sq. m. Pop. 156,000. (P. C.)

LIM/-ER-ICK, an inland co. in the S.W. part of Ireland, in the prov. of Munster, bordering on the estuary of the Shannon. Pop., exclusive of the co. of the town of Limerick, 248,801. (P. C.)

LIMERICK, an ancient city of Ireland, the cap. of the above co., on the S. side of the Shannon. This town is the centre of an extensive trade, but its manufactures are very limited. One of the most remarkable objects of this place are the hanging gardens, constructed in 1808 by Mr. Roche, which contain a surface of more than an English acre.

LIP'-A-RĪ, or lee'-pā-re ISLANDS, (Anc. Æo/liæ In/sulæ,) a group in the Mediterranean, off the N. coast of Sicily, consisting of seven principal islands, besides several islets and rocks. Lipari (Anc. Lip'ara), the largest, intersected by the parallel of 38° 30' N. Lat., and the meridian of 14° 55' E. Lon. is about 8 m. in length. Pop. 12,500. (P. C.) Among the others, Strom/boli (Anc. Stron'gyle), an insular mountain, nearly 3,000 ft. in height, is remarkable for its constantly burning volcano, which serves for a light-house to the sailors in that sea. The Lipari islands are evidently of volcanic origin. They were sometimes called Vulcaniæ by the ancient Romans, from the supposition, probably, that Vulcan had his workshops here as well as in Ætna.

LIPPE, lip'-pēh, a small r. of Germany, which flows into the Rhine on the right.

LIPPE-DETMOLD (-det/-molt), a principality of Germany, on the sources of the above r., from which circumstance it is supposed to take its name. It consists of the counties of Lippe and Sternberg, being situated between 51° 48' and 52° 12' N. Lat., and 8° 35' and 9° 10' E. Lon. Area, 435 sq. m. Pop. 80,000. (P. C.) DETMOLD, the cap., situated on the Werra, contains 2,800 inhabitants. (B.) Lat. 51° 56' N., Lon. 8° 50' E.

LIPPE-SCHAUENBURG (-shou/-ēn-boorg or shou'-ēn-burg), often, though incorrectly, written SCHAUMBURG, a small principality of Germany, intersected by the parallel of 52° 20' N. Lat., and the 9th meridian of E. Lon. Area, 210 sq. m. Pop. 25,000. BÜCKEBURG (bük'-kēh-böörē), the cap., contains 2,100 inhabitants. (B.) Lat. 52° 16' N., Lon. 9° E.

LIRIA, lee'-re-ā, a manufacturing t. of Spain, in the prov. of Valencia, 15 m. N.W. of Valencia. Pop. 12,000. (B.)

LIS'-BON (Port. Lis-bo'-ā : Anc. Olisipo), the cap. of Portugal, on the N. bank of the Tagus, about 9 m. above its entrance into the sea. The river at the W. end of Lisbon is but little more than a mile in breadth, but opposite to the centre of the city it widens considerably, and above forms a bay several miles in extent, which furnishes a safe and magnificent harbour, capable of containing all the fleets of Europe. In the old portion of the town, the streets are irregular, narrow, ill-paved, and dirty. But in that part which has been rebuilt since the great earthquake of 1755, the houses are handsome, the streets regular and very clean. Perhaps the most remarkable edifice of Lisbon is the palace of Ajuda (ā-zhoo'-dā), which, when finished, will rank among the finest in Europe. Among the numerous literary and scientific institutions of this city, we may mention the Royal Academy of Sciences, the College of the Nobles, the Royal Academy of Marine, with an observatory, and the Royal Military College. The commerce of Lisbon, though much diminished since the loss of Brazil, is still considerable. Among its manufactures, those in gold and jewelry are perhaps the most remarkable. We may observe, that the want of industry, as well as the ignorance, of the Portuguese, has been much exaggerated by travellers.

LITH-U-A'-NĪ-Ā (see Int. XI.), a country of Europe, which constituted an independent and powerful state, from about the year 1206 to 1385, when it was united with Poland, by the marriage of king Yaguellon with the Polish queen Hedvige. Olghord, the father of Yaguellon, and the most powerful of the Lithuanian princes, had extended his dominions to the banks of the Don and the shores of the Black Sea, and thrice presented himself in triumph before the gates of Moscow. A great part of these possessions was afterwards lost under the reign of Casimir III., and of several succeeding princes. The territory which constituted the duchy of Lithuania, at the time of the first dismemberment of Poland, in 1772, now forms the Russian governments of Vilna, Grodno, Bialystock, Vitepsk, Mohelef, Minsk, and Augustov or Augustow.—Adj. and inhab. land. By means of canals and railways, Liverpool has ready communication with all the more important places in the interior of the country; a circumstance which, with its proximity to Manchester, has contributed, perhaps not less than its maritime trade, to its extraordinary commercial prosperity. Among the numerous literary and scientific establishments of this city, we may mention the Royal Institution, founded in 1814, by the celebrated William Roscoe, and containing an extensive museum of natural history, many valuable paintings, &c.; courses of lectures are given on literature and the various branches of physical science. Like most of the great towns of England, Liverpool is furnished with water and gas, which are distributed to the private houses. With the exception of London, this town is the most populous in Great Britain. Its growth has been extremely rapid; in 1700, its pop. was only 5,714; in 1801, it was 77,703; in 1831, 165,221 (M.), and in 1851, including the parish and the adjoining townships, 384,263. Liverpool now far exceeds London in the value of its exports, which in 1851 amounted to £35,000,000, while those of London were about £14,000,000. Lat. 53° 24' N., Lon. 2° 58' W.

LOMOND, LOCH, lok lo'-mond, the largest lake of Great Britain.* is situated in Scotland, between the counties of Stirling and Dunbarton. Its length is about 22 m.; its greatest breadth about 5 m. The greatest depth is about 120 fathoms. The superficial extent is stated to be 45 sq. m.

LONDON, lun/-d'n, (Anc. Londin'/ium,) the cap. of the United Kingdom of Great Britain and Ireland, the most commercial and probably the most populous city on the globe, is situated on the Thames, about 45 m. above its entrance into the sea, and 15 m. below the highest tide-way. The greater part of the town stands on a slight elevation, on the left bank of the r., in the co. of Middlesex; the remainder, on the right bank, in the co. of Surrey. London may be considered as consisting of five principal portions, viz., Westminster and West-End, in the W. part of the city; the city proper, which forms the central and most ancient quarter of the town; East-End; and Southwark. Six noble bridges cross the Thames; the Waterloo, the London, the Westminster, the Blackfriars', the Southwark, and the Vauxhall. Of these, the Waterloo bridge, built of granite, and 1,242 ft. in length, is the largest and most beautiful. The Southwark bridge, constructed of iron, and 708 ft. in length, is remarkable for the extent of the central arch, which has a span of 240 ft. The Thames is also traversed by a tunnel or subterraneous passage, consisting of a brick cylinder or pipe, divided into two roadways, each 15 ft. high, and 12 ft. broad. This tunnel, which is about 2 m. below the London bridge, has been constructed for the purpose of uniting the two banks without injury to the shipping interest, which could not have been effected by the erection of a bridge. Among the great number of public edifices which adorn the metropolis of the British empire, the most remarkable are—the palace of St. James, situated N. of a park of the same name; since the year 1695, it has been the residence of the English kings; but, notwithstanding the richness and elegance of the interior, the building being only of brick, and irregular in its form, the exterior exhibits none of that magnificence by which many other of the palaces of Europe are distinguished: the Tower, a vast and ancient fortress, founded by William the Conqueror, and formerly inhabited as a palace by several English sovereigns. Since the reign of queen Elizabeth, it has been employed as an arsenal, and a repository for the jewels, records, &c., belonging to the crown, and sometimes as a state prison. It should be observed that extensive additions have been made to it at different times, so that the original tower, which is called the White Tower, at present forms but a small part of this vast edifice. Unhappily, on the 30th of October, 1841, that portion of the Tower of London, denominated the Grand Store-house, and

Small Armoury, with its contents, an inestimable collection of trophies, antiquities, &c., together with nearly 250,000 stand of arms, was reduced by fire to a mingled heap of ruins: an occurrence the more to be deplored, because, from the peculiar character of a large part of the articles destroyed, it is impossible that they should ever be replaced. Among the churches may be mentioned St. Paul's Cathedral, which is regarded as the most remarkable work of architecture in Great Britain, and, as a temple, the most sumptuous and vast that has ever been erected in Protestant Christendom; it was begun in 1675 and finished in 1710; one architect, Sir Christopher Wren, having superintended the work from its commencement to its completion; the extreme length of the cathedral is 510 ft.; height from the floor to the top of the cross, 362 ft.: and Westminster Abbey, one of the finest Gothic buildings in Europe, in which repose the ashes of many of the English kings, and others of the royal family, as well as of those who, by their talents or exploits, have added to the glory of the British name.—Among the almost countless multitude of institutions for the promotion of science, literature, and the arts, of which London can boast, our limits will permit us to notice only a few of the most remarkable. These are: the University of London, founded on a new plan, excluding theological studies, and admitting to its course, without distinction, all those who wish to attend it; this institution was incorporated in 1837: King's College, another university, which excludes students not professing with the established church: The Royal Society of London, instituted in the early part of the 17th century, and incorporated in 1663, one of the most distinguished as well as one of the oldest associations of the kind in Europe; its object is the promotion of general science: the Royal Institution of Great Britain, incorporated in 1800; it possesses a magnificent chemical laboratory, an extensive library, &c.—Professor Davy, afterwards Sir Humphry Davy, was connected with this institution, when, in 1807, he made the discovery of the composition of the fixed alkalis, a discovery which, viewed in all its relations, may be regarded as one of the most important, as well as one of the most brilliant, recorded in the annals of science:—the Linnæan Society, incorporated in 1802, with a valuable library and one of the most extensive botanical collections in the world; the East India Company has recently presented to this society all those invaluable collections, which have been made at different times by its agents in India (B.): the Zoological Society, incorporated in 1829, connected with which are the Zoological Gardens, with a menagerie stocked with animals from every region of the globe: the Society for the Diffusion of Useful Knowledge, founded in 1826, incorporated in 1832; the great object of which is to distribute, among the middling and poorer classes, works on science, &c., at a low price; this is in every respect a useful and admirable institution, and possesses among its numerous members a large share of the talent and learning, as well as some of the most distinguished names, of Great Britain: The Royal Geographical Society, founded in 1830; an association which, though in its infancy, has

ou, as in *our*; th, as in *thin*; TH, as in *this*; N, nearly like *ng*.

already done much towards advancing the interests of this important science. Another institution, of a different kind, especially deserving the attention of a stranger in the metropolis, is the British Museum, a rich and almost unrivalled collection of books, manuscripts, statues, coins, and other antiquities, besides specimens in the various departments of natural history.—As regards extent and activity of commerce, London is without a rival among all the cities of the globe. In 1825, the tonnage of the ships belonging to this port amounted to 876,400; about the same time, that of all the merchant vessels of France was only 689,448 (B.); so that *the tonnage of the British capital alone considerably exceeded all that of the third commercial power in the world!* At the same time, the tonnage of New York, which, in this respect, is the second city on the globe, amounted to only 304,500; Newcastle, the second port of the United Kingdom, and the third in the world, had only 193,100 tons. If we compare the value of the imports and exports of the most important commercial places in the world, we shall find that, in this respect, London is far before every other, while Liverpool holds the second and New York the third rank.

———“Where has commerce such a mart,
So rich, so thronged, so drained, and so supplied,
As London—opulent, enlarged, and still
Increasing London? Babylon of old
Not more the glory of the earth than she,
A more accomplished world's chief glory now.

——— Now mark a spot or two
Which so much beauty would do well to purge.”

“However imposing, however wonderful may be the picture presented to the thoughtless observer, or to him who contemplates London only from a distance—when we reflect what multitudes of her citizens are condemned to continual labour, which does not yield them a sufficiency of the necessaries of life, but whose efforts, like those of Sisyphus, are ever unsuccessful, and yet may never be remitted; and how many there are who have not the virtue, if they have the ability, to struggle manfully with want, but are supported by a charity which perhaps fear alone inspires, or by those dishonest practices which are the last resource of the idle, we shall find far more cause for abasement and sorrow, than for pride and exultation.” It appears that, in 1838, there were in London 4,430 pickpockets and common thieves known to the police, 217 burglars and housebreakers, 2,295 vagrants, 2,786 habitual disorderlies (M.), besides various other classes of offenders. It is estimated that more than 14,000 persons are supported by street alms; a large portion of these mendicants are among the worst class of impostors. The pop. of London, as will be seen by the following statement, has increased far more rapidly during the present than the past century. The total pop. in 1700 was 674,350; in 1750, 676,250; in 1801, 888,198; in 1831, 1,508,469; in 1851, 2,361,640. St. Paul's Cathedral, situated nearly in the centre of London, is in 51° 30' 48" N. Lat., and 0° 5' 48" W. Lon.—Inhab. LONDONER, lun'-dɔn-ɛr.

LOUGHBOROUGH, luff/-bur-reeh, a manufacturing t. in the central part of England, in Leicestershire, on a canal which communicates with Nottingham and Leicestershire, 10 m. N. by W. of the latter town. Pop. of the entire parish, 10,170.

LOUGHREA, lôh'-râ', a t. of Ireland, in the co. of Galway, on a small lake of the same name. Lat. $53^{\circ} 12' N.$, Lon. $8^{\circ} 35' W.$ Pop. in 1831, 4,007. (M.)

LOUIS, St., (sent loo'-is, or loo'-e,) the commercial cap. of Mo., and seat of justice of St. Louis co., is situated on the W. bank of the Mississippi r., 18 m. below the mouth of the Missouri; 808 m. W. from Washington, and about 1150 m. by water above New Orleans. Lat. $38^{\circ} 36' N.$ Lon. $89^{\circ} 36' W.$

The position of this city, on one of the largest rivers of the world, near its union with the Missouri and Illinois, and in the centre of the most extensive system of internal navigation in America, is in the highest degree favourable to its commercial prosperity; and, in all probability, it is destined to become in a few years one of the greatest emporiums of the new continent. The growth of St. Louis has been astonishingly rapid. In 1816 the pop. was only 2,000; in 1830 it was 5,832; in 1840, 16,469; and, in 1850, it amounted to 77,860. The co. of St. Louis has a pop. of 104,978.

Its site is elevated, and protected from floods by a barrier of limestone, which extends nearly two miles. On the first bank, which is elevated about 20 feet, are several streets running parallel with the river, in which the heavy produce and shipping business is transacted. Front street, which is open on the eastern side, displays a range of four-storied limestone warehouses, which have an imposing appearance from the water. These streets are crossed at right angles by others, which lead, by a gentle ascent, to a second plateau, which is 40 feet above the level of the first, and affords a fine view of the

Fâte, fâr, fáll, fât; mē, mêt; pîne or pîne, pîn; nõ, nõt; õõ as in *good*;

river, the city, and its environs. This part of the city is laid out in broad avenues and streets, and adorned with elegant mansions. The more recent houses are mostly built of brick, or of a kind of limestone, found on the spot, which is soft when first quarried, but becomes hard by exposure. The streets are lighted with gas, and the water of the river is distributed through them from a reservoir on the top of an artificial mound, supposed to be the work of the aborigines. Among the principal public buildings and institutions are the City Hall, the Catholic cathedral, and the University of St. Louis, with a library of 12,000 volumes. There is also an Academy of Sciences, a Museum, a Convent, two Orphan Asylums, a U. S. Arsenal, and several academies.

In amount of shipping, St. Louis will compare favourably with any of the western cities. In the year 1850, 240 steamboats were employed in her commerce, the largest of which carried 938 tons; and the number of steamboat arrivals, in that year, amounted to 2900. The tonnage of the steamboats owned here in 1848, (126 in number), was 35,578. The quantities of the leading articles of produce received here, in 1850, were as follows: 927,346 sacks of wheat; 330,000 bbls. of flour; 573,500 pigs of lead; 60,862 bales of hemp; and 9,055 hhd's. of tobacco. Abundance of coal and marble is found in the immediate vicinity, and iron in some parts of the county. The trade of St. Louis, in 1851, was estimated by a committee of the Chamber of Commerce, at 60 millions of dollars.

This place is also the seat of various manufactures, among which are numerous iron-foundries, rope-factories glass-works, oil-mills, and saw-mills.

LOUIS, SAINT, (Fr. pron. sãn loo'-ce'), a t. of West Africa, the cap. of the French possessions in Senegambia, on an island of the same name, in the Senegal, near its mouth. Lat. about 16° N., Lon. 16° 30' W. Pop. near 6,000. (B.)

LOUISA, (loo-ee'-za,) a co. in the E. central part of Va., N. W. of Richmond. Pop. 16,691. Seat of justice, Louisa c. h.

estimated at 48,500 sq. m. Pop. 511,974, of whom 255,416 are whites, 17,537 free coloured, and 239,021 slaves. Baton Rouge is the capital. Louisiana, which originally comprehended, besides the present state, all the territory N. of Texas between the Mississippi and the Rocky Mountains, was ceded by the French to the United States, in 1803. The state was admitted into the Union in 1812.

LOUISVILLE, (loo'-is-vill'), the most populous and commercial city of Kentucky, and cap. of Jefferson co., on the S. bank of the Ohio, about 130 m. below Cincinnati, and 250 by direct line from St. Louis. Lat. 38° 3' N. Lon. 85° 30' W. Pop. in 1850, 43,196. A little above the city the Beargrass cr. falls into the Ohio, affording a harbour for steamboats and river craft. The city, which is chiefly built of brick, is situated on a beautiful plain, elevated about 70 feet above the river. The streets are straight, well-paved, and lighted with gas. There are a number of streets parallel with the river, which vary in width from 60 to 100 feet, and are crossed, at right angles, by thirty others, each of which is 60 feet wide. Among the public edifices and institutions may be mentioned the City Hall, the Medical Institute, the Asylum for the Blind, a hospital, the University of Louisville, and several fine places of worship. Some of these are beautiful specimens of architecture. Louisville is the terminus of a railroad 93 m. long, which connects it with Frankfort and Lexington. The Louisville and Portland canal, passing round the falls which obstruct the navigation of the Ohio at this place, is one of the most important works in the country. It is about two m. long, and sufficiently wide and deep to admit large steamers. There are four locks, constructed in the most durable manner, with a total lockage of 22 feet. This town, besides being one of the most important commercial places in the Western country, is the seat of several extensive manufactories. Among these are numerous iron-foundries, engine-shops, boat-yards, rope-factories, bagging-factories, glass-works, &c.

LOUTH, louth, a co. in the E. N. E. part of Ireland, prov. of Leinster, bordering on the sea. Pop. in 1831, 107,481. (P. C.)

LOUTH, a t. of England, in Lincolnshire, 127 m. N. of London. Pop. of the parish, with an area of 5 sq. m., 8,848.

LOUVAIN, loo-vane', (Fr. pron. loo'-vân', Flem. Leu'-ven,) a t. of Belgium, prov. of Brabant, on the Dyle and on the railway between Brussels and Liege. Its pop. in the 14th century is said to have amounted to near 200,000, though it does not now exceed 26,000. (B.) Louvain is the seat of a celebrated and flourishing university, founded in 1426, and attended by about 500 students. Lat. 50° 53' N., Lon. 4° 42' E.

LOUVIERS, loo'-ve-ŷ', formerly LOVIERS, a t. of France, in the dep. of Eure, on the r. Eure, 17 m. S. by E. of Rouen. Its manufactures of woollen cloths and kerseymeres, first introduced in 1681, are the most important of the kind in the kingdom. There are in all upwards of 40 factories. LÜ'-BECK, an important commercial city of Germany, formerly the head of the Hanseatic League, and still the cap. of the free Hanseatic cities of the Germanic confederation, is situated on the Trave (trä'-veh), 36 m. N. E. of Hamburg. This town, with its territory, containing an area of about 117 sq. m., constitutes an independent republic, which is a member of the Germanic confederation. Among the edifices of Lübeck, the Senate-House (Rathhaus, rât'-house), in which the Hanseatic deputies formerly met, deserves especially to be mentioned. Lat. $53^{\circ} 51' N.$, Lon. $10^{\circ} 41' E.$ Pop. of the town, about 26,000; total pop. of the republic, 46,000. (B.)

LU-CERNE' (Fr. pron. lü'-sèrn'; Ger. Luzern, loot-sèrn'); a canton in the N. central part of Switzerland. Area estimated at 657 sq. m. Pop. in 1836, 123,407. (P. C.)

LUCERNE, the cap. of the above, is situated at the W. extremity of the L. of Lucerne, on both sides of the Reuss, which forms its outlet. The town is surrounded by old walls, flanked with towers. Lucerne contains a lyceum, a gymnasium, and numerous other institutions. One of the most remarkable things at this place is the topographic map, *in relief*, constructed by Gen. Pfyffer. This extraordinary work is 22 ft. long and 13 wide, and represents an extent of 180 sq. leagues, of which the L. of Lucerne forms the centre. The materials are pasteboard, wax, and resin. Gen. Pfyffer is said to have spent more than 10 years in making this topographical model. In the vicinity of Lucerne is the monument erected in 1821 to the memory of the Swiss Guards who died in defence of the Tuileries against the mob of Paris, on the 10th of August, 1792. It is the image of a wounded and dying lion of colossal size, sculptured in the side of a rock. Lat. 47° 3' N., Lon. 8° 18' E. Pop. 8,150. (P. C.)

LUCERNE, LAKE OF (Ger. Waldstätter See, wàlt/-stet-ter sà), situated nearly in the centre of Switzerland, is one of the most picturesque pieces of water in Europe. It is nearly cruciform, with an addition to its E. end, called the L. of Uri. Its entire length is about 25 m., but the breadth of any of its arms is seldom more than 2 or 3 m. The surface is 1,380 ft. above the level of the sea. The greatest depth is stated to be near 900 ft.

LUCIA lu/-she-a, **ST.**, one of the British W. India Islands, intersected by the 14th parallel of N. Lat., and the 61st meridian of W. Lon. It is above 30 m. in length, and about 17 in its greatest breadth, and contains an area of about 350 sq. m. Pop. in 1836, 16,116. (P. C.)

LUCK'-NOW', a large t. of Hindostan, since 1775 the cap. of Oude, is situated on the Goomty r. It consists of three distinct portions: the ancient, and much the largest part of the city is badly built, with dirty and narrow streets; another quarter, which contains the residences of the king and of the royal family, is comparatively new, and the houses are constructed and furnished after the English fashion; the remaining portion of the town is built in the oriental style, and has many fine houses and religious edifices. Lat. 26° 51' N., Lon. 80° 50' E. Pop. estimated at above 300,000. (B.)

LUD'-LŌW, a t. of England, in Shropshire, 24 m. S. of Shrewsbury, and 126 m. W. S. W. of London. Pop. 5,064.

LUDWIGSBURG, lood'/-wigs-burg' or lood'/-Wigs-böörq', a handsome t. of Germany, in Würtemberg, the cap. of the circle of the Neckar, with

first in 1632, between the Swedes, under Gustavus Adolphus, and the Imperialists, under Wallenstein, in which the former were victorious, though their king was slain; the other in 1813, between the army of Napoleon and the allies, encouraged by the presence of the emperor Alexander and the king of Prussia, in which the French gained a dearly-bought victory.

LUX'-EM-BURG' (Fr. Luxembourg, lûx'-âm'-boor'), a prov. or grand-duchy forming the S. E. extremity of the Netherlands, partitioned by the treaty of April, 1839, between Holland and Belgium; the E. portion, with an area of about 1,000 sq. m., and a pop. of 160,000, being assigned to the former, and the remainder, with an area of 1,700 sq. m., and a pop. of 168,000, to the latter kingdom. The title of the grand-duke of Luxemburg, with the right of suffrage in the Germanic confederation, is enjoyed by the king of Holland.

LUXEMBURG, a city of the Netherlands, the cap. of the grand-duchy of this name, and one of the strongest fortresses in Europe, situated about 116 m. S. E. of Brussels. It is surrounded by strong walls and deep ditches, with a double line of outworks, in the form of a heptagon. As a fortress, Luxemburg belongs to the Germanic confederation, and is occupied by their troops. Lat. 49° 38' N., Lon. 6° 10' E. Pop. about 11,000. (B.)

LUXEUIL, lûx'-uî', (Anc. Luxovium,) a t. of France, in the dep. of Upper Saône, remarkable for its warm mineral springs, which were resorted to by the Romans. Lat. 47° 50' N., Lon. 6° 22' E. Pop. 3,628. (M.)

LUZON, loo-zone', or LUÇON (Sp. pron. loo-thone'), the largest of the Philippine Islands, situated between 12° 20' and 19° N. Lat., and 119° 30' and 124° 30' E. Lon. Its form is very irregular. The whole length, following the bend of island, is about 580 m.; the greatest breadth is about 150 m. Area estimated at 50,000 sq. m. The pop. is stated at 2,264,807. (M.) According to Balbi, the part of Luzon which is under the government of the Spaniards is divided into 16 provinces. Manilla or Manila (mâ-nee'-lâ), situated at the head of a considerable bay in the S. W. part of the island, is the cap. of Luzon, as well as of all the Spanish possessions in the Philippine Islands. This town is regularly laid out, and some portions of it are said to be exceedingly well built, clean, and handsome, with broad and well-paved streets. Balbi estimates its pop. at near 140,000. That portion of Luzon which is not subject to the Spaniards, is inhabited by independent savages. (See PHILIPPINE ISLANDS.)

LYCOMING, li-kom'-ing, a co. in the N. part of Pa., intersected by the W. branch of the Susquehanna. Pop. 26,257. Co. t. Williamsport.

LYME-REGIS, lime re'-jis, a seaport t. of England, in Dorsetshire, somewhat frequented in summer as a watering-place. Lat. 50° 43' N., Lon. 2° 55' W. Pop. 2,756.

LYM'-FI-ORD' or lüm'-fe-ord', a remarkable arm of the sea, extending from the Cattegat, in about 57° N. Lat., westward to the German Ocean. Previously to 1825 it was separated from the ocean by a narrow strip of land, a mile or so in breadth, over which the sea occasionally broke; but the communication is now permanent. Its whole length is perhaps 100 m.; the breadth varies from 1 m. or less to about 15 m. The Lymfiord is shallow and of difficult navigation. (P. C.)

LYM'-ING-TON, a seaport t. of England, in Hampshire, about 80 m. W. S. W. of London. Lat. 50° 41' N., Lon. 1° 32' W. Pop. of the parish, 3,813.

LYNCH'-BURG, a flourishing t. of Va., the cap. of Campbell co., on James r., about 90 m., in a direct line, W. by S. of Richmond. Lat. 37° 36' N., Lon. 79° 22' W. Pop. 8,071.

LYNN, a flourishing and pleasant t. of Mass., in Essex co., on the sea-coast, about 9 m., in a straight line, N. E. of Boston, chiefly remarkable for its extensive manufacture of shoes. It stands on the Eastern Railroad, which connects Boston with Portsmouth, in New Hampshire. Lat. 42° 28' N., Lon. 70° 57' W. Pop. of the township, 14,257.

LYNN-REGIS (re/-jis), a seaport t. of England, in the co. of Norfolk, on the Ouse, near its mouth. Lat. 52° 46' N., Lon. 0° 24' E. Pop. of the borough, which includes an area of about 4 sq. m., 16,039.

LYONNAIS, le'-on'-ná', or LYONAIS, a former prov. of France, deriving its name from its cap., the city of Lyons; now divided into the depts. of Rhone and Loire.

LY'ONS (Fr. Lyon, le'õn'; Anc. Lugdu'num); the second city of France, as regards population, wealth, and commerce, is situated on the Rhone, at its junction with the Saône, 275 m. E. N. E. of Bordeaux, and 245 m. S. S. E. of Paris. Much the greater part of the town is built on the tongue of land between the Saône and the Rhone, which is about 3 m. in length, with an average breadth of about 3 furlongs; some extensive and important quarters, however, are situated on the W. or right bank of the Saône. South of the city is a new and handsome suburb, on a tract of land gained by altering the bed of the Rhone, called, from the architect who planned it, the Presqu' ile Perrache (presk eel pèr'-râsh'), or the "peninsula Perrache." Lyons is the seat of a Roman Catholic archbishopric, and a Protestant consistory; it also possesses a great number of institutions for the advancement of literature and science, among which we may name the *Académie Universitaire*, the National College, the Academy of Science, Belles-lettres, and Arts, and the Public Library, containing 92,000 vols., besides nearly 1,000 manuscripts. Lyons is the largest manufacturing town in France; indeed, as regards the manufacture of silk, it is unequalled in Europe. The greater part of the silk produced in France is worked in the looms of this city, besides a large quantity imported from Italy. Lat. 45° 46' N., Lon. 4° 50' E. Pop. in 1846, 159,783. Adj. and inhab. LYONAIS, le'-o'-ná'; feminine, LYONAISE, le'-o'-naze'.

LYS, leece, (Dutch pron. lice,) a small r. which rises in France, in the dep. of Pas-de-Calais, and, flowing north-easterly into Belgium, joins the Scheldt at Ghent.

MAASLUYS, mǎǎ'-slois, or **MAASLANDSLUYS**, mǎǎs'-lânt-slois', a t. of Holland, on an arm of the Maas or Meuse, about 10 m. W. by N. of Rotterdam. Lat. 51° 55' N., Lon. 4° 10' E. Pop. near 5,000. (B.)

MAASTRICHT. See **MAESTRICHT**.

MACAO, mǎ-cǎ'-o, or mǎ-kou', a seaport t. and Portuguese settlement in China, on an i. of the same name, forming a part of the Chinese prov. of Quang-tong. This town is remarkable as having been the centre of European trade in the E., during the time that the Portuguese had the sway in those seas; and may be regarded as the cradle of that extensive commerce which is now concentrated at Canton. Lat. 22° 13' N., Lon. 113° 35' E. Pop. about 30,000. (B.)

MAC'-CLES-FIELD', a manufacturing t. of England, in Cheshire, 16 m. S. by E. of Manchester. It is regarded as the centre of the silk manufacture in England: to this branch of industry it is chiefly indebted for its prosperity, which, however, has received some severe checks within the last few years. Pop. 24,137.

MAC-QUAR'-RIE, the name of a river and small lake in the E. part of the Australian continent.

MAD'-A-GAS'-CAR (called by the natives Mad-e-casse/ or Mad-e-gasse/), a large i. in the Indian Ocean, about 240 m. from the E. coast of Africa, extending from about 12° to 25° 40' S. Lat., and from about 43° 10' to 50° 30' E. Lon. It is 960 m. long, with a breadth varying from 200 m. to 360 m. The area is estimated at 225,000 sq. m. Until the commencement of the present century, this island appears to have been divided among a great number of independent tribes, but, of latter times, it may be regarded as consisting of the kingdom of Madagascar, which occupies the larger portion, and several other parts under the government of independent chiefs. The whole pop. is estimated at between 4,000,000 and 5,000,000. Among the different nations into which the inhabitants of Madagascar are divided, the Ovahs, who occupy the interior of the island, are the most deserving of notice. They are the most industrious, powerful, and civilized of all the Madecasses. In height, they are rather above the European standard, portly in their person, of handsome features, and usually of a copper colour (though sometimes nearly or quite black), with dark and lank hair. The Madecasses evidently belong to the great Malay race. (B.) The prevailing religion is idolatry. The kingdom of Madagascar owes its origin to the late prince Radama, the chief of the Ovahs, who, in energy and enlightened policy, resembled Peter the Great. This ex-

traordinary man, after conquering a great part of the island, commenced the difficult but glorious enterprise of introducing into his empire the civilization and arts of Europe. He received and protected the missionaries, and promoted the establishment of schools, which, at the time of his death, had increased to more than 100, and in which nearly 5,000 children were taught. Several young persons were sent to Mauritius, and even to England, to receive instruction. Through the intercession of the English, Radama also abolished the slave trade in his dominions. He was on the point of seeing his vast projects crowned with the most brilliant success, when his queen, a second Clytemnestra, caused him to be poisoned in July, 1828. She, with her infamous accomplice, succeeded to the throne; and it is not improbable that this great kingdom will, ere long, be resolved into its original elements, if, indeed, this has not already taken place. Since the death of Radama, Europeans have had but little if any intercourse with Madagascar, so that nothing certain is known respecting the present condition of the island.—Adj. and inhab. MAD'-E-CASSE' or MAL-GASH' (Malegache).

MADDALONI, mād-dā-lo'-ne, a t. of Naples, in the prov. of Terra-di-Lavoro, with a royal college, 14 m. N. N. E. of Naples. Pop. 10,000. (P. C.)

MADEIRA, mad-ee'-rā, (Port. pron. mǎ-dǎ'e-rǎ,) an i. in the N. Atlantic, between 32° 36' and 32° 53' N. Lat., and 16° 40' and 17° 20' W. Lon. It is about 37 m. in length, and 15 m. in its greatest breadth. Area computed at above 300 sq. m. Pop. estimated at 80,000. (P. C.) This island is a mass of basaltic rock; of which the highest part is 5,450 ft. above the sea, and is covered with vegetation to its summit. The cliffs on all sides are very lofty; one on the N. coast is above 1,000 ft. in height. The mountain scenery in the interior is bold and highly romantic. Every part of the island not encumbered with rocks is extremely fertile. The climate of Madeira is perhaps more equable and mild than that of any other country, not within the tropics. The thermometer seldom falls below 53° in the severest weather, while the mean temperature of the summer is between 73° and 74°; that of winter is about 63°. The place is considered very healthy, and is much resorted to by invalids, particularly those suffering from pulmonary affections. Funchal is the capital.

MAD-RAS' or **FORT ST. GEORGE**, the cap. of Southern India, situated on the Coromandel Coast. The position of this town is very unfavourable to maritime commerce, on account of the rapid current which runs along the coast, and the dangerous surf which beats against the shore. Fort St. George was founded by the English in 1639; it was soon after surrounded by a town, which has since become very populous. The number of inhabitants, in 1822, amounted to 462,000, of whom nearly all are natives. The Observatory is in 13° 4' 9" N. Lat., and 80° 15' 56" E. Lon. Madras also gives its name to the most southerly of the three presidencies into which the British empire in India is divided, comprehending the whole of Hindostan, S. of the r. Krishna, besides some other districts.

MAD-RID' (Sp. pron. mād-reed', almost mātH-reeth'), the cap. of Spain, is situated nearly in the centre of the Spanish peninsula, in a sterile plain surrounded by mountains, at an elevation of more than 2,000 ft. above the level of the sea. It is enclosed by a brick wall 20 ft. high, with 15 gates, which are mostly built of coarse gray granite. Owing to the sterility of the surrounding country, and the total absence of good houses and pleasure-gardens in the neighbourhood, the exterior view of the town is any thing but inviting. The interior, however, is not devoid of beauty. The houses are well constructed, and the principal streets are, with few exceptions, wide and handsome. Among the remarkable edifices of Madrid, we may notice the new palace of the king, which is perhaps the finest royal residence in Europe. It has four fronts, 470 ft. in length and 100 ft. high; and its interior is decorated in a style of costly magnificence. The Spanish capital contains a great number of literary and scientific establishments, but they are said, not generally to have kept pace with the march of improvement in other parts of Europe. There are, however, several institutions which enjoy a high reputation; among which we may cite the Spanish

Academy (La Academia de la Lengua, *i. e.* "the Academy of the Language"), founded in 1724, in imitation of the French Academy, and intended to be, like that body, the supreme tribunal in matters of literature: the Museum of Natural History, in which public lectures are given on various sciences, including mathematics, and which contains a splendid collection of minerals from the Spanish dominions in America, besides specimens in the other departments of natural history. There are two extensive libraries open to the public; one founded by Philip V., in 1712, which contains 150,000 vols., besides a very large collection of manuscripts, and a museum of medals and antiquities. Lat. 40° 25' N., Lon. 3° 42' W. The population in 1845 was 206,740. —Adj. and inhab. MAD'-RĀ-LE'-NĪ-ĀN (Borrow)—Spanish, MADRILEÑO, mād-re-lane'-yo.

MAESTRICHT or MAASTRICHT, mās'-trikt, (Anc. Trajectum ad Mosam,*) a strongly fortified t. of Holland, cap. of the Dutch part of the prov. of Limburg, on the Meuse or Maas, 14 m. N. by E. of Liege. In the vicinity is the mountain of St. Peter (Petersberg), remarkable for its immense stone quarries, which extend over a tract of 12 leagues in circumference, traversed, it is said, by 20,000 passages, which cross each other in all directions, forming such an intricate labyrinth that it is dangerous to enter it without an experienced guide. The inhabitants of the surrounding country, it is said, have found, in time of war, a safe refuge in this quarry, both for themselves and their cattle. Some parts of this mountain are supposed to have been worked 2,000 years ago. Lat. of the town, 50° 51' N., Lon. 5° 41' E. Pop. 22,000. (P. C.)

MAG-Ā-DOX'-Ā or MAG-Ā-DOX'-O (Port. pron. mág-â-do'-sho: called by the inhabitants Mâk'-â-joo'), a t. on the E. coast of Africa, cap. of a kingdom of the same name, of which very little is known to Europeans. Lat. about 2° N., Lon. 45° 20' E.

MAG-DA-LE'-NĀ (Sp. pron. mág-dâ-lâ'-nâ), the principal r. of New Granada, in S. America. It rises in the little lake Papas (pâ'-pâ's), among the Andes, in about 1° 50' N. Lat. and 76° 30' W. Lon., and, flowing northerly, empties itself into the Caribbean Sea, in about 11° 10' N. Lat. and 74° 45' W. Lon. Its entire length is estimated at above 800 m. It is navigable as far as Honda, more than 500 m.

MAG-DE-BURG' (Ger. pron. mág-dêh-böörġ'), a city of Germany, cap. of the prov. of Prussian Saxony and of a gov. of its own name, on the Elbe, 74 m. S. W. of Berlin. This place is very strongly fortified, and is one of the most important bulwarks of the Prussian monarchy. It

is also the centre of an active commerce, and possesses various and extensive manufactures. Among the buildings we may mention the Cathedral, remarkable for its size; it has two steeples, 350 ft. in height, and one of the largest bells in Europe. The literary and scientific institutions, as well as the charitable establishments of this town, are numerous and well conducted. Lat. 52° 8' N., Lon. 11° 39' E. Pop. 50,000. (P. C.)

MAGELLAN, maj-el/-lan,* (Sp. pron. má-hèl-yân/,) STRAIT OF, at the S. extremity of S. America, between Patagonia and Terra del Fuego. Its whole length, following its windings, is more than 300 m. It was discovered in 1520, by the great Portuguese navigator, Magalhaens (måg-ál-yá/-ens), then in the service of Spain, and called, in honour of him, the Strait of Magalhaens. The Spaniards changed the name to Magellan, which, in their language, expresses a sound not very different from that of the Portuguese Magalhaens.

MAGGIORE, LAGO, lá-go māj-jo'-rà, or the "large lake," (Anc. La/cus Verba/nus; Ger. Langensee, lāng/-en-sá/, or "long lake,") next to Garda the largest lake in Italy, lying partly between Piedmont and Lombardy, and partly in the Swiss canton of Tessin or Ticino. It is intersected by the 46th parallel of N. Lat. and the meridian of 8° 40' E. Lon.; having a length of above 40 m., with a breadth varying from 1 to 6 m. Its surface is 578 ft. above the level of the sea; its greatest depth is stated by McCulloch to be not less than 300 fathoms!

MAINE, mane, one of the former provinces of France, now chiefly distributed among the departments of Sarthe, Mayenne, and Orne.

MAINE, one of the U. S., situated between $43^{\circ} 4'$ and $47^{\circ} 30'$ N. Lat., and $66^{\circ} 50'$ and 71° W. Lon.; bounded on the E. by New Brunswick, N. and W. by Canada and New Hampshire, and S. by the Atlantic; and divided into 13 counties.* Extreme length, according to the boundary established in 1842, about 320 m.; greatest breadth, from E. to W., about 200 m. The area is estimated at 32,000 sq. m.; according to the former boundary it is supposed to have exceeded 35,000 sq. m. Pop. 583,088. Augusta is the capital. Maine originally formed a part of the territory of Massachusetts: it was separated, and became an independent state in 1820.

MAINE AND LOIRE (Fr. Maine-et-Loire, mane à lwâr), a dep. in the W. part of France, on the rivers Mayenne and Loire. Pop. 477,270. (B.) Capital, Angers.

MAIN'-LAND, the largest and most southerly of the Shetland Islands, is about 52 m. in length, and 20 in its greatest breadth. The form is very irregular, and the island, for the most part, craggy, mountainous, and barren.

MAJ-OR'-CA (Sp. Mallorca, mál-yor'-cà), the largest of the Balearic Isles, situated in the Mediterranean, between $39^{\circ} 15'$ and 40° N. Lat., and $2^{\circ} 23'$ and $3^{\circ} 32'$ E. Lon. It is about 60 m. long, measuring nearly E. and W.; its greatest breadth, from N. to S., is 47 m. Majorca belongs to Spain, from the nearest part of which it is distant nearly 110 m. This island is very fertile, though the general surface of the country is hilly. Pop. about 140,000. (P. C.) The climate is described as being exceedingly mild and delightful. Palma is the capital, and the largest town on the island. Majorca and Minorca were anciently named Gymnesiæ; while the epithet of Major, or "the larger," was given the former, and that of Minor, or "the smaller," to the latter island.—Adj. and inhab. MAJ-OR'-CAN or MALLORQUINE, mal'-lor-keen'; (Sp. Mallorquin, mál-yor-keen'.)

MAL'-A-BAR', a name usually applied to the whole W. coast of Hindostan, from Cape Comorin to Bombay; but, strictly speaking, it denotes only that dist. or prov., with the adjoining coast, in which the Malabaric language is spoken, which does not extend beyond $12^{\circ} 30'$ N. Lat.—Adj. MAL'-A-BAR'-IC.

MA-LAC'-CA a t. of S. Asia, the cap. of a small colony of the same name, belonging to Great Britain, is situated on the W. coast of the Malay peninsula. It was formerly a place of considerable importance, but since the foundation of Singapore, in 1819, it has sunk into comparative insignificance. Lat. $2^{\circ} 10'$ N., Lon. $102^{\circ} 5'$ E. Pop. in 1822 12,000. (P. C.)

MAL/-A-GA or **mâl/-â-gâ** (Anc. Mal'aca), the principal seaport of the Spanish prov. of Granada, situated on a bay in the Mediterranean, with a fine harbour. From the earliest ages, under all the nations who have possessed it, this place has been renowned for its commerce; and at present it is the only flourishing city in Andalusia. (P. C.) Lat. 36° 43' N., Lon. 4° 25' W. Pop. stated at 52,000. (B.)

MALAISSIA, mal-a/-she-a, (Fr. Malaisie, mâ'-lá'-ze'), or the **MALAY ARCHIPELAGO**, called also the **INDIAN**, and sometimes the **EASTERN ARCHIPELAGO**, the most western and most important of the three great divisions of Oceanica, is situated between 12° S. and 21° N. Lat., and 95° and 133° E. Lon. It comprehends the Philippine and Molucca groups, the large islands of Sumatra, Java, Borneo, Celebes, and a multitude of smaller islands. The line which separates Malaisia from Polynesia, runs W. of Papua and E. of Gilolo, Mysol, and Ceram. (See **OCEANICA**.) Malaisia derives its name from the circumstance that the inhabitants, for the most part, belong to the great Malay race.—Adj. **MALAISSIAN**, mal-a/-she-an.

MÄLAREN, mâ/-lar-en, a lake of Sweden, about 70 m. in length, which communicates with the Baltic at Stockholm.

MALAY PENINSULA, called also the **PENINSULA OF MALACCA** or **MALAYA** (mal-â/-ya), a long and narrow territory in Chin India, forming the most southern part of the continent of Asia, situated between 1° 15' and about 12° N. Lat., and 98° and 104° 20' E. Lon. It is about 800 m. long, with a breadth varying from 50 to above 180 m. Area estimated at 80,000 sq. m. The soil appears to be, in general, not distinguished for fertility; but the mineral wealth of this region is remarkable. Gold is found in all the rivers, and is also obtained from mines in quantities sufficient to justify the name of Chersonesus Aurea, or the "golden peninsula," which the ancients gave to this country. Tin is also found in abundance. The inhabitants of the peninsula are Siamese and Malays; the former occupy that portion which is N. of the 5th or 6th degree of N. Lat., and the Malays the remainder.—Adj. **MAL-AY/-AN** and **MAL-AY/**; inhab. **MALAY**.

The **MALAYS**, according to Blumenbach, constitute the fourth grand division of the human race. In form they are short and robust. The medium height of the men may be 5 ft. 2 inches; that of the women 4 ft. 11 inches. The face is round, the mouth wide, and the teeth, in general, remarkably fine. These people have great mental activity, and eagerly apply themselves to commerce and navigation. (P. C.) Some of them appear to have made considerable advancement in civilization, and to be well acquainted with agriculture and the mechanic arts. They have also made some progress in medicine and in music. The Malays are spread not only over the islands of the Malay Archipelago, Madagascar, and the southern part of the Asiatic continent, but appear also to be found even in the remotest parts of Polynesia.

MAN/-CHES-TER, the great centre of the cotton manufacture of Great Britain, and the principal manufacturing town in the world, is situated in Lancashire, on the Irwell, a branch of the Mersey, 31 m. E. of Liverpool, and 163 N. N. W. of London. A multitude of mean-looking houses, in which the manufacturers lodge, a number of irregular, narrow, and ill-paved streets, and the continual smoke which rises from so many steam-engines, render the general aspect of this place rather repulsive. The newer parts of the town, however, are, for the most part, of a very different character. The streets are handsome, and several of the public edifices might be accounted ornaments to any

It is nearly surrounded by lakes, partly natural and partly formed by the damming up of the river. It is regularly fortified, and is perhaps the strongest bulwark of Austrian Italy. Among the remarkable buildings of Mantua, we may notice the Cathedral, one of the finest in Italy, adorned with many excellent paintings; and the Public Library and Museum, containing 80,000 printed vols., besides many manuscripts, and a sculpture gallery, which ranks next after those of Rome, Florence, and Naples. That which perhaps has contributed more than anything else to the fame of Mantua, is the circumstance that Virgil was born in the vicinity of this town, whence he has been called the "Mantuan bard." Lat. 45° 9' N., Lon. 10° 48' E. Pop. 28,000. (B.)

MARSALA, mar-sâ/-lâ, a seaport t. at the W. extremity of Sicily, near the site of the ancient Lilybæum or Lilybæum, celebrated for its wines, which form an important article of exportation. It has a royal college, and about 21,000 inhabitants. (B.) Lat. 37° 48' N., Lon. 12° 27' E.

MARSEILLES, mar-sailz/, (Fr. Marseille, mar'-saiî/ or mar'-sâ/e;* Lat. Massilia; Gr. Μασσαλία,) a large commercial city and seaport of France, the cap of the dep. of the Mouths of the Rhone, situated on the E. side of a small bay of the Gulf of Lyons. Its harbour is a fine basin, about 1,000 yards in length, and extending into the very centre of the city. Its depth varies from 12 to 24 ft., so that it is exceedingly well adapted for moderate-sized merchantmen, but not for ships of the largest dimensions. The trade of Marseilles is very extensive and rapidly increasing; and the revenue derived from customs is greater than that of any other town in France, not even excepting *Le Havre*. This city contains, among other institutions, a national college, a school of navigation, an academy of sciences, belles-lettres and arts, and a public library of 60,000 vols. Massilia was founded about 600 years before Christ, by a colony of Greeks, from Phocæa. It was evidently a place of great importance, in the time of Julius Cæsar. In the middle ages, we find it holding a distinguished place both as a commercial and warlike power. The Marseillais appear to have been actively engaged in the crusades; and in the third crusade, several armaments sailed from their port. For a short time in the early part of the 13th century, Marseilles constituted an independent republic. The Observatory is in Lat. 43° 17' 50" N., Lon. 5° 22' 15" E. The pop. of the whole commune, in 1836, was 146,239 (B.), but at present it is said to exceed 170,000.—Adj. and inhab. **MARSEILLAIS** or **MARSEILLOIS**, mar'-sale'-yâ/ or mar'-sâ'-yâ/; feminine, **MARSEILLAISE**, mar'-sale'-yaze/; and **MARSIL'-I-AN**, when the ancient town is referred to.

MAUCH CHUNK, a town of Pa., capital of Carbon co., on the r. Lehigh, about 70 m. in a straight line N. N. W. of Philadelphia. A railroad, about 8 m. in length, down an inclined plane, connects the coal-mines of Mauch Chunk with the town. The cars, when laden with coal, run the whole distance by their own weight, and require no other attention than to have their velocity occasionally moderated by means of a brake. They are drawn up by mules, which are rewarded for their severe labours by being allowed to ride down, in vehicles made for their especial accommodation. It is a curious fact, that after having become accustomed to the indulgence of riding, no severity or persuasion will induce them to walk down the inclined plane.

MAURITIUS, mau-rish'-e-us, or **ISLE OF FRANCE**, an i. of the Indian Ocean, intersected by the 20th parallel of S. Lat. and the meridian of 57° 30' E. Lon. Length, near 40 m.; greatest breadth, about 25 m. The area is estimated at 700 m.; the pop. at 100,000 (P. C.); about three-fourths of whom were originally negro slaves, now free. Port Louis or Port North West, on the N. W. side of the island, is the capital. Lat. 20° 10' S., Lon. 57° 29' E. Pop. 26,000. (P. C.)

Mauritius, with the neighbouring island of Bourbon, was discovered by the Portuguese in 1505, and the whole group was called the Mascarenhas (mǎs-kǎ-ren'-yǎs') Islands, from the name of the discoverer. The Dutch afterwards took possession of Mauritius, which they named in honour of Maurice (in Latin Mauritius), the stadtholder of the Netherlands. In 1715, it fell into the hands of the French, who called it the Isle de France, but, in 1810, it was taken from them by the British, in whose possession it has since remained.

MEC/CA, a celebrated city of Arabia, in the prov. of Hedjaz, remarkable as being the birth-place of Mahomet, and the great centre or capital of the Moslem religion. It is situated in a sterile valley, in the midst of mountains, about two days' journey E. of its port Jidda, on the Red Sea. The most remarkable edifice is the temple of the Kaaba (kǎǎ/-bǎ); a massive structure, forming an oblong square, 18 paces long, 14 broad, and nearly 40 ft. high, covered by an immense curtain of black silk, on which is inscribed, in letters of gold, the sentence which imbodyes the essential part of the Mahometan's creed: "There is no god but God; Mahomet is the prophet of God." The sacred fountain of Zem-zem—said to be that found by Hagar, when her son Ishmael was dying of thirst—is enclosed in a substantial square building, with marble basins for ablution, and a room appropriated for pilgrims, who come in crowds to taste, and to be purified by, its waters. Mecca appears to have lost the reputation which it once possessed as a seat of Mahometan learning. Lat. about 21° 30' N., Lon. 40° 15' E. Pop. uncertain, said to be above 80,000 during the period of pilgrimage (B.); at other times, it may be between 20,000 and 30,000—Adj. and inhab. MECCAWEE, mek/-kǎ-wee', sometimes written MECCAWAY.

MECHLIN, mek/-lin, or MECHELEN, mek/-el-en, (Fr. Malines, mǎ'-leen') an archiepiscopal city of Belgium, in the prov. of Antwerp, on the Dyle, 14 m. N. N. E. of Brussels. It is regularly laid out with

broad, clean, and well-paved streets. The lace manufactured in Mechlin has long been in high repute, and brings a great price: it is said, however, that this branch of business has declined of late. The town has recently acquired additional importance from being the central point at which several railways in Belgium meet. The archbishop of Mechlin is the primate of the kingdom. Lat. $51^{\circ} 2' N.$, Lon. $4^{\circ} 29' E.$ Pop. 24,000. (B.)

MECK'-LEN-BURG (Ger. pron. mek'-len-böörġ'), a territory of Germany, between $53^{\circ} 3'$ and $54^{\circ} 20' N.$ Lat., and $10^{\circ} 40'$ and $14^{\circ} E.$ Lon., and divided into two grand-duchies, viz., Mecklenburg-Schwerin and Mecklenburg-Strelitz.

MECKLENBURG-SCHWERIN (shwēr-eeen') constitutes the western and much the larger division of the above territory. Area, 4,833 sq. m. Pop. 482,925. (M.) Schwerin is the capital.

MECKLENBURG-STRELITZ (strel'-its) is bounded on the W. by the above, and contains an area of 997 sq. m. Pop. 89,528. (M.) Strelitz is the capital.

MEDINA, med-ee/-nā, (*i. e.* the "city," so called by way of eminence,) one of the cities held sacred by Mahometans, and, next to Mecca, their principal place of pilgrimage, is situated about 260 m. N. of Mecca, and about 100 m. N. E. of its port Yembo, on the Red Sea. It is not open, like Mecca, but surrounded with walls about 40 ft. high,* flanked by 30 towers (M.), and is entered by three fine gates. The glory of Medina, is the possession of the tomb which contains the remains of the Prophet. We may remark, that the story long current in Europe, of Mahomet's coffin being suspended in the air by a loadstone, is unknown in the East. Medina has but little commerce, and scarcely any manufactures. The inhabitants, too numerous to be supported by the productions of the sterile country by which they are surrounded, are said to be maintained, in a great measure, by the gifts which are sent or brought to them by the faithful. Pop. estimated at 18,000. (M.)

ME-DI'-NĀ, a co. in the N. part of Ohio, a little W. of the Ohio and Erie Canal. Pop. 24,441. Co. t. Medina.

MEDINA SIDONIA, med-ee/-nā se-do/-ne-ā, an ancient t. of Spain, in Andalusia, 22 m. E. by S. of Cadiz, with extensive manufactures of earthenware. Pop. 9,000. (B.)

MED'-IT-ER-RA'-NE-AN SEA (Lat. Ma're Mediterra'neum; *i. e.* "midland sea," and Ma're Inter'num; *i. e.* the "inner or inland sea"); a large inland sea, situated between Africa, on the S., and Europe and Asia on the N., extending from about $30^{\circ} 20'$ to $45^{\circ} 40' N.$ Lat., and from

about 5° 30' W. to 36° E. Lon. It is rather more than 2,200 m. in length; its greatest breadth, from Venice to the S. extremity of the Bay of Sidra, is about 1,100 m. Area estimated at 690,000 sq. m. The Mediterranean communicates with the Atlantic by the Strait of Gibraltar, with the Black Sea by the Dardanelles, the Sea of Marmora, and the Bosphorus. The depth of this sea is very great, it being, in most places, unfathomable. It is said, however, that between Sicily and Tunis, the channel is nowhere more than 30 fathoms deep. The Mediterranean, though poetically termed a "tideless sea," is not strictly so: in the Adriatic, as well as between that sea and the coast of Africa, the tides rise from 5 to 7 feet, and their influence is also felt more or less along the shores of Sicily and the W. side of the Morea. A great number of rivers flow into the Mediterranean, particularly from the N., and a strong current comes down through the Dardanelles from the Black Sea; yet, so rapid is the evaporation, that a constant influx takes place through the Strait of Gibraltar, in order to preserve its equilibrium with the Atlantic.

MENTZ, ments, or MAINZ, mints, (Fr. Mayence, mǎ'-yǎnce'; Anc. Magontiacum or Moguntiacum,) a fortified city of Germany, the cap. of the prov. of Rheinhessen, in Hesse-Darmstadt, and formerly of the electorate of its own name, is situated on the W. bank of the Rhine, nearly opposite to its junction with the Main. It is one of the strongest fortresses of Europe, and the chief bulwark of Germany against France. The village of Kastel or Kassel, on the opposite side of the Rhine, is included within its system of fortifications, and is connected with Mentz by a bridge of boats, about 1,800 ft. in length. The town is old fashioned, and, on the whole, badly built, and the streets, with few exceptions, are narrow, crooked, and gloomy. Among the remarkable edifices, we may mention the church of St. Ignatius, which is considered a model of beautiful ecclesiastical architecture; and the magnificent grand-ducal palace, formerly the house of the Teutonic Order. Mentz is remarkable for having given to the world the first complete specimen of a printed book, and for being the centre whence the typographical art has spread itself over the globe. One of the squares of the city is named in honour of Gutenberg (goo'-ten-berg), the inventor of the art of printing with moveable types, and a splendid monument

has recently been erected to his memory. Among its various literary and scientific institutions, Mentz contains a city library of above 90,000 vols., in which are preserved some of the earliest extant specimens of printing. The remains of a Roman bridge over the Rhine, and an aqueduct in the vicinity, among other monuments, attest the ancient origin of Mentz. Magontiacum, whence the modern town derives its name, was founded by Drusus, about 10 years before the Christian era. Lat. 50° N., Lon. 8° 11' E. Pop., exclusive of the garrison (which amounts to about 6,000), 31,000. (B.)

MENZALEH, men-zâ'-leh, a small t. of Lower Egypt, near an extensive lagoon to which it gives its name. Lat. 30° 45' N., Lon. 31° 55' E. Lake Menzaleh is above 50 m. long, and near 30 m. wide.

MERGUI or MERGHI, mę'-gee', a t. of Farther India, cap. of a British prov. of the same name, at the mouth of the r. Tenasserim, with a good harbour. Lat. 12° 30' N., Lon. 98° 35' E. Pop. in 1825, about 8,000. (B.)

MER'-I-DA (Anc. Augus'ta Emer'ita), a decayed t. of Spain, in Estremadura, on the right bank of the Guadiana, remarkable for its magnificent ruins. Among these we may mention a triumphal arch which has been attributed to Trajan, and a bridge over the Guadiana, one of the largest in Europe, remarkable for its solidity and fine preservation. Augusta Emerita was founded by a Roman general, under the Emperor Augustus: it afterwards became the capital of Lusitania, and the most magnificent city in Roman Spain. At the time of the Arab invasion, it was, according to a Moslem historian, 8 m. in circumference, and garrisoned by 90,000 men. Lat. 38° 51' N., Lon. 6° 15' W. Pop. about 6,000. (B.)

MERIDA, the cap. of the Mexican state of Yucatan, situated about 50 m. from the sea. Lat. about 20° 50' N., Lon. 89° 40' W. Pop. 23,000. (P. C.)

MER'-RI-MACK', a r. of New England, which rises in the N. central part of New Hampshire, and, flowing southerly into Massachusetts, afterwards changes its course to the N. E., and empties itself into the Atlantic about 20 m. S. of Portsmouth. Its whole length is near 200 m. The navigation is obstructed, especially in the upper part of its course, by a number of rapids and falls.

MERRIMACK or **MAR'-A-MEC'**, a r. of Mo., which falls into the Mississippi about 20 m. below St. Louis.

MERRIMACK, a co. in the S. central part of N. H., intersected by the Merrimack r. Pop. 38,445. Co. t. Concord.

MER'-SE-BURG' (Ger. pron. mĕr'-seh-böörĕ'), a manufacturing and commercial t. of Prussian Saxony, the cap. of a gov. of the same name, on the r. Saale, 18 m. W. of Leipsic. It has a fine cathedral, with one of the largest organs in Germany. Lat. 51° 22' N., Lon. 12° E. Pop. above 8,000. (B.)

MER'-SEY, an important r. in the W. N. W. part of England, which flows into the Irish Sea. About 15 m. from its mouth, it expands into an estuary, which, at its broadest part, is about 3 m. wide. The Mersey and Irwell have been rendered navigable as far as Manchester.

MERTHYR TYDVIL or **TYDFIL**, mĕr'-thjĕr tid'-vil, a t. of Wales, in Glamorganshire, 19 m. N. by W. of Cardiff, with rich mines of coal and iron ore. It has increased very rapidly within the last few years. Lat. 51° 44' N., Lon. 2° 20' W. Pop. of the entire parish, 34,977.

MĒSH'-ĒD', often written **MUSHED**, a decayed city of Persia, in Khorrassan, remarkable for the mausoleum of Imâm Reza, "the magnificence of which, with its silver gates, jewelled doors, rails once of solid gold, glittering domes and minarets, and handsome arcades, is almost unequalled in Persia." (M.) This city carries on considerable trade with the neighbouring towns of central Asia, and has some important manufactures. Lat. 36° 18' N., Lon. 59° 35' E. Pop. 45,000. It is, however, often doubled by the number of pilgrims who visit the shrine of Imâm Reza. (P. C.)

MES'-O-PO-TA'-MĪ-A (Arab. Al Jezira or El-Jez-ee'-rĕh, "the island"), the name given by the ancient Greeks to a country of Asia, which lies between the Euphrates and Tigris. Its length, from N. W. to S. E., is between 600 m. and 700 m.; its greatest breadth is near 200 m. *Mesopotamia* signifies literally "between the rivers."

MESSINA, mes-see'-nă, (Anc. Zancle and Messe'ne or Messa'na,) a fortified city of Sicily, cap. of a prov. of the same name, near the N. E. extremity of the island, with the best harbour in the kingdom of the two Sicilies. The port of Messina is formed by a semicircular strip of land, which, from its resemblance to a sickle, suggested the original name of the town; Zancle (in Greek, Ζαγκλη) signifying a "sickle," or "pruning-hook." This city contains several remarkable buildings,

a royal college, and an extensive public library, which is rich in Greek manuscripts; it also possesses the most extensive commerce and manufactures of all the towns of Sicily. Lat. 38° 14' N., Lon. 15° 35' E. Pop. 60,000. (P. C.)

METZ, mets, (Fr. pron. mace; Anc. Divodu/rum; afterwards Mediomat/rici, and Met/tis or Me/tis,) a city and fortress in the N. E. part of France, the cap. of the dep. of Moselle, situated on the Moselle, about 80 m. W. N. W. of Strasburg. The interior of the town is in general handsome; the streets are straight, wide, and well paved. The most remarkable of the public edifices is perhaps the cathedral, a Gothic building remarkable for the boldness and lightness of its architecture. Its length is about 387 ft., and the height of the tower near 400 ft. Metz contains an *académie universitaire*, a national college, an academy of letters and arts, a practical school of artillery and military engineering (the finest institution of the kind in Europe), a public library of 31,000 vols., and numerous other literary and scientific institutions. Lat. 49° 7' N., Lon. 6° 10' E. Pop. 42,793. (B.)

MEURTHE, murt, a dep. in the N. E. part of France, intersected by the r. Moselle. Pop. 424,366. (B.) Capital, Nancy.

MEUSE, muze, (Fr. pron. muz; Dutch, Maas, määs: Anc. Mo'sa,) a r. which rises in the N. E. part of France, and, flowing through Belgium and the southern part of Holland, falls into the N. Sea, in about 51° 56' N. Lat., and 4° 3' E. Lon. Above 40 m. from its mouth, its waters unite with those of the Rhine or Whaal, but the stream thus formed still retains the name of Maas. The entire length of this river is estimated at 400 m. It is navigable to Verdun, in France, or about three-fourths of its course.

MEUSE, a dep. in the N. E. part of France, intersected by the above r., and bordering on Belgium. Pop. 317,701. (B.) Capital, Bar-le-Duc.

MEX'-I-CO, (Sp. pron. Mèh'-he-ko,) **THE UNITED STATES OF**, a federal republic of North America, situated between 16° and 33° N. Lat. and 91° and 117° W. Lon., bounded on the N. and E. by the United States and Gulf of Mexico; S. and W. by the United States of Central America and the Pacific Ocean. Extreme length from S. E. to N. W. about 1900 m.; greatest breadth from E. to W. about 800 m. The area is estimated at 800,000 sq. m. The pop. is probably about 7,000,000. Owing to the civil dissensions of the Mexicans, and other causes, it appears impossible to obtain any entirely satisfactory information respecting the political condition of this republic.* It is divided into 19 states and the federal district, besides several territories. The following is a list of the states:—Chiapa (che-á'-pá), Yucatan (yoo-ká-tán'), Tabasco (tá-bás'-ko), Oaxaca (wá-ná'-ká), Vera Cruz (vâ'-rá krooce), Puebla (pweb'-lá), Mexico, Michoacan (me'-cho-á-kân'), Xa-

* In consequence of the late war between Mexico and the United States the former was compelled to cede to the latter the territories of New Mexico and Upper California. In 1845 the state of Yucatan declared itself independent for the second time.

lisco or Jalisco (hǎ-lees'/-ko), Guanajuato (g'wǎn-â-hwǎ'/-to), Queretaro (kêr-â/-tá-ro), San Luis Potosi (sǎn loo-is/' po-to-see'), Zacatecas (sǎ-kǎ-tâ/-kâs), Durango (doo-rǎng/'-go), Occidente (ok-se-den/'-tà), So-no/-ra and Cinaloa (se-nǎ-lo/'-â), Chihuahua (che-wǎ/-wǎ), Cohahuila (ko-â-wee/'-la), Nuevo Leon (nwǎ'-vo-lá-one'), Tamaulipas (tǎ-mou-lee/'-pas). The territories are:—Colima (ko-lee/'-mǎ), Tlascala (tlâs-kâ/'-lá), and Lower California. The climate of Mexico, as might be expected in a country of such vast extent, varies greatly in different parts. In the neighbourhood of the capital, at an elevation of more than 7,000 ft. above the sea, the thermometer rarely falls below freezing point. The winter may be compared to that of Naples, while in summer the temperature is seldom above 75°, in the shade. On the table-land of Toluca (S. S.W. of the city of Mexico), which has an elevation of near 9,000 ft. above the sea, the air is so cold, during the greater part of the day, that the thermometer generally ranges from 42° to 46°, so that even those persons who have been brought up in northern regions, find the climate very unpleasant. (P. C.) In the southern portions of the country, on the low lands, the climate is very hot, as in other intertropical regions. Humboldt has asserted, that in this country may be grown almost all the vegetable productions, which are found between the equator and the poles. Maize constitutes the principal food of the lower classes, and is produced everywhere, even on the highest table-lands, where wheat will not grow. On the low lands, bananas are extensively cultivated, or, to speak more correctly, are produced abundantly, with scarcely any cultivation. "Humboldt affirms that half a hectare (about an acre) of land, planted with bananas, will furnish food for more than fifty individuals; whereas the same extent of land, if sown with wheat in Europe, would not support more than two individuals." (M.) But this facility of obtaining a subsistence, appears to have exerted a most baneful influence on the character of the Mexicans, by fostering improvidence and sloth. Mexico is especially remarkable for its mineral wealth. Not only gold and silver, but copper, iron, and lead, exist in abundance. Quicksilver is also found. The carbonate of soda, which is necessary for the smelting of the silver ore, is collected in several lakes, where it is found crystallized on the surface, in great abundance.—Adj. and inhab. MEX'-I-CAN (Sp. Mexicano, m'êh-he-kâ/-no).

MEXICO (called by the aborigines Tenochtitlan), the cap. of the united Mexican states, one of the most beautiful cities in the world, and, till recently, the largest in America, is situated in the midst of an elevated plain, surrounded by mountains, at the height of 7,468 ft. above the level of the sea. The streets are wide, well paved, and flagged, and cross each other almost uniformly at right angles. The Great Square (Plaza Mayor, plǎ'-sǎ mǎ-yore') is one of the finest to be seen in any metropolis: in its centre is a colossal statue of Charles IV. of Spain, said to be superior to any other work of this kind existing in the New World. The Cathedral, on the N. side of the Great Square, is regarded as the finest ecclesiastical edifice in America. There

are, besides, a number of churches, remarkable for the magnificence of their architecture, and the costliness of their paintings, sculpture, and other decorations. Mexico was formerly inferior to none of the American cities, as a seat of science and literature; but, in these as in most other respects, its course has been retrograde for several years past. There is a university, a college of mines, with a rich collection of minerals, and a number of other institutions, most of which, however, are said to be in a state of decay. Lat. $19^{\circ} 26' N.$, Lon. $99^{\circ} 5' W.$ Pop. estimated at 180,000. (B.)

MEXICO, GULF OF, on the S. E. coast of N. America, between about $18^{\circ} 10'$ and $30^{\circ} 20' N.$ Lat., and 81° and $98^{\circ} W.$ Lon. Its length, from N. E. to S. W., is near 1,100 m.; its greatest breadth, above 600 m.

MÉZIÈRES, mēz'-e-air/, a strongly fortified t. of France, the cap. of the dep. of Ardennes, on the Meuse. Lat. $49^{\circ} 46' N.$, Lon. $4^{\circ} 44' E.$ Pop. 4,000. (B.)

MIACO, me-ā'-ko, or KEE'-o, a large city of the Japanese empire, situated on the island of Nippon, 230 m. W. by S. of Yeddo. It was formerly the capital of Japan, and is now the residence of the Daïri (dā-ee-ree) or chief priest, and contains a number of remarkable edifices. One of the temples has a colossal image of the god Daïboots, or the Grand Boodha, made of wood and covered with gilt paper, represented, like the Hindoo idols, sitting on a flower of lotus. The total height is more than 90 ft., the statue being about 80, and the flower above 10 ft. high. The image is 25 ft. (4 toises) between the shoulders, and is capable of containing several people in the palm of the hand. In a neighbouring building is suspended the largest bell in the known world. It is about 18 ft. high, and weighs 2,040,000 Dutch pounds, or about 1,000 tons! (B.) Miaco is the first manufacturing and probably the first commercial town in Japan. Here, also, all the money of the empire is coined. Miaco signifies "capital;" Keo (or Kio), a "residence." Lat. about $34^{\circ} 30' N.$, Lon. $136^{\circ} E.$ The pop. probably exceeds 500,000. (B.)

MI-AM'-I, a r. which rises in the N. W. central part of Ohio, and, flowing south-westerly, joins the Ohio at the S. W. extremity of the state, about 20 m. below Cincinnati. Its whole length is probably 150 m.

lake is about 600 ft. above the level of the sea; its depth is stated to be 900 ft. Lake Michigan is connected, at its N. E. extremity, by the Strait of Mackinaw, with Lake Huron.

MICHIGAN, one of the U. S., situated between 41° 40' and 48° N. Lat., and 82° 10' and 91° W. Lon. It consists of two great natural divisions, viz., the lower peninsula, bounded on the W. and N. W. by Lake Michigan, on the N. E. and E. by Lake Huron, the r. and Lake St. Clair, the Detroit r. and Lake Erie, and on the S. by Ohio and Indiana; length, from N. to S., about 290 m.; greatest breadth, from E. to W., rather more than 200 m.; and the upper peninsula, situated between the lakes Superior, Huron, and Michigan, and bounded on the S. W. by Wisconsin; its length is near 330 m., with a mean breadth of 50 or 60 m. The total area is estimated at above 60,000 sq. m. The state is divided into 72 counties.* Pop. 397,654. Lansing is the seat of government. Michigan was admitted into the Union in 1836.

MIL'-AN* (It. Milano, me-lâ'-no; Lat. Mediola'/num), the principal city of N. Italy, and the third in the Italian peninsula (being inferior only to Naples and Rome), is situated between the Olona and Lambro, on the Naviglio Grande (nâ-veel'/yo grân'-dà) or "great canal," which connects these rivers with each other, and flows all round the original town or city proper, of which it marks the boundary. The suburbs which have been built outside of this boundary, occupy more space than the original city. They are surrounded with a line of ramparts, which is planted with trees, and serves as a promenade. Much of the space, however, between the ramparts and the Naviglio, is occupied by gardens. Among the number of magnificent buildings that adorn Milan, the most remarkable is the Duomo or Cathedral, which, after St. Peter's, at Rome, is the largest and most sumptuous ecclesiastical edifice in Italy, and one of the finest in Christendom. The exterior, with its hundred spires, and its three thousand statues of various sizes, looks like a forest of marble. Milan is distinguished as a centre of learning and the arts; and it is said that more books are published here than in all the rest of Italy put together. Among other institutions, this city contains an academy of fine arts, one of the most extensive establishments of the kind in Europe, and a picture gallery, rich in the choicest productions of the ancient Italian masters. The library of Brera (brâ'-rà) contains 100,000 vols., and is open to the public. Milan is the residence of an archbishop, of the Austrian viceroy, and of the governor-general of the Lombard provinces. The Observatory, which is considered the first in Italy, is in Lat. 45° 28' 1" N., Lon. 9° 11' 48" E. The pop., according to Balbi, is above 155,000, and increases rapidly from year to year.—Adj. and inhab. MIL'-AN-ÈSE'.

MILITARY FRONTIER, the name given to a tract of country extending along the S. and S. E. frontier of the Austrian empire, from the Adriatic to the E. extremity of Transylvania. It is distinguished from the rest of the empire by having a purely military government. The object of this establishment was originally to secure the frontier against the inroads of the Turks. All the peasants are soldiers, and hold their lands from the state as fiefs, on tenure of military and civil service. In time of peace, 45,000 men are always under arms, who feed and clothe themselves, and perform their appointed services without any expense to the Austrian government. In time of war, they serve the state in the same manner as the rest of the army, and march out of the country, if required, and they receive the usual pay. It is said that, in any extremity, they can muster 200,000 men, and that, by means of alarm-fires and bells, this immense force can be summoned together, throughout the whole extent of the frontier, in the space of *four hours!* (M.)

MIL-LEDGE-VILLE', the seat of justice of Baldwin co., Ga., and the cap. of the state, situated on the Oconee, at the head of steamboat navigation. Lat. $33^{\circ} 7' N.$, Lon. $83^{\circ} 20' W.$ Pop. 2,216.

MINDANAO, min-da-nâ'-o, or MAGINDANAO, (Sp. pron. mâ-heen-dâ-nâ'-o,) the most southern, and, after Luzon, the largest of the Philippine Islands, is situated between 5° and $10^{\circ} N.$ Lat., and $121^{\circ} 30'$ and $126^{\circ} E.$ Lon. It appears like two islands connected with each other by a narrow isthmus. The eastern portion is above 300 m. in length, from N. to S., with a mean breadth of 80 or 90 m.; the western is about 170 m. long, and, on an average, perhaps 50 m. broad. The area is estimated at about 34,000 sq. m. The inhabitants appear to be chiefly Malays. (See PHILIPPINE ISLANDS.)

MIN'-E-SO'/TA or MINNESOTA (originally spelled Minnay-Sotor), a territory of the United States; bounded on the N. by British America, E. by Lake Superior and Wisconsin, S., S. W., and W. by Iowa and the Missouri and White-Earth rivers. Area estimated at 120,000 sq. m.

MINHO in Portuguese, and Miño in Spanish, pronounced alike, meen'-yo (Anc. Min'/ius), a r. in the N. W. part of the Spanish peninsula, which rises in the N. part of Galicia, and, flowing south-westerly, falls into the Atlantic in about $41^{\circ} 53' N.$ Lat., and $8^{\circ} 47' W.$ Lon. In the latter part of its course, it forms a portion of the boundary between Spain and Portugal.

MIN-NE-SO'-TA, a Territory of the United States, a portion of the old North West Territory, and more recently of Wisconsin and Iowa, lies between $42^{\circ} 30'$ and $49^{\circ} N.$ Lat.; and between $89^{\circ} 30'$ and $103^{\circ} 30' W.$ Lon., having a mean length from E. to W. of about 410 miles, and an average breadth of 390 miles; including an area of nearly 166,000 sq. miles. It is bounded on the N. by British America; E. by Lake Superior and the State of Wisconsin; S. by Iowa and Missouri Ter.; and W. by Missouri Ter. The Lake of the Woods, with a chain of small lakes, and their outlets, form a part of the N. boundary, the St. Croix and Mississippi rivers a part of the E., and the Missouri and White Earth rivers form the W. boundary.

Population.—By the census of 1850, Minnesota had 6,077 inhabitants, of whom 6,038 were white, and 39 colored persons. The deaths for the year ending June 30th, 1850, were 30, or only five in every one thousand. Governor Ramsey estimated the Indian population in 1852 at 25,000.

Counties.—Minnesota is divided into nine counties, viz. Benton, Dakota, Itasca, Mahkahta, Pembina, Ramsey, Wabasha, Wahnahto, and Washington. The capital is St. Paul's.

Face of the Country.—Though there are no mountains in Minnesota, it is the most elevated tract of land between the Gulf of Mexico and Hudson's Bay. A plateau of about 200 miles in length, and from 15 to 40 miles in breadth, known as the "Coteau des Prairies," or Prairie Heights, runs through the middle of the southern part of Minnesota. Its greatest elevation is about 1916 feet above the level of the sea, and its average elevation is about 1450 feet. The northern and highest portion is about 890 feet above Big Stone Lake, which lies in its vicinity.

Passing the St. Peter's river, we come upon another range of heights, called the "Coteau du Grand Bois," or the Wooded Highlands, which extend for more than 100 miles nearly parallel with the Coteau des Prairies, and form the eastern wall of the valley of St. Peter's. These heights are mostly covered with an extensive forest of hard wood. Through the middle of the triangle which occupies the N. E. part of

ou, as in *our*; th, as in *thin*; TH, as in *this*; N, nearly like *ng*.

the territory runs another range of heights, known as the "Hauteur de Terre," or "High Lands," which extends west by south about 300 miles, and forms the dividing ridge between the waters which flow into Hudson's Bay and those which flow into the Gulf of Mexico. A range of highlands extends north from the Coteau des Prairies, and forms with them the water shed of the rivers flowing into the Mississippi and Red rivers on the east, and the Missouri on the west. The other parts of the territory, as far as known, are varied with rolling prairies, extensive woodlands, and rich meadows.

Lakes and Rivers.—Minnesota abounds in lakes, giving origin to rivers which flow toward every point of the compass, and whose waters mingle with those of the Gulf of Mexico, Hudson's Bay, and the Atlantic Ocean. The largest of the lakes, with the exception of Lake Superior, which bounds about 70 miles of the N. E. of Minnesota, are the Lake of the Woods, Red Lake, Mini-Wakan or Devil Lake, Rainy Lake, Leech Lake, and Mille Lac or Spirit Lake. Besides these, there are hundreds of smaller lakes, varying from mere ponds to lakes of 30 miles in length. These generally have clear pebbly bottoms, and are well stocked with fish, among which are the white fish, pike, pickerel, maskelonge, sucker, perch, and trout. The wild rice grows on the shores of many of these lakes, especially in the north. Devil Lake, which is on the 48th parallel of lat. in the N. W. of the territory, is 40 miles in length by about 15 in breadth. It has no outlet, and the waters are brackish. Red Lake, on the same parallel, E. of the Red River, with which it communicates, is about the same size as Devil Lake. Lake of the Woods and Rainy Lake are both on the N. boundary line; the former is quite a large lake.

The rivers and streams of Minnesota are almost as numerous as its lakes. The far-famed Mississippi river issues out of Itasca Lake, N. E. from the centre of the territory, in lat. 47° 13' N. and at an elevation of 1575 feet above the Gulf of Mexico. It has a course of about 800 miles within Minnesota, of which 500 are navigable; 200 below the Falls of St. Anthony, and 300 above. In the S. E., where it forms the boundary between Minnesota and Wisconsin, its banks are very precipitous, reaching an elevation of from 200 to 500 feet. The Rum and St. Croix, noted for the pine forests in their vicinity, are the principal tributaries from the E.; and Crow-Wing, Crow, and St. Peter's from the W. The latter has a course of about 470 miles through a very fertile country, and is navigable, at high water, 120 miles. The St. Croix is navigable to the falls, about 80 miles. The Red River of the north drains all the northern slope tending to Hudson's Bay. It has a course of 800 miles, of which 500 are within Minnesota, and of this portion of its course 400 are said to be navigable.

The Riviere à Jacques (*ree'-ve-air' ah zhak*) about 600 miles long, and the Sioux, 350, are tributaries of the Missouri on the W. from this State. They run south.

Soil and Productions.—About 60,000 sq. miles in the N. E. of the territory are mostly composed of volcanic rocks, or arid, sandy hills

Fåte, fâr, fâll, fât; mē, mêt; plne, or pîne, pîn; nõ, nõt; õ as in *good*,

and plains. The rest of the territory is believed to be mostly fertile, consisting of woods and prairies, and well adapted to agricultural settlements. The valley of the St. Peter's is especially fertile. Governor Ramsey, in one of his messages, thus speaks: "Experience has demonstrated that, beyond all doubt, we can produce from the soil in its natural state, in every part of Minnesota in which the test has been made, wheat, corn, oats, and potatoes, in quality equal to that produced in any of the States of the Union, and in *quantity* that astonishes even those who have been familiar with the most fertile bottom lands of Indiana and Illinois." Under the 48th parallel, wheat and corn grow luxuriantly, and the best of wheat is produced at the Red river settlement in 49° N.

Among the indigenous products are cranberries in great quantities, maple-sugar trees in abundance, strawberries, crab-apples, wild rice, plums, currants, grapes, &c.

Timber is abundant in different parts of Minnesota. Pine forests of great extent exist on the St. Croix and Rum rivers. In the winter of 1850-1, it was computed that 21,000,000 feet of lumber were cut on the St. Croix and its tributaries. The other forest-trees are oak, elm, ash, birch, maple (sugar), hickory, linden, poplar, cedar, spruce, fir, tamarack, &c.

The mineral resources of Minnesota have not yet been much developed; but lead, copper, iron, limestone, and the red pipe-stone are found. From the latter the Indians manufacture their pipes. This mineral is believed to be peculiar to the region of the "Coteau des Prairies."

The animals are abundant, and this has always been a favorite hunting-ground of the Indians. The buffalo, deer, black bear, gray antelope, wolverine, beaver, otter, muskrat, mink, martin, fisher, wolf, raccoon, and other fur-bearing animals abound. The moose, elk, grizzly bear, and American reindeer are sometimes met with.

Climate, Meteorology, &c.—The climate of Minnesota compares favourably with New England and Northern New York, though extending several degrees farther north. The winters being drier, and the ground frozen less deeply, favours the wheat crop. Bilious fevers prevail but little, and fever and ague are almost unknown. Observations kept at St. Paul's, in 44° 56' N. lat. in Dec., Jan., and Feb. of the winter of 1850-1, give the following results: Clear days, 22; variable, 45; cloudy, 23; rain, 5, snow, 24; and hail, one. Greatest height of the mercury, 47°; least height, 32° 5'; average of the winter, 15° 23'; coldest day, (Jan. 30,) 20°; mildest day, (Feb. 25,) 36° 6'. Mercury 37 days below zero; 31 days at or above freezing. Thawed in the sun 33 days. Winds N. N. W. to N., 50 days; S. E. to E. N. E., 20 days; variable, 20 days. The amount of rain for this winter is stated as being unusually large, from which the dryness of the atmosphere may be inferred. The earliest closing of the navigation by ice, between 1844 and 1850, was Nov. 8; the latest, Dec. 8. The earliest opening in the same year was March 31; the latest, April 19.

Towns.—St. Paul, the capital of Minnesota, and the largest town, is situated on the Mississippi, 2070 miles from its mouth, in lat. 44° 50' N. It is 9 miles by land below the Falls of St. Anthony. Steamboats connect it with St. Louis and other towns on the Mississippi. Pop. about 1500.

St. Anthony, on the E. side of the Mississippi, at the Falls of St. Anthony, is destined, from its great amount of water-power, to be an important manufacturing town. Pop. about 1000.

Stillwater and St. Croix, both on the St. Croix, are largely engaged in the lumber trade. The former has 800 and the latter 600 inhabitants. The penitentiary is at Stillwater.

Wabasha, below Lake Pepin, is open 5 or 6 weeks in the year longer than the towns above.

MIN-OR/-CA, sometimes written MENORCA, (anciently one of the Gymnesiæ: see MAJORCA,) one of the Balearic Isles, intersected by the 40th parallel of N. Lat. and the 4th meridian of E. Lon. It is 32 m. in length, and about 13 m. in its greatest breadth. Area about 300 sq. m. Pop. 35,000. (P. C.)—Adj. and inhab. MINORQUINE, min-or-keen', or MIN-OR/-CAN.

MIRAMICHI, mîr'-a-me-shee', a r. and bay in the E. part of New Brunswick, near 47° N. Lat. and 65° W. Lon.

MIRANDOLA, me-rân'-do-lâ, a fortified t. of N. Italy, in the duchy of Modena. Lat. 44° 50' N., Lon. 11° 7' E. Pop. about 6,000. (B.)

MIREPOIX, mîr'-êh-pwâ', or meer'-pwâ', a small t. of France, in the dep. of Ariège. Lat. 43° 5' N., Lon. 1° 52' E. Pop. about 4,000. (M.)

MISKÓLCZ, mish-kôlts', a large t. of Hungary, with a Protestant and a Roman Catholic gymnasium. Lat. 48° 7' N., Lon. 20° 47' E. Pop. estimated at about 28,000. (B.)

MIS'-SIS-SIP'-PI (i. e. the "great water"), a large r. of N. America, which forms with the Missouri, its principal affluent, *the longest river in the world*. It rises from two small lakes, in about 47° 20' N. Lat., and 95° 30' W. Lon., which are estimated to be about 1,500 ft. above the level of the sea. Its general course is nearly S.; it enters the Gulf of Mexico by several mouths, in about 29° N. Lat., and 89° 20' W. Lon. The waters of the Mississippi, as it advances southward, are swollen by a number of important tributaries, viz., the Wisconsin, Illinois, and Ohio on the left, and the St. Peters, Desmoines, Missouri, Arkansas, and Red River on the right. Below the entrance of the Ohio, the breadth of the main river averages about 900 yards, and its mean depth varies from 90 to 120 ft. The velocity of the stream, below the mouth of the Missouri, is on average from 60 to 70 m. a day. In the latter part of its course, however, a number of *bayous* (see BAYOU), leaving the principal stream, very materially diminish the body of

water, and the rapidity of the current. The length of this mighty river is about 3,200 m., or, if we measure from the head of the Missouri, which may be regarded as its true source, it will amount to 4,400 m. It is navigable, at all seasons of the year, considerably above its junction with the Missouri, or more than 2,000 m. above its mouth.

MISSISSIPPI, one of the U. S., situated between the 30th and 35th degrees of N. Lat., and 88° 10' and 91° 50' W. Lon.; bounded on the N. by Tennessee, E. by Alabama, S. by the Gulf of Mexico and Louisiana, and W. by Louisiana and Arkansas, from which it is separated by the Mississippi r.; and divided into 59 counties.* Length, from N. to S., about 340 m.; greatest breadth, from E. to W., 184 m. The area is estimated at 48,000 sq. m. Pop. 606,555; consisting of 295,758 whites, 899 free coloured persons, and 309,898 slaves. Jackson is the capital. Mississippi was admitted into the Union in 1819.—Inhab. **Mis'-sis-sip'-pĭ-ān.**

MISSOLONGHI, mis'-so-long'-ge, a fortified t. of Greece, on a bay or lagoon on the N. side of the Gulf of Patras, which was taken and destroyed by the Turks in 1826, after a long siege. Lord Byron died here, April 19, 1824. Lat. 38° 23' N., Lon. 21° 28' E.

MISSOURI, mis-soo'-re, a large r. of N. America, which rises in the Rocky Mountains, in about 45° N. Lat., and 110° 30' W. Lon., and, after a very tortuous course of about 3,000 m., falls into the Mississippi, in about 38° 50' N. Lat., and 90° 10' W. Lon. It is navigable to the Great Falls, or about 2,500 m. from its mouth. The waters of this river are remarkably turbid, from which circumstance, it is said, the name, signifying "mud river," is derived.

MISSOURI, one of the U. S., situated between 36° and 40° 40' N. Lat., and 89° and 95° 30' W. MO-ROO'-CO, EMPIRE OF, (called by the natives Moghrib ul Acsa, mo^l-grib ool ak^l-sâ, *i. e.* the "farthest west:" the Mauritania Tingitana of the ancient Romans,) is situated in the N. W. of Africa, between the 28th and 36th degrees of N. Lat. and the 1st and 12th of W. Lon.; bounded on the N. by the Mediterranean and Strait of Gibraltar, E. by Algiers, S. by the Sahara, and W. and N. W. by the Atlantic. Length, from N. E. to S. W., above 700 m.; greatest breadth, perhaps 300 m. Area estimated at 175,000 sq. m. Pop. 6,000,000. (B.) The climate of Morocco is not so hot as might be expected from its position, a circumstance which is chiefly owing to the alternation of sea and land breezes, and to the influence of the various mountain ranges by which this country is intersected. The thermometer rarely rises, in the hottest places, so high as 90°; and along the sea, it seldom, if ever, falls below 39° or 40°. The seasons are divided into wet and dry. The wet season corresponds with our winter, and usually continues, with slight interruptions, from October to March. During the dry season or summer, showers are of rare occurrence. The fruits of this country, and the vegetable productions generally, are, with slight exceptions, like those of Southern Europe. The prevailing religion of Morocco is Mahometanism. Among all the followers of the prophet, the Moors are said to be most bigoted. The government is an absolute despotism, the sultan being the head of both church and state, and having unlimited power over the property and lives of his subjects.—Adj. MOOR'-ISH and MORESQUE, mo-resk'; inhab. MOOR and MO'-GHRIB-IN (Arab. Mò'-ghra-bee'; in the plural, Mo'-ghar/-bâ'.—See Int. XVI., Obs. 4).

MOROCCO (Arab. Mâ-râksh'), a large though decayed city of Africa, the cap. of the above empire, situated near the r. Tensift, about 110 m. from the Atlantic. It is surrounded by a strong wall, 30 ft. high and near 6 m. in circuit. The area enclosed contains several large gardens and open spaces. The most remarkable building is the sultan's palace, which occupies an oblong space on the outside of the main wall, about 1,500 yards in length, and 600 in breadth; which includes, besides the sultan's residence, a number of gardens and detached pavilions. The most important branch of industry in Morocco is the manufacture of leather. The tanners possess the art of tanning the skins of lions and panthers, and giving them a snow-white colour, with the softness of silk. (P. C.) Their bright colours are considered inimitable in Europe. Lat. 31° 37' N., Lon. 7° 36' W. Pop. probably between 50,000 and 60,000. (B.)

MOR'-RIS, a co. in the N. part of N. J., intersected by the Morris Canal. Pop. 30,158. Co. t. Morristown.

Mos'-cōw (Russ. Mos-kwá'), a large city of European Russia, the cap. of a prov. of the same name, and formerly the seat of the imperial government, is situated in the midst of a fertile and highly cultivated country, on the r. Moskwa, about 380 m. S. E. of St. Petersburg. The view of the city from a distance has excited the admiration of all travellers. The innumerable towers, some with cupolas, either gilt or painted green, others rising in the form of minarets, and the many gardens and trees intermixed with houses, give the city quite an Oriental appearance. Since, however, the conflagration of 1812, the aspect of Moscow has been considerably changed, and it is becoming more and more like the capitals of western Europe. Among the remarkable buildings, may be mentioned the Kremlin, the old residence of the czars, which has been repaired since the attempts of the French to blow it up in 1812, and still retains its ancient irregularity and grandeur: the Great Hall for exercising the troops in bad weather, which is about 560 ft. long, 180 ft. wide, and 50 ft. high; the ceiling of such vast extent has not a single pillar to support it: and the building of the Foundling Hospital, regarded as the handsomest and most extensive of the kind in Europe. The ancient capital of Russia possesses a great number of literary and scientific institutions, among which we may notice the University, the first in the empire for the number of its professors and students; its library, partly destroyed in 1812, has been restored, and contained in 1835 about 45,000 volumes (M.): the Anatomical Museum, one of the most extensive in the world: the Imperial Society of Naturalists; and the Society of Amateurs of Russian History and Antiquities. Moscow is the great entrepôt for the internal commerce of European Russia: it is also the residence of two archbishops. Lat. 55° 46' N., Lon. 35° 33' E. Balbi estimated the pop. at 250,000; Johnston, in 1846, at 350,000.

MO-SELLE' (Ger. Mosel, mo'-zèl; Anc. Mosel'la or "Little Meuse"); a r. which rises in the mountains between the deps. of Vosges and Upper Rhine, in France, and, flowing northerly, crosses the French frontier, and, passing through the Prussian territory, joins the Rhine at Coblenz. Its whole course is about 280 m., for 170 of which it is navigable.

MÜHLHAUSEN, müle'-hou'-zen, a walled t. in Prussian Saxony, on the Unstrut, with numerous manufactures and an active commerce. Lat. 51° 13' N., Lon. 10° 29' E. Pop. near 12,000. (P. C.)

MUHLHAUSEN, mule'-hou'-zen, (Fr. Mulhouse, mü'l'-ooze',) a manufacturing and commercial t. of France, in the dep. of Upper Rhine, on the Ill, a tributary of the Rhine. It is the great centre of the manufacture of printed cottons and silks, so much esteemed for their brilliant and indelible colours. This business is carried here to a higher degree of perfection, and conducted on a more extensive scale than in any other place in the world. The manufactures of Muhlhausen and its immediate vicinity, occupy near 60,000 workmen, the annual value of whose productions is estimated at 50,000,000 francs. (B.) Lat. 47° 47' N., Lon. 7° 21' E. The present pop., according to Balbi, amounts to more than 24,000, having quadrupled itself since the commencement of the present century.

MÜHLHEIM, müle'-hîme, a manufacturing t. of the Prussian states, on the Ruhr (roor), an affluent of the Rhine. Lat. 51° 26' N., Lon. 6° 53' E. Pop. 6,400. (B.)

MULL, one of the Hebrides, forming a part of Argyleshire, and separated from the main land of Scotland by a channel called the Sound of Mull. It is about 35 m. in length and 14 in its greatest breadth, containing an area of about 300 sq. m.

MUL'-LIN-GAR', the cap. of the co. of Westmeath, Ireland, situated 44 m. W. by N. of Dublin. Pop. in 1831, 4,295. (M.)

MÜN'-DEN, a manufacturing and commercial t. of Germany, in Hanover, at the confluence of the Fulda and Werra, whose united streams here take the name of Weser. Lat. 51° 26' N., Lon. 9° 38' E. Pop. 5,300. (B.)

MU'-NICH (Ger. München, mün'-hen), a city of Bavaria, the cap. of the circle of the Isar, and of the whole kingdom, is situated on the Isar, 225 m. W. of Vienna. This town has been greatly improved and enlarged since the beginning of the present century, and now ranks

* From the name of this town, the word *muslin* has been derived.

ou, as in *our*; th, as in *thin*; TH, as in *this*; N, nearly like *ng*.

among the handsomest in Germany. New and splendid streets are seen extending in all directions, adorned with elegant houses and magnificent public buildings. The king's palace, when the important alterations undertaken by the reigning sovereign shall have been completed, will probably be the richest and most beautiful royal residence in the Germanic empire. As a seat of learning and the arts, Munich stands in the first rank of European cities. Among the most remarkable institutions, we may name the University, formerly established at Ingolstadt, whence it was removed, in 1800, to Landshut, and in 1827 transferred to the Bavarian capital; there are 58 ordinary and 10 extraordinary professors, and between 1,300 and 1,400 students; the University library contains 105,000 vols.: the Public Library, with 400,000 printed vols. and 8,500 manuscripts: the Royal Academy of Arts: and the Military Academy. Munich is greatly indebted to the taste and liberality of the present sovereign, Ludwig I., not only for the recent improvement in the buildings and general appearance of the city, but especially for its distinguished reputation as a seat of the fine arts. The magnificent collections in painting and sculpture, deposited in the Pinacotheca, "picture-repository," and the Glyptotheca, "sculpture-repository," are regarded as the chief glory of the Bavarian capital, and may rank among the finest establishments of the kind in the world. The observatory of Munich, one of the best in Europe, is in Lat. 48° 8' 45" N.; Lon. 11° 36' 37" E. Pop. about 100,000. (B.)

MUN/-STER (Ger. Mün/-ster), a city of the Prussian dominions, the cap. of a circle of the same name, and of the whole prov. of Westphalia, is situated on the Aa, a tributary of the Ems, with which river it also communicates by a canal. It was formerly strongly fortified, but in 1765 the fortifications were destroyed, and the ramparts planted with linden trees and converted into a promenade. Munster has an academy, attended by 350 students, with a faculty of philosophy, and one of theology (for the Roman Catholics); and a gymnasium, attended by nearly 400 students, with a library of 25,000 vols. Lat. 51° 58' N., Lon. 7° 36' E. Pop. 21,000. (B.)

MUN/-STER, one of the four provinces into which Ireland is divided, occupying the S. W. portion of the island, comprising the counties of Clare, Cork, Kerry, Limerick, Tipperary and Waterford.

MURCIA, mur/-she-a, (Sp. pron. moor/-the-â,) a prov. and formerly a kingdom in the S. E. of Spain, bordering on Andalusia and the Mediterranean. Extreme length, from N. to S., about 130 m.; greatest breadth, from E. to W., near 110 m.—Adj. and inhab. MURCIAN, mur/-she-an; (Sp. Murciano, moor-the-â/-no.)

MURCIA, a city of Spain, the cap. of the above prov., situated in a beautiful and fertile valley, watered by the r. Segura (sêg-oo/-rà), about 26 m., in a straight line, from the sea. It is the seat of several colleges and other institutions. The silk manufactures of this place are said to have formerly employed 16,000 hands, but now only 400. The inhabitants of the capital, like those of the province generally, are described as slothful, gloomy, and reserved, on which account Murcia is

NAIRN'-SHIRE, a co. of Scotland, S. of, and bordering on Moray Frith. Pop. 9,217.

NAIRN, the cap. of the above, is a seaport t. at the mouth of a small river of the same name, which flows into Moray Frith. Pop. 2,672.

NA'-MUR (Fr. pron. nâ'-mür'; Flem. Namen, nâ'-men); a prov. in the S. E. part of Belgium, bordering on France. Area, 1,413 sq. m. Pop. 212,725. (P. C.)

NAMUR (Lat. Namur/cum), the cap. of the above prov., situated at the confluence of the Sambre and the Meuse. It is regarded as the strongest fortress in Belgium, and is the seat of various manufactures, particularly of arms and cutlery. Lat. 50° 28' N., Lon. 4° 51' E. Pop. 19,000. (B.)

NANCY (Fr. pron. nân'-se'), a t. of France, the cap. of the dep. of Meurthe, and formerly of Lorraine, near the r. Meurthe, 30 m. S. of Metz. It has an *académie universitaire*, a royal college, a rich museum, a public library of 23,000 vols., and other institutions. Lat. 48° 42' N., Lon. 6° 10' E. Pop. 30,000. (B.)

NANGASAKI, nang'-ga-sâ'-ke, a seaport t. of Japan, on the island of Keoo-seoo (Kiu-siu), the only place in the empire which is open to Europeans. The streets are narrow and winding; but the numerous temples render the appearance of the town picturesque to those approaching from a distance. Lat. 32° 46' N., Lon. 129° 52' E. Pop. variously estimated from 15,000 or 18,000 (P. C.), to 60,000 or 70,000 (M.) This great difference may perhaps be accounted for by the occasional influx of foreigners.

NAN-KIN' or NAN-KING' called also KIANG NING, a large city of China, formerly the cap. of the empire, situated near the right bank of the river Yang-tse-kiang, about 120 m. from its mouth. It is enclosed by walls, nearly 20 m. in circuit, composed of limestone, cemented by sunburnt clay. The city has declined much, both in size and splendour, since the end of the 13th century, when Kublai-Khan removed the imperial residence to Peking. At that time, Nankin was the largest town on the globe. The streets of this city, though not so wide as those of Peking, are regular and generally handsome, clean, well-paved, and bordered with well-furnished shops. The most remarkable edifice is the famous porcelain tower, an octagonal building, above 200 ft. high: each side of the base is 40 ft. long. There are 9 stories, of equal height; at the termination of each, a roof, built in the Chinese fashion, projects some feet on the outside, and under it is a passage round the tower. At the projecting corners of these roofs small bells are fastened, which sound with the slightest breeze. The material of which the walls are constructed is said to be a kind of white brick, made of fine clay. Nearly the whole

of the interior is gilded. Nankin is connected by canals with the Yang-tse-Kiang; it carries on an active commerce, and is the seat of numerous manufactures. It is also distinguished as a centre of learning and the arts. Lat. $32^{\circ} 5' N.$, Lon. $118^{\circ} 47' E.$ The pop., which is said to have once been 4,000,000, is at present estimated by Balbi at about 500,000.

NAN/-SE-MOND', a co. in the S. E. part of Va., bordering on N. C. Pop. 12,283. Co. t. Suffolk.

NANTES (Fr. pron. nânt: Anc. Condevic/num; afterwards Namne/-tes), a city of France, the cap. of the dep. of Lower Loire, delightfully situated on the N. bank of the Loire, 210 m. W. S. W. of Paris. It is, for the most part, well built, and contains about 20 places or squares. Among its various literary and scientific institutions, this town possesses a royal college, a school of medicine, a museum of antiquities, a valuable cabinet of natural history, a public library of 30,000 vols., &c. Nantes is one of the most commercial places in France, and is the seat of numerous manufactures. Lat. $47^{\circ} 13' N.$, Lon. $1^{\circ} 32' W.$ Pop. 75,150. (B.)

NAN-TUCK/-ET, an i. in the Atlantic, belonging to Massachusetts, from the main land of which it is distant about 20 m. It is about 16 m. in length, with a mean breadth of 4 or 5 m. It forms the co. of Nantucket, which has a pop. of 8,452.

NANTUCKET, a port of entry, cap. of the above, is situated on the N. side of the i., with a good harbour. Lat. $41^{\circ} 17' N.$, Lon. $70^{\circ} 6' W.$

NANT/-WICH, a t. of England, in Cheshire, 18 m. S. E. of Chester. Pop. 5,489.

NA/-PLES (It. Napoli, nâ/-po-le: Anc. Parthen/ope and Neap/olis), an archiepiscopal city and seaport of Italy, the cap. of a kingdom to which it gives its name, is situated on the N. side of a small bay of the Mediterranean, called the Gulf of Naples, 118 m. S. E. of Rome. It contains but few buildings deserving admiration for their architecture; they are generally either disproportionate in their parts, or overloaded with ornaments. The houses of Naples are flat-roofed and covered with a kind of stucco, which becomes indurated on exposure to the atmosphere. Most of them have balconies in front, making the streets, which are generally narrow, appear still narrower. The most remarkable edifices are: the royal palace (La Reggia, lâ red/-jâ), a large mass of buildings, constructed at different times; the new palace has a front nearly 400 ft. in length, with three orders of pillars, one above the other, Doric, Ionic, and Corinthian; the apartments are adorned with valuable paintings of the old Italian masters: the Palazzo degli Studj Publici (pâ-lât/-so dêl-ye stoo/-de-e, poob/-le-che), erected in the early part of the 17th century, originally intended and used for a university, but afterwards, in 1790, converted into a great national museum; this, called Museo Borbonico (moo-sâ/-o bor-bon/-e-ko), is said to be unrivalled in its collection of various antiquities; it contains also the Royal Library of 150,000 vols., which is open to the public. Naples possesses a great number of institutions for education, among which we may cite

ou, as in *our*; th, as in *thin*; TH, as in *this*; N, nearly like *ng*.

the University, founded in 1224, and attended at present by about 1,500 students: the Lyceum del Salvatore: an establishment for unrolling and decyphering the manuscripts found at Herculaneum, and other ancient towns: a botanic garden, one of the richest in Italy: and a "Royal House for the Poor," where nearly 6,000 children are taught the different arts and trades, at the expense of the government. Naples is celebrated for its delicious climate and for the beauty of the surrounding country. The Observatory is in Lat. $40^{\circ} 51' 46''$ N., Lon. $14^{\circ} 15' 4''$ E. Pop. in 1835, exclusive of the garrison and non-resident foreigners, 350,000. in 1845 400,800. Adj. and inhab. NE'-A-POL'-I-TAN.

NAPLES, KINGDOM OF, otherwise called THE KINGDOM OF THE TWO SICILIES, a state comprising the S. portion of Italy, with Sicily and the adjacent islands, situated between $36^{\circ} 30'$ and 43° N., Lat. and $11^{\circ} 50'$ and $18^{\circ} 30'$ E. Lon. The length of the peninsular portion, following the curve, is near 390 m.; the breadth varies from about 13 m. to above 130 m. Area of the whole kingdom estimated at 42,000 sq. m. Population 8,423,316. The kingdom of Naples is divided into 22 provinces, or intendencies, 15 belonging to the peninsula, and 7 to Sicily. The gov. is nominally a limited monarchy, but approaches very nearly to a despotism. The reigning family is a branch of the house of Bourbon.

NAR-BONNE' (Anc. Nar'bo Mar'tius), a city of France, in the dep. of Aude, 6 or 7 m. from the Mediterranean, on a canal which communicates with this sea and the r. Aude. It is surrounded by a wall flanked with towers, and entered by four gates. A Roman colony was planted here about 116 years before the Christian era. Narbo is afterwards mentioned by Cicero and Strabo as one of the most important cities of Gaul. Several fragments of Roman architecture may be seen here, incorporated in the walls of the town, and a number of inscriptions exist in excellent preservation. The pop. of Narbonne, which in the middle ages amounted to more than 40,000, is now only 10,000. (B.) Lat. $43^{\circ} 11'$ N., Lon. 3° E.

NASH, a co. in the N. N. E. part of N. C., intersected by Tar r. Pop. 10,657. Co. t. Nashville.

NASH-O'-BA, a co. in the E. central part of Miss., intersected by Pearl r. Pop. 2,437. Co. seat, Philadelphia.

NASH'-VILLE, the largest t. in Tenn., the cap. of Davidson co. and of the state, is situated on the S. bank of the Cumberland r., which is navigable for steamboats to this place. It is the centre of an active trade. The University of Nashville, founded in 1806, is the principal literary establishment. Lat. $36^{\circ} 9'$ N., Lon. $86^{\circ} 49'$ W. Pop. 10,478.

NAS'-SAU (Ger. pron. nās'-sou), DUCHY OF, a state of Germany, between $49^{\circ} 55'$ and $50^{\circ} 50'$ N. Lat., and $7^{\circ} 31'$ and $8^{\circ} 35'$ E. Lon. The area is variously estimated, but is probably about 1,900 sq. m. Pop. in 1838, 379,272. (P. C.) The capital is Wisbaden.

NASSAU (usually pronounced Nas-sau'), a co. forming the N. E. extremity of Florida. Pop. 2,164. Co. t. Fernandina.

sissippi r., near the S. W. extremity of the state. It is the centre of an extensive commerce, but the insalubrity of the climate has somewhat retarded its growth. Lat. 31° 34' N., Lon. 91° 25' W. Pop. estimated at 10,000.

NATCH'-I-TOCH'-ES, sometimes pronounced nak'-e-tush', a parish in the W. part of La., on the Red r. Pop. 14,201. Capital, Natchitoches.

NAT-O'-LI-A, AN'-A-TO'-LI-A or AN-A-DO'-LI, (from the Greek ανατολη, i. e. the "rising or east," being equivalent to the French word *levant*.) a part of Asiatic Turkey, now generally considered as synonymous with the Asia Minor of the ancients. Natolia or Anadoli, in a more restricted sense, is employed to denote an extensive province, occupying the W. and N. W. portions of Asia Minor.

NAUM'-BURG (Ger. pron. noum'-böörG), a flourishing t. of Prussian Saxony, on the Saale, near its junction with the Unstrut. It is the seat of the supreme tribunal for the governments of Merseburg and Erfurt. Lat. 51° 9' N., Lon. 11° 40' E. Pop. 11,000. (B.)

NAU'-PLI-A or NAPOLI DI ROMANIA, nâ'-po-le de ro-mâ-nee'-â, a sea-port t. of Greece, in the E. part of the Morea, on a bay of the same name. The ancient Nauplia was the port and arsenal of Argos, during the flourishing period of Grecian history, but was almost or quite deserted in the time of the early Roman emperors. Under the Byzantine sovereigns it revived, and afterwards became the chief settlement of the Venetians in the Morea, until it was taken by the sultan Solyman, in 1537. Its situation, so picturesque and so advantageous for commerce and defence, caused it to be chosen, after the war of independence, for the capital of Greece; but, in 1834, the seat of government was transferred to Athens. Lat. 37° 34' N., Lon. 22° 47' E. Pop. probably near 12,000. (B.)

NAV'-AN, a t. of Ireland, at the confluence of the rivers Blackwater and Boyne, 26 m. N. by W. of Dublin. Pop. in 1831, including the suburbs, about 6,000. (M.)

NAVARINO, nav-a-ree'-no, or NEOCASTRO, nâ'-o-kâs'-tro, a small t. and fortress of Greece, in the S. W. part of the Morea, on a bay of the same name, remarkable as the scene of a great naval contest, October 20th, 1827, between the combined fleet of the French, English, and Russians, under Admiral Codrington, and the Turco-Egyptian fleet, commanded by Ibrahim Pasha. The allies gained a complete victory, which established the independence of Greece.

NAV-ARRE' (Sp. pron. Navarra, nâ-var'-râ), a prov. and formerly a kingdom of Spain, bounded on the N. by France, S. E. by Aragon, S. W. by Old Castile, and W. by the Basque provinces or Biscay. Length from N. to S., about 80 m.; greatest breadth, from E. to W., 64 m. Pamplona is the capital.—Adj. and inhab. NAV'-AR-RESE'.

NETH'-ER-LANDS (Dutch, *Nederland*, nà/-dèr-lánt'; Ger. *Niederlande*,
 nee/-dèr-lân-dèh; Fr. *Pays Bas*, pàe-bâ; each name signifying, in its
 respective language, "low land or low countries"), the name formerly
 applied to the whole country which constitutes the territories of Hol-
 land and Belgium, but now usually employed to denote the kingdom
 of Holland only. In the beginning of the 16th century, almost the
 whole of the Netherlands belonged to the house of Austria; but Charles
 V., emperor of Germany, united them in 1548 to the crown of Spain.
 In consequence of the cruel persecution of the Protestants, during the
 reign of his son Philip II., king of Spain, seven of the provinces, viz.
 Holland, Gelderland, Zealand, Utrecht, Friesland, Overijssel, and Gro-
 ninghen, revolted and formed the celebrated republic of the Seven United
 Provinces, which was afterwards generally called Holland, from the
 name of the largest and most influential province. To these were
 afterwards added, by conquest and treaty, other territories, including
 Drenthe and N. Brabant. The remaining provinces, including S. Bra-
 bant, continued united to the Spanish crown till 1706, when, after the
 battle of Ramilies, they acknowledged as their sovereign Charles VI.,
 afterwards emperor of Germany, and were thenceforward known as the
AUSTRIAN NETHERLANDS. In the seven Dutch provinces, the house
 of Orange obtained the hereditary dignity of Stadtholder, in 1747.
 After the fall of Napoleon, in 1813, the Prince, who, during the ascen-
 dancy of the French influence, had been compelled to live in exile,
 was recalled and governed the country, with the title of "Sovereign
 Prince." In 1815, the seven northern and ten southern provinces, after
 a separation of 200 years, were again united under the name of the
 kingdom of the Netherlands. This union continued for 15 years, till
 the revolt of the Belgians, in 1830. (See **BELGIUM** and **HOLLAND**.)

NEU'-BURG (Ger. pron. noi/-böörg), a handsome t. of Bavaria, on the
 Danube, 45 m. W. S. W. of Ratisbon. Lat. 48° 44' N., Lon. 11° 11'

NEVADA, LA SIERRA. See the next article.

NEVADO, nâ-vâ/-do, a Spanish word signifying "covered with snow," which has been applied to numerous mountain peaks in S. America and Mexico.

LA SIERRA NEVADA (lâ se-er/-rà nâ-vâ/-dâ), or the "snow-clad ridge," is a chain of mountains in Granada, Spain, which runs due E. and W., and is about 60 m. in length. The peak of Mulhacen (moo-lâ-â-then'), near the centre of this chain, in 37° 10' N. Lat., and 3° 28' W. Lon., is the highest mountain summit in the Spanish peninsula, and, with the exception of the Alps, the highest in Europe, having an elevation of 11,658 ft. above the level of the sea. The Sierra Nevada is perpetually covered with snow above the height of 9,500 ft.

NEVADO DE SORATA. See SORATA.

NEVERS, nēh-vare/, (Anc. Noviodunum, afterwards Niver/num or Nevir/num,) a manufacturing and commercial t. of France, cap. of the dep. of Nièvre, on the Loire, at the junction of the little r. Nièvre, 133 m. S. by E. of Paris. It contains a royal cannon foundry, and other extensive manufactures in iron. The crockery made here is regarded as the best in France. largest t. in the state, is situated on the Passaic, 9 m. W. of New York. The river is navigable for sloops of 80 tons to this place; 4 m. below the t. it falls into Newark Bay. The position of this city is very favourable for trade, standing, as it does, on the railroad between New York and Philadelphia, and communicating with the Delaware at Easton, by means of the Morris Canal. It is the seat of numerous and flourishing manufactures, and contained, in 1850, 38,894 inhabitants, exhibiting an increase of more than 21,000 since the census of 1840. Lat. $40^{\circ} 45' N.$, Lon. $74^{\circ} 10' W.$

NEWARK BAY is formed by the junction of the Passaic and Hackensack rivers. It is 6 or 7 m. long, and above 2 m. wide, communicating at its S. extremity with Staten Island Sound.

NEW BED-FORD, a seaport t. and port of entry of Mass., in Bristol co., of which it is one of the seats of justice, on an arm of Buzzard's Bay, about 50 m., in a straight line, S. by E. of Boston. The inhabitants of this town own a large amount of shipping, and are very extensively engaged in the whale fishery. Lat. $41^{\circ} 38' N.$, Lon. $70^{\circ} 56' W.$ Pop. 16,464.

NEW-BERN, a port of entry of N. C., cap. of Craven co., is situated at the confluence of the Trent and Neuse, about 100 m. E. S. E. of Raleigh. Lat. $35^{\circ} 20' N.$, Lon. $77^{\circ} 5' W.$ Pop. 4,722.

NEW-BER-RY, a dist. in the N. W. central part of S. C., between the Saluda and Broad rivers. Pop. 20,143. Seat of justice Newberry c. h.

NEW BRUNS-WICK, a prov. of British America, lying on the W. side of the Gulf of St. Lawrence. Length, from N. to S., about 190 m.; average breadth estimated at 150 m. Pop. in 1834, 119,457. (P. C.) Frederickton is the capital.

NEW BRUNSWICK, a t. of N. J., the cap. of Middlesex co., on the Raritan, where it is crossed by the New York and Philadelphia railroad, 28 m., in a straight line, S. W. of New York. With this city it has daily intercourse, by means of steamboats on the Raritan, as well as by the railroad, while, through the Delaware and Raritan canal, it has a water communication with Trenton and Philadelphia. Pop. 10,019.

NEW-BURG, a well-built t. of N. Y., in Orange co., on the Hudson, about 60 m., by water, from New York. It is alternately with Goshen the co. t. Lat. $41^{\circ} 31' N.$, Lon. $74^{\circ} 1' W.$ Pop. 11,415.

NEWBURYPORT, nu'-ber-re-pört', a beautiful t. and port of entry in Essex co., Mass., at the mouth of the Merrimack. It was formerly very flourishing, but in 1811 a fire destroyed nearly 300 buildings, from the effects of which calamity it has never recovered. Lat. $42^{\circ} 48' N.$, Lon. $70^{\circ} 50' W.$ Pop. 9,534.

NEWCASTLE, nu'-kas-s'l, the most northern of the three counties of Del. Pop. 42,784. Co. t. Newcastle.

NEW-CAS-TLE-UPON-TYNE, an important commercial t. and river-port of England, in Northumberland, on the N. bank of the Tyne, 10 m. from its mouth. It is connected with Gateshead, on the opposite side of the river, in the co. of Durham, by a handsome stone bridge, with 9

elliptical arches. This town owes its importance and prosperity to its extensive commerce in coal, which is procured from numerous pits, situated on both sides of the Tyne, from within 2 m. of its mouth to 16 or 18 m. up the river. Newcastle forms a little county of itself, with an area of only 2,000 acres. It has nearly doubled in pop. during the present century. Lat. $50^{\circ} 58' N.$, Lon. $1^{\circ} 37' W.$ Pop. of the t. and co. of Newcastle, 48,860. Gateshead, which is regarded by some as a suburb of the above, contains about 19,000 inhabitants.

NEWCASTLE-UNDER-LYME or LYNE,* a t. of England, in Staffordshire, 135 m. N. W. of London. Pop. 9,838.

NEW ENGLAND, a name given to the N. E. portion of the U. S., including the six states of Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, and Connecticut. The whole area may be estimated at about 67,000 sq. m., being rather less than that of Virginia. Total pop. 2,727,397. The inhabitants of New England are distinguished for their intelligence and enterprise. There is probably no country on the globe, in which the obligations of morality and religion are more generally respected and obeyed.

NEW-FOUND-LAND', a large i. of British America, situated in the Atlantic, S. E. of Labrador, from which it is separated by the Strait of Belle Isle, between $46^{\circ} 40'$ and $51^{\circ} 37' N.$ Lat., and $52^{\circ} 25'$ and $59^{\circ} 15' W.$ Lon. Its form approaches that of a triangle. The length, measuring nearly N. and S., is about 320 m.; greatest breadth, near 300 m. Area estimated at 50,000 sq. m. Pop. fluctuating, in consequence of many persons, who visit the island in the fishing season, leaving it during winter: according to the census of 1836, it amounted to 73,705. (P. C.) Little is known of the interior of Newfoundland. It appears, however, to be generally barren. The inhabitants depend chiefly on fishing for their subsistence.

NEW GRANADA, grá-ná'-dá,† (Sp. Nueva Granada, nwá'-vá grá-ná'-dá,) one of the three republics of S. America, into which, in 1836, Colombia was divided. (See COLOMBIA.) The boundary line between Granada and Ecuador, appears not to be exactly settled, but it lies between 1° and $2^{\circ} N.$ Lat.: towards the N. this republic extends to $12^{\circ} 30' N.$ Lat.: it is situated between 69° and $83^{\circ} W.$ Lon; bounded on the N. by the Caribbean sea, E. by Venezuela and Brazil, S. by Brazil and Ecuador, and W. by the Pacific and Central America. The greatest length, from N. to S., is near 800 m.; greatest breadth, from E. to W., about 650 m. Area estimated at 400,000 sq. m. Pop. in 1826, 1,320,000. (B.) There is reason to believe that, in consequence of the unsettled state of the country, it has not materially increased since that period. Bogota is the capital.

* It appears from old records that an ancient forest on the borders of Cheshire was called Lyme or Lime (probably from *limes*, a "boundary"); from their proximity to which, a number of places are supposed to have received the addition to their names of *under lyme* or *lyne*.

NEW HAVEN, a port of entry, the largest t. in Conn., the cap. of the above, and, alternately with Hartford, the seat of the state government, situated at the head of a small bay, projecting from Long Island Sound, about 34 m., in a straight line, S. S. W. of Hartford, with which town it is connected by a railroad. The general appearance of New Haven is neat, and even elegant. The state-house, built on a Grecian model, is perhaps the most remarkable edifice. This town is the seat of Yale College, founded in 1700, and one of the most flourishing collegiate institutions in the whole country. NEW MEXICO.—New Mexico is a territory of the United States, formed in 1850, from the Mexican province of that name (acquired by the treaty with Mexico in 1848) and from portions of California and Texas. It lies between 32° and 38° of N. lat.; and 103° and 117° of W. lon.; being about 700 miles in average length, and about 350 in mean breadth, including an area of about 210,744 square miles. It is bounded on the N. by Utah, and Indian Territory; E. by Indian Territory and Texas; S. by Texas and Mexico, and W. by the State of California, from which it is partly separated by the Colorado river. The population, by the census of 1850, was 61,505; of which 61,488 were white, and 17 coloured persons. Deaths in the year ending June 30th, 1850, 1,507, or more than 24 in every thousand.

This territory is divided into seven counties.*

Rivers.—The Rio Grande' (see Rio Bravo del Norte') and its branches drain the eastern part of New Mexico. This river passes through the territory from N. to S. between two ranges of the Rocky Mts., forming the valley of the Rio Grande. The Pecos is the principal branch on the east. See Appendix.

The Puerco, (pwér'ko,) the principal western branch of the Rio Grande, rises in the Sierra Madre Mts., and, though running over 100 miles, its channel is often entirely destitute of water, during the dry season, in the lower part of its course.

The Canadian, a branch of the Arkansas, drains a mountain valley in the N. E. of this territory. See Appendix.

The Colorado of the West enters New Mexico from Utah, and traversing the N. W. part, strikes the W. boundary on the 35° of N. lat. From this point to the Mexican frontier it forms the boundary between New Mexico and California. None of the rivers of this territory are navigable, unless it may be the Colorado and Gila near their mouths. Most of the smaller rivers, except near their sources, for a great part of the year have either dry channels, or are a series of sandy pools. Even the Rio Grande itself, Major Emory found but 25 yards wide, and hub deep, at Albuquerque, nearly 300 miles from its source. He also states that it seldom rises more than two feet. More than 150 miles farther south, at the same season, it was but 118 feet wide and 14 inches deep. Lieut. Simpson, however, in his journal, Sept. 22d, 1849, at the same place, has this passage:—"The river at this point is about 200 yards wide, the stream rapid, and its depth

four feet." He afterwards mentions croosing in a ferry-boat at Albuquerque and Socorro.

The Gila (hee'là) river rises in the Sierra Madre Mts., and running nearly west on the southern boundary, discharges itself into the Colorado, after a course of about 500 miles. It is hemmed in by mountains for more than half its course, forming a narrow valley, in some parts not more than 300 feet wide.

Face of the Country, Mountains, &c.—This extensive territory is for the most part a high table land, crossed by several ranges of mountains, and generally destined to hopeless sterility. The eastern section comprises the valleys of the Rio Grande and its tributaries, and lies among the different ranges of the Rocky Mountains, which cross the country in a direction nearly N. and S. The larger portion lies west of the Sierra Madre mountains, and, as far as known, partakes of the general characteristics of the great Fremont Basin. (See Utah.) The Colorado on the west, and the Gila on the south, with their tributaries, drain this portion. The mountain ranges, commencing at the east, are first the Guadalupe Mts., which diverge from the main chain of the Rocky Mts. and pass off in a S. E. direction into Texas. Next are the Sierra Grande, a chain of mountains which separate the valleys of the Rio Grande and Pecos, and passing south into Texas, approach the former river nearly to its banks, which they coast to the mouth of the Pecos. The Sierra Madre Mts. form the western limit of the valley of the Rio Grande, and run from N. to S. through New Mexico. In the valley of the Rio Grande, which is itself a table land of 6000 feet elevation in the northern part, there are various detached mountains, bearing local names; one, about half a degree south of Santa Fé, has been called Gold Mountain, from its containing that metal. A portion of the great American Desert enters the N. E. corner of N. Mexico. Passing the Sierra Madre Mts., we enter upon ground that has been little explored, except a small portion between 35° and 36½° N. lat., and between 107° and 110° W. lon., which was traversed by Lt. Simpson of the Topographical Corps of Engineers in 1849, who describes the country as "one entire naked barren waste, sparsely covered with cedar and pine of a scrub growth, thickly sprinkled with sage and artemisia, and having a yellow, buff-coloured soil." The exception to this general sterility is in the valleys, where there is some ground cultivated by the Pueblo Indians. A range of mountains hem in the Gila to the north, as far as the 112th degree of W. lon. One of the peaks of this range Major Emory estimated at 5724 feet above the sea, and the upper end of the valley of the Gila at 4347 feet.

Soil and Productions.—We have characterized this territory as generally sterile, but it is not without considerable exceptions. Many parts of the valley of the Rio Grande, as well as the valleys of other rivers and streams, are exceedingly fertile, and produce fine crops of wheat, Indian corn, and other grains, besides grapes, melons, peaches, and other fruits and garden vegetables. But everywhere in New Mexico irrigation is necessary to successful agricultural opera-

ou, as in *our*; th, as in *thin*; TH, as in *this*; N, nearly like *ng*.

tions. During the dry season, however, even this resource fails, as many of the rivers, except near their sources in the mountains, are completely dried up or reduced to a series of pools. On the tablelands, which are utterly useless for agriculture, there grows a peculiar grass which, in the dry season, cures and preserves its nutritious qualities. On this grass the cattle, sheep, horses and mules feed all winter, and preserve themselves in excellent condition, till the rainy season causes the green grass to spring up anew. Pasturage is the principal source of wealth in New Mexico. The herds and flocks, however, are subject to be driven off by Indian depredators. The mutton of New Mexico is excellent, but the wool almost valueless for want of a market. Only a small portion of the surface is covered with forests, and the country is almost entirely destitute of the hard woods. Some of the streams are fringed with the cotton-wood, and pine of an inferior quality occurs on the mountains. The sycamore, ash, cedar, walnut, evergreen oak, and willow are found in small quantities.

From the great number of ruined pueblos, or Indian habitations, in the valleys west of the Sierra Madre Mts., it would seem that a greater population existed here formerly than at present; supported, probably, by a system of irrigation.

Minerals.—The geological structure of the country indicates that New Mexico conceals in its bowels rich mineral treasures; but these have not as yet been much developed. Gold-mines have been known and worked for a long time in this region, but hitherto with no great success, either through the jealousy of the Indians or for want of skilful mining. Reports have reached us, that appear to be well founded, of the discovery of gold in several places on the Gila river, and of silver at El Paso. Copper, iron, salt, coal, and other minerals have also been found.

Animals.—Deer, mountain sheep, wild hogs, turkeys, geese, brant, swans, ducks, scorpions, and lizards, are met with; though animal does not appear to be more prolific than vegetable life in this region.

Towns.—Santa Fé, (*san'ta-fä*), the capital and largest town in New Mexico, is situated on the Santa Fe r., a branch of the Rio Grande, from which it is but a few miles distant in an air line. Lat. 35° 40' N. It is the great emporium of the overland trade that has been carried on since 1822 with the State of Missouri. It is principally built of adobes, or unburnt brick. The houses form a square, with a court within, upon which nearly all the apartments open. There is generally but one entrance from the street, which is wide and high enough to admit animals with their packs. The town, however, presents but a poor appearance. Pop. 7,713.

Albuquerque (*al-boo-ker'kay*) is situated on the Rio Grande, about 50 m. south of Santa Fe, in the midst of some of the most fertile land in New Mexico. Pop. about 1,000.

San'ta Domin'go, a pueblo, or Indian town, is situated on the Rio Grande, about 25 miles S. W. of Santa Fe. The houses are of two stories, the upper being set retreatingly on the lower, so that the roof of the lower story serves for a terrace to the upper. The houses

Fâte, fâr, fáll, fât; mè, mêt; plne or pîne, pîn; nõ, nõt; õõ as in *good*;

are entered by ladders ascending to this terrace, there being no doors to the lower story. This is a description of all the pueblos in New Mexico. Pop. about 800.

Zuñi, (soon'-ye,) Laguna, (la-goo'-nä,) and Jemez, are situated from 30 to 100 m. W. of the Rio Grande, and inhabited by Indians who have herds of cattle, horses and sheep. Their populations are, respectively, about 1,200, 800, and 400.

NEW OR'LEANS,* a city and port of entry of Louisiana, and seat of justice of the parish of Orleans, is situated on the left bank of the Mississippi river, 105 m. by water, and 80 m. in a direct line from its mouth. Lat. 29° 58' N., Long. 90° 7' W. Pop. of the parish 119,461, of whom 18,068 are slaves. Its site is an alluvial flat, which is several feet below the surface of the river at high water, and is so marshy that there are no cellars to any of the houses. To prevent inundations, an embankment, or *levée*, has been raised, which extends more than 100 miles above the city, and in some places is 30 feet high. This forms a convenient landing for the cargoes of vessels. The river, which is here more than 100 feet deep, makes a curve to the left, from which the familiar name of "Crescent City" is derived. The city, which extends about 5 miles along the river and half a mile back, is divided into three municipalities. The first, which includes the city proper, or middle section, is the most populous; the second, which includes the upper suburbs, contains the finest residences; and the third comprises the lower section. The houses are chiefly built of brick, and the streets are straight, regularly laid out, and lighted with gas. The principal edifices are a large Roman Catholic cathedral, a state-house, custom-house, a U. S. branch mint, an exchange, and a college. It also contains several hospitals, and 38 churches, of which 12 are Roman Catholic. A large proportion of the citizens are of French and Spanish descent, and perhaps no city presents a greater mixture of races and languages. The low situation renders the air, in the warm season, very unhealthy: the yellow fever often commits fearful ravages. But notwithstanding these drawbacks, the town is increasing in wealth and population, its commerce attracting multitudes from every quarter of the globe.

As a place of trade, New Orleans enjoys unequalled advantages. It is the outport of all the commerce of the Mississippi and its tributaries. It is accessible for ships of the largest size, while its *levée* is thronged with smaller vessels of every description. Sometimes 50 steamboats may be seen at once. The chief article of export is cotton, of which a million bales have been received here in one year. In the value of its exports, New Orleans exceeds every other city in the Union. In the year ending September 1, 1851, the exports amounted to \$81,216,900, of which 54 millions were to foreign countries, and 27 millions to other ports of the United States. The number of arrivals of steamers and other vessels in 1851, was 5,050.

name, and one of the seats of the state government, is situated near the mouth of Narragansett Bay, on one of the finest harbours in the world. It stands on the S. W. side of Rhode Island, about 5 m. from the sea, and 22 m. in a straight line, S. by E. of Providence. The beauty of its situation, and the salubrity of its climate, have made this town a place of fashionable resort for persons from the southern and middle states, during the summer months. Lat. 41° 28' N., Lon. 71° 21' W. The pop. of Newport was greater before the revolution than at the present time, though it is now on the advance: in 1840, it was 8,333. Pop. of the co. of Newport, 20,007.

NEW SOUTH WALES, a colonial territory of Great Britain, occupies the eastern portion of the Australian continent. Its northern and western limits are not yet determined. On the east it is bounded by the South Pacific Ocean, and on the south by the province of Victoria. A colony of convicts was established here in 1788. In 1840, the transportation ceased, and at present there are but very few convicts in the country. The pop. in 1848, was 220,474, and since the recent discovery of gold, has been rapidly increasing. A mountain ridge extends for many hundred miles nearly parallel with the coast, at an average distance of 40 or 50 miles, and with a mean altitude of 3,500 feet. Different parts of this ridge are called the Blue Mountains, and the Australian Alps. The region west of this range is drained by the Macquarrie, Lachlan, and Darling rivers, none of which are navigable. Those which intersect the space between the mountains and the sea are quite small, and furnish very limited communication with the interior. The coast is indented with several good harbours, among which are Port Jackson, Port Macquarrie, and Botany Bay. The country next to the sea, for five or six miles, is occupied by barren ridges, producing a few stunted trees and bushes. As we advance toward the interior it improves in appearance, and at the distance of twenty or twenty-five miles it presents a beautiful undulating surface, clothed with luxuriant herbage, and adorned with groves, which are lofty, but not dense. The forests of Australia are less dense than those of other continents. The soil is generally fertile and better adapted to pasturage than to tillage. Wheat, maize, oats, and the grape are cultivated successfully; but it is chiefly by the production of wool that this colony is rising into commercial importance. In 1850, 32 million pounds of wool were exported from this province and Victoria. The climate is warm, and subject to drought, but is very salubrious. The chief towns are Sydney, the capital, Paramatta, Bathurst, and Goulbourn. See AUSTRALIA and SYDNEY.

NEW YORK, one of the original U. S., between 40° 30' and 45° N. Lat., and 72° and 79° 50' W. Lon.; bounded on the N. N. W. and W. by Canada, the r. St. Lawrence, Lake Ontario, the Niagara r., Lake Erie, and Pennsylvania; S. and S. W. by Pennsylvania and New Jersey, E. by Connecticut, Massachusetts, and Vermont. These limits, however, do not include Long Island, which extends from near the S. E. extremity of the continental portion of the state, more than 100 m. in an easterly direction. (See LONG ISLAND.) The greatest length of N. Y., from E. to W., is 322 m.; extreme breadth, from N. to S., about 300 m. Area estimated at 49,000 sq. m. Pop. 3,097,394. The state is divided into 59 counties.* New York, though not the largest, is in almost every other respect the leading state in the Union; its pop. exceeds that of Pennsylvania (the second of the United States, as regards the number of its inhabitants), by more than 700,000, and surpasses the whole population of the six New England states, by nearly 200,000. To New York is due the honour of having first undertaken and brought into successful operation those extensive internal improvements which have since, though on a smaller scale, been extended to almost every portion of the Union. Albany is the capital.

NEW YORK, the metropolis of the above state, the most populous city and greatest emporium in the New World, and with its suburbs, Brooklyn and Williamsburg (as legitimately a part of New York as Southwark is of London), the third in point of wealth and population of the cities of Europe and America, is situated on the southern extremity of Manhattan Island, at the mouth of the Hudson, about 18 m. from the Atlantic, and 80 m., in a direct line, N. E. of Philadelphia. The city and county have the same limits, comprising the whole of Manhattan island, which is 13½ m. in length, and 2 m. in its greatest breadth. The densely inhabited portion of the city is situated on the S. extremity of the island, extending northward 3 or 4 m. In the old or southern quarter of the town, the streets are for the most part narrow and irregular, but nearly all the northern or newer part is remarkable for the regularity and beauty of the streets, as well as for the elegance of the houses. Broadway, the principal street, and one of the finest to be seen in any city, is 80 ft. wide, and about 3 m. long. Commencing at the Battery (an open space planted with trees at the S. extremity of the island), it extends N. N. E. through nearly the whole length of the town. It may be compared to a great river; the streets which terminate in it, and those which

it intercepts, being tributaries that supply a constantly increasing throng of people, and vehicles of every description, as we advance towards its southern extremity. Perhaps the most important of these affluents is Chatham street, which forms the outlet of the Bowery, East Broadway, and several other considerable streets, and unites with Broadway at the lower extremity of the Park. The city contains a number of public squares or open spaces, adorned with trees and resorted to as places of promenade; the most remarkable of which are the Battery (already mentioned), the Park, a triangular enclosure, situated about three-quarters of a mile from the Battery, midway between the Hudson and East River; it contains the City Hall, the Hall of Records, and other buildings; and Washington Square, in the N. W. part of the city. The principal business of New York is carried on in the lower or southern section of the town, where, along the wharves, in every direction, may be seen forests of masts, and where countless vessels, of every description, and from every part of the globe, pour their rich tribute into the lap of this queen of commercial cities. Steamers of such size, splendour, and speed, as the world has never before seen, forming regular lines of packets to Liverpool, Southampton, Glasgow, Havre, Bremen, San Francisco and other ports in the Union, arrive at, and depart from its docks almost daily, loaded with passengers and merchandise. The registered tonnage of this port amounts to 694,843. The total value of exports in 1851, was \$87,653,849; of imports in the same year, \$131,356,952, (about two-thirds of the imports of the whole U. S.) New York is fast approaching the European capitals in the stateliness of its private mansions and the solidity and grandeur of its public buildings. Among the most remarkable of the latter class may be mentioned the City Hall, situated in the Park; it is 216 ft. in length, 105 ft. in breadth, with a front of white marble: the Merchants' Exchange, in Wall street, a magnificent edifice of granite: the Custom House, a vast and costly structure, situated in the same street: the Astor House, on Broadway, opposite to Chatham street, an immense hotel of granite, containing 390 rooms: and Trinity Church, on Broadway, lately rebuilt, which may rank among the finest modern specimens of Gothic architecture. Among its 250 churches, there are at least 20 structures of brown sandstone and marble, of no mean architectural merit. Grace Church especially, built of white marble, at an angle in Broadway, two miles from the Battery, cannot fail to arrest the attention of every stranger. Among the numerous literary and scientific institutions, we may cite Columbia College, founded in 1754: the University of New York, founded in 1831; including the faculties of medicine and law: the Astor Library which is about to be opened (1852), with 100,000 vols., in a building erected for the purpose in Lafayette Place: the Society Library, with nearly 40,000 vols.: the mercantile Library Association, with above 33,000 vols.: and the Academy of Fine Arts: the American Art Union: the Dusseldorf Gallery: and

the Lyceum of Natural History. This city also contains a great number of charitable establishments: the most important of which are the City Hospital; the Alms House, which is situated at Bellevue, near the East river, at some distance above the thickly settled portion of the city; the New York Hospital; the Bloomingdale Lunatic Asylum; the Deaf and Dumb Asylum; the Blind Asylum; and other institutions of a kindred character. Stewart's store, a building of white marble, occupying an entire block on Broadway, is perhaps unsurpassed in any city as a private mart of merchandise. New York particularly excels in the size and number of its hotels, which are thronged with strangers visiting this grand centre of pleasure and business for half a continent. Besides the Astor House, already mentioned, a vast pile of buildings has been erected on the site of Niblo's Garden, which is to be devoted to the purposes of a hotel, under the name of the Metropolitan. Brooklyn adds a number of fine edifices to adorn this great metropolis; prominent among which are its City Hall, a structure of white marble, in the Ionic style; the Church of the Pilgrims, of gray stone; and several other churches. Two miles S. E. of Brooklyn is Greenwood Cemetery, occupying 242 acres of ground, perhaps the most extensive place of sepulture of modern times. The grounds are as varied as extensive, composed of constant alternations of hill and dale and wood and water. New York is plentifully supplied with excellent water from the Croton river, by means of the recently constructed hydraulic works. The aqueduct which conveys the water to the reservoir from which it is distributed to the city, is above 40 m. in length. It is an irregular hollow cylinder, formed of hydraulic stone and brick masonry, (except where the water is conveyed across two valleys, and from the receiving to the distributing reservoirs, in which case iron pipes are employed:) the greatest interior breadth is 7 ft. 5 inches; the greatest height is 8 ft. 5½ inches. The total cost of the aqueduct, from the Croton dam to the distributing reservoir inclusive, is estimated at 9,000,000 of dollars.

The City Hall is in Lat. 40° 42' 40'' N., Lon. 74° 1' 8'' W. The pop. of the city and county in 1850 was 515,547. Including the suburbs, it was 650,000.

NEW ZEALAND, an insular group in the Pacific Ocean, between 34° and 47° S. Lat., and 166° and 179° E. Lon. It consists principally of two large islands, of which the more southern, called New Munster, is the larger, being about 520 m. in length, and 150 m. in its greatest breadth: the other, named New Ulster, is nearly 500 m. in length, and 200 m. in its greatest breadth, but its mean breadth is considerably less than that of the former. The area of all the islands is estimated at 86,000 sq. m. A range of mountains runs through the middle island, some of whose peaks rise from 12,000 to 14,000 ft. above the sea. This range is continued in the N. island; in the S. W. of which is Mt. Egmont, an extinct volcano, of from 9,000 to 10,000 ft. elevation. There are several active volcanoes. Much of the soil is too rugged for cultivation, but there are large tracts of arable

land. There are ten principal settlements; among the most populous of which are Auckland district, with a population of 7,000, and Wellington, with about 5,000, the former in the N. E., and the latter in the S. of the N. island. European pop. of the group, about 20,000; aborigines, 120,000. Auckland, the capital, has about 3,500 inhabitants. Inhab. **NEW ZEA'-LAND-ER.**

NEZH-EEN' (Nejin or Neschin), a flourishing and beautiful t. of European Russia, in the gov. of Tchernigof. Lat. 51° 3' N., Lon. 31° 50' E. Pop. 16,000. (M.)

NI-AG'-A-RA or ni-ag/-ra (see Int. XII., Obs. 2), a r. of N. America, which forms the outlet of L. Erie, and a part of the boundary between the state of New York and Canada. About 3 m. below its commencement, it divides into two arms, which embrace an island, called Grand Island, 12 m. long, and from 2 to 7 m. wide. A mile and a half below Grand Island, the entire waters of the Niagara are precipitated over a ledge of rocks about 160 ft. in perpendicular height, forming the Niagara Falls, the most stupendous cataract on the globe. The entire breadth of the river at the falls (including Goat Island, which divides the waters so as to form two distinct cataracts), is about 1,300 yards, but a little below it contracts to less than 200 yards in width. The whole length is about 35 m.

NIAGARA, a co. forming the N.W. extremity of N. Y., bordering on Niagara r. and L. Ontario. Pop. 42,276. Co. t. Lockport.

NICARAGUA (nik-ar-â/-gwâ), **LAKE OF**, situated in the state of the same name, in Central America, about 12 m. from the nearest part of the Pacific, and 70 from the Caribbean Sea, with which it communicates through the river San Juan. It is about 110 m. in length, and 40 in its greatest breadth.

NICE, **NECE**, (It. Nizza, nit/-sâ; Anc. Nicæ/a;) a city and seaport of the Sardinian dominions, the cap. of a prov. of the same name, is beautifully situated near the foot of the Alps, on the Mediterranean, 95 m. S. W. of Genoa. It is much resorted to by strangers as a winter residence. Lat. 43° 41' N., Lon. 7° 17' E. Pop. estimated at near 30,000. (P. C.)

NICH'-O-LAS, a co. in the W. central part of Va., on the r. Kanawha. Pop. 3,963. Co. t. Summersville.

NICHOLAS, a co. in the N. E. part of Ky., intersected by the Licking r. Pop. 10,361. Co. t. Carlisle.

NIC'-O-BAR' ISLANDS, a group in the Indian Ocean, N. W. of Sumatra, between 6° 30' and 9° 30' N. Lat., and 93° and 94° 20' E. Lon., consisting of two large and a number of smaller islands. The largest is about 40 m. long, and near 20 m. broad. The great insalubrity of the climate has prevented any permanent settlements being made among the Nicobars by Europeans.

the Danube; it is the seat of a Greek archbishopric. Lat. 43° 46' N., Lon. 24° 53' E. Pop. about 10,000. (B.)

NI-co/-SI-A, the principal t. of Cyprus, situated near the centre of the island. Lat. 35° 13' N., Lon. about 33° 40' E. Pop. estimated from 12,000 to 16,000. (B.)

NIĖ/-MEN (Polish pron. nyem/-en), a r. which rises in the S. W. part of Russia, near the t. of Minsk, and after a very winding course, enters the Prussian territories, where it takes the name of Memel (mem/-el), and finally falls into the Kurische Haff, in about 55° 20' N. Lat., and 21° 20' E. Lon. Its whole length is estimated at near 400 m. The Niemen is remarkable among the rivers of Europe for its great and destructive inundations. At the melting of the snows, in spring, its waters are said sometimes to rise, in the short space of 10 or 14 days, 30 ft. above the ordinary level.

NIÈVRE, ne-aivr/, a dep. in the E. central part of France, intersected by the Loire. Pop. 297,550. (B.) Capital, Nevers.

NIGER, nī/-jer, or QUOR/-RA, in the upper part of its course called JOL/-I-BA, a large r. in the W. part of Africa, which rises in about 8° N. Lat., and 6° W. Lon., and flowing at first north-easterly, then south-easterly, and afterwards southerly, falls into the Gulf of Guinea by numerous mouths, in about 5° N. Lat., and 6° E. Lon. Its whole length is estimated at above 2,300 m. The Joliba or upper portion of the Niger appears to have been known to the ancients, though they were probably entirely ignorant of its termination. Mungo Park, sent out by the African Association in 1795, was the first European who explored the upper portion of the Niger, but he was unable to throw any light upon the question as to what became of its waters. Various hypotheses had been and were still entertained; some geographers supposed that they were lost in the sands in the interior of the continent, or flowing into some inland lake were evaporated, like those of the Desaguadero of Bolivia, in S. America; others adopted an opinion very prevalent among the natives of Northern Africa, that the Niger flowed eastward and joined the Nile, being in fact the Nile itself: another generally received hypothesis, and one which Park himself adopted, was, that the waters of the mysterious river, after travelling a long course through Central and Southern Africa, were finally poured into the Atlantic, through the estuary of the Congo. But all the doubts and conjectures respecting the course of this remarkable stream were at length set at rest by the brothers Richard and John Lander, who, in the year 1830, sailed from Boossa (to which place the Niger had been previously explored by Park) to the mouth of the river previously called the Nun, in the Bight of Benin.

NILE (Gr. Νεῖλος; Lat. Nil-lus; Arab. Bâhr-Nil); a great and celebrated r. in the N. E. part of Africa, which is formed by the junction of two streams (in 15° 34' N. Lat., and 32° 31' E. Lon.), of which one, called the Blue River (Bahr-el-Azrek), rises in Abyssinia, in about 11° N. Lat., and 36° 55' E. Lon.; the other, named the White River (Bahr-el-Abiad), has its sources considerably farther west, probably on the northern declivity of the Mountains of the Moon. These branches, which are sometimes denominated the Blue and White Nile, derive their names from the colour of their respective waters;—those of the Bahr-el-Abiad being coloured by a fine white clay which is usually suspended in them. The Nile, in the upper part of its course, makes two extensive circuits, which, together, resemble the form of the letter S; but below the cataracts, its general direction is almost north, with comparatively few deviations. The whole length of this r., from the highest sources with which we are acquainted, is estimated at 2,750 m. The most remarkable phenomena connected with the Nile, are perhaps its annual inundations, to which Egypt may be said to owe its existence as a habitable country. The cause of these inundations is now ascertained to be the periodical rains which fall around the sources of the river within the tropics. The rise of the Nile commences in June, and continues increasing till September. The Delta then looks like an immense marsh, interspersed with numerous islands, with villages, towns, and plantations of trees, just above the water. The inundation having remained stationary for a few days, begins to subside, and about the end of November most of the fields are left dry, covered with a fresh layer of rich brown slime: at this time the lands are put under culture. From its junction with the Tacazzé (in 17° 45' N. Lat.) to its termination, a distance of about 1,350 m., the Nile does not receive a single affluent on either side; an instance which is without a parallel in the geography of the globe. This great r. is navigable, without any obstruction, to the cataracts, or, more properly speaking, *rapids*, in Lat. 24° 8' N., which are regarded as constituting the southern limit of Egypt. (For further particulars respecting the Nile, see EGYPT.)—Adj. NI-LOT'-IC.

NIMES or **NISMES**, neem, (Anc. Nemausus,) a city in the S. of France, cap. of the dep. of Gard, 30 m. N. E. of Montpellier. As a seat of manufactures and commerce, it ranks among the first towns in the country; but it is chiefly interesting to the traveller and antiquary for its striking monuments of ancient grandeur. The Maison Carrée (mâ-zôn' kâr-râ'), *i. e.* literally the "square house," though it is in fact a parallelogram, is regarded as an extraordinary specimen of architectural beauty. This ancient temple appears to be in good preservation, and is now used as a museum for objects of antiquity. The State House at Richmond, in Va., is a copy of the Maison Carrée, the plan and drawings having been sent to Virginia by Jefferson, when he

NISH'-A-POOR', an ancient city of Persia, in Khorassan, for a long time the residence of the Seljook sultans. It is surrounded by a mud wall, but the greater part of the enclosed area is covered with ruins. In its neighbourhood, about 40 m. towards the W. N. W., are the famous Turquoise mines: these gems constitute the only article of foreign trade, to the inhabitants of Nishapoor. Lat. 36° 8' N., Lon. 58° 55' E. Pop. 8,000. (P. C.)

NIVELLES, ne'-vell', (Flem. Nyvel, nî'-veĭ,) a manufacturing t. of Belgium, in S. Brabant, 17 m. S. of Brussels. Pop. 7,000. (B.)

NIZH'-NEE (Nijni) Nov'-GO-ROD', a flourishing manufacturing and commercial t. of European Russia, cap. of a gov. of the same name, at the confluence of the Oka with the Volga. Here, at present, is held the great annual fair, which a few years since gave so much importance to the little town of Makarieff, situated on the Volga, 50 m. E. S. E. of Nizhnee Novgorod. The value of goods sold at this fair in 1836, amounted to 126,514,046 rubles, or above \$100,000,000! (P. C.) The fair is attended, as is estimated, by not less than 300,000 strangers. It begins on the 1st of July, and continues a month or six weeks. Between 4,000 and 5,000 warehouses and booths, presenting, for ten months of the year, the silence of a desert, are exclusively appropriated to the business of the fair. Lat. 56° 20' N., Lon. 44° 28' E. Permanent pop. about 25,000. (P. C.)

NOR/-WAY (Lat. Norwe'gia; in Norw. Norge, nor'-gà), a country in the N. of Europe, comprehending the western portion of the Scandinavian peninsula, and extending, if we include Norwegian Lapland, from 58° to 71° N. Lat., and from 5° to 31° E. Lon. Its length is above 1,000 m.; its greatest breadth about 250 m. The area is estimated at about 130,000 sq. m. Pop. 1,150,000. (P. C.) Norway formerly constituted a kingdom of itself, but at present is united to the crown of Sweden. (See SWEDEN.)—Adj. and inhab. NOR-WE'-GĪ-ĀN or nor-wee'-jun.

NORWICH, nor/-ridge, an important manufacturing city of England, cap. of the co. of Norfolk, forming also a little co. of itself, is situated on the r. Wensum, 96 m. N. N. E. of London. This town has been celebrated for its manufactures of woollens since the era of Henry I., when the Flemings first settled here and introduced the spinning and weaving of worsteds. Norwich is especially interesting to the naturalist, from its containing the magnificent botanical museum of Sir James Edward Smith (the founder of the Linnæan Society of London), which is one of the richest and best chosen collections of the kind in the world; here may also be seen specimens in other departments of natural history, collected by Linnæus himself, together with some of the unpublished manuscripts of that illustrious naturalist. The co. of Norwich has an area of about 9 sq. m., with a pop. of 62,344.

NOR/-WICH, a city of Conn., and one of the seats of justice of New London co., situated at the head of navigation, on the Thames, 12 m. N. of New London. Lat. 41° 33' N., Lon. 72° 7' W. Pop., exclusive of the township, 10,265.

NO/-TO, a t. of Sicily, near the site of the ancient Nec'tum, 16 m. S. W. of Syracuse. Pop. about 11,000. (B.)

NOT/-TĀ-WAY, a r. which rises in the southeastern part of Va., and, flowing into N. C., contributes to form the Chowan.

NOT'-TING-HAM-SHIRE, a co. in the N. E. central part of England, intersected by the Trent. Pop. 249,910.

NOVARA, no-vâ'-râ, (Anc. Nova'ria,) a fortified t. of the Sardinian states, cap. of a prov. of the same name, near the Gogna (gone'-yâ), an affluent of the Po, 27 m. W. by S. of Milan. Lat. 45° 27' N., Lon. 8° 38' E. Pop. 15,300. (P. C.)

NOVA SCOTIA, no'-vâ sko'-she-â (*i. e.* "New Scotland"), a British colony of N. America, between 43° 20' and 46° N. Lat., and 61° and 66° 20' W. Lon. It is surrounded by the sea, except at its N. W. extremity, where it is connected with the territory of New Brunswick by an isthmus about 9 m. wide. Its length, from Cape Canso on the E., to Cape St. Mary on the W., is above 260 m.; its greatest breadth, measuring on a line at right angles with the preceding, is about 100 m. Area estimated at 15,620 sq. m. Pop. in 1838, 155,000. (M.) The prov. or gov. of Nova Scotia comprehends, in addition to the above peninsula, the i. of Cape Breton.

NO'-VÂ ZEM'-BLÂ (a corruption of the Russian name Novaja Zemla, no'-vî-â zem-lâ' or "new land"), an i. in the Arctic Ocean, between 70° 30' and 77° N. Lat., and 52° and 78° E. Lon. Length, nearly 400 m.; mean breadth, about 50 m. There appears to be no vegetation on this island, except lichens and mosses; but white bears, foxes, walruses, and seals abound. Though several expeditions for this purpose have been sent out by the Russian government, the island has not yet been fully explored.

NOV'-GO-ROD' or No'-VO-GO-ROD' VEL'-I-KEE (*i. e.* the "Great New City") an ancient and decayed city of European Russia, cap. of a gov. of the same name, is situated on the Volkhof, at its exit from L. Ilmen, 100 m. S. E. of St. Petersburg. This town is one of the most ancient, and was formerly the most important, in the Russian empire, having been founded, it is said, in the 5th century. In the 9th century, it had its own prince, and in the 12th, a republic was established here, which soon became very powerful, and extended its territory, it is said, from Livonia on the W. to Siberia on the E., and, if we may believe the testimony of several historians, the pop. of the city at one time amounted to 400,000! (B.) In 1477, it was conquered by the grand duke of Russia, since which time it appears to have gradually declined. Its present pop. does not exceed 10,000. (P. C.) Yet, when viewed from a distance, it has a very striking appearance, owing to its fine situation and the gilded domes of its 63 churches, which remain as monuments of its ancient splendour. Its commerce and manufactures are still considerable. It is the residence of an archbishop. Lat. 58° 32' N., Lon. 31° 16' E.

NO'-VÎ, a pleasant, well-built t. of Italy, in the Sardinian territories, cap. of a prov. of the same name, with an active trade. Lat. 44° 47' N., Lon. 8° 48' E. Pop. about 10,000. (P. C.)

NOYON, nõh'-yõn', (Anc. Noviomagus Veromanduo'rum,) a small t. of France, in the dep. of Oise, on a branch of the r. Oise, once the residence of the cour^t of Charlemagne, and remarkable, in later times, as the birth-place of John Calvin. Lat. 49° 35' N., Lon. 3° 1' E. Pop. 3,473. (M.)

NU'-BI-À (Anc. Æthio'pia?), an extensive country in the N. E. part of Africa, between Egypt and Abyssinia, and included between the 24th and 10th parallels of N. Lat., and the 30th and 39th meridians of E. Lon. The term Nubia appears to be of very vague application. The natives apply the name Nooba (Nouba) or Wady el Nooba to a comparatively small tract between Derr and Dongola, while in Egypt, it is loosely employed to denote the region of Sennaar and the countries S. of it. This portion of the African continent, since the conquests made by his son Ismael Pasha, in 1821, may be regarded as forming a part of the extensive dominions of Mehemet Ali, the vice-roy of Egypt. It is divided into Lower Nubia or Nubia Proper, extending N. to the mouth of the r. Tacazzé, and Upper Nubia, which includes Shendy, Halfay (Anc. Mer'oe) and Sennaar. Area and pop. unknown. In the northern portion of this country, as far S. as 17° 30' N. Lat., heavy rains occasionally fall throughout the year; but, further S., the rains are periodical, beginning in the early part of spring, and continuing about three months, thus producing the annual swelling of the Nile.—Adj. and inhab. NU'-BI-AN.

NUECES, noo'-ses, or nw'-cès, a r. of Texas, flowing into a bay of the same name, near 27° 30' N. Lat., and 98° W. Lon.

NU'-REM-BERG (Ger. Nürnberg, nürn'-bèrg), a city of Bavaria, on a branch of the Regnitz, 93 m. N. N. W. of Munich. In the middle ages, this town, in wealth, commerce, and manufactures, ranked among the first cities of Europe. Its pop. was then about 90,000. (B.) Though many circumstances have contributed to diminish its ancient prosperity, its trade and manufacturing industry assign it still a distinguished rank among the towns of Germany. It is also remarkable for its numerous and well conducted public institutions of every kind, among which, its celebrated gymnasium and its polytechnic school may be particularly mentioned. The world is indebted to Nuremberg for the invention of watches, of brass, and of the lock for fire-arms, and of some other articles of less importance. Albert Dürer, the distinguished painter, was a native of this town. Lat. 49° 27' N., Lon. 11° 4' E. Pop. 41,000. (P. C.)

OAHU, wõh'-hoo, one of the most important of the Sandwich Islands, lying about 130 m. N. W. of Hawaii, and intersected by the parallel of 21° 30' N. Lat., and the 158th meridian of W. Lon. Length, 43 m.; greatest breadth, 24 m. Pop. in 1850, 23,145. Honolulu (ho'-no-loo'-loo), situated on a bay of the same name, on the S. side of the island, is the chief town of Oahu, the cap. of the whole group (see SANDWICH ISLANDS), and the great centre of civilization in the Ha-

OCEANICA, o-she-an/-e-kâ, (Fr. *Océanie*, o'-sâ'-â'-ne/,) the name of the fifth division of the globe, which includes the continent of Australia, and all the islands in the Eastern and Pacific Ocean, between 95° E. and 100° W. Lon., which are not considered, from their proximity, to belong to the continents of Asia or America. Its limits are somewhat indefinite, but it may be said to be bounded on the N. W. and N. by a line running through the Strait of Malacca and the China Sea north-eastward (excluding the island of Formosa and the Japan islands), to the 35th parallel of N. Lat., thence eastward to about the 160th meridian of W. Lon., on the N. E. and E. by a line drawn from this meridian due S. E. to the 100th meridian of W. Lon., and thence S. to the 56th parallel of S. Lat. This parallel may be taken for the southern, and the 95th meridian of E. Lon. for the western boundary of Oceanica. This grand division of the world is subdivided into three parts, viz. MALAISIA or Western Oceanica, POLYNESIA or Eastern Oceanica, and AUSTRALIA, which see.

OC-MULG'-EE, a r. of Ga., which rises in the N. part of the state, and, flowing in a general south-easterly course, unites with the Oconee to form the Altamaha. It is navigable for steamboats to Macon.

Length 460 m. It is navigable for barges of 40 or 50 tons as high as Breslau, near 51° N. Lat., and 17° E. Lon.

O-DES'-SA, a seaport and important commercial t. of Southern Russia, in the gov. of Kherson, on the N. W. coast of the Black Sea. This town was a miserable village in 1791, when the empress Catharine obtained possession of Otchakof (Oczakow). The new town was begun in 1794, in 1817 it was declared a free port for 30 years, and Odessa has now become the first commercial place on the Black Sea. Much of the prosperity of this city is owing to the enlightened administration of the Duke of Richelieu, a French emigrant nobleman, who was appointed governor by the emperor Alexander. The town is well built; the streets are broad and straight, but not paved. The principal institution for education, among many, is the Lyceum, founded by the Duke of Richelieu, and called by his name. Lat. 46° 30' N., Lon. 30° 45' E. Pop., including the suburbs, in 1837, 63,000. (P. C.) and in 1845 78,000.

OR/-E-GON RIVER OR COLUMBIA RIVER, a large r. of N. America, which rises on the W. declivity of the Rocky Mountains, near 50° N. Lat. and 116° W. Lon., and; flowing in a very circuitous course, falls into the Pacific, in about 46° 15' N. Lat., and 124° W. Lon. The entire length is estimated at 1,200 m. It is navigable all seasons of the year, for vessels drawing 12 ft. water, to the Cascades, about 150 m. by water from its mouth.

OREGON TERRITORY, the extreme northwestern portion of the possessions of the American Confederacy, lies between 42° and 49° N. Lat., and between 109° and 125° W. Lon., being about 600 miles in mean length from E. to W., and about 486 in breadth from N. to S., and including an area of 241,463 sq. miles, or nearly 220,00,000 acres. It is bounded on the N. by British America, E. by the Rocky Mountains, which separate it from Missouri or N. W. Territory, and a small portion of Indian territory; south by the 42d degree of N. Lat., which separates it from Utah and California, and W. by the Pacific. A small part of the N. W. boundary is formed by the straits of Juan de Fuca and the Gulf of Georgia, which separate it from Vancouver's Island. The population by the census of 1850, was 13,293; of whom 12,087 were white, and 206 colored persons. Deaths in the year preceding June, 1850, forty-seven, or less than four in every thousand. There were in that year 2,374 families inhabiting the same number of dwellings. The Indians, of whom there are many tribes, are not included in the census returns.

Oregon is divided into ten counties.*

Rivers, Lakes, Harbours, &c.—The Oregon or Columbia,—the principal river not only of this territory but of the whole Pacific slope, and the only important channel of communication between the inland regions and the sea—has its sources in the Rocky Mountains, within the British dominions. The two principal branches take their rise in about 50° N. Lat., but pursuing opposite directions, they enclose an elliptical area of about 250 miles in extent from north to south. The north branch or Columbia proper, runs N. W. to nearly the 52d degree of lat., then turning S. passes through a series of lakes, and joins the south branch just within the Oregon limits. The south branch, McGillivray's, Kootanic, or Flat Bow river, (for it has received all these different names,) runs first in a S. W. and then in a N. W. direction, and joins the north branch as just stated. About 100 miles from its mouth the south branch expands into Flat Bow Lake. The Columbia now pursues a S. W. course for about 150

miles, receiving the Clarke or Flathead and Spokain rivers from the south, and the Okonag'an or Okanag'an from the north. It next runs almost directly south for about 200 miles, receiving the Lewis, called also the Saptin or Snake river, from the E., and the Yakima from the W. Below Fort Wallawalla it pursues a westerly, and for the last 80 miles a N. W. direction to its mouth in the Pacific Ocean. In this part of its course its affluents from the south are the John Day's, Falls, and Willam'ette rivers; and from the north the Cowlitz. We will now retrace our steps; starting at the Cascade Range of Mountains, 150 miles from the sea, to which point the Columbia river is navigable for vessels drawing 12 feet water. Here the river is narrowed to a channel of 150 yards in width, and descends 40 feet in two miles. It is then navigable 40 miles further up to the Dalles, where it is again compressed within a channel of 100 yards. This channel is formed by high basaltic rocks, and is half a mile in length. The river here descends 50 feet in two miles; but in freshets rises 60 feet, when the Dalles can be passed by boats both up and down. But many fatal accidents have occurred from attempts to pass when the water was not in a proper stage. From thence (with many interruptions, however, by falls and rapids, which are passed by portages,) the river is navigable for small boats up to the Dalles de Morts, near the 52d degree of N. Lat. Near the north boundary are Kettle Falls. Again descending the Columbia, we have Clarke river rising in the Rocky Mountains in the E. of Oregon, pursuing a N. W. course through Lake Kulluspelm, and joining the Columbia after a course of about 600 miles. But the great tributary of the Columbia, the Lewis or Saptin, rises in the Rocky Mountains, in the S. E. of Oregon, and running first in a S. W. and then in a N. W. course from 800 to 1,000 miles, joins the parent stream, after receiving the Breneau, Owyhee, and Malheur from the west, and the Sickly, Reid, Fayette, Salmon, and Kooskooskie rivers from the east. The Lewis is only navigable in particular parts, being obstructed by the Salmon and American Falls, and other impediments to navigation. The Fall river on the east side of the Cascade range, and the Willam'ette on the west, each have a north course of about 200 miles. The Okanagan, the largest affluent of the Columbia on the right bank, has its course principally in British America. There are several small lakes in the S. W., between the Cascade range and the Blue mountains, and also in the S. E. near the Rocky Mountains.

The best harbours in Oregon are in Puget's Sound, Hood's Canal, and Admiralty Inlet—arms of the straits of Juan de Fuca. Here, such is the depth of the water, and the boldness of the shores, that a vessel's side will strike before her keel. Between these and the mouth of the Columbia is Gray's Harbour—but its anchorage is limited. The Columbia river itself is much obstructed at its mouth by bars and shifting sands, which render the navigation dangerous. The Klamet and Umpqua rivers in the S. W. are navigable for a small distance. The Klamet has only two fathoms water on the bar, but

ou, as in *our*; th, as in *thin*; TH, as in *this*; N, nearly like *ng*.

four or five within. The Umpqua admits vessels of 12 feet draught, and light steamboats can ascend 25 miles. A port of entry has been established at its mouth. The Willam'ette, which enters the Columbia 90 miles from the sea, is navigable for vessels of the largest class to Portland, 15 miles from its mouth, and sometimes even as high as Milwaukie, seven miles farther up. It is navigable for small steamboats 60 miles above the falls.

Face of the country, Mountains, &c.—Oregon is usually divided into three sections, viz. the Lower Country, or portion next the sea; the Middle Country, or portion which lies between the Cascade range and Blue mountains; and the Upper Country, or portion which lies between the Blue and Rocky mountains. On approaching Oregon from the sea, it presents the same bold, iron-bound coast as California; but with this difference, at least south of the Columbia, that the coast range, instead of running *parallel* with the Pacific, is composed of a series of highlands nearly at right angles to the shore, through the valleys of which the rivers of the Callapuya or Callapooya mountains,—the western limit of the Willam'ette valley,—descend to the ocean. This section has a breadth varying from 75 to 120 miles between the Pacific and the Cascade range; and although its general features present a rugged aspect, yet this is the garden of Oregon, the agricultural store-house of the territory, and here are the rich valleys of the Willam'ette, the Umpqua, and Rogue's river, *south* of the Columbia, and of the Cowlitz and Chahales, *north* of the same river, besides various alluvial basins on the Columbia, and the scattered valleys of the smaller streams. The larger valleys vary in length from 40 to 150 miles, and in breadth from 5 to 85 m. One remarkable feature of the Willam'ette valley, is the buttes, (pronounced butes,) high conical hills, which are generally insulated. Near the mouth of the Coupé r. there are two Buttes, called Pisgah and Sinai, which are half a mile apart at their bases, and about 1,000 ft. above the plain, with a level country all around them for 20 miles. From one part of the Willam'ette valley, near the Rickreal, seven peaks of the Cascade mountains, crowned with everlasting snow, may be seen at once. This scene, viewed from the valley, covered with its golden harvests, has a very picturesque effect. The Willam'ette river has a great number of tributary streams. Commencing at its mouth, on the west side, and proceeding in order, we have the Tuality (two'l'-e-to), Yam Hill, Rickreal (rick'-re-awl), Luckimiute (luck'-e-me-oot'), Mary's, and Long Tom rivers, all rising in or at the base of the Callapooya mountains. Turning, and descending on the right bank, we pass the Mackenzie's, Sexton's, Coupé (koo-pay'), Sandyam, Pudding, Clackamus, and Milwaukie rivers. Several of these affluents are nearly one-fourth of a mile wide at their mouths; others are what are called, in the Middle States, creeks. These are bounded by fertile valleys, which offer great inducements to the settler. The eastern branches rise in the Cascade range.

10,000 to 14,000 ft. in elevation, and forming part of a chain of mountains extending from 60° N. Lat. to the southern point of Old California, we enter the second region, or Middle Country of Oregon. This section extends from N. to S. through the entire territory, covering a breadth of about 160 miles; and may be characterized as the pastoral portion. The part south of the Columbia is drained by the Fall's, John Day, Unatilla, and Wallawalla rivers, which run N. into the Columbia; and also by a number of western affluents of the Lewis or Snake river. The northern part of this plateau is drained by the Barrier, Pischous, Yakima, and other branches of the Columbia. In the southern part, the Blue mountains cross this section in irregular E. and W. directions. Most of the rivers lying on the emigrant's route, are sunk in deep perpendicular channels of lava, with rugged sterile banks, and few alluvial bottoms, which fact has given to the whole country a worse character than it deserves. At some distance back from the rivers are large plains, covered with a nutritious grass, and there are streams whose valleys would repay agricultural labour. Crossing the Blue mountains (which sometimes rise to the snow-line, but whose general elevation is from 3,000 to 4,000 ft.), we arrive at the Upper Country, which reaches to the base of the Rocky mountains, and is mostly a sterile and cheerless region, of about 150 m. in breadth. The northern portion above the Salmon river is wooded. The southern is covered with volcanic mountains and plains. The rivers of this section are somewhat peculiar, running in deep troughs, called cañons, sometimes from 500 to 1,500 ft. below the surface of the surrounding country, and inaccessible to the traveller. There are some places adapted to grazing, but it is generally too cold for agriculture.

Soil and Productions.—In the Lower Country, where alone agricultural operations are carried on to any extent, wheat is the staple production; but owing to the cool evenings, and the drought in the latter part of summer, Indian corn does not mature well. Besides these, oats, barley, turnips, and most of the fruits of the Middle States flourish. The want of rain is unfavourable to the potato. Among the indigenous fruits are the crab-apple, a large red plum, strawberries, a yellow raspberry, and some other berries. The most fertile portions of Oregon are the lower valley of the Willam'ette and parts of the Umpqua valley, which possess a surpassingly luxuriant soil. A species of fir, called Lambert's pine, grows in the lower region to an enormous size, sometimes attaining a height of nearly 300, and a girth of 40 ft.—*often* of 24 to 36 ft. This is the great wood of the country, and large quantities are exported to the Sandwich Islands, and perhaps now to California. The other timber, of which there is not a great variety or great abundance, is the cedar, oak, ash, maple, laurel, pine, willow, dogwood, cottonwood, and alder. The oak, next to the fir, is the most valuable wood, and is found most abundantly in the Willam'ette and Umpqua valleys. In the middle region, timber is not abundant, and consists mostly

ou, as in *our*; th, as in *thin*; TH, as in *this*; N, nearly like *ng*.

of soft wood. On the Blue mountains, and in parts N. of the Columbia, the pine grows. By the census of 1850, there were 135,357 acres of land under cultivation, producing 228,882 bushels of wheat; 2,928 bushels of Indian corn, 325 lb of tobacco, 29,596 lb of wool, 211,734 lb of butter, 36,030 lb of cheese, 380 tons of hay, and employing farming implements and machinery to the value of \$183,403. Value of live stock \$1,875,987.

Climate and Meteorology.—In common with the western shores of all continents, Oregon has a milder climate than the same latitudes on the Atlantic border. The coast region is the mildest, and the Upper Region the most rigorous. In the first, the winters last only from December to February, snow seldom falls, and S. and S. W. winds prevail, mitigating the severity of the weather. From April to November but little rain falls. At Puget's Sound, between May and July, the mean temperature was 67°, maximum 98°, minimum 39°; at Ft. Vancouver, from June to September, the mean was 66°, maximum 87°, minimum 51°. Of 106 days, 76 were fair, 19 cloudy, and 11 rainy. The winter somewhat resembles that of England. In the Middle Region, the summers are much drier and warmer, and the winters colder than in the Coast Region, the extremes varying from 108° to 18°. Daily range 40°. No dews fall here. The Upper Country is very variable, having in each day all the changes of the seasons, and is therefore unfitted for agricultural operations.

Animals, fish, &c.—The wild animals are deer, black and grizzly bears, elk, wolves, antelopes, foxes, musk-rats, martens, and beavers. The latter are fast diminishing. There are some buffaloes in the eastern portion. But little game is found in the *Middle* section. In spring and fall, geese, ducks, and other water-fowl are abundant. The fish are, salmon in great abundance and excellent quality, (caught from May till October), sturgeon, cod, carp, sole, flounders, ray, perch, herring, and smelt, with large quantities of crabs, clams, oysters, and mussels.

History.—Oregon seems to have been first trodden by European feet about 1775, when a Spanish navigator visited Juan de Fuca straits. Cook coasted along its shores in 1778. The Columbia r. is believed to have been first made known to the civilized world, in 1791, by Captain Gray, of the ship *Columbia* of Boston, U. S., who saw the mouth of the river, but did not enter it till May of the next year, when he gave it the name of his ship. From this time up to 1804 the coast of Oregon was occasionally visited by British and American fur-traders. In that year, President Jefferson sent out an exploring party under Lewis and Clark, who passed the winters of 1805 and '6 at the mouth of the Columbia. After this period, overland expeditions by fur-traders became common, and these, with the British Hudson Bay Company, held joint possession of the country (but not without jealous rivalries and bloody contests), till the treaty of 1846, which gave all below 49° N. Lat. to the United States.

Emigration from the U. S. for the purpose of settlement, commenced in 1839. Its growth for the time is probably retarded by the gold-mines of California attracting nearly all travellers and settlers, but their ultimate prosperity will most likely be mutual, the mining population of the one furnishing a market for the agriculturists of the other. There is no doubt that in future times Oregon will play an important part in the commerce of the Pacific Ocean, and particularly that of the Polynesian groups.

The government of Oregon is similar to all other territorial governments. The governor receives a salary of \$3,000, and is besides superintendent of Indian Affairs. His secretary receives \$1,800 per annum. Great interest is taken in the cause of education. The Methodists have an institute at Salem, and the Presbyterians have an academy at Tualatin Plains, both flourishing institutions. There are two female institutes at Oregon City, and good schools at Portland, Lafayette, and other small towns.

Towns.—Portland, on the Willam'ette, 15 m. from its mouth, is at the head of ship navigation, and is the largest and most commercial town in Oregon. Pop. estimated at about 1,000. Oregon City, in a cañon* (kan'yon) on the E. side of the Willam'ette, 25 miles from its mouth, is the present capital, and has excellent manufacturing facilities, derived from the falls in the river at this place. Pop. about 700. Salem, also on the Willam'ette, 60 m. above Oregon City, is beautifully located in a rich prairie country, and is one of the most flourishing towns in the territory. It is in contemplation to remove the capital thither. Pop. about 600. Oregon Institute, organized in 1844, is on a commanding site, about 6 miles from Salem. It has at present from 75 to 100 pupils. Lafayette, at the falls of the Yam Hill, a western tributary of the Willam'ette, has about 400 inhabitants. Marysville is situated on the W. side of the Willam'ette, at the mouth of the Mary's r. Pop. 200.

O-REL' or OR-LOF', a flourishing city in the S. central part of European Russia, cap. of a gov. of the same name on the Oka. It has an extensive trade in grain, and may be regarded as the great commercial entrepôt for the interior of Russia; it is also the seat of various manufactures. Lat. 52° 57' N., Lon. 35° 57' E. The pop. in 1820 was 20,000; in 1830 it was stated at 31,000 (P. C.); at present it probably exceeds 40,000.

* This is a Spanish word signifying a "channel or passage." It is usually employed, west of the Rocky Mountains, to denote the narrow channel of a stream flowing between precipitous banks. Sometimes, as in the case of the cañon at Oregon City, the stream does not occupy the entire channel, but leaves a flat space between the river and the precipitous bank or wall which encloses it.

OL'-REN-BOORG' (Orenburg), an extensive gov. of Russia, situated partly in Europe and partly in Asia. Oo'-fâ (Ufa), the cap., is on a r. of the same name, in Lat. 54° 42' N., Lon. about 56° E. Pop. 6,000. (P. C.)

ORENBOORG, the principal t. of the above gov., situated on the r. Ural, is regularly built and well fortified. It carries on an extensive trade with Bokhara. Lat. 51° 46' N., Lon. 55° 5' E. Pop. stated at 20,000. (P. C.)

ORIHUELA, o-re-wâ'-lâ', a city in the Spanish prov. of Valencia, on the r. Segura, in a fertile plain, which has been justly styled "the Garden of Spain." It contains a university and several other institutions. Lat. 38° 8' N., Lon. 1° W. Pop. 26,000. (B.)

O-RI-NO'-CO (*i. e.* the "coiled serpent"), a large r. of S. America, the sources of which have never been visited by Europeans. As it is usually laid down on our maps, it strikingly resembles, in its general course, the form of a coiled serpent, as its name implies. From about 4° S. Lat., and 68° W. Lon., it flows northerly above 200 m., then north-easterly, and at last almost E., to the Atlantic, which it enters near 9° N. Lat., and 61° W. Lon., by a multitude of mouths, called the Caños (kân'-yoce) or "channels" of the Orinoco. The whole length is estimated at near 1,300 m. The delta commences about 100 m. from the sea. The tides are sometimes perceptible as far as Angostura, or about 250 m. from the mouth of the Orinoco. During the rainy season, which corresponds to our summer, the river overflows the Llanos (lyâ'-nòs) or plains which lie N. of it to a great extent, presenting a vast expanse of waters, said sometimes to exceed 150 m. in breadth. In the upper part of its course, the rise is said to amount to 13 fathoms, which is somewhat more than the greatest rise on the Ohio.

O-RIS'-SÂ, a prov. of Hindostan, between the 18th and 23d degrees of N. Lat., and bordering on the Bay of Bengal.

ORIZABA, o-re-sâ'-bâ, a flourishing t. of Mexico, 70 m. W. S. W. of Vera Cruz. Pop. between 8,000 and 10,000. (M.) Near it, in Lat. 19° 2' N., Lon. 97° 15' W., rises the volcanic mountain of Orizaba (now extinct) to the height of 17,380 ft. above the Atlantic.

ORK'-NEY ISLANDS (Lat. Or'cadès), a group belonging to Great Britain, situated near the N. N. E. extremity of Scotland, between 58° 44' and 59° 24' N. Lat. They are separated from the main land of Scotland by the Pentland Frith, which, in the narrowest part, is about 6 m. wide. The group contains in all 67 islands or islets, 27 of which are permanently inhabited. The largest is Pomona or Mainland. (See POMONA.) Total area estimated at 440 sq. m. Pop. 30,507.

W. of Paris, with which it is connected by a railway. Among its numerous literary institutions, we may name the *Académie Universitaire*, a national College, and the Public Library, containing 25,000 vols. Genabum appears to have been a place of considerable importance among the ancient Carnutes. In retaliation for the massacre of some Romans residing in the town, it was plundered and burned by Cæsar (about 50 B. C.) In later times, Orleans has undergone two of the most remarkable sieges recorded in history. The first was during the invasion of Attila (A. D. 451), in which that hitherto victorious destroyer was successfully resisted. The other took place in 1428, during the English invasion, when Joan of Arc, called afterwards the Maid of Orleans, commenced her wonderful career, by delivering the city, with the signal defeat of its besiegers. O'-VER-TON, a co. in the N. part of Tenn., bordering on Ky. Pop. 11,211. Co. t. Monroe.

OVIEDO, o-ve-à'-do, (Lat. Ovetum), a city in the N. W. part of Spain, cap. of the prov. of Asturias, supposed to have been built near the middle of the 8th century. During the middle ages, Oviedo was known throughout Christendom as "the City of the Bishops" (Civitas Episcoporum), owing, it is said, to the great number of the clergy who took refuge here from the persecutions of the Moors. The ancient cathedral is a magnificent structure of the pure Gothic style, equalled, perhaps, by none in the Spanish peninsula. The University, founded in 1580, is well endowed, and has a large library. Lat. 43° 22' N., Lon. 5° 57' W. Pop. about 10,000. (B.)

O-WE'-GO, a flourishing t. in the S. part of N. Y., on the E. branch of the Susquehanna, and at the junction of the Ithaca and Owego Railroad (29 m. long) with the New York and Erie Railroad, about 84 m., in a direct line, S. W. of Utica. Pop. 7,159.

OX'-FORD (Lat. Oxonia), a beautiful city and celebrated seat of learning of England, the cap. of Oxfordshire, is situated on the Isis, a branch of the Thames, 53 m. W. N. W. of London. The date of the university is unknown; it is, however, certain that Oxford was a place of study in the reign of Edward the Confessor, if not earlier. The University of Oxford at present consists of 19 colleges and 5 halls.

ou, as in *our*; th, as in *thin*; th, as in *this*; n, nearly like *ng*.

The total number of members on the books in 1841, was 5,515. Among the different libraries of Oxford, we ought especially to notice the celebrated Bodleian Library, named in honour of Sir Thomas Bodley, by whom it was founded, in 1597. It contains about 300,000 printed vols., besides a great number of valuable manuscripts. The Observatory is in Lat. $51^{\circ} 45' 40''$ N., Lon. $1^{\circ} 15' 22''$ W. Pop., including the university, with an area of above 4 sq. m., 23,834. A student at Oxford is called an *Oxo-Ni-an*.

OX-FORD-SHIRE, a co. in the S. central part of England, on the Thames. Pop. 161,643.

OX-US (called by the natives Amoo, *ââ-moo'*, or JE-HOON'), a great r. of Central Asia, which rises from a mountain lake in $37^{\circ} 27'$ N. Lat., and $73^{\circ} 40'$ E. Lon., at an elevation of 15,600 ft. above the level of the sea. (M.) Its general direction is north-westerly: it enters the sea of Aral near $43^{\circ} 30'$ N. Lat., and 58° E. Lon., after a course of about 1,300 m. Sir A. Burns crossed it on his way to Bokhara, and found it upwards of 800 yards in breadth, about 20 ft. in depth, with muddy waters, and a current of about $3\frac{1}{2}$ m. an hour. (M.)

O-ZARK, a co. in the S. part of Mo., bordering on Ark. Pop. 2,294.

PACIFIC OCEAN (sometimes, though improperly, called the SOUTH SEA), a vast expanse of water, extending from the western shores of America to the eastern shores of Asia and Australia. Its most northern limit is Behring's Strait, in about 66° N. Lat.: towards the southern extremity, it is divided from the Atlantic by a line drawn from Cape Horn to the S. pole. It extends from 120° E. to 70° W. Lon., a distance of above 11,000 m. Its extent, from N. to S., is somewhat less than 10,000 m. The Pacific received its name from Magellan, the first European who traversed it, in consequence of the prosperous weather which he met with while navigating its surface. Though this ocean is subject to violent gales and storms (at least in many parts of it), it would seem that the winds and water-currents are generally more regular and uniform, and in so far less *hostile*, than those in the Atlantic. This may be accounted for by its great extent, which prevents the regular prevailing winds from being broken by those irregular currents, calms, and storms which the vicinity of a large tract of land, especially of mountain land, is so apt to produce.

PADERBORN, *pâ'-der-born'*, a commercial t. of Prussia, in Westphalia, cap. of a circle of the same name. It is an ancient place, tolerably well built, and surrounded by a wall with five gates. It is said to have been for a time the residence of Charlemagne. Lat. $51^{\circ} 44'$ N., Lon. $8^{\circ} 44'$ E. Pop. 6,000. (B.)

PAD-U-A (It. Padova, *pâ'-do-vâ*; Anc. Pata/vium), a city and distinguished seat of learning, in Austrian Italy, cap. of a prov. of the same name, situated on the Bacchiglione (*bâk-keel-yo/-nâ*), a small r. which flows into the Adriatic. It is fortified with walls, ditches, and bastions.

and is above 6 m. in circumference, but is thinly inhabited. At the head of its numerous scientific and literary institutions, stands the University, one of the most celebrated and most flourishing in Europe. It was founded in the early part of the 13th century, and attained its greatest popularity during the 15th and 16th centuries, when it was attended not only by a multitude of students from all parts of Europe, but even by some from Mahometan countries. Its medical school was particularly celebrated. Fallopius, Morgagni, and the great Galileo, have been among its professors: Dante, Petrarch, and Tasso have been of the number of its pupils. The University at present is attended by 1,000 students, but, during its most flourishing period, it is said to have had six times that number: there are four faculties; theology, law, medicine, and philosophy, with about 60 professors: the botanic garden, connected with the University, is regarded as the oldest in Europe: the library contains upwards of 70,000 vols. The clerical college or seminary is noted for its printing presses, which have long supplied Italy with school-books and with good editions of other works. Its library contains above 55,000 vols. At Padua, Forcellini compiled his great Latin Lexicon, upon which he spent 40 years of his life. Patavium was considered in the Roman times as one of the oldest towns in Italy. It is distinguished as the birth-place of Livy. The Observatory is in Lat. 45° 24' 2" N., Lon. 11° 52' 18" E. Pop. 51,000. (B.) —Adj. and inhab. PAD'-U-AN.

PAGE, a co. in the N. N. E. part of Va., intersected by the Shenandoah r. Pop. 7,600.

PAIS'-LEY, a manufacturing t., the third in Scotland for population and commercial importance, situated in Renfrewshire, on the White Cart r., 3 m. above its junction with the Clyde, and 8 m. W. by S. of Glasgow. Lat. 55° 51' N., Lon. 4° 26' W. The pop. of the parish of Paisley, in the middle of the last century, was about 6,000; in 1801, it was 31,179; in 1841, it amounted to 60,487: that of the town alone to 48,426.

PAL'-A-WÂN', one of the Philippine Islands, extending from 8° 20' to 11° 30' N. Lat., and from 117° 30' to 119° 40' E. Lon. Length about 270 m. Mean breadth, perhaps 25 m. Little is known of the interior.

PALENCIA, pal-en'-she-a, (Sp. pron. pâ-len'-the-ã; Anc. Pallan'tia,) a city of Spain, in Leon, cap. of a prov. of the same name, on an affluent of the Pisuerga (pe-swër'-gã), which flows into the Douro. Its cathedral is one of the largest and finest in Spain. Lat. 42° 2' N., Lon. 4° 28' W. Pop. about 11,000. (B.)

PALENQUE, pâ-lenk'-ã, or more properly CULHĒACAN, kool-wã-kân', an ancient city of Mexico, remarkable for its magnificent ruins, said to be the most interesting, and on the largest scale, of any in the New World.

PAL-ER'-MO or pâ-lêr'-mo (Anc. Panor'mus), the principal seaport and cap. of Sicily, and the second city of the kingdom of the two Sicilies; is pleasantly situated on the N. coast, towards its W. extremity. The town forms an oblong parallelogram, surrounded by walls, and furnished

ou, as in *our*; th, as in *thin*; TH, as in *this*; N, nearly like *ng*.

with bastions. The royal palace is an old building, fortified like a castle, with a magnificent chapel, built by Roger of Sicily, in 1129. On the summit of the palace is the observatory where Piazzini discovered, in 1801, the planet Ceres. Palermo is the see of an archbishop; and the seat of a university, founded in 1447, and attended by about 600 students, with a library of 40,000 volumes. Panormus appears to have been a place of considerable consequence in ancient times; the name signifying "All-port," may be regarded as indicating its early commercial importance. The observatory is in Lat. $38^{\circ} 6' 44''$ N., Lon. $13^{\circ} 21' 24''$ E. Pop. about 168,000. (B.)

PAL-ES-TINE' (Lat. Palæsti'na, usually called by the Romans Judæa), the name commonly applied to the land anciently inhabited by the Israelites, including the country of the Philistines. Its precise boundaries are not well defined. It appears, however, to have been situated between 31° and $33^{\circ} 30'$ N. Lat., and 34° and $36^{\circ} 30'$ E. Lon., being bounded on the N. and E. by Syria, S. E. and S. by the desert, and W. by the Mediterranean. Length, perhaps 180 m.; greatest breadth about 80 m. Area estimated at 11,000 sq. m. (P. C.)

PALMA, pâl/-mâ, one of the Canary Islands, intersected by the parallel of $28^{\circ} 30'$ N. Lat., and the 18th meridian of W. Lon. Length about 26 m.; greatest breadth about 16 m. Area 19 sq. leagues. Pop. in 1835, 33,089. (P. C.)

PALMA, a fortified t., the cap. of Majorca and of all the Balearic Islands, is situated on the S. W. coast, on a bay of the same name, which forms a good harbour. In the 13th century, Palma was one of the chief trading places in Europe, but at present its commerce is comparatively unimportant. Lat. $39^{\circ} 34'$ N., Lon. $2^{\circ} 44'$ E. Pop. estimated at 34,000. (B.)

PALMAS or LAS PALMAS, lās pâl/-mâs, the chief t. of the Grand Canary, and the cap. of all the Canaries, is situated on the N. E. coast. Lat. $28^{\circ} 8'$ N., Lon. $15^{\circ} 26'$ W. Pop. about 9,000. (B.)

PAM'-LI-CO (called in the upper part of its course Tar River), a r. of N.C., flowing into Pamlico Sound, near $35^{\circ} 15'$ N. Lat. and $76^{\circ} 30'$ W. Lon.

PAMPLONA, pâm-plo/-nâ, or PAMPOLUNA, pâm-pâ-loo/-nâ (Anc. Pompeion or Pompeiopolis), a fortified t. of Spain, cap. of the prov. of Navarre, and formerly the residence of the Navarrese kings, is situated on the r. Arga, an affluent of the Ebro. Lat. $42^{\circ} 50'$, Lon. $1^{\circ} 42'$ W. Pop. 15,000. (B.)

PANAMA, pân-â-mâ', a fortified seaport t. of New Granada, cap. of a prov. of the same name, and of the dep. of the Isthmus (Istmo), situated on the Bay of Panama. Lat. $8^{\circ} 59'$ N., Lon. $79^{\circ} 27'$ W. Pop. not 10,000, (B.), but the statements of several other writers make it considerably above this number.

PANAMA, ISTHMUS OF, called also the ISTHMUS OF DARIEN (dâ/-re-en), the narrow neck of land which unites North and South America, situated between 7° and $9^{\circ} 30'$ N. Lat., and 77° and $83'$ W. Lon. The narrowest part is about 20 m. E. of Panama, between 9° and $9^{\circ} 30'$ N. Lat., and near 79° W. Lon., where it is scarcely 30 m. wide.

PANAY, pã-nĩ', one of the Philippine Islands, intersected by the 11th parallel of N. Lat., and the 117th and 118th meridians of E. Lon. Length, about 110 m.; greatest breadth, near 90 m. Its form is almost an equilateral triangle. It is one of the most important and populous islands in the whole group. Pop. estimated, in 1837, at about 406,000. (P. C.)

PANCSOVA, pãân'-cho'-võh', a trading t. in the S. E. part of Hungary, on the Temes (tem'-esh'), near its junction with the Danube, 10 m. E. N. E. of Belgrade. Pop. 9,000. (B.)

PA-NO'-LA, a co. in the N. W. part of Miss., intersected by the Tallahatchie r. Pop. 11,444. Co. seat, Panola.

PA'PA, pãã'-põh', a large t. of Hungary, about 80 m. S. E. of Vienna. Pop. 14,000. (B.)

PAPAL STATE (It., Stato Pontificio, stã'-to pon-te-fee'-che-o, or Stato della Chiesa, stã'-todêl-lã ke-ã'-sã, *i. e.* "state of the church"), a division of Italy, comprehending the dominions of the see of Rome, of which the Pope is the monarch. It is principally situated between 41° 10' and 45° N. Lat., and 11° and 14° E. Lon.; bounded on the N. by the Austrian dominions, N. E. and E. by the Adriatic and kingdom of Naples, S. W. by the Mediterranean, and W. and N. W. by Tuscany and Modena. Its length is about 270 m.; the breadth varies greatly; in one part it extends across the Italian peninsula, and is near 140 m. broad. Area estimated at 17,200 sq. m. Pop. in 1833, 2,732,036. (M.) The seat of gov. is at Rome.

PAPUA, pap'-oo-a or pã'-poo-ã, called also New Guinea, a large i., or perhaps cluster of islands, in the Eastern seas, between 130° and 150° E. Lon., and 0° and 10° S. Lat. Not only its interior, but even its coast line is in many parts unknown. Europeans have little or no commercial intercourse with this island. The inhabitants consist of two and perhaps more classes; the Papuas, who inhabit the western portion of the island, received their name from the Malays, in whose language it signifies "frizzled hair;" and the Haraforas, who are said to occupy the interior and eastern coasts. Both these races appear to live in a state of great barbarism. The Papuas are said to resemble the Australians, though they are perhaps rather less degraded.—Adj. PAPAUN, pap'-oo-an.

PARA, pã-rã', called formerly BELEM, bã-lên' or bã-leng', a seaport t. of Brazil, cap. of a prov. of its own name, is situated on the river or estuary of Para, formed by the union of the Tocantins with the Tagipuru (tã-zhe-poo-roo'), the southern arm of the Amazon. Lat. 1° 28' S., Lon. 48° 22' W. Pop. estimated at nearly 20,000 (B.), though some say that the troubles and massacres which occurred in Para, in 1834-5, have greatly reduced the number of its inhabitants.

PARAGUAY, par-a-gwã' or par-a-gwĩ', a r. of S. America, which rises in Brazil, in about 13° 30' S. Lat., and 56° 20' W. Lon.; it flows southerly, separating the state of Paraguay from Bolivia and La Plata, and empties itself into the Parana, in about 27° 20' S. Lat., and 58° 40' W. Lon. Its length is estimated at above 1,100 m. Vessels of 300 tons

may ascend as far as Assumption, and smaller vessels several hundred miles within the boundary of Brazil.

PARAGUAY, an independent state of S. America, situated between 19° and $27^{\circ} 30'$ S. Lat., and 54° and 59° W. Lon.; bounded on the N. and E. by Brazil, S. by La Plata, and W. by La Plata and Bolivia. Length, from N. to S., near 600 m.; greatest breadth, about 210 m. Area estimated at 90,000 sq. m. Pop. in 1826, 250,000 (B.), at present it probably exceeds 300,000. The Guaranis (*gwã-rã-nees'*), a tribe of aborigines, constitute the principal portion of the inhabitants. Dr. Francia, the late dictator, through his wise, though arbitrary government, appears to have succeeded in bringing these people into a more perfect state of subordination and civilization, than has ever been done before with any nation of American aborigines; and, at the same time, he has preserved the country from those dissensions and civil wars from which the other S. American states have suffered so deeply. His policy of rigorously excluding from his dominions all foreigners, without exception, has doubtless contributed greatly not only to preserve the tranquillity of the country, but also to consolidate the different elements of the population into one mass, and to form them into a nation. Little is known with certainty respecting the present condition of this country. Assumption (Asuncion) is the capital.

PARAHYBA or **PARAIBA**, *pã-rã-ee' -bã*, a r. in the S. E. part of Brazil, which rises about 80 m. W. of Rio Janeiro, and after a very circuitous course of above 500 m., falls into the Atlantic, about 170 m. N. E. of the Brazilian capital, in $21^{\circ} 40'$ S. Lat., and near 41° W. Lon.

PARAMARIBO, *par'-a-mar' -e-bo*, the cap. of Dutch Guiana, in S. America, is situated on the r. Surinam, about 20 m. from its mouth. Lat. $5^{\circ} 45'$ N., Lon. $55^{\circ} 24'$ W. Pop. estimated at from 18,000 to 20,000. (B.)

PARANA, *pã-rã-nã'*, a large r. of S. America, which rises in the S. E. part of Brazil, near 22° S. Lat. and 45° W. Lon., and, flowing in a general westerly course, receives the Parana-Iba* (*par'-ã-nã ee' -bã*) in $20^{\circ} 40'$ S. Lat., and $52^{\circ} 20'$ W. Lon., after which it runs at first southerly, then westerly, to its junction with the Paraguay. On receiving this great tributary, it again takes a southerly course to its termination (Lat. 34° S., Lon. $58^{\circ} 30'$ W.), where, by its union with the Uruguay, it forms the Rio de la Plata. The whole length of the Parana may be estimated at 2,000 m. It is navigable about 750 m. for vessels of 300 tons.

PARANA-IBA or **PARANAHYBA**. See the preceding article.

PARANAHYBA, *pãr'-ã-nã-ee' -bã*, or **PARNAHIBA**, *pãr'-nã-ee' -bã*, a r. in the N. E. part of Brazil, which flows into the Atlantic, in $2^{\circ} 50'$ S. Lat., and near 42° W. Lon. Length above 700 m. It is navigable above 400 m. for vessels of from 15 to 40 tons.

* Some geographers call that portion of the river which is above the junction of the Parana-Iba, the Rio Grande (*ree'-o gran'-da*), considering the Parana to be formed by the union of these two branches.

PARIS, pâr/-is, (Fr. pron. pâ'-re/; Anc. Lute/tia, afterwards Paris/sii;) a great city and distinguished seat of civilization, learning, and the arts, the cap. of the dep. of Seine, and the metropolis of France, is situated on both sides of the r. Seine, about 110 m., in a direct line, from its mouth, and 210 m. S. E. of London. The limits of the town are defined by a wall erected in the reign of Louis XVI., in order to prevent the introduction of commodities without the payment of local taxes. The outline thus formed, though irregular, approximates to an oval. Through the wall there are 58* entrances, at each of which is a toll-house. (M.) Round the walls, on the outer side, is a road planted with rows of trees, what are termed the exterior boulevards. The entire circuit of these boulevards is rather more than 15 m.; the area included within the walls is about 8,500 acres, or 13¼ sq. m. Paris is, for the most part, irregularly built, with lofty houses and narrow streets: a few of these, however, are truly magnificent, such as the Rue de la Paix (ru d'lâ pâ), de Castiglione (dêh kâs'-tig'-le'-on/), de Rivoli (d're'-vôl'-e/), &c. As in London, the fashionable part of the city is at the W. end. The more densely inhabited portion of Paris is encircled by the interior boulevards, between which and the walls, are the suburbs or *faubourgs* (fô'-boor/), forming some of the best built quarters of the town. There are in Paris about 70 *places* or squares, the principal of which are—the Place de la Concorde (plâs d'lâ kông'-kord/), an open space W. of the garden of the Tuileries, in the centre of which is the obelisk lately brought from Luxor, in Egypt; the Place Vendôme; the Place des Victoires (dâ vic'-twâr/); the Place du Trône; the Place du Carrousel (kâr'-roo'-zel/); and the Place Royale. There are several public gardens, as the garden of the Tuileries (twee/-ler-eez), the Luxembourg, and the Champs Elysées (shânz êl'-e'-zâ/), or “Elysian Fields.” The Champ de Mars (shân d'mar), *i. e.* “Field of Mars,” is a very large oblong enclosure, bordered by a double avenue of trees, for reviewing troops, horse-racing, &c. Among the remarkable buildings of Paris, we may mention the Tuileries, a palace of vast dimensions, but not to be admired for its architecture; the Louvre (loovr), formerly a royal residence, a striking and magnificent edifice, connected with the Tuileries by a long gallery, containing a superb collection of pictures, one of the finest in the world: the Cathedral of Notre-Dame, founded in the 11th century, one of the noblest existing specimens of Gothic architecture: Sainte Geneviève, or the Pantheon, considered by many as the finest church in the French metropolis: and the new church of Madeleine (mâd'-lane/) or “Magdalen,” an imitation of a Corinthian temple, regarded as the most imposing and chaste specimen of this kind of architecture which has ever been produced in modern times. There are in Paris several splendid triumphal arches, of which the Arc de l'Etoile (arc dlâ'-twâl/) is the most remarkable, being indeed the most stupendous structure of the kind ever erected, either in ancient

* The Penny Cyclopædia states that in 1830 the entrances were reduced to 50

or modern times. It forms a mass, of which the plan is 147 ft. by 73 ft. the height is 162 ft. The effect of its extraordinary dimensions is greatly enhanced by the simplicity of its form, and by its position; for, standing quite separate from any other building, it is seen to the very best advantage. Paris is perhaps superior to every other city in the world, with respect to the number and character of its scientific and literary establishments. Of these, our limits will permit us to notice but a very few. The most remarkable are: the *Académie Universitaire*, or the University (date unknown), attended by 7,446 students, (B.) being the most frequented of any in the world; the *College of France*, which may be regarded as equivalent to a university, attended by near 1,000 students; the Museum of Natural History, the richest collection of the kind that exists, with a menagerie and botanic garden; the lectures on the natural sciences, at the Botanic garden (*Jardin des Plantes*, zhar`-dân' dà plânt), are attended by near 3,000 persons: the Polytechnic School, a distinguished institution, which has been imitated in several other countries: and the school of Astronomy (at the Observatory), one of the first establishments of the kind existing in any country. The following libraries are open to the public: the National Library, containing above 500,000 vols., 80,000 manuscripts, 1,600,000 engravings, and 100,000 medals and coins: the Library of the Arsenal, with 180,000 vols. and 5,000 manuscripts: and the Library of Sainte Geneviève, with 112,000 vols. The Library of the Institute (not public) contains 70,000 vols. There are, in the French capital, numerous learned societies, at the head of which is the National Institute; this establishment for a long time comprehended four departments, called *academies*, viz., the French Academy, (*L'Académie Française*, lâ`-ká`-dém`-e' frân`-saze',) the office of which is the regulation and improvement of the French language: the Academy of Sciences; Academy of Inscriptions and Belles-Lettres; and the Academy of the Fine Arts. A fifth academy, of the moral and political sciences, has been added by Louis Philippe, the last king. Among the multitude of charitable institutions in Paris, there are 17 hospitals, 5 of which are for the military. The Observatory is in Lat. 48° 50' 13'' N., Lon. 2° 20' 22½'' E. Pop. 1,053,897.—Adj. and inhab. **PARISIAN**, par-ish'-un (Fr. *Parisien*, pâ`-re`-ze-ân' (masculine), and *Parisienne*, pâ`-re`-ze-enn' (feminine).

PAR'-MA or **pâr'-mâ**, **DUCHY OF**, an independent state of Northern Italy, between 44° 22' and 45° 8' N. Lat. and 9° 20' and 10° 37' E. Lon.; bounded on the N. by the Austrian dominions, from which it is separated by the Po, E. by Modena, S. by the Modenese, Tuscan, and Sardinian territories, and W. by the dominions of Sardinia. Its extent, from E. to W., is above 60 m.; from N. to S., near 50 m. Area estimated at 2,280 sq. m. Pop. in 1833, 465,673. (M.)—Adj. and inhab. **PAR'-ME-SAN'**.

12 m. S. of the Po. It is surrounded by walls, and is rather more than 4 m. in circumference. The streets are wide and straight, but appear somewhat dull and deserted. Parma has a superior school or lyceum, with the chairs of theology, medicine, and philosophy, attended by about 400 students; a public library, with 80,000 printed vols. and 4,000 manuscripts; and several other literary institutions. The Ducal Gallery has many valuable paintings, by some of the first Italian masters: most of the churches of Parma are adorned with those of Corregio. The ancient Parma was a town of the Etruscans: it became a Roman colony at the same time as Mutina (now Modena), 183 years before Christ. Lat. $44^{\circ} 48' N.$, Lon. $10^{\circ} 27' E.$ Pop. about 36,000. (P. C. and M.) Balbi, however, states it at about 30,000.

PASCAGOULA, pas'-kə-goo'-lā, a r. in the S. E. part of Miss., which flows into a bay of the same name.

PASCO OR CERRO PASCO, ser'-ro pās'-ko, a t. of Peru, situated 14,278 ft. (P. C.) above the level of the sea, remarkable for its silver mines, which are among the richest in the world. Lat. about $10^{\circ} 40' S.$, Lon. $75^{\circ} 43' W.$ Pop. fluctuating, between 12,000 and 16,000. (P. C.)

PAS-DE-CALAIS, pā' d' kâ'-lā', or the "Strait of Calais," a dep. near the N. extremity of France, bordering on the Strait of Dover. Pop. 664,654. (B.) Capital, Arras.

PAS'-QUO-TANK', a co. near the N. E. extremity of N. C., bordering on Albemarle Sound. Pop. 8,950. Co. t. Elizabeth City.

PAS-SA'-IC, a small r. in the N. E. part of N. J., flowing into Newark Bay. Near Paterson it has a perpendicular descent of 50 ft. and a total fall of 70 ft., affording an immense water-power.

PASSAIC, a co. in the N. part of N. J., bordering on N. Y. Pop. 22,575. Co. t. Paterson.

PASSAU, pās'-sou, a t. and important fortress of Bavaria, cap. of the circle of the Lower Danube, at the confluence of the Inn and the Ilz (ilts) with the Danube. A handsome bridge, resting on 7 piers of granite, crosses the last-named river, which is 754 ft. wide. Two suburbs, the one on the right bank of the Inn, and the other on the left bank of the Ilz, are called respectively Innstadt and Ilzstadt. Passau is in $48^{\circ} 34' N.$ Lat., and $13^{\circ} 28' E.$ Lon. Pop., including the suburbs, about 10,500. (P. C.)

PAT'-A-GO'-NI-A, an extensive country of S. America, occupying the S. extremity of the continent, and extending from 39° to near $54^{\circ} S.$ Lat., and from 63° to $75^{\circ} 40' W.$ Lon. It is separated on the N. from the territories of La Plata by the r. Negro; the line which divides it from Chili is not accurately determined: on all other sides it is bounded by the sea. Length, from N. to S., about 1,060 m.; greatest breadth, from E. to W., 600 m. The area is probably above 300,000 sq. m. The natives of this country are called PATAGONIANS; a name which they received from Magellan, on account of the supposed magnitude of their

ou, as in *our*; th, as in *thin*; TH, as in *this*; N, nearly like *ng*.

feet,* which, being wrapped up in skins, probably appeared to him much above their actual size. The Patagonians have in fact comparatively small feet and hands. About the middle of the last century, Captain Byron met with a number of these people, who, if we may trust his statements, were not less than 8 ft., some even exceeding 9 ft. in height. It appears, however, to be now generally admitted that there has been great exaggeration respecting the stature of the Patagonians: nevertheless they are, according to the most authentic information we possess, the tallest people of whom we have any knowledge; the average height being probably above 6 ft. The plains of Patagonia appear to be generally sterile, owing partly to the nature of the soil and partly to a deficiency of rain. The climate, though cold in winter, is said to be healthy, and generally pleasant.—Adj. and inhab. PAT'-A-GO'-NI-AN.

PAT'-ER-SON, a flourishing manufacturing t. of N. J., cap. of Passaic co., on the Passaic r., near the falls, 17 m. N. N. W. of N. Y. Pop. 11,341.

PAT'-NA, a large city of British India, cap. of the prov. of Bahar, situated on the Ganges, near 300 m. N. W. of Calcutta. Lat. 25° 37' N., Lon. 85° 15' E. Pop. estimated at above 300,000. (M.)

PA-TRAS' (Anc. Pat/ræ), a seaport t. of Greece, on the N. N. W. coast of the Morea. It suffered extremely in the war of independence, but appears now to be rapidly recovering its former prosperity. Lat. 38° 14' N., Lon. 21° 47' E. Pop. probably above 8,000. (B.)

PAT'-RICK, a co. in the S. part of Va., bordering on the Blue Ridge and N. C. Pop. 9,609. Co. t. Taylorsville.

PAU, pō, a t. in the S. W. part of France, cap. of the dep. of the Lower Pyrenees, on a small river called the Gave de Pau (gāv d' pō), an affluent of the Adour. It is regularly laid out and well built. As a pleasant and healthy residence, it is much resorted to by strangers, especially by the English. It contains an *académie universitaire*, a royal college, and other institutions. Pau is remarkable as the birth-place of Henry IV. of France, and of Bernadotte, the late king of Sweden. Lat. 43° 18' N., Lon. 0° 22' W. Pop. 11,959. (M.)

PAUL'-DING, a co. in the N. W. part of Ga., bordering on Ala. Pop. 7,039. Seat of justice, Paulding c. h.

PAULDING, a co. near the N. W. extremity of Ohio, bordering on Ind. Pop. 1,766. Co. t. Paulding.

PAVIA, pā-vee'-ā, † (Anc. Ticinum,) a city and celebrated seat of learning in Austrian Italy, cap. of a prov. of the same name, is situated on the Ticino, 19 m. S. of Milan. At the head of its numerous literary and scientific institutions, stands the University, the first in Italy, which, among its professors in our own times, can boast of Scarpa,

* Patagon (pat-a-gone') in Spanish signifies a large foot.

Voita, Configliacchi, and other distinguished men. It has three faculties, those of law, medicine and philosophy. It is particularly celebrated as a school of medicine. The University of Pavia was founded by Charlemagne, and restored in the 14th century by Galeazzo Visconti; but it owes its present form and institutions to the empress Maria Theresa, and her enlightened minister, count Firmian. The number of students is about 1,400. Pavia was formerly the residence of the Lombard kings, and was afterwards the capital of one of the short-lived Italian republics. From its numerous public edifices, it was called "the City of a Hundred Towers," but its magnificence and fame belong to another age, and it has long been in a state of paralysis and decay. Lat. 45° 11' N., Lon. 9° 10' E. Pop. near 24,000. (B.)—Adj. and inhab. PAVIAN, pã-vee/-an.

PAX/-o (Anc. Pax/os), the smallest of the seven Ionian Islands, situated about 10 m. S. by E. of Corfu. It is scarcely 5 m. long. Pop. in 1836, 5,287. (M.)

PAZ, LA, lã pãz, (Sp. pron. lã pãth,) an important commercial city of S. America, in Bolivia, cap. of a dep. of the same name, on the E. declivity of the Andes, 12,170 ft. above the level of the sea, near 16° 30' S. Lat., and 68° 10' W. Lon. Pop. above 20,000. (P. C.)

PEARL RIVER, a r. which rises in the N. E. central part of Miss., and flowing southerly, falls into L. Borgne. Its length is above 250 m., but its navigation is impeded by drift-wood, shallows, and sand-bars.

PEARL/-ING-TON, a port of entry of Miss., in Hancock co., on the E. side of Pearl r.

PEE/-BLEß, an inland co. in the S. of Scotland. Pop. 10,499.—Also, a small t., cap. of the above, on the Tweed, 22 m. S. of Edinburgh.

PEE'-DEE', GREAT, a r. that rises in the N. W. part of N. C., in which state it is called the Yad/-kin, and flowing in a general south-easterly direction through S. C., falls into the Atlantic near 33° 10' N. Lat. Near its mouth it is joined by the Little Pedee, and other streams, which form an estuary named Winyaw bay. It has a sloop navigation of 130 m.

PEGU, pe-goo', a former kingdom of Chin-India, now forming the S. portion of the Birman empire.—Adj. and inhab. PEGUAN, pe-goo'-an.

PEGU (called Bã-goo' by the natives), a decayed city of the Birman empire, the ancient cap. of the above kingdom, on a river of the same name, an affluent of the Irrawaddy. Here is the famous temple of Shoomadoo, being a pyramid of brick, 331 ft. high, with a base 162 ft. square. It is surmounted by a sort of umbrella, made of iron, and gilt, nearly 20 ft. in diameter. Lat. 17° 40' N., Lon. 96° 20' E. The pop. of Pegu is said to have formerly amounted to 150,000, but the place is now in ruins, and almost deserted.

PEÏPUS, pã/e-pooce or TCHOOD'/-SKO-E, a large lake in the W. part of European Russia, between 57° 48' and 59° N. Lat., and 26° 56' and 28° 10' E. Lon. Extreme length, about 85 m.; greatest breadth, 32 m. The southern portion, which is joined to the rest by a strait not 2 m. wide, is called the L. of Pskof, being situated principally within that

government. The Peïpus communicates with the Gulf of Finland by the r. Narova or Narva.

PE'KING' or PE'KIN' (signifying, it is said, the "Northern Capital"), the largest city of China, and the seat of the imperial government, is situated not far from the left bank of the Pei-Ho (pà-ho'), with which river it is connected by a narrow canal, about a hundred m. W. N. W. of the Gulf of Petchelee. It is about 19 m. (15,400 toises) in circumference, exclusive of the suburbs. Peking is composed of two parts, entirely distinct from each other, viz. the Imperial Town (called also the Tartar Town, because it was founded by the present Tartar dynasty, and because the greater number of the inhabitants are Mantchoos), containing the imperial palace, and the great offices for the administration of the empire; and the Chinese Town, called likewise the External Town, from its being situated without the walls of the principal city. Though itself enclosed by walls, this is, properly speaking, only a suburb. The walls are about 40 ft. high and twenty feet thick at the base. There are 16 gates, over each of which is a watch-tower 9 stories high, and in each story are port-holes for cannon. The roads leading to Peking are paved with blocks of granite; the streets of the city are not paved, but are constantly watered to keep down the dust. The streets of the Imperial Town are broad, straight, and very clean. The principal ones vary from 140 to 200 ft. in breadth. (P. C.) The houses are usually not higher than one story. The wooden columns in front of the shops are painted red and blue, and are sometimes gilt. In many places arches resembling the triumphal arches of Europe, built of wood, and richly decorated, cross the streets. These structures are erected for the purpose of honouring such persons of either sex as have been distinguished for their virtue, their learning, or for important services rendered to the state. The imperial buildings are covered with yellow tiles, those of the princes with green, and all the other houses with gray tiles. Peking is the seat of the great National College or University, in which is said to be concentrated all the learning of China. The Imperial Library is unquestionably the largest which exists out of Europe: it is estimated to contain what is equivalent to at least 300,000 of our octavo volumes. (B.) In the cabinet of natural history, belonging to the emperor, the specimens are accompanied by representations in painting, which are executed with scrupulous fidelity. The Imperial Observatory is in 39° 54' 13" N. Lat., and 116° 27' 54" E. Lon. The pop. of Peking is variously estimated, from 600,000 or 700,000 to 3,000,000; Balbi gives 1,300,000 as the most probable estimate. The garrison is supposed to amount to 80,000.

PEMBROKE, pem'-bröök, a seaport town of Wales, cap. of Pembroke-shire, on the margin of Dounpool, an inlet on the S. side of Milford Haven. Lat. 51° 40' N., Lon. 4° 53' W.

PEMBROKESHIRE, pem'-bröök-shîr, a co. occupying the S. W. extremity of Wales. Pop. 83,044.

PENDLETON, a co. in the N. N. E. part of Kentucky, intersected by the Licking r., and bordering on the Ohio. Pop. 6,774. Co. t. Falmouth.

PENN[^]-SYL-VA[^]-NI-A, one of the thirteen original U. S., situated between 39° 40' and 42° 16' N. Lat. (almost the whole of the northern boundary runs upon the 42d parallel), and 74° 45' and 80° 30' W. Lon.; bounded on the N. by L. Erie and New York, E. by New York and New Jersey, from which it is separated by the r. Delaware, S. by Maryland and Virginia, and W. by Virginia and Ohio; and divided into 63 counties.* Length, from E. to W., about 300 m.; greatest breadth, from N. to S., 170 m.; with the exception, however, of the most western portion, the breadth is equal in all parts, being rather more than 150 m. Area estimated at 46,000 sq. m. Pop. 2,311,786. Pennsylvania is distinguished above the other states of the Union, by her extraordinary mineral wealth. Anthracite coal is found in exceeding abundance in the counties of Schuylkill, Carbon and Luzerne, in the eastern part of the state. Bituminous coal occurs in great quantities in the neighbourhood of Pittsburg, on the western declivity of the Alleghanies, and in other places. There are also rich mines of iron ore and extensive quarries of marble. Harrisburg is the capital.—Inhab. **PENN[^]-SYL-VA[^]-NI-AN**.

PE-NOB[^]-SCOT, the largest r. in Maine, of which the principal branch rises in the N. W. part of the state, and, flowing at first south-easterly, traverses Chesuncook lake. Afterwards, having received the eastern branch, it takes a southerly course, and falls into the Atlantic in about 44° N. Lat. and 69° W. Lon. Its length is estimated at above 250 m. It is navigable for large vessels to Bangor, more than 50 m. from the sea.

PENOBSCOT, a co. of Maine, on the above r., extending from near the Atlantic coast, northward, to the border of Canada. Pop. 63,089. Co. t. Bangor.

PEN-RYN[^], a t. of England, in Cornwall, 1½ m. N. W. of Falmouth. Pop. 3,337.

PEN[^]-SA-CO[^]-LA, a port of entry of Florida, in Escambia co., situated on Pensacola Bay, 10 m. from its entrance into the Gulf of Mexico. Pop. 2,164. Lat. 30° 28' N., Lon. 87° 12' W.

PEN[^]-ZA or **PENSA**, a flourishing t. in the S. E. central part of European Russia, cap. of a gov. of the same name, on the Soora (Sura), an affluent of the Volga. Lat. 53° 12' N., Lon. about 44° 30' E. Pop. 11,000. (P. C.)

PEN-ZANCE[^], a seaport t. of England, in Cornwall, 8 m. E. by N. of Land's-end. Pop. 8,578.

PERSIA, pĕr'-she-ā, (called by the natives Iran ee'-rân'; Gr. Περσῆς)

Fâte, fâr, fáll, fât; mè, mêt; pine or pine, pln; nò, nòt; öö, as in *good*;

an extensive country in the S. S. W. part of Asia, between 25° and 40° N. Lat., and 44° and 62° E. Lon. Its political boundaries have varied greatly at different epochs, sometimes including Armenia, Georgia, Bokhara, and sometimes reduced to less than its natural limits. These are, on the S. the Indian Ocean and the Persian Gulf; on the S. W. and W. the Tigris; on the N. the Aras and the Caspian Sea; and on the E. the Indus. The north-eastern limit is not determined by any natural boundary. At present, however, the territories of Persia are much more circumscribed; the extensive provinces of Afghanistan and Beloochistan are quite independent, while a considerable tract of land E. of the Tigris is possessed by Turkey. The greatest extent of Persia (with its present boundaries), from E. to W., may be near 1,000 m.; from N. to S., about 800 m. Area, 450,000 sq. m. Pop. 9,000,000. (B.) The greater part of Persia is an elevated plain, a considerable portion of which is desert. Indeed, the whole country, with slight exceptions, is very sparingly watered; much, however, is done by irrigation, to overcome this natural defect. Persia has nearly all the agricultural products of southern Europe, besides several that are ordinarily found only in the tropics. The religion is Mahometanism; the government a military despotism. Teheran is the capital.—Adj. and inhab. PERSIAN, per'-she-an.

PERSIAN GULF, an extensive arm of the Indian Ocean, situated between Persia and Arabia, and extending from 24° to 30° 10' N. Lat., and from 48° to 57° E. Lon. Length about 600 m.; greatest breadth near 230 m.

PER'-SON, a co. in the N. part of N. C., on the sources of the Neuse, and bordering on Va. Pop. 10,781. Co. t. Roxboro.

PERTH, a manufacturing t. of Scotland, and once the residence of the Scottish kings, cap. of Perthshire, is situated on the Tay, 33 m. N. by W. of Edinburgh. Lat. 56° 24' N., Lon. 3° 25' W. Pop. 19,293.

PERTH AMBOY. See AMBOY.

PERTH'-SHIRE, a co. in the E. part of Scotland, bordering on the Frith of Tay. Pop. 137,390.

PERU, pe-roo', (Lat. Peru'via,) a country of S. America, situated between 3° 20' and 22° S. Lat., and 68° and 81° 20' W. Lon.; bounded on the N. by Ecuador, E. by Brazil, S. by Bolivia, S.W. and W. by the Pacific. Length, from N. N. W. to S. S. E., near 1,500 m.; greatest breadth, from E. to W., above 900 m.; area estimated at 500,000 sq. m. Pop. 1,700,000. (B.) It may be observed that the name of Peru was formerly applied to a country far more extensive than the territories of the present republic; but the southern portion, called Upper Peru, after the Spanish power was overthrown in 1824, was formed into an independent state (in 1825), and received the appellation of Bolivia. The climate of this extensive country varies according to the elevation of the land, its proximity to the sea, and other circumstances. Along the whole coast S. of Cape Blanco, a drop of rain never falls; but for nearly five months, from June to November, the earth is covered with a fog. During this period, the ground is constantly moistened and fertilized by

ou, as in *our*; th, as in *thin*; TH, as in *this*; N, nearly like *ng*.

the dew caused by the condensation of the fog. During this period, which may be said to constitute the winter of the lower countries, the higher regions enjoy fine weather and have their summer. But in January, the rains on the mountains commence, and continue about three months. The climate of Peru is not so hot as might be supposed. In summer, the weather is delightfully fine, and the heat is moderated by the sea and land breezes. The mean annual temperature, according to Humboldt, is 72° , the maximum 82° , and the minimum 55° . Nearly all the animals peculiar to S. America are found in Peru, as the jaguar, the puma, the sloth, the armadillo, the ant-eater, &c. Among the vegetable productions of this country, we may particularly notice the cinchona, the tree or shrub which yields the Peruvian bark. This plant, which is peculiar to S. America, and is most abundantly found in the extensive country formerly comprehended under the name of Peru, requires a temperature considerably lower than that which usually prevails in tropical regions, and is said seldom to grow at a less elevation than 4,000 ft. above the sea. Peru is particularly noted for its wealth in silver and gold; but many of the mines, which were formerly very productive, have either become exhausted, or from other causes are no longer worked. The government of Peru is a federal republic, resembling, in many of its features, that of the United States. Lima is the capital.—Adj. and inhab. PE-RU/-VI-AN. (Sp. Peruano, pà-roo-â/-no.)

PERUGIA, pà-roo/-jâ, (Anc. Perugia,) a t. of Italy, in the Papal state, cap. of a prov. of the same name, on a hill not far from the right bank of the Tiber, 85 m. N. of Rome. It has a university, attended by 300 or 400 students, with a library of 30,000 vols. Perugia was an important city of ancient Etruria, and some highly interesting Etruscan antiquities have been recently found in the present town and its vicinity. Lat. $43^{\circ} 7' N.$, Lon. $12^{\circ} 22' E.$ Pop. estimated at 30,000. (B. and M.)*

PESARO, pà/-sâ-ro, (Anc. Pisaurum), a seaport t. of Italy, in the Papal state, on the Foglia (fole/-yâ), near its entrance into the Adriatic. Lat. $43^{\circ} 55' N.$, Lon. $12^{\circ} 54' E.$ Pop. about 12,000. (B.)

PESHAWER, pesh'-our/, a city of Afghanistan, cap. of a prov. of the same name, and formerly one of the residences of the kings of Cabool, is situated in the midst of an extensive plain, watered by several branches of the Cabool r. Lat. $34^{\circ} 6' N.$, Lon. about $71^{\circ} 30' E.$ Pop. estimated in 1809 at 100,000, but at present it is probably below 70,000. (B.)

PESTH (Hung. pron. pesht), the handsomest, most populous, and most commercial t. of Hungary, situated on the left bank of the Danube, opposite to Buda, with which it is connected by a bridge of boats. The streets are, for the most part, wide and straight, and are adorned with several handsome public buildings. Though Buda is the residence of the viceroy and the cap. of the kingdom, Pesth is the seat of the chief judicial courts of Hungary. This town possesses a university founded

in 1635, at Tyrnau; which in 1777 was transferred to Buda, and in 1784 to Pesth. It is one of the most richly endowed in Europe, and possesses a library of 60,000 vols., a cabinet of natural history, and several other similar establishments. There are 49 professors, and above 1,000 students. The National Museum of Pesth is one of the most remarkable in Europe, as well for its rich collection of coins and medals, as for its valuable library, which contains, among other works, numerous manuscripts from distinguished Hungarian writers. Lat. 47° 30' N., Lon. 19° 4' E. Pop. estimated by Balbi at above 75,000.

PE'-TER-BQ'-ROUGH, also written PETERBURGH, a small city of England, in Northamptonshire, 75 m. N. by E. of London. Pop. 6,107.

PE'-TER-HEAD, a seaport t. of Scotland, in Aberdeenshire, on the German Ocean. Lat. 57° 32' N., Lon. 1° 47' W. Pop. 4,586.

PE'-TERS-BURG, St. (Russ. Peterburg, pã'-ter-boorg'), the largest city of the Russian empire, and the seat of the imperial government, situated at the E. extremity of the Gulf of Finland, where it receives the r. Neva. The ground on which the city stands is low and swampy, and the surrounding country is a morass and forest, except where it has been ameliorated by industry and art. St. Petersburg, now regarded as the most magnificent city in the world, was founded in 1703, by Peter the Great, but is chiefly indebted for its beauty and grandeur to the empress Catharine II. Since her time, it has been still further improved, and at present is altogether unrivalled among the capitals of Europe for the width and regularity of its streets, the length and magnificence of its quays, and the elegance of its squares and public buildings. The streets are from 60 to 120 ft. wide, and appear to be lined with palaces. Among the multitude of remarkable edifices, we may name the Cathedral of Kasan: the Church of St. Isaac, built entirely of marble; when finished, it will probably be the most beautiful in the Russian capital: the Palace of the Hermitage, the favourite residence of Catharine II., by whom it was built; it contains a costly library, a collection of paintings, and other treasures: and the New Michailof (me-ki'-lof) Palace, the residence of the grand-duke Michael. St. Petersburg contains several noble monuments, at the head of which stands the magnificent equestrian statue of Peter the Great. The Field of Mars, adorned with a statue of Suvarof (Suwarow), will admit of 40,000 or 50,000 men being reviewed in it. Among the literary and scientific institutions of the Russian metropolis, may be mentioned the University, founded in 1819: the Academy of Sciences, founded by Peter the Great, on the plan of Leibnitz, with a library of 100,000 vols.: the Medico-Chirurgical Academy, founded by Peter the Great, and reorganized by Alexander; connected with it are two extensive hospitals: and the Imperial Public Library, containing above 400,000 vols. The hospitals and charitable institutions of all descriptions are numerous and well supported, the virtue of charity being one of the most prominent features of the Russian character. St. Petersburg is the greatest manufacturing city, and has the most extensive foreign trade, of any in the empire. It is the residence of a Roman Catholic archbishop and a

PÉZENAS, pēz'-nâ', (Anc. Piscenæ,) a t. in the S. of France, in the dep. of Hérault, 24 m. W. S. W. of Montpellier. Pop. 7,490. (M.)

PHIL'-A-DEL/-PHI-À, a port of entry, the second city of the United States, and the metropolis of Pennsylvania, is situated between the rivers Delaware and Schuylkill, about 6 m. above their confluence, and about 130 m. in a straight line, N. E. by E. from Washington. It is laid out with extreme regularity; the streets, with scarcely an exception, crossing each other at right angles. The city has an air of remarkable neatness, and many of the streets are very handsome, though there is but little variety in the appearance of the houses. Among the remarkable edifices may be mentioned the State House, a plain brick building, situated in Chesnut street, a third of a mile from the Delaware, remarkable for containing the hall in which the Declaration of Independence was signed: the Custom House, formerly the United States Bank, situated in the same street, E. of and near the State House, a marble edifice, built on the model of the Parthenon: the United States Mint, built also of marble, in Chesnut street about midway between the Delaware and Schuylkill; it is the principal, and was, until recently, the only place in the Union where coin is struck: the Girard College for Orphans, situated about 2 m. N. W. of the centre of the city, a magnificent structure, which is entirely surrounded by Corinthian columns; not only the walls and columns, but even the roof and floors are of marble: and the Eastern Penitentiary, an establishment in which the system of solitary confinement has been resorted to with distinguished success. In literary and scientific institutions, Philadelphia, perhaps, ranks higher than any other city in the United States. The Philadelphia Library, commenced in 1731, by Franklin, now contains about 65,000 volumes; the American Philosophical Society, founded in 1843, has among its members distinguished men in all parts of the world; its library contains 14,000 volumes; the Academy of Natural Sciences possesses a well-chosen scientific library of about 12,000 volumes, and, besides numerous specimens in the other departments of natural his-

tory, the most extensive collection of plants in America: the Philadelphia Athenæum, founded in 1814, has a library of near 10,000 vols.: the Franklin Institute for the promotion of the mechanic and useful arts, has annual exhibitions of American manufactures and inventions. Philadelphia is particularly distinguished as a seat of medical science: the medical department of the University of Pennsylvania, founded in 1765, and the Jefferson Medical College, founded in 1824, are justly regarded as the first institutions of the kind in America. Among the charitable establishments of this city, we may mention the Alms House, situated on the W. bank of the Schuylkill, S. W. of the City Proper, and the Pennsylvania Hospital, containing an extensive medical library, and a painting, by West, of Christ healing the Sick, presented to the institution by the illustrious artist himself. Philadelphia is the greatest manufacturing town in the Union, and the multitude of ignorant and degraded persons who are usually congregated in such places, has doubtless been an influential cause of the riots with which the city has so frequently of late been afflicted and disgraced. Philadelphia is abundantly supplied with excellent water from the Schuylkill. Water-wheels, turned by the river, are employed to force the water up into extensive reservoirs, situated on the top of Fairmount, (about $1\frac{1}{2}$ m. W. N. W. of the densely inhabited part of the city,) whence it is distributed to every part of the town. The scenery around the water-works, including Fairmount, with its six reservoirs, resembling so many beautiful lakes, is truly enchanting. The water supplying the suburbs of Spring Garden and Northern Liberties is raised from the river by means of steam, a separate system of water-works having recently been constructed. At Fairmount the Schuylkill is crossed by a handsome wire suspension-bridge, 343 ft. in length, the first of the kind which has been erected in this country. Philadelphia contains a navy yard, in which have been built several of the finest vessels in the United States' navy. Lat. of the High School Observatory, $39^{\circ} 57' 8''$ N., Lon. $75^{\circ} 10' 29''$ W. Pop., including the suburbs, 374,232.—Inhab. PHIL'-A-DEL'-PHI-AN.

PHIL-IP-PINE ISLANDS, a numerous group, situated in the eastern seas, between 5° and 19° N. Lat., and 117° and 126° E. Lon. The principal are Luzon, Mindinao, Panay, Palawan, Samar, Zebu or Cebu, and Mindoro, which are noticed under their respective names. The Philippines were discovered in 1521, by Magellan, (who was killed in one of the islands,) since which time they have remained in the possession of the Spanish, who appear to have settlements on all the larger islands. The aboriginal inhabitants consist of two races, the Malays, and a tribe of negroes called Negritos (nà-gree'-toce). The former have, with some exceptions, submitted to the sway of the Spaniards, and embraced Christianity. They are the proprietors of the soil, and are treated by the Spaniards as free subjects. They are said to be well lodged, clothed, and abundantly supplied with food, so that their con-

dition is perhaps superior to that of the peasantry in many parts of Europe. The Negritos inhabit the mountain fastnesses, and are generally independent. Some of them, however, are said to have embraced Christianity. The most important Spanish settlements are on the islands of Luzon and Panay. Much the greater part of Mindinao (the second in size) is inhabited by independent savages, some of whom are daring pirates. The principal productions of the Philippine islands are sugar, indigo, tobacco, and rice. Cocoa of a superior quality is produced, but not exported, being extensively consumed at home.

PILLAU, pil'-lou, a seaport t. of Prussia, situated on a point of land at the entrance of the Frische Haff, 25 m. W. by S. from Königsberg, of which it may be said to be the port: vessels of a large size, which, on account of the shallowness of the Frische Haff, cannot ascend to Königsberg, stop at Pillau, in consequence of which it is a place of considerable importance. Lat. 54° 34' N., Lon. 19° 53' E. Pop. scarcely 4,000. (B.)

PIL'-SEN, a fortified t. of Bohemia, cap. of a circle of the same name, on the Beraun (bà-roun'), an affluent of the Moldau, with an active trade and numerous manufactures. Lat. 49° 45' N., Lon. 13° 23' E. Pop. 8,000. (B.)

PINEROLO, pe-nà-rol'-o, (Fr. Pignerol, peen'-yer-ol') a t. and formerly an important fortress of Piedmont, cap. of a prov. of the same name, situated at the foot of the Alps, 25 m. S. W. of Turin. Pop. about 11,500. (P. C.)

PISA, pee'-zà or pee'-sà, (Anc. Pi'sæ,) a decayed archiepiscopal city of Central Italy, cap. of a prov. of the same name, in the grand-duchy of Tuscany, on the Arno, about 8 m. from its mouth. In the middle ages this town was the cap. of a celebrated and powerful republic, when it is said to have possessed a population of 150,000; at present, the number of its inhabitants is not more than about 20,000. (B.) Among its buildings, may be mentioned the famous leaning tower, called the Belfry (Campanile, kâm-pâ-nee'-là); it is 190 ft. in height, and the topmost story overhangs the base, on one side, about 15 ft. The view from the summit is alike extensive and beautiful, but when the spectator looks down towards the base, from the overhanging side, the effect is terrific. The University of Pisa is the first in Tuscany, and was formerly one of the most celebrated in Italy. It is at present at-

PISTOJA, pis-to/'-yà, (Anc. Pisto'ria or Pisto'rimum,) a well built town of Central Italy, in the grand-duchy of Tuscany, 20 m. N. W. of Florence. It possesses various manufactures: those of organs and fire-arms may be particularly mentioned. *Pistols* are said to have derived their name from this town. Pop. 12,000. (B.)

PIT-CAIRN'S' ISLAND, a small i. in the Pacific, near 25° S. Lat., and 130° W. Lon.

PITEÅ, pit/'-e-ö, a small r. in the N. of Sweden, which enters the Gulf of Bothnia, near $65^{\circ} 10'$ N. Lat.

PITT, a co. in the E. part of N. C., intersected by the Tar r. Pop. 13,397. Co. t. Greenville.

PITTS/'-BURG, the cap. of Alleghany co., in Pa., and, as regards population, manufactures, and commerce, the second town in the state, is situated at the confluence of the Monongahela and Alleghany rivers (whose junction forms the Ohio), near 250 m., in a straight line, W. by N. from Philadelphia. Its position is very advantageous for trade, as it has a ready communication with all the great towns on the Ohio and Mississippi, but it is especially distinguished for its extensive and flourishing manufactures in iron, glass, and other articles. The surrounding country is exceedingly rich in bituminous coal, the constant burning of which, as fuel, causes a perpetual cloud of black smoke to hang over the place. The suburbs, Birmingham and Alleghany, are respectively situated on the left side of the Monongahela, and the right side of the Alleghany rivers, and communicate with the city by bridges. A conflagration, almost without a parallel in the history of our country, has recently (April 10, 1845) desolated Pittsburg. It is estimated that 1,100 or 1,200 houses, including nearly all the business portion of the city, have been consumed. Lat. $40^{\circ} 32'$ N., Lon. $80^{\circ} 2'$ W. Pop. in 1850 including the suburbs, 84,000.

guay. Its length is about 160 m.; its breadth varies from about 30 to 130 m. The name Rio de la Plata, or "river of silver," was given to it by Sebastian Cabot, who first penetrated beyond the junction of the Parana and Paraguay, in consequence of his having obtained a considerable booty of silver and gold from the Indians of the adjacent country, whom he defeated: there are no precious metals on its banks. (E. G.)

PLATA, LA, lã plã'-tã, called also the ARGENTINE REPUBLIC (Republica Argentina, rà-pooò'-le-kã ar-hen-tee'-nã), a republic of S. America, situated between 22° and 41° S. Lat., and 52° and 72° W. Lon.; bounded on the N. by Bolivia, E. by Paraguay, Brazil, Uruguay, and the Atlantic, S. by the Atlantic and Patagonia, and W. by Chili and Bolivia. Greatest length, from N. to S., about 1,300 m.; mean breadth, from E. to W., near 700 m. Area estimated at above 900,000 sq. m. Pop. 700,000. (B.) The names of the United Provinces of La Plata are as follows—Buenos Ayres, Santa Fe, Entre Rios (ên'-trã ree'-oce), Corrientes (cor-re-en'-tês), Cordova, Santiago del Estero (sãn-te-ã'-go del ês-tã'-ro), Tucuman (too-koo-mãn'), Salta, Catamarca, Rioga (re-o'-gã), San Luis, Mendoza, San Juan. Owing to the dissensions between these different states, it is difficult to say what is the present political condition of this country. Though nominally a republican confederation, La Plata appears to be divided into a number of independent governments, which are, for the most part, ruled by dictators. The country of La Plata is characterized by some striking natural peculiarities. Between 28° and 30° S. Lat., a desert plain extends from near the Rio Dulce, westward, to about the 68th meridian of W. Lon., a distance of perhaps 280 m.: near its eastern extremity, it is about 60 m. in breadth, but farther west it is much broader. Though more than 700 m. from the Atlantic, the surface of the ground is but a few feet above the level of the sea, and is for the most part covered with a thick efflorescence of salt. Hence this desert has received the name of the Great Salina (Gran Salina, grãn sã'-lee'-nã). The vegetation is limited to a species of *Salsola*, from the ashes of which soda is extracted. The wind from this desert appears sometimes to resemble the sirocco of Africa. In December, 1825, for several days the wind was so hot in Santiago del Estero, that it blistered the face and hands even of those who remained in their houses; leaves fell scorched from the trees; the bolts, keys, and locks of the doors were so hot that they could not be retained in the hand; and the inhabitants seemed to be threatened with suffocation. In the Despoblado (dês-po-blã'-do), or "uninhabited" country, an extensive and elevated region supposed to be more than 13,000 feet above the sea, situated on the E. side of the Andes, in the N. W. part of La Plata and the adjoining territories of Bolivia, a large portion of the surface of the ground is covered with salt. Where this mineral is so extensively diffused, we need not be surprised to find, what is actually the case, that the waters of a large number of the rivers and lakes are saline; especially in the central and western portions of the country. The vegetable productions of La Plata vary according to the

ou, as in *our* ; th, as in *thin* ; th, as in *this* ; n, nearly like *ng*.

position of the different parts of the country. North of the Great Salina, they resemble those of the intertropical regions; rice and Indian corn are produced in the lower valleys, and in the more elevated tracts, cotton and tobacco are cultivated on a large scale. South of the great salt desert, the agriculture resembles that of southern Europe; wheat and Indian corn are the principal crops; while among the fruit trees are to be found the orange, peach, apricot, pear, apple, fig, and vine.

PLATTE, a r. which rises on the E. declivity of the Rocky Mountains, and flows into the Missouri, near 41° N. Lat., and $95^{\circ} 40'$ W. Lon., after a course of 1,600 m. It is not navigable.

PLATTEN-SEE, plát'-tēn sá, or LAKE BA'LATONY (báá'-lá-toñ') a lake in the W. part of Hungary, intersected by the 47th parallel of N. Lat., and the 18th meridian of E. Lon. Length about 50 m.; greatest breadth 10 m. Its waters are said to be fresh at its S. W. extremity, but in other parts salt.

PLATTS'-BURG, a port of entry of N. Y., cap. of Clinton co., situated on L. Champlain, at the mouth of the Saranac r. On the lake, near this town, the British squadron was captured by the Americans, under Commodore McDonough, Sept. 11, 1814. Pop. 5,618.

PLAUE, plou'-ēn, an important manufacturing t. in the kingdom of Saxony, on the Elster, 60 m. S. by W. of Leipsic. Pop. near 9,000. (P. C.)

PLEISSE, plí'-cēh, a small r. of Saxony, which joins the Elster near Leipsic.

PLOCK, plotsk, a t. of Poland, the cap. of a gov. of the same name, on the Vistula. Lat. $52^{\circ} 34'$ N., Lon. $19^{\circ} 47'$ E. Pop. about 8,000. (P. C.)

PLYM'-OUTH, a seaport t. of England, which, with Devonport, forms the second naval port of Great Britain, is situated in Devonshire, on a rocky promontory at the N. end of Plymouth Sound, between the estuaries of the rivers Tamar and Plym. Though many of the streets of this town are irregular and narrow, it is, on the whole, remarkable for the neatness, and even elegance of its houses, and contains a number of very handsome public buildings. The dock of Plymouth is situated $1\frac{1}{2}$ m. W. of this town, at Devonport, which was formerly called Plymouth Dock. (See DEVONPORT.) The harbour, one of the finest in the world, is double; consisting of the Catwater, formed by the estuary of the Plym, and the Hamoaze (ham'-oze), formed by that of the Tamar. The latter is destined to receive the vessels of the royal navy; it is four miles in length, and half a mile in breadth; its average depth is 9 fathoms at low tide, and the largest ships float close to the quays. The bay, or arm of the sea, into which these harbours open, is a spacious and safe asylum for all sorts of ships in stormy weather. To defend it from the heavy swell of the sea, which formerly rendered it very unsafe for anchoring, a stupendous breakwater, about a mile in length, has been formed in the middle of the sound. Plymouth was formerly called Sutton (*i. e.* "South Town"), a name which is still re-

tained by an inlet of the sound, Sutton Pool, on which the town is partly built. Lat. $50^{\circ} 22' N.$, Lon. $4^{\circ} 7' 30'' W.$ Pop. 36,527; including the adjacent towns of Devonport and Stonehouse, it will amount to 80,059.

PLYMOUTH, a co. in the S. E. part of Mass., bordering on the sea. Pop. 55,697.

PLYMOUTH, the cap. of the above, is situated on a small bay of the same name, 35 m., in a straight line, S. S. E. of Boston. It is remarkable as being the place where the first settlers of New England landed, December 22d, 1620. Lat. of the court-house, $41^{\circ} 57' 28'' N.$, Lon. $70^{\circ} 40' 28'' W.$ Pop. of the whole township, 8,000.

PLYMOUTH, a port of entry of N. C., cap. of Washington co., on the Roanoke, 8 m. from its mouth.

Po (Anc. Eridanus and Padus), the largest r. of Italy, rises on the E. side of Mount Viso, in about $44^{\circ} 40' N.$ Lat., and $7^{\circ} E.$ Lon. It flows at first easterly, then northerly, till it reaches the point of about $45^{\circ} 13' N.$ Lat., and $7^{\circ} 50' E.$ Lon., when its general course becomes and continues almost due E. After passing, with a multitude of windings, through one of the most fertile plains in the world, it empties itself into the Adriatic by numerous mouths, near $45^{\circ} N.$ Lat., and $12^{\circ} 30' E.$ Lon. The whole length is estimated at 450 m. The principal channel or mouth, which joins the sea almost under the 45th parallel, is called the Maestra (má-ace/-trâ), and is always navigable for merchant vessels. Boats of 60 tons can, in all seasons, ascend the river as high as Cremona, and, except in times of great drought, as far as Casale (kâ-sâ/-là), in Piedmont, in Lon. $8^{\circ} 27' E.$

POITOU or POICROU, poi-too', (Fr. pron. pwâ·too'), a former prov. of France, now divided among the depts. of Vienne, Deux Sèvres, Vendée, Indre-et-Loire, and Charente.

PO'-LA, a decayed seaport t. and once splendid city of Istria, on the N. E. coast of the Adriatic. It is now only remarkable for its fine harbour, which was anciently a station for one of the divisions of the Roman fleet; and for its numerous interesting antiquities, among which is a vast amphitheatre, not much inferior in magnificence to the Coliseum of Rome. Lat. 44° 52' N., Lon. 13° 50' E. Present pop. about 800. (B.)

PO'-LAND (Polish, Polska, pole'-skâ), formerly an independent and extensive country of Europe, extending from the 48th to the 58th parallel of N. Lat., and from the 15th to the 33d meridian of E. Lon., including a large portion of the present territories of Russia, Prussia, and Austria. But the existing kingdom of Poland, constituted by the congress of Vienna, in 1815, and now united with the Russian empire, is of comparatively limited dimensions; being situated principally between 50° and 55° N. Lat., and 18° and 24° E. Lon.; bounded on the W. and N. W. by the dominions of Prussia, N. and E. by the Russian governments of Wilna, Grodno, and Volhynia, and S. by the Austrian prov. of Galicia and the republic of Cracow. Area estimated at about 50,000 sq. m. Pop. in 1847, 4,857,700. (B.)—Adj. PO'-LISH; inhab. POLE, and Po'-LAK (now obsolete).

PÖLK, a co. forming the S. E. extremity of Tenn. Pop. 6,338.

POLK, a co. in the S. W. central part of Mo., a little S. of the Osage r. Pop. 6,186. Co. t. Bolivar.

POLTAVA, põl-tâ'-vâ, (sometimes incorrectly written Pultowa,) a t. in the S. part of European Russia, cap. of a gov. of the same name, remarkable for a great battle fought in its vicinity, in 1709, between Peter the Great and Charles XII. of Sweden, in which the former gained a complete victory. Lat. 49° 33' N., Lon. 34° 40' E. Pop. 10,000. (P. C.)

POLYNESIA, pol-e-nee'-she-â, (or Eastern Oceanica,) a name signifying "many islands," applied to one of the three divisions of Oceanica. It comprises the various islands or insular groups in the Pacific Ocean, between 130° E. and 100° W. Lon., with the exception of those adjacent to the eastern or western continent, and of those belonging to Australia, Malaisia, and the Aleutian group. (See AUSTRALIA and MALAISIA.)—Adj. and inhab. POLYNESIAN, pol-e-nee'-she-an.

POM'-ER-A'-NI-Å (Ger. Pom'-mèrn), an extensive prov. of the Prussian monarchy, lying along the S. coast of the Baltic, between 53° and 54°

PO-MO'-NA, or MAINLAND, the largest of the Orkneys, situated between 58° 53' and 59° 10' N. Lat., and 2° 43' and 3° 22' W. Lon. Length, 24 m.; greatest breadth, near 14 m. Pop. 16,141.

POMPEII, pòm-pá'-ye, an ancient city of Italy, situated near the sea, 15 m. S. E. of Naples. In the year 79, A.D., it was overwhelmed, together with Herculaneum and some other towns, by an eruption of Vesuvius, from the crater of which it is distant about 5 m. For more than 16 centuries its existence appeared to be unknown, and its name almost forgotten. But in 1748, some peasants employed in cutting a ditch, met with the ruins of Pompeii, which soon became an object of interest and attention. In consequence of the extensive excavations commenced in 1755, and continued to the present time, a great number of highly interesting antiquities have been brought to light. One may, indeed, at present promenade the streets, and visit the shops, theatres, and temples of this long-forgotten city. Every thing seems to be in a state of extraordinary preservation. Not only statues, medals, jewels, and nearly every kind of household furniture, have been found almost unaltered, but even books and paintings may be seen, far less injured than might have been supposed, when we take into consideration the violent catastrophe which destroyed the town, and the subsequent lapse of so many ages. Pompeii not having been buried by lava, but with tufa, ashes and scorix, the excavations are much more easily effected here than at Herculaneum.

PONDICHERY, pòn'-de-shér'-re, (Fr. Pondichéry, pòn'-de'-shà'-re') a t. of Hindostan, and the principal French settlement on the Asiatic continent, is situated on the Coromandel coast, 83 m. S. S. W. of Madras. It is a handsome and well-built town, and has, from the sea, a very imposing appearance. Lat. 11° 56' N. Lon. 79° 52' E. Pop. about 40,000. (B.)

PONTA-DELGADA, pòn'-tã dël-gã'-dã, the principal t. though not the cap. of the Azores, situated on the S. side of the island of St. Michael. Lat. 37° 40' N., Lon. 25° 50' W. Pop. probably about 16,000. (B.)

PO-TO'-MAC, a large r. of the U. S., which rises in the Alleghany Mountains, in about 39° 7' N. Lat., and 79° 30' W. Lon., and, flowing at first north-easterly, and afterwards in a general south-easterly direction, forms, in its whole course, the boundary between Md. and Va. It falls into the Chesapeake Bay, in about 38° N. Lat., and 76° 10' W. Lon. Length estimated at 400 m. It is navigable for the largest vessels to Washington, about 120 m. from its mouth, or near 250 m. from the sea.

POTOSI, po-to-see' or po-to'-se, a city of Bolivia (formerly Upper Peru), celebrated for its rich silver mines, situated at the height of 13,265 ft. above the sea, on the W. declivity of the Cerro de Potosi, near its base. This mountain, which has the shape of a perfect cone, and rises to an elevation of more than 16,000 ft. above the level of the sea, seems to consist entirely of silver ore, of different degrees of richness. The fact that this precious metal existed here was first discovered in 1545, by an Indian, who, pursuing a llama up the steep declivity, caught hold of a shrub, which being torn from the soil, exposed a mass of solid silver at the roots. From 1556 to 1800, the produce of these mines amounted to the enormous sum of 823,950,508 Spanish dollars. (P. C.) The greatest produce of a single year was in 1593, when it amounted to 7,858,893 dollars. Lat. 19° 36' S., Lon. about 65° 30' W. Pop. in 1826, about 12,000 (P. QUE-BEC' (Fr. Québec, kà'-bek'), a city and fortress of Canada, formerly the cap. of the British possessions in America, is situated on the left bank of the St. Lawrence, where it receives the St. Charles, about 400 m. from its mouth. It occupies the extremity of a ridge, terminating at the junction of the two rivers, which rises near 340 ft. above the surface of the water. On the summit of this promontory stands the citadel, and the town extends from it down to the water's edge. The commanding position of the city, together with its vast and beautiful harbour, presents, at a distance, a picturesque and magnificent view to the approaching spectator. The town itself, however, is not very attractive; the streets are narrow and irregular, those in the lower portions are dirty and confined. Quebec is strongly fortified, and has been justly called the Gibraltar of America. Among the numerous literary institutions of this town, we may name the French College, and the Public Library, which contains upwards of 6,000 vols. of valuable and standard works. Quebec is situated on the St. Lawrence, above the island of Orleans, where the river suddenly contracts, and is said to take its name from *Kebec*, an Indian word, signifying "narrow." Lat. 46° 47' 30" N., Lon. 71° 10' W. Pop. above 30,000. (B.)

QUED'-LIN-BURG' (Ger. pron. qued'/lin-böörġ,'), a t. of Prussian Saxony, on a tributary of the Saale, 32 m. S. W. of Magdeburg. It was the birth-place of the celebrated German poet Klopstock. Lat. 51° 48' N., Lon. 11° 8' E. Pop. 13,000. (B.)

Length, about 1,400 m.; greatest breadth, above 200 m.

REE, *râ*, a lake in the central part of Ireland, 17 m. in length, and perhaps 6 m. in its greatest breadth.

REGGIO, *red'-jo*, (Anc. Rhe'gium,) an archiepiscopal t. of Naples, cap. of Calabria Ultra, at the S. extremity of the Italian peninsula, on the strait of Messina. Rhegium was, at an early period, one of the most flourishing commercial cities of Magna Grecia, in the S. of Italy, and is said to have been founded about 700 years before the Christian era. This town has experienced great vicissitudes of fortune, both in ancient and modern times. In the 16th century, it was thrice taken and pillaged by the Turks. The earthquake of 1793 destroyed Reggio so completely, that not a single building remained entire. It has, how-

REIMS or RHEIMS, reemz, (Fr. pron. rânz; Anc. Durocorto/rum, afterwards Re/mi;) an archiepiscopal city of France, in the dep. of Marne (of which, though not the cap., it is by far the largest town), 84 m. E. by N. of Paris. It is surrounded with old walls and entered by six gates. One of these, the gate of Mars, consisted formerly of a Roman triumphal arch, which is still standing, though now superseded by a gate of modern construction. Among the remarkable edifices may be mentioned the Cathedral, one of the largest and most magnificent in Europe. It was erected chiefly in the 13th century, since which time the French kings have, with few exceptions, been consecrated here. Reims possesses extensive manufactures, principally of woollens, or fabrics of wool combined with other materials. Lat. 49° 15' N., Lon. 4° 3' E. Pop. 38,359. (P. C.)

RHINE (Anc. Rhe/nus; Fr. Rhin, rân; Ger. Rhein, rîne; Dutch, Rhyn, rîne); a celebrated r. of Europe, which has its sources in the Alps. The principal branch, called by the Germans, the Vorder Rhein (*i. e.* fore Rhine), rises a little N. E. of Mount St. Gothard, in about 46° 38' N. Lat., and 8° 39' E. Lon. The general course of the river is northerly, to Mentz, thence nearly N. W., to the borders of the Netherlands, whence it takes a westerly direction, and divides into two principal branches; the larger of these, called the Waal or Wahal (wââl), joins the Meuse; the other, which retains the name of the Rhyn, falls into the N. Sea, in 52° 13' N. Lat. All that portion of the river which lies within or along the boundary of Switzerland, is called the Upper Rhine; from Bâle to Cologne it is denominated the Middle Rhine; and the remainder of the course to its mouths, the Lower Rhine. With respect to length, the Rhine is the fourth river of Europe, but it holds the first rank as a channel of commerce. Its whole course amounts to about 950 m. The Lower Rhine may be navigated by sea-vessels of 300 or 400 tons, though flat river-barges are generally used, on account of the numerous sand-banks. In some parts of the Middle Rhine, the navigation is greatly impeded by the rapidity of the current, as well as by numerous small islands and sand-banks, which are subject to sudden and frequent changes in their form and position. Steamboats have recently been resorted to, with great advantage, in navigating the Rhine. Near Schaffhausen, on the Upper Rhine, the river, running through a narrow channel, between lofty rocks, falls over a ledge of lime-stone, about 70 ft. in height, producing the celebrated "cataract of the Rhine."—Adj. RHEN'-ISH.

RHONE (Fr. Rhône; Anc. Rho'danus); a large r. of Europe, which rises in the central part of Switzerland, in about 46° 35' N. Lat., and 8° 20' E. Lon., and, flowing at first south-westerly, traverses L. Lemán; afterwards, having received the Saône, its course is almost due S., to the Mediterranean, which it enters by several mouths, near 43° 25' N. Lat., and 4° 30' E. Lon. The whole length is estimated at 590 m. The current of the Rhone and its larger tributaries is so rapid as to be a great obstacle to navigation with ordinary boats, but the recent introduction of steamers has, in a great measure, obviated that difficulty, and is said to have contributed vastly to the improvement of this portion of France.

RHONE, a dep. in the S. E. part of France, on the rivers Rhone and Saône. Pop. 482,024. (B.) Capital, Lyons.

RHONE, MOUTHS OF (Fr. Bouches-du-Rhône, boosh dü rône), a dep. in the S. of France, situated, as its name indicates, at the mouths of the Rhone. Pop. 362,325. (B.) Capital, Marseilles.

RI'-O CO-LOR-AD'-O, *i. e.* "Red River," or simply **COLORADO**, a large r. of Texas, which falls into Matagorda Bay, near 23° 40' N. Lat., and 96° W. Lon. Length estimated at near 1,000 m.

RI'-O DEL NORTE, called formerly the **RIO BRAVO** or **RIO BRAVO DEL NORTE**, (Sp. pron. ree'-o brá'-vo dèl nor'-tà,) *i. e.* the "rapid river of the North," a large r. of N. America, which rises near 41° N. Lat. and 110 W. Lon., and, flowing in a general south-easterly direction, falls into the Gulf of Mexico, near 26° N. Lat. and 97° 20' W. Lon. Through a great part of its course, it forms the boundary between Texas and Mexico. Length, above 2,000 m. It is not navigable to any extent. This river is frequently called the **RIO GRANDE**.

RIO JANEIRO, ri'-o jan-ee'-ro, or simply **RIO**, or more fully, **RIO DE JANEIRO**, (Port. pron. ree'-o dà zhân-á'e-ro,) the cap. of the empire of Brazil, as well as of a prov. of its own name, and the largest and most commercial city in S. America, situated on a bay of the Atlantic, which forms, in every respect, one of the best harbours in the world. This bay is nearly 24 m. in length, and 15 m. in its greatest breadth; and, being surrounded by high hills, is protected from every wind. The entrance, which is scarcely a mile wide, is defended by several forts. The town is regularly laid out, but the streets are generally narrow, and the houses not remarkable for elegance. Among the literary and scientific institutions of the Brazilian capital, we may name the Public Library, containing from 50,000 to 70,000 vols.; the School of Medicine and Surgery, the Botanic Garden, and the Observatory. The trade of Rio is very extensive, and appears to be still rapidly increasing. The principal export is coffee; of which the quantity shipped at this place is said to be nearly equal to all the exports of coffee from all the other ports in the world. Lat. 22° 54' S., Lon. 42° 45' W. Pop. above 200,000; about one-half of whom are negro slaves.

ROCHE'-FORT or **rosh'-for'**, a fortified t. and naval port of France, in the dep. of Lower Charente, on the r. Charente, about 12 m. (by water) from its mouth. The harbour is formed by the river, which, though not large, affords at all times sufficient depth of water to float the largest vessels. The arsenal is one of the most extensive and finest in the country. There is without the town a naval hospital, which ranks among the most extensive establishments of the kind in Europe. Lat. $45^{\circ} 56' N.$, Lon. $0^{\circ} 58' W.$ Pop. 14,000. (B.)

ROCHELLE, LA, lâ ro'-shell', a fortified seaport t. of France, cap. of the dep. of Lower Charente, on the Atlantic, 93 m. N. N. W. of Bordeaux. It is the centre of an extensive commerce. Rochelle is remarkable in history for the celebrated siege which it underwent during the reign of Louis XIII., and the ministry of Richelieu, which resulted in the demolition of the last refuge of the Huguenots, and the ruin of their party. The conquest is said to have cost France 40,000,000 francs. Lat. $46^{\circ} 9' N.$, Lon. $1^{\circ} 10' W.$ Pop. 15,000. (B.)

ROCH'-ES-TER, an ancient city of England, in Kent, on the Medway, 28 m. E. by S. from London. Pop., including 4 parishes, 11,743.

ROCHESTER, a flourishing city and port of entry of N. Y., cap. of Monroe co., on the Genesee r., 7 m. from Lake Ontario. The Erie Canal, and the Albany and Buffalo Railroad, pass through the town. Another railroad communicates with Port Genesee, on L. Ontario. A sloop navigation extends from the lake up the Genesee r. to within 2 m. of the city. With these advantages, Rochester possesses a very active and extensive trade, of which the immense quantities of flour manufactured in its numerous mills, form, perhaps, the most important article. The site of Rochester was a wilderness in the early part of the present century, the first settlement having been made in 1812; in 1820 the population was only 1,502, but since the opening of the Erie canal, in 1824, the town has increased with astonishing rapidity; in 1830 the population was 9,269, and in 1850 it had amounted to 36,403; and, with its increased facilities of intercourse with other important

This chain, though forming a part of the vast mountain system, which extends through the whole length of America, is not, as was formerly supposed, continuous with the Cordilleras of Mexico. With a large part of the Rocky Mountains we are but very imperfectly acquainted. Mount Brown and Mount Hooper, situated near 53° N. Lat., and between 115° and 117° W. Lon., are the highest of this chain that have yet been measured, the former having an elevation of near 16,000 ft., the latter of 15,690 ft. (P. C.)* Between 42° and 42° 40' N. Lat., and near 110° W. Lon., there is a break in this mountain chain, called the South Pass, or Fremont's Pass, through

ROMANS, ro'-mân', a t. in the S. of France, in the dep. of Drôme, 12 m. N. E. of Valence. Pop. in 1831, 7,677. (P. C.)

ROME (Latin and Italian, Roma, ro/'má), the most celebrated city of the world, either in ancient or modern times, the cap. of the Papal state, and the ecclesiastical metropolis of Catholic Christendom, is situated chiefly on the E. or left bank of the Tiber, about 16 m. from its mouth. It is enclosed by walls which are generally understood to occupy the site of those constructed by Aurelian. They describe a polygon, of which the longest diameter (*i. e.* from N. W. to S. E.) is 3 m. The whole circuit is between 14 m. and 15 m.; but not half of the space included is occupied with houses. That portion of the city which is situated on the left bank of the Tiber, constitutes Rome Proper: the other is called *Transtevere** (trâns-tâ/-vâ-râ, *i. e.* "beyond the Tiber"): in this part are the palace of the Vatican and the church of St. Peter. These two divisions of the town are connected by three bridges. Of the 15 gates of Rome the *Porta del Popolo* (por/'tâ del po/-po-lo) on the N., and the *Porta Maggiore* (mâd-jo/'râ) on the E., are the most remarkable for their beauty. At the head of the edifices of modern Rome, stands the celebrated Cathedral of St. Peter, which is not only the largest and most beautiful church that has ever been erected, but is, without exception, the noblest work of architecture ever produced by the hands of man.† There is some diversity in the statements of its dimensions, given by different authors; but, it appears from the best authorities to which we have access, that its length considerably exceeds 600 ft., and that its greatest breadth is near 500 ft.: the height, from the cross to the floor (which covers an area of nearly 5 acres), is about 460 ft. The whole expense of constructing this vast edifice is estimated at above \$60,000,000! The work was begun in 1506, and finished in 1614, with the exception of the colonnade, which was added in 1655-67. The celebrated dome,‡ which may be regarded as the boldest and most astonishing effort of human architecture, was chiefly constructed by Michael Angelo. Near the great Cathedral is the palace of the Vatican, containing above 4,000 different apartments; it

* This name is also, and perhaps most frequently, applied to a subdivision of *Transtiberine* Rome.

† Byron, apostrophizing this unrivalled structure, says—

"But thou, of temples old, or altars new,
Standest alone—with nothing like to thee."

To which Diana's marvel was a cell."

is the largest palace in Europe, but is not remarkable for architectural beauty. There are in Rome above 300 churches, many of which are noble and venerable structures, but therè is none which merits to be named by the side of St. Peter's. Our limits will not permit us to mention even the principal among the multitude of magnificent ruins, which, to the traveller, constitute the great attraction of Rome: we must not, however, leave the Colise'um (or Colosseum) without a passing notice. This structure, called also the Flavian Amphitheatre, which was the wonder of ancient Rome, and is now the most august and imposing ruin in the world, consists of a vast ellipse, 620 ft. in length, and 513 ft. in its greatest breadth. In the centre is an open elliptical space or arena, about 290 ft. in length, and 180 ft. in breadth. Around this arena are the seats of the spectators, which rise, tier above tier, the higher ones still receding, till they almost reach the top of the outer wall, which is about 160 ft. in height. This immense amphitheatre is said to have had seats for above 80,000 spectators, and standing room for 20,000 more. Rome possesses a great number of literary institutions, among which we may name the University, one of the oldest in Europe, and the Roman College, founded by the Jesuits, which may be regarded as another university; to it are annexed a rich library, a collection of antiquities, of specimens in natural history, etc. The Observatory, connected with the Roman College, is in $41^{\circ} 53' 52''$ N. Lat., and $12^{\circ} 28' 40''$ E. Lon. Pop. above 154,000. (B.)

ROO-ME'/-LI-A or ROOM'-E-LEE' (Rum-Ili), the name of an eyalet of European Turkey, comprehending Albania, Macedonia, and Thessaly. The pasha of Roomelia ranks above all the other pashas of Turkey in Europe.

ROS'-ROCK, a seaport and important commercial t. of N. Germany, in the grand-duchy of Mecklenburg-Schwerin, on the Warnow (war'-noŕ), about 9 m. above its mouth in the Baltic. It was formerly a member of the Hanseatic League, and for a long time ranked next to Lübeck among the ports of the Baltic. The dukes of Mecklenburg granted it great privileges, many of which it still enjoys, such as the right of choosing its own magistrates, of taxing itself, and of coining money. It is now the largest and most commercial town in the grand-duchy. It possesses a university, founded in 1419, and attended by about 110 students, with a library of above 80,000 vols. ROT'-TER-DAM', a celebrated commercial t. of Holland, next to Amsterdam the most important in the kingdom, situated on the N. or right bank of the Meuse (Maas), 35 m. S. S. W. of that city. The numerous deep canals by which it is intersected, allow the largest merchantmen to come into the middle of the town, and unload at the very doors of the warehouses. Among its scientific and literary institutions, may be mentioned the Academy of Natural Sciences, and the Public Library. Rotterdam is remarkable as the birth-place of the celebrated Erasmus. The name of this city appears to be derived from a *dam of the Rotte* (rot'-tĕh), a little river which runs through the city, and falls into the Meuse at this place. Lat. 51° 55' N., Lon. 4° 39' E. Pop. in 1840, 78,098. (P. C.)

in 1826, was estimated by him at 60,100,000. This vast empire is divided into three great parts, viz. European, Asiatic, and American Russia. European Russia, though not comprising the greatest extent of territory, surpasses the others vastly in population and importance. It is situated between $40^{\circ} 40'$ and 70° N. Lat., and $17^{\circ} 40'$ and 66° E. Lon., and is bounded on the W. by the Baltic and Prussia, on the S. by the territories of Austria and Turkey, by the Black Sea, and the Caucasian territories of Russia, which are comprised within the limits of Asia. Its boundaries on the E. and N. are the same as those of Europe. Its greatest length, from N. to S., is about 1,900 m.; its greatest estimated breadth, from E. to W., is above 1,600 m. Area, 2,047,600 sq. m. Pop. in 1826, 56,500,000, (B.) ;* in 1846, 60,303,266. [See SIBERIA.] American Russia comprehends the N. W. part of North America, between $54^{\circ} 40'$ and $71^{\circ} 20'$ N. Lat., and 130° and 168° W. Lon. Area estimated at 500,000 sq. m., including the Aleutian islands and several other groups. Pop. 50,000. (B.) The established religion of Russia is the Greek Orthodox, identical with that of the Greeks of the Ottoman empire. The government is an absolute and unlimited despotism. St. Petersburg is the capital of the empire. —Adj. RUSSIAN, roe'-shun or rush'-un; Inhab. RUSSIAN and Russ, (poetical).

SAHARA, sq-hã'-ra, also written Zahara, *i. e.* the "desert," a region of vast extent, which occupies the central parts of N. Africa. It extends from the Atlantic, between Cape Noon (Nun), in 28° 46', and the mouths of the Senegal, in about 16° 30' N. Lat., eastward to the valley of the Nile. On the N. it is bounded by the Barbary states, on the S. by the countries watered by the Senegal r. and by Soodan. Of the actual limits, however, on the N. and S., very little is known. The length of the Great Desert, from E. to W., is near 3,000 m.; the breadth, from N. to S., may vary from 700 to 1,500 m. The surface appears to be chiefly composed of sandstone or loose sand: every part is almost or entirely destitute of vegetation.

pearance, when approached from the sea, is very imposing, but the interior presents the irregularity and many of the deformities common to Turkish towns. There are in Salonica a number of highly interesting monuments of antiquity. One of the gates of the city consists of an ancient triumphal arch. Salonica holds the second commercial rank among the towns of European Turkey, being inferior only to Constantinople; and is also the seat of some important manufactures. Lat. 40° 38' N., Lon. 22° 56' E. Pop. estimated by Balbi at 70,000.

SALONICA, GULF OF (Anc. *Sí'nus Therma'icus*), is situated at the N. W. extremity of the Ægean Sea. Length about 70 m.; greatest breadth above 40 m.

SAL-WIN' or **SAL-WEN'** (called by the natives Than-Lyeng or Than-Lweng), a r. in the S. E. part of Asia, which is supposed to rise in China, near 27° N. Lat., and 99° E. Lon.; flowing southerly, it falls into the Gulf of Martaban, a little below the town of this name. Though it brings down a great volume of water, it is not navigable in the lower part of its course. The upper portion has not been explored.

SALZBURG or **SALTZ/-BURG** (Ger. pron. sálts/-böörög), an archiepiscopal city of Upper Austria, cap. of a circle—formerly of a duchy—of the same name, on the Salza (sált/-sá), an affluent of the Inn, 70 m. E. S. E. of Munich. It is surrounded with walls and bastions, and has eight gates. Though irregularly built, the town contains several splendid edifices, chiefly in the Italian style. Salzburg has a lyceum (in the place of its former university), with a library of 30,000 vols.; that belonging to the Monastery of St. Peter contains 40,000 vols. The duchy or principality of Salzburg was formerly governed by archbishops, who possessed very great privileges. It was secularized in 1802, and converted into an electorate of the German empire, and in 1814 it was united to Austria. Lat. of the town, 47° 48' N., Lon. 13° 1' E. Pop. about 14,000. (B.)

SALZWEDEL, sálts/-wá'.dèl, a t. of Prussia, cap. of a circle of the same name, on an affluent of the Elbe. Lat. 52° 51' N., Lon. 11° 17' E. Pop. above 6,000. (B.)

SAM'-AR-CAND', a celebrated but now decayed city of Asia, in Independent Tartary, situated in a fertile valley, about 120 m. E. of Bokhara. It was once the capital of the vast empire of Tamerlane, when its pop. is said to have amounted to 150,000. The tomb of that famous conqueror is still in excellent preservation; his remains repose under a lofty dome, the walls of which are superbly adorned with jasper and agate. Lat. 39° 50' N., Lon. about 67° E. Pop. variously estimated at from 10,000 to 30,000, and even 50,000.

SAMBOR, sãm'-bor, a t. of Austrian Galicia, cap. of a circle of the same name, on the Dniester. Lat. 49° 32' N., Lon. 23° 17' E. Pop. 9,000. (B.)

SA/-MOS (called by the Turks Soo-sãm'), a fertile i. of the Greek archipelago, belonging to Turkey, intersected by the parallel of 37° 40' N. Lat. and the 27th meridian of E. Lon. It is separated from the coast of Asia Minor by a strait not 2 m. in breadth. Length about 30 m.; greatest breadth 17 m. Pop. 15,000. (P. C.) Samos contains several interesting monuments of antiquity; among others, some remains of the great temple of Juno, who was worshipped with particular honour in this island, from its having been (as the Samians maintained) the place of her birth.—Adj. and inhab. SA/-MI-AN or SAM'-I-OT'.

SANDWICH ISLANDS, one of the Polynesian groups, situated in the Pacific, between 18° 50' and 22° 20' N. Lat., and 154° 40' and 160° 20' W. Lon. The principal islands are Hawaii, Oahu, Atui, Maui,

Fâte, fâr, fáll, fât; mè, mêt; plne or pine, pîn; nô, nôt; öö as in *good*;

Molokai or Morotai,* Nihau, and Lanai or Ranaï,* which are noticed under their respective names. The natives of the Sandwich Islands appear to be a branch of the great Malay race. They are of middle stature, and well formed, with muscular limbs and open countenances, and seem to possess a large share of intelligence and enterprise. When this group was discovered by Cook, in 1778, the inhabitants were observed to have made greater progress in civilization than those of the other Polynesian islands. Since their conversion to Christianity, in 1819, the American missionaries have laboured among them with distinguished success. Books and newspapers are now printed in the native language at Honolulu, and even a map of the islands has been engraved at Lahaina, in Maui. Many of the Sandwich Islanders now dress in the European fashion; and vessels built at Honolulu, manned by natives, traverse the Pacific to the N. W. coast of America, and to Canton.—Inhab. SANDWICH ISLANDER.

SANTA MARIA, one of the Azores or Western Islands, intersected by the 37th parallel of N. Lat., and the meridian of 25° 10' W. Lon.

* It is stated as a curious fact that the inhabitants of both the Sandwich and Society Islands are incapable of distinguishing between the sounds of *l* and *r*, and of *t* and *k*. This does not appear to arise so much from a defect in the organs of speech as of hearing. It is said that they can utter correctly the sounds of the letters just named, but that they cannot distinguish them either when spoken by themselves or by others. It appears that the English missionaries in the Society Islands first adopted the mode of writing names like those above cited with *t* and *r*; the Americans in the Sandwich Islands have unfortunately had recourse to a different orthography, whence arises the diversity of spelling which we find in the best works on the Polynesian islands. In connexion with this subject, it may be remarked, that in other languages *t* and *c* or *k* are sometimes changed for each other. Thus in Latin, we find *nuncius* or *nuntius*: *Lucretia*, the ancient name of Paris, appears to have been written also *Lucetia* (in Greek, *Λευκῆτια*, *Leuketia*), and *Loticia* (*Λοτικία*, *Lotikia*).

SAR'-A-GOS'-SA (Sp. Zaragoza, thã-rã-go'-thã ; Anc. Salduba ; afterwards Cæsaraugus/ta), an archiepiscopal city of Spain, cap. of Aragon, on the left bank of the Ebro, which is here crossed by a fine stone bridge, 600 ft. in length, resting on seven arches. This town formerly contained a number of edifices, distinguished for their magnificence, but the greater part were much injured in the war with the French in the early part of the present century. The church of Nuestra Señora del Pilar (nwes'-trã sane-yo'-rã dël pe-lar'), which is still preserved, is a superb building ; the principal altar, built entirely of alabaster, in the Gothic style, is greatly admired as a piece of ancient architecture. Among the institutions for education, may be mentioned the University, founded in 1474, now attended by about 1,500 students. Saragossa will be ever memorable for the heroic and almost unparalleled bravery with which its citizens, under Palafox, resisted the French forces during the peninsular war, in 1808-9. Having been once compelled to raise the siege, the enemy returned the ensuing year, with reinforcements, and, aided by an epidemic within the city, they at length induced the inhabitants to surrender, by granting them honourable terms. Pop. 43,000. (B.)

SAR-A-TOF' (Saratow), a t. of European Russia, cap. of a gov. of the same name, on the right bank of the Volga. It is irregularly built, and the houses are mostly of wood. Lat. 51° 31' N., Lon. about 46° E. Pop. stated at above 41,000. (P. C.)

SAR'-A-TO'-GA, a co. in the E. part of N. Y., between and bordering on the Hudson and Mohawk rivers. Pop. 45,646. Co. t. Ballston.

The township of Saratoga, in the E. part of this county, on the Hudson, at the mouth of Fish creek, is memorable as the scene of the surrender of Gen. Burgoyne's army to the Americans, under Gen. Gates, on the 17th of October, 1777.

SARATOGA SPRINGS, the principal watering place in the U. S., situated in the above co., 28 m., in a straight line, N. of Albany. It is an incorporated village, consisting principally of one fine broad street, adorned with trees, with many large and excellent hotels and boarding houses. A great quantity of the mineral waters of Saratoga is bottled and sent to different parts of the world. Pop. of the township, 3,384.

SAR-DIN'-I-A (It. Sardegna, sar-dane/-yã ; Fr. Sardaigne, sar'-dañe/), an important i. in the Mediterranean, forming a part of the Sardinian states, between 38° 51' and 41° 17' N. Lat., and 8° 4' and 9° 50' E. Lon. Its form resembles a parallelogram, the longer sides running nearly N. and S. Extreme length, about 168 m. ; greatest breadth, near 90 m. Area estimated at 10,000 sq. m., being a trifle larger than Sicily, according to the estimate of some geographers. Pop. 524,633. (M.) The island is generally fertile, but exhibits a considerable variety of soil : it produces almost all the fruits and vegetables of Southern Europe. A large portion of the surface is hilly and mountainous. The climate varies according to the locality : near the coast, the temperature seldom, if ever, falls below the freezing point, while the summits of the mountains in the interior are often capped with snow in

winter. Sardinia is governed by a viceroy appointed by the king. Cagliari is the capital.—Adj. SAR-DIN'-I-AN; inhab. SARD or SARDINIAN.

SARDINIAN STATES (It. Stati Sardi, stâ'-te sar'-de), the name given to the dominions of the house of Savoy. This kingdom comprehends, besides the Island of Sardinia, an extensive territory occupying the N. W. portion of Italy, between 43° 40' and 46° 27' N. Lat., and 5° 38' and 10° 6' E. Lon.; bounded on the N. by Switzerland, E. by Austrian Italy, and the territories of Parma, Tuscany, and Modena, S. by the Mediterranean, and W. by France. Length, from S. E. to N. W., near 250 m.; greatest breadth, above 200 m. It includes the duchy of Savoy, Piedmont in its more extensive sense, the duchy of Genoa, and the county or province of Nice. Total area of the kingdom, about 29,000 sq. m. Pop. 4,650,368. (M.) Area of the continental portion, about 19,000 sq. m. Pop. about 4,100,000. The prevailing religion of the Sardinian states is Roman Catholicism. The government is a monarchy, hereditary in the male line; and though the regal authority is somewhat circumscribed by a supreme council in the Island of Sardinia, it is absolute in the continental portion of the kingdom. Turin is the capital.

SAREE, sâ'-ree' (Sari), an ancient city of Persia, in the prov. of Mazanderan, a few miles from the S. shore of the Caspian Sea. Lat. near 36° 30' N., Lon. 53° 10' E. Pop. estimated at 30,000. (B.) It is said, however, to have been recently almost depopulated by the plague.

SAR'-NO, a t. of Naples, at the head of a river of the same name, 13 m. N. W. of Salerno. Pop. about 10,000. (P. C.)

SARTHE, sart, a dep. in the N. W. central part of France, intersected by a r. of the same name, which falls into the Mayenne. Pop. 466,888. (B.) Capital, Le Mans.

SA'-RUM, OLD, an ancient and now totally ruined city of England, in Wiltshire, 2 m. N. of Salisbury or New Sarum. It is interesting, as affording a striking example of the rotten borough system. It sent two members to the house of commons in the time of Edward III., and after its total decay, without having a single house or inhabitant, the proprietor of the land, on which it once stood, was still permitted to exercise this important privilege, until the passing of the reform act.

SAS-KATCH'-A-WÂN', a large r. of British America, rising in the Rocky Mountains, and flowing into L. Winnipeg. The whole length, including Nelson r. (the outlet of L. Winnipeg), which may be regarded as its lower portion, is estimated at above 1,500 m.

SASSARI, sâs'-sâ-re, an archiepiscopal t., cap. of the N. division of the I. of Sardinia, on a small r. about 8 m. from the N. W. coast. It has a university, besides other literary institutions, and about 20,000 inhabitants. (P. C.) Lat. 40° 43' N., Lon. 8° 26' E.

Loire, on the Loire (which is here crossed by a stone bridge, nearly 900 ft. in length), 28 m. S. E. of Angers. In the time of the Huguenots, this town was one of the principal centres of Protestantism in France; and for a time, commerce, learning, and the arts, flourished here. But its prosperity fell with the fall of the Huguenot party, which followed the revocation of the edict of Nantes by Louis XIV. Saumur was the birth-place of Madame Dacier. Pop. 11,576. (M.)

SA-VAN/-NAH, a r. of the U. S., which rises, by several branches, on the S. frontier of N. Carolina, where this state borders on S. Carolina and Georgia; flowing south-easterly, it forms the greater part of the boundary between S. C. and Ga., and falls into the Atlantic near 32° N. Lat., and 81° W. Lon. Its whole length is estimated at 600 m. It is navigable for large vessels to Savannah, for steamboats of 150 tons to Augusta (about 250 m. from the sea), and for smaller vessels, 150 m. further.

SAVANNAH, a city and port of entry of Ga., cap. of Chatham co., and the largest and most commercial town in the state, is situated on the right bank of the river of the same name, about 15 m. from its mouth. The streets are wide and regular, with spacious squares, and many handsome buildings. Lat. 32° 5' N., Lon. 81° 8' W. Pop. 16,060.

SAVE, (Ger. Sau, sou; Anc. Sa'vus,) a r. of the Austrian empire, which rises in Illyria, near 46° 30' N. Lat., and 13° 40' E. Lon. Its general direction is nearly E. S. E.; after a course of about 590 m. it joins the Danube, at Belgrade. It is navigable for vessels of from 150 to 200 tons, to the mouth of the Kulha (kool'hã), near 45° 30' N. Lat., and 16° 20' E. Lon.

SAVONA, sã-vo/-nã, a seaport t. of N. Italy, in the Sardinian States, on the Mediterranean, 25 m. S. W. of Genoa. Pop. 15,500. (P. C.)

SAV'-OY* or sav-oi', (It. Savoia, sã-voi/-ã,) a country of N. Italy, with the title of duchy, between 45° 4' and 46° 25' N. Lat., and 5° 37' and 7° 8' E. Lon. On the N. it borders on L. Lemán, and on the W. it is partly bounded by the Rhone, which separates it from France. Area, 4,270 sq. m. Pop. 564,137. (M.) Savoy forms the nucleus of the Sardinian monarchy. It was governed as early as the 10th century by its own counts, whose descendants acquired Nice, in 1388, and Piedmont, in 1418. In 1713, Sicily was added to the dominions of the house of Savoy, then first recognized as one of the royal houses of Europe. That island was soon after exchanged for Sardinia, which, at that time, belonged to Austria.—Inhab. SAV'-OY-ARD'.†

With humble wares and pipe of merry sound,
From his green vale and shelter'd cabin hies,
And scales the Alps to visit foreign skies."

ROGERS'S *Pleasures of Memory*.

† We very frequently hear this word pronounced Savoy'ard, but we believe that the accentuation given above, is generally adopted by the best speakers.

"That stern yet kindly spirit who constrains
The SAVOYARD to quit his naked rocks."

SAXE-ALTENBURG—*ál/-tən-burg'*, (Ger. Sachsen-Altenburg, *sák/-sən-ál/-tən-böörġ'*), a small duchy of Germany, between 50° 44' and 51° 6' N. Lat., and 11° 20' and 12° 40' E. Lon. It consists of two nearly equal portions, separated from each other by the territory of Reuss. Area, 483 sq. m. Pop. 121,590. (P. C.) Altenburg is the capital.

SAXE-CO/-BURG-GOTHA, (Ger. Sachsen-Coburg-Gotha, *sák/-sən ko/-böörġ go/-tã*), a duchy of Germany, consisting chiefly of two large portions, viz. the principalities of Coburg (see **COBURG**), and Gotha. The latter is principally between 50° 35' and 51° 6' N. Lat., and 10° 20' and 11° E. Lon. Area about 590 sq. m. Pop. 96,658. Total area of the duchy, about 790 sq. m. Total pop. near 138,000. (P. C.) Gotha is the capital.

SAXE-MEININGEN-HILDBURGHAUSEN, *sax-mi/-ning-ən hilt-böörġ-hou/-zən*, a duchy of Germany, composed of the ancient duchy Meiningen, the principalities of Hildburghausen and Saalfeld, and some other districts. It lies chiefly between 50° 12' and 50° 53' N. Lat., and 10° 7' and 11° 40' E. Lon. Area about 882 sq. m. Pop. 144,294. (P. C.)

SAXE-WEIMAR or **SAXE-WEIMAR-EISENACH**, *sax-wi/-mar-i/-zən-äk*, (Ger. Sachsen-Weimar, *sák-sən-wi/-mar*), a grand-duchy of Germany, consisting of the two principalities of Weimar and Eisenach, composed of several detached portions, between 50° 25' and 51° 30' N. Lat., and 9° 50' and 12° 15' E. Lon. Area about 1,400 sq. m., of which Eisenach occupies about 445. Total pop. 245,813. (P. C.) Weimar is the capital.

SAX/-O-NY (Ger. Sachsen, *sák/-sən*), in its largest sense, is used to designate an extensive country in the N. of Germany, stretching from the Weser, on the W., to the frontiers of Poland, on the E. Its limits appear never to have been definitely and permanently settled. It was formerly considered to include Westphalia. The name properly denotes the country of the Saxons; and as the boundaries of their dominion often changed with the changing tide of conquest, we may readily understand why the appellation of Saxony has been so variously and vaguely applied.

SAXONY, KINGDOM OF, a state in the central part of Germany, between 50° 10' and 51° 28' N. Lat., and 11° 55' and 15° 3' E. Lon. Length above 140 m.; greatest breadth about 75 m. Area 5,788 sq. m. Pop. 1,836,433. (P. C.) The government is an hereditary limited monarchy. Dresden is the capital.—Adj. and inhab. **SAX/-ON**.

SAXONY, PRUSSIAN, a prov. of the Prussian dominions, consisting of the Saxon territories formerly belonging to Prussia, together with those which were dismembered from the kingdom of Saxony in 1815. It is bounded on the N. and N. E. by Brandenburg, E. by Silesia, S. by the kingdom of Saxony, and W. by Hesse, Brunswick, and Hanover. Its form is very irregular: the area falls but little short of 10,000 sq. m.

SCHUYLKILL, skool/-kill, a r. which rises in the E. part of Pa., and flowing south-easterly, falls into the Delaware about 6 m. S. of Philadelphia. Its whole length is estimated at 120 m. It is navigable for sloops to Philadelphia, but a little above that city there are falls; yet, by means of lockage, dams, and side-canals, boats may ascend to Port Carbon, above Pottsville.

SCHUYLKILL, a co. in the E. part of Pa., on the sources of the above river. Pop. 60,713. Co. t. Orwigsburg.

SCHWABACH, shwâ/-bâk, a thriving manufacturing t. of Bavaria, on a r. of the same name, an affluent of the Regnitz, 9 m. S. S. W. of Nuremberg. Pop. about 8,000. (B.)

SCHWARZBURG, shwartz/-burg or shwârts/-böörg, a principality in the central part of Germany, consisting of two principal portions, the more southern of which is called the Upper County, the more northern, the Lower County. The former lies between $51^{\circ} 34'$ and $50^{\circ} 55'$ N. Lat., and $10^{\circ} 50'$ and $11^{\circ} 23'$ E. Lon. The Lower County is situated between $51^{\circ} 13'$ and $51^{\circ} 27'$ N. Lat., and $10^{\circ} 32'$ and $11^{\circ} 16'$ E. Lon. The house of Schwarzburg is now divided into two branches, Rudolstadt (roo/-dol-stätt), and Sondershausen (sôn/-ders-hou/-zĕn), each of which has a part both of the Upper and the Lower County. Schwarzburg-Rudolstadt contains an area of 408 sq. m. Pop. 65,600. (M.) Rudolstadt, the capital, on the Saale, has a pop. of 4,000. (B.) Schwarzburg-Sondershausen, possesses a territory of 360 sq. m. in extent, and about 54,000 inhabitants. (M.) Sondershausen, with a pop. of 3,600 (B.), is the capital.

SCHWEIDNITZ, shwite/-nits, a fortified t. of Prussian Silesia, on the Weistritz (wice/-trits), an affluent of the Oder. Lat. $50^{\circ} 51' N.$, Lon. $16^{\circ} 27' E.$ Pop. above 9,000. (B.)

SCHWERIN, shwâ-reen', a t. of N. Germany, cap. of the grand-duchy of Mecklenburg-Schwerin, on the W. side of a lake of its own name. SCI/-LY ISLANDS, a group belonging to England, lying about 30 m. W. by S. from Land's End. There are a great number of islets and rocks, but only a few islands of any importance; St. Mary's, the largest, contains between 2 and 3 sq. m. The pop. of the entire group in 1831 was only 2,465. (M.)

Sci/-o, or shee/-o, (Mod. Gr. **ΧΙΟ** (*Χιω*), hee/-o; Anc. *Chios*;) a fertile and beautiful i. belonging to Turkey, in the Ægean Sea, intersected by the parallel of 38° 30' N. Lat., and the 26th meridian of E. Lon., and separated from Asia Minor by the Strait of Scio, which is about 5 m. wide. Length about 35 m.; greatest breadth 13 m. In 1820 the pop. was estimated at 100,000, but, in consequence of so many of the inhabitants having been massacred or carried into slavery, in the late Greek war, it has been reduced, it is said, to less than 20,000. (P. C.) The wine of Chios is celebrated as among the best in the Levant, and it had the same reputation in ancient times. Chios claims the honour of having given birth to Homer.—Adj. and inhab. **ΧΙΟΤ**, kee/-ot; or **ΧΙ/-ΑΝ**. when the ancient island is referred to.

Sci/-o/-ro, a r. of Ohio, which rises in the S. W. central part of the state, and, flowing at first south-easterly, and afterwards nearly S., falls into the Ohio r. at Portsmouth. It is about 200 m. long, and is navigable for boats 130 m.

SCIORO, a co. in the S. part of Ohio, at the mouth of the above r. Pop. 18,428. Co. t. Portsmouth.

SCOT/-LAND, a country occupying the northern portion of the island of Great Britain, between 54° 38' and 58° 41' N. Lat., and 1° 46' and 6° 13' W. Lon. It is bounded on all sides by the sea, except on the S., where it is separated from England by Solway Frith, the Cheviot hills and the Tweed. Length, from N. to S., about 280 m.; greatest breadth above 170 miles. Area 26,014 square miles. The population by the census of 1851 was 2,870,784. The kingdom with its dependencies, is divided into thirty-two counties. Before the accession of James VI. (afterwards James I. of England), to the English throne, in 1603, Scotland constituted an independent kingdom. Till the Union, which was consummated in the reign of queen Anne, though under the same sovereign with England, it still had its own parliament. According to the Articles of Union, ratified Jan. 16, 1707, the peerage of Scotland is represented in the house of lords of the United Kingdom by 16 peers, chosen by the whole body of Scotch peers at the commencement of each parliament. The counties were to be represented by 30 members in the house of commons, and the boroughs by 15 members. This arrangement continued till 1832, when the borough representation received an addition of 8 members, making in all 53. Edinburgh is the capital of Scotland, and was formerly the residence of the Scottish kings.—Adj. **SCOTCH** or **SCOT/-TISH**; inhab. **SCOT** or **SCOTCH/-MAN**.

SEGORBE, sà-gor/-bà, (Anc. Segob/riga), a t. of Spain, in Valencia, remarkable for its Roman antiquities. Lat. 39° 54' N., Lon. 0° 30' W. Pop. about 6,000. (B.)

SE-GO'-VI-À (Sp. pron. sà-go/-ve-à), an ancient city of Spain, cap. of a prov. of the same name, situated 48 m. N. N. W. of Madrid. It is surrounded by thick walls, built by the Moors, and strengthened at intervals with turrets. Among its public buildings may be mentioned the vast and handsome Cathedral, and the Mint, said to be the oldest place of coinage in the kingdom. Among other antiquities, there is an aqueduct, above 2,100 ft. in length, supposed to have been built by Trajan. Lat. 41° N., Lon. 4° 7' W. Pop. 13,000. (B.)

SEINE, sane, (Anc. Seg/uana,) an important r. of France, which rises in the dep. of Côte d'Or, and, flowing in a general north-westerly course, falls into the English Channel (La Manche), in about 49° 27' N. Lat., and 0° 4' E. Lon. The whole length is estimated by Malte Brun at 470 m. Vessels of 250 and 300 tons can ascend to Rouen; the shifting sands at the mouth of the river impede the ascent of larger vessels. The Seine is navigable for boats drawing 6 ft. water, to Paris, and for smaller ones as far as Méry (mêr'-re'), in the dep. of Aube. The course of the river below Paris is extremely tortuous, so that the distance to Rouen by water is probably 3 or 4 times as great as it is in a direct line. Steamboats take two days for the descent, and four for the ascent: those passing between Paris and Havre require nearly double the time. (P. C.)

SEINE, a dep. in the N. or N. central part of France, intersected by the above river. Though the smallest, it is the most populous department in the kingdom. Pop. 1,106,891. (B.) Capital, Paris.

SUMATRA, soo-mâ'-tra, an important i., the most westerly of the Malaisian group, and, next to Borneo, the largest in the eastern seas, between 5° 50' N. and 6° S. Lat., and 95° 20' and 106° E. Lon. Its length is above 1,000 m.; its greatest breadth about 240 m. The area is computed at 160,000 sq. m. Population vaguely estimated at 2,000,000. (M.) The vegetable productions of this island are those common to tropical countries; rice, pepper, and camphor are the most important. The quantity of pepper produced annually is estimated by McCulloch at 30,000,000 lbs., which is in fact more than the whole produce of pepper in all other parts of the globe. Sumatra was once noted for its gold, and a considerable quantity is still exported: it also contains rich mines of copper ore, which, however, are but little worked. The Dutch have possessions at Padang, Bencoolen, and other parts of the S.W. coast; but a large portion of the island is independent.—Adj. and inhab. SUMATRAN, soo-mâ'-tran.

SUMBAWA, sum-baw'-wā, an i. of Malaisia, between 8° 20' and 9° 20' S. Lat., and 116° 40' and 119° 20' E. Lon. Length about 170 m.; greatest breadth above 60 m. The Dutch have established some sort of authority in the eastern districts, but a large portion of the island is independent.

SUN'-DER-LAND, a commercial t. and seaport of England, in the co. of Durham, on the Wear, at its entrance into the North Sea, and 13 m. N. E. of Durham, with which town it is connected by a railway. Ship-building is more extensively carried on here than anywhere else in the kingdom. Lat. $54^{\circ} 55' N.$, Lon. $1^{\circ} 21' W.$ Pop. 17,022.

SUPERIOR, LAKE, the largest and most westerly of the five great lakes, which are connected with the St. Lawrence, between $46^{\circ} 35'$ and $49^{\circ} N.$ Lat., and $84^{\circ} 30'$ and $92^{\circ} 20' W.$ Lon. The length, following the bend of the lake, is about 400 m. ; greatest breadth, above 160 m. Area estimated at 28,000 sq. m. The surface is about 640 ft. above the Atlantic ; the mean depth is stated at 900 ft. Lake Superior is probably the largest body of fresh water on the globe.

SURAT, soo-rat', a large commercial city of Hindostan, cap. of Guzerat, on the Taptee, about 20 m. from its entrance into the Gulf of Cambay. Bombay has deprived it of a large part of that commerce for which it was formerly so celebrated ; but it still carries on a considerable trade with Arabia, and possesses some flourishing manufactures. Lat. $21^{\circ} 11' N.$, Lon. $72^{\circ} 50' E.$ Pop. estimated by Balbi at 160,000, though some writers make it much higher.

SURINAM. See GUIANA, DUTCH.

SURINAM, soo'-re-nam', a r. of South America, in Dutch Guiana, flowing into the Atlantic. Length, about 300 m. It is navigable for large ships about 4 leagues from the coast, and for river barges above 50 m. farther.

SUR'-REY, a co. in the S. E. part of England, S. of, and bordering on the Thames. Pop. 582,678.

SUS'-QUE-HAN'-NA, a large r. of the U. S., formed by the union of two principal branches. The E. branch rises in Otsego Lake, in the S. E. central part of N. Y., and, flowing in a general south-westerly course, is joined by the W. branch at Northumberland, about 43 m. N. of Harrisburg : their united waters then flow southerly, and fall into the N. extremity of Chesapeake Bay. Its whole length may be estimated at near 350 m. The navigation is obstructed in the lower part of its course by numerous rapids.

SUSQUEHANNA, a co. in the N. E. part of Pa., on the E. branch of the above r., and bordering on N. Y. Pop. 28,688. Co. t. Montrose.

SUS'-SEX, a co. in the S. E. part of England, bordering on the English Channel. Pop. 299,753.

SWE'-DEN (in Swedish, Sverige, swēr'-e-gêh), a monarchy in the N. W. part of Europe, comprising the E. part of the Scandinavian peninsula, situated between $55^{\circ} 20'$ and $69^{\circ} N.$ Lat., and $11^{\circ} 10'$ and $24^{\circ} 20' E.$ Lon.; bounded on the N. by Norway and Russian Lapland, E. and S. E. by Russia and the Baltic, and W. by the Cattegat, the Skagger Rack, and Norway. Length, above 950 m.; greatest breadth, about 260 m. Area estimated at 170,000 sq. m. Pop. in 1839, 3,109,772. (P. C.) The mines of Sweden form an important source of national wealth. Swedish iron is noted for its superior quality. There are some extensive copper mines; that at Fahlun is the most remarkable. (See **FAHLUN**.) The established religion of Sweden is the Lutheran. While all sects are tolerated, none but Lutherans can be promoted to any employment in the state. The government is a limited monarchy, hereditary in the male line. Sweden and Norway, though at present united under one king, have distinct and separate constitutions. Stockholm is the capital.—Adj. **SWE'-DISH**; inhab. **SWEDE**.

SWINEMÜNDE, SWEE'-neh-mün'-dêh, (*i. e.* "Swinemouth,") a small commercial t. and seaport of Prussia, on the Swine (swêe'-neh), one of the outlets of the Stettiner-Haff, at its entrance into the Baltic. Lat. $53^{\circ} 53' N.$, Lon. $14^{\circ} 23' E.$ Pop. 3,600. (B.)

SWITZ'-ER-LAND (Ger. Schweiz, shwītes; Fr. La Suisse, lâ swiss; Anc. Helve'tia), a mountainous country in the southern part of Europe, between $45^{\circ} 48'$ and $47^{\circ} 48' N.$ Lat., and $5^{\circ} 57'$ and $10^{\circ} 30' E.$ Lon.; bounded on the N. and E. by Germany, S. by Italy, and W. and N.W. by France. Length, near 230 m.; greatest breadth, above 140 m. Area, about 15,000 sq. m. Pop., in 1839, 2,188,395. (P. C.) Switzerland is a republic, consisting of 22 confederated states, called *cantons*, viz. Aargau (Argovie), Appenzell, Basel (Bâle), Bern, Freyburg, Gall, St., Geneva, Glarus, Grisons, Lucerne, Neufchâtel, Schaffhausen, Schwyz, Solothurn (Soleure), Thurgau, Ticino (Tessin), Unterwalden, Uri, Valais, Vaud, Zug, and Zürich. The inhabitants of Switzerland consist of three classes—Germans, French, and Italians. The former dwell chiefly in the cantons Zürich, Lucerne, Uri, Schwyz, Unterwalden, Glarus, Zug, Appenzell, St. Gall, Thurgau, Schaffhausen, and Aargau, and constitute about seven-tenths of the entire population. The French Swiss are found principally in Neufchâtel, Geneva, Vaud, and a part of Soleure, Freyburg, Valais, Bâle, and Bern. The Italian Swiss are far less numerous, and inhabit only Ticino and some parts of Grisons and Valais. The German language is employed in the general affairs of the confederation and in the government of the particular cantons, with the exception of Geneva, Neufchâtel, Vaud, and Ticino. (B.)

ou, as in *our*; th, as in *thin*; TH, as in *this*; N, nearly like *ng*.

All the cantons of Switzerland are republics, excepting Neuchâtel, in which the king of Prussia exercises the right of sovereignty. The Swiss confederation has no permanent capital; by a federal enactment of 1815, Zurich, Bern, and Lucerne, are alternately the seat of the general government.—Adj. **SWISS**; inhab. **SWISS**, and sometimes **SWITZ'-ER**.

SWITZERLAND, a co. forming the S. E. extremity of Ind. P. 12,932. Co. t. Vevay.

SYD'-NEY, an important commercial t. of New Holland, cap. of the colony of New South Wales, on the S. side of the bay called Port Jackson, which forms, perhaps, the finest natural basin in the world. This bay is about 15 m. long; the anchorage is everywhere excellent, and ships are perfectly protected from every wind. Sydney was originally founded in 1788, as a colony for convicts; but at present there are few if any of that class in the province. Pop. in 1841, 29,973, in 1851 over 50,000. The exports of wool in 1848 amounted to 17,565,000 lbs. Lat. 33° 55' S., Lon. 150° 10' E.

SYR'-A-CUSE (Anc. Syracu/sæ; It. Siracusa, se-râ-kâ'-sâ); a celebrated city and seaport of Sicily, on the E. coast, about 30 m. S. S. E. of Catania. Its harbour, once so famous, is now choked with sand, and little remains, except its vast ruins, to remind the spectator of the proud metropolis of ancient Sicily, which durst oppose the power of Athens, of Carthage, and of Rome. The present town is pretty strongly fortified, but its streets are narrow and dirty, and its commerce reduced almost to nothing. Lat. 37° 4' N., Lon. 15° 18' E. Pop. 14,000. (B.)—Adj. and inhab. **SYR'-A-CU'-SAN**.

SYRACUSE, a flourishing city of N. Y., cap. of Onondaga co., on the Erie Canal, where it is joined by the Oswego Canal, about 47 m., in a straight line, W. of Utica. Near it are the extensive salt-works of Salina. Pop. 22,271.

SYR'-I-A, a country of rather indefinite extent, between 30° and 38° N. Lat., and 34° and 38° or 39° E. Lon., situated at the E. extremity of the Mediterranean, and forming a part of the Turkish empire. The name of Syria (*Συρία*) was given to this country by the Greeks and Romans, and is now unknown to the Asiatics. The Arabs call it Bel-ed/ Es-Shâm (or simply Es-Sham), *i. e.* "the country to the left;" because when in prayer they face the rising sun, it lies to their left hand. Though within the temperate zone, Syria exhibits all the climates of the globe. In the Ghor (the valley between the Dead Sea and the Sea of Tiberias), the mean annual temperature appears to be not much lower than that of the equator. This need not surprise us when we consider that the lower part of this valley is more than 1,000 ft. below the level of the sea. (P. C.) The Arabic poets have said that the "Sanneen (or Sannin, the southern part of Lebanon) bears winter upon his head, spring upon his shoulders, autumn in his bosom, while summer lies sleeping at his feet." Under so various a climate, the vegetable productions, as might be expected, are extremely numerous, comprising

TÁ'-GUS (Sp. Tajo, tâ'-ho; Port. Tejo, tâ'-zho); the largest r. of the Spanish peninsula: it rises near the W. frontiers of Aragon, where that kingdom joins New Castile, in about 40° 30' N. Lat., and 1° 40' W. Lon. Flowing in a westerly course, it passes nearly through the centre of the peninsula, and falls into the Atlantic in 35° 38' N. Lat., and 9° 20' W. Lon. Its whole length exceeds 550 m. It is navigable to Abrantes, about 90 m. above Lisbon.

TAHITI, tâ-hee'-te, (formerly written Otaheite,) the largest and most important of the Society Islands, between 17° 30' and 18° S. Lat., and 149° and 149° 40' W. Lon. Length about 48 m.; greatest breadth about 26 m. Its form is remarkable; it seems as if an island almost perfectly circular had been joined to the extremity of an elliptical one. The isthmus which connects the two parts is only about 3 or 4 m. broad. Pop. 8,000. For the character and condition of the inhabitants, see SOCIETY ISLANDS.—Adj. and inhab. TAHITIAN, tâ-hee'-te-an.

TALAVERA DE LA REYNA, tâ-lâ-vâ'-râ dà lâ râ'e-nâ, an ancient t. of Spain, in New Castile, on the Tagus, 42 m. W. by N. of Toledo. Pop. about 8,000. (B.)

The Tenasserim provinces constitute a territory extending along the E. shore of the Bay of Bengal, for about 450 m., between 10° and 17° N. Lat. The climate of this region is said to be remarkably healthy, and the country very productive.

TEN-ER-IFFE' (Sp. Tenerife, tà-nà-ree/-fà), the largest and most populous of the Canary Islands, between 27° 50' and 28° 40' N. Lat., and 16° 5' and 17° 5' W. Lon. Length, 73 m.; greatest breadth, near 40 m. Area estimated at 1,012 sq. m. Pop. in 1829, 85,000 (P. C.) The most remarkable feature of this island is its celebrated mountain summit, known as the Peak of Teneriffe, which rises 11,946 ft. (P. C.)

above the level of the sea. It is an extinct volcano; but, from some crevices in the crater, hot watery vapours still issue. These crevices are called by the natives the *nostrils of the Peak*.

TEN^N-NES-SEE' RIVER, the largest affluent of the Ohio, rises in the W. part of N. C., and, flowing westerly into Tenn., afterwards makes an extensive circuit through the N. part of Ala., then changing its course, runs nearly N. through Tenn. and Ky., and falls into the Ohio, near 37° N. Lat. and 88° 35' W. Lon. According to many geographers, the Tennessee is formed by the union of the Clinch and Holston rivers. The whole length is estimated at 1,100 m. It is navigable for steamboats, during high water, to Florence, in Ala., about 260 m.

TENNESSEE, one of the U. S., between 35° and 36° 40' N. Lat., and 81° 40' and 90° W. Lon.; bounded on the N. by Kentucky and Virginia, S. E. by N. Carolina, S. by Georgia, Alabama, and Mississippi, and W. by the Mississippi r., which separates it from Arkansas and Missouri; and divided into 79 counties.* Length, from E. to W., about 430 m.; greatest breadth, from N. to S., about 110 m. Area estimated at 45,000 sq. m. P. 1,002,625; of whom 756,893 are whites, 6,271 free coloured persons, and 239,461 slaves. Nashville is the seat of government. Tennessee was admitted into the Union in 1796.

TERAMO, tēr'-ā-mo, a t. of Naples, cap. of the prov. of Abruzzo Ultra, about 10 m. from the Adriatic. Lat. 42° 40' N., Lon. 13° 48' E. Pop. 9,000. (B.)

TERCEIRA, tēr-sā'e-rā, one of the principal islands of the Azores: it is intersected by the parallel of 38° 40' N. Lat., and the E. coast is grazed by the 27th meridian of W. Lon. Length, 24 m.; greatest breadth, 14 m. Area estimated at 260 sq. m. Pop. estimated at 50,000. (P. C.) Angra is the chief town.

TERMINI, tēr'-me-ne, (Anc. Ther/mæ, *i. e.* "hot baths,") a fortified seaport t. of Sicily, on the N. coast, remarkable for its hot mineral springs and baths, and for the ruins of the ancient city of Him'era, in its vicinity. Lat. 37° 57' N., Lon. 13° 42' E. Pop. about 14,000. (B.)

TERNI, tēr'-ne, (Anc. Interam'na,) a t. of Italy, in the Papal State, on the Nera, an affluent of the Tiber, 48 m. E. by N. from Rome. Pop. about 6,000. (P. C.) About 4 m. to the E., on the Velino (vā-lee'-no), a stream which flows into the Nera, is a celebrated cascade, called the *Cascata del Marmore* (kās-kā'-tā dēl mar'-mo-rā). The water

TER'-RA DEL FU-E'-GO, more properly TIERRA DEL FUEGO, te-êr/-râ dël fwâ/-go, a group of islands at the S. extremity of S. America, separated from the continent by the Strait of Magellan. The principal island is about 270 m. in length, and 180 or 190 m. in its greatest breadth. The name of Tierra del Fuego, or "land of fire," is supposed to have been given to this insular group by the Spaniards, from their having witnessed here a volcanic eruption. A phenomenon of this kind was observed, not many years since, by Captain Basil Hall, while on a visit to these islands. Tierra del Fuego is inhabited by savages, who appear to be in the lowest state of ignorance and barbarism. They are low in stature, and are of a dark copper or mahogany colour. The climate is cold, but the temperature is comparatively equable. Cloudy weather, rain, and wind prevail throughout the year, and fine days are rare.

TERRACINA, têr-râ-chee/-nâ, (Anc. Anx'ur, afterwards Terraci/na), a seaport t. of Italy, in the Papal State, 60 m. S. S. E. of Rome, remarkable for its interesting remains of antiquity.

TERRE BONNE (*i.e.* "good land"), usually pronounced *tar bone*, a parish in the S. part of La., bordering on the sea. Pop. 7,724. Seat of justice, Williamsburg.

TEX'-AS, formerly (in conjunction with Coahuila) a state of Mexico, conquered its independence in 1836, and maintained its existence as an independent republic till 1845, when it was admitted into the North American confederacy, as a sovereign state. A portion of its territory in the N. W., was relinquished by Texas on the formation of the territory of New Mexico in 1850, in consideration of \$10,000,000 to be paid by the U. S. government. This portion now forms a part of New Mexico. Texas lies between 25° 30' and 36° 30' N. Lat., and 93° 40' and 107° W. Lon., being about 800 miles in length, from the mouth of the Rio Grande, to the N. W. extremity of the state, and 750 in its greatest breadth, including about 237,321 sq. m. It is bounded on the N. by New Mexico and Indian Ter., E. by Arkansas and Louisiana, S. E. by the Gulf of Mexico, and S. W. by Mexico, from which it is separated by the Rio Grande or Rio del Norte. A portion of the northern part has New Mexico for its W. boundary. It is divided into 78 counties.† Pop. in 1850, 212,592, of whom

154,100 were white, 331 free coloured persons, and 58,161 slaves. In the year ending June 30, 1850, there were 3,406 deaths, or 16 in every thousand. Austin is the seat of government.

Bays, Rivers, &c.—The coast of Texas is lined with bays and inlets. The largest of these—Galveston Bay—extends about 35 m. inland from the Gulf of Mexico. Following this in a S. W. direction in the order named, are Matagorda, Lavaca, Espiritu Santo, Aransas, and Corpus Christi bays, and Laguna del Madre. These are all separated from the gulf by a line of long narrow islands or sand banks. Matagorda Bay and Laguna del Madre (being rather sounds than bays) run parallel with the shore. Texas does not afford a single harbour for vessels of a large size. Galveston Inlet, the deepest, has but 12 ft. of water, the entrance of Matagorda Bay but 11 ft., and San Luis 10 ft. Texas has several long rivers, whose navigation also is very much obstructed by shallows and rafts, though these may, and doubtless many of them will be removed hereafter, and the navigation much extended. The large rivers (proceeding in order N. E. from the Rio Grande, or Rio del Norté, which is almost 1,800 m. long, and forms the entire S. W. boundary of the state) are the Nueces, San Antonio, Guadalupe, Colorado, Brazos, Trinity, Neches, and Sabine. These rivers are respectively about 300, 250, 275, 550, 500, 400, 300, and 350 m. in length; but these are mere estimates from measurements on the map. The Sabine, which forms the E. boundary, spreads near its mouth into Sabine Lake. The Red r. which rises in the N. W. of this state, forms the greater part of the N. boundary, and is navigable for about 200 m. of that distance. The Sabine is navigable 150 m., the Brazos 150 m., the Nueces 100 m., the Trinity 300 m., the San Jacinto 50 m., and the Rio Grande (except at low water) 400 m. The Colorado is obstructed by a raft 10 m. from its mouth, but when this is removed, it will probably be navigable for small steamboats to Austin.

Face of the Country, Soil, and Productions.—The Guadalupe mountains, a branch of the Rocky mountains, run through the western part of Texas, but their extent and altitude are not known with any precision. A range of heights runs through the middle of the southern part of the state, east of the Colorado r., and high table lands occupy the N. W. region. The surface along the gulf and for 100 m. inland is level and barren, except on the margin of the streams. These are bordered with strips of timbered land, varying in breadth from 3 to 7 miles. Vast prairies are found in various sections of the country, alternating with tracts of land covered with timber. The prairies on the Red river bottom, which extend about 200 m., are represented to be of unsurpassed fertility, and very productive in maize, cotton and wheat. The soil of the prairies is a

deep black mould mixed with sand. Previous to the emigration from the United States, vast herds of wild horses and cattle fed on the rich natural grasses of these meadows. A striking peculiarity in Texas is a section called the "Cross Timbers," a continuous forest, stretching perhaps 150 or 200 m., from the sources of the Trinity northward to the Arkansas river. "It appears at a distance like an immense wall of wood; and towards the west, such is its linear regularity that it looks as if planted by art." The principal grains of this state are Indian corn and wheat; two crops of the former can be raised in a year. But the great staple is cotton, which is said to be equal, if not superior, to the best produced in the United States. The sugar-cane also flourishes here as well or better than on the Mississippi river. Among the fruits which abound are the peach, lemon, pine-apple, date, olive, orange, fig, melon, and grape, all of which flourish in the lowlands. Vanilla, indigo, sarsaparilla, and other medicinal and dyeing plants are indigenous. The forest trees of Texas are the live-oak, and several other varieties of oak, hickory, walnut, pecan, magnolia, wild peach, elm, birch, sycamore, cypress, cedar, pine, dogwood, musquite, bois-d'arc and cottonwood. Along the river bottoms is an impenetrable growth of cane. The long Spanish moss, valuable for bedding and fodder, clothes the trees near the seaboard and on the streams. By the census returns of 1850, Texas had under cultivation 635,913 acres of land, producing 5,796,735 bushels of Indian corn; 42,448 bushels of wheat; 60,770 lb of tobacco; 55,945 bales of cotton, containing 400 lb each; 122,118 lb of wool; 2,319,574 lb of butter; 92,018 lb of cheese; 8,327 tons of hay; and 7,017 hhds of sugar of 1,000 lb each. This state possessed, the same year, live stock of the value of \$10,263,086, and farming implements and other machinery to the value of \$2,095,308. The animals of Texas are bears, cougars, wolves, pecaries, panthers, foxes, and raccoons, with herds of buffalo and wild horses and abundance of deer. Alligators are met with in the rivers.

Minerals.—The mineral resources of this state have not been much developed as yet. In the east, salt is obtained from several lakes; bitumen has been found in many places, and granite, limestone, gypsum, slate, and iron abound except near the coast. As branches of the Rocky mountains extend into this state, it is quite probable that some of the mineral treasures said to exist in the same range in New Mexico, may be brought to light in Texas.

Climate, Meteorology, &c.—The climate is mild, and, being free from swamps, is more healthy than most of the states of the south on their seaboard. The dry season lasts from April to December; the wet, the remainder of the year. The cold is quite severe in December and January. Two crops of Indian corn may be gathered in a year, the first being usually planted in February, and the last in June. Wheat has been cut in May.

Cities and Towns.—The principal towns are Galveston, Houston,

Brownsville, San Antonio, San Augustin, Austin City, and Washington. Several of these may be found under their proper heads in the Gazetteer or Appendix. Galveston, the largest and most commercial t., is situated on Galveston island, between the bay of the same name and the Gulf of Mexico, 230 m. S. E. from Austin City, and 444 W. by S. from N. Orleans. Lat. 29° 10' N., Lon. 94° 50' W. Pop. estimated at 6000. Brownsville is a flourishing t. on the Rio Grande, about 40 m. from its mouth, and 310 m. in a direct line S. from Austin City. It is a place of considerable importance on account of the navigation of the river and the trade with Mexico. Pop. about 4000.—Adj. and inhab. TEX'-AN.

TEX'-EL, often called TES'-SEL, a small i. off the W. coast of Holland, at the entrance of the Zuyder Zee.

THAMES, temz (Anc. Tam'esis), the largest and most important river of England, rises in Gloucestershire, near Cirencester, by several branches. The principal one, called the Isis, joins the Churn near Cricklade, where the united stream first takes the name of Thames; though, after the example of the literati of Oxford, it is generally called the Isis till after it passes that city. The general course of the river is easterly; it falls into the German Ocean in about 51° 30' N. Lat., and 0° 50' E. Lon. The whole length is computed at 210 m. It is navigable for ships of any burden to Deptford (about 4 m. S. E. of London), for vessels of 800 tons to Catharine's Docks, near the Tower of London, and for barges to the confines of Gloucestershire. The greatest breadth of the Thames at London, is rather more than a quarter of a mile; the mean breadth may be 700 or 800 ft.

THAN'-ET, ISLE OF, a dist. of England, in the county of Kent, separated from the mainland by the r. Stour.

THEAKI or THIAKI, the-â/-ke (Anc. Ith'aca), one of the smaller Ionian islands, intersected by the parallel of 38° 25' N. Lat., and the meridian of 20° 40' E. Lon. Length 14 m.; breadth 5 m.

THEBES (The'bæ; or Dios'polis, *i. e.* the "city of Jove"), a once famous but long-ruined city of Upper Egypt, capital of the kingdom of the Pharaohs when in the zenith of their power, situated on both sides of the Nile. Lat. 25° 43' N., Lon. 32° 39' E. Its remains of antiquity are perhaps the most magnificent and imposing to be found on the globe. (See Penny Cyclopædia, articles EGYPT, CARNAC, and LUXOR; also, "Wilkinson on the Manners and Customs of the Ancient Egyptians.")

THEBES (Gr. Θῆβαι, *thēbai*, pronounced the'-vâ by the modern Greeks; Turk. Tee'-vâ), a t. of Greece, situated in a fine plain, about 30 m. N. N. W. of Athens. A few inscriptions are the only vestiges remaining, to remind us of the ancient capital of Bœotia. Pop. supposed not to exceed 5,000. (M.)

THEISS, tice (Hung. Tisza, tee-sõh; Anc. Tibis'cus), a r. of Hungary, the principal tributary of the Danube. It rises in the Carpathian Mountains, near 47° 30' N. Lat., and 25° E. Lon., and flowing at first north-westerly, then south-westerly, and afterwards southerly, falls into

the Danube in about $45^{\circ} 10'$ N. Lat., and $25^{\circ} 22'$ E. Lon. Its whole course is estimated at not less than 500 m., for the greatest part of which it is navigable.

THIBET or TIBET, tib/-et* or tib-et/ (called by the natives T'phoo-p'ho), an extensive country in the S. E. central part of Asia, of which very little is known. It appears to lie between 27° and 36° N. Lat., and 72° and 103° E. Lon., and is bounded on the S. W. by parts of the Hindoo Koosh and Himalaya Mountains, S. by the Himalayas and the northern boundaries of Assam, Birma, and the Chinese prov. of Yunnan. The eastern boundary is very uncertain, and the northern seems to be entirely unknown. As far as our information extends, Thibet consists almost wholly of table-land, the highest plains of which are more than 10,000 ft. above the level of the sea. The climate, as we might expect in a country so elevated, is generally cold; † indeed, one of the native appellations of Thibet is said to signify the "snowy region of the north." In some of the valleys, however, especially in that of the Dzangbo (or Sanpoo), it is very warm. During some seasons of the year the air is excessively dry, so that meat exposed to it, becomes so perfectly desiccated that it may be ground like bread, and may be preserved in this state for a number of years. It appears also that the Thibetans in like manner dry the bodies of their sovereign Lamas, instead of embalming them. This country produces many of the vegetable fruits and trees of Central and Southern Europe. All our domestic animals are known in Thibet; besides which there are goats with a very fine fleece, and those with long fine hair; and *argali* (the *Ovis ammon*), a species of wild sheep, with horns of 100 lbs. weight. (P. C.) The inhabitants of Thibet belong to the Mongolian race. They are said to be mild and humane, but not to exhibit the enterprise of their neighbours either to the N. or S. The art of printing has been practised among them from a remote age. Thibet is remarkable as the central seat of Boodhism, which is found here in its greatest purity. The priests are called *lamas* (lā/-mās): the Dalāi (dā/-lī) Lama, or Grand Lama, who resides at Lassa, is believed to be an incarnation of the deity in a human form. On the dissolution of this body, he is sup-

MOORE'S *Lalla Rookh*.

† It appears, however, from the testimony of several respectable travellers, that some elevated regions of Thibet, which, according to the received theory, should be buried in everlasting snow, are not only habitable, but teem with animal and vegetable life. In the most southern portions of this country, the line of perpetual congelation (if we follow the general rule on this subject) could not be placed higher than 12,300 ft. above the sea; and yet, on an elevation of more than 16,000 feet, Captain Gerrard saw horses galloping about in all directions, and feeding on the very tops of the heights, while various kinds of birds were soaring in the air above them. THIONVILLE, te'-ôn'-vill', a fortified t. of France, in the dep. of Moselle, on the r. Moselle, 16 m. N. of Metz. Pop. 4,201. (M.)

THOM'-AS, a co. in the S. part of Ga., bordering on Florida. Pop. 10,103. Co. t. Thomasville.

THOM'-AS-TON, a t. of Me., in Lincoln co., on St. George's r., 12 m. from the sea, and 37 m., in a straight line, S. E. of Augusta. Here is the Maine State Prison.

THORN, torn, a celebrated fortified t. of Prussia, on the Vistula, here crossed by a long wooden bridge, 50 m. S. S. W. of Marienwerder. Lat. 53° N., Lon. 18° 36' E. Pop. about 11,000, without the military, or 14,000, including them. (B.) Thorn was the birth-place of Copernicus.

THREE RIVERS (Fr. Trois Rivières, trwâ re'-ve-air'), a t. of Lower Canada, cap. of a dist. of the same name, and formerly of all Canada, on the St. Lawrence, at the mouth of the St. Maurice, which here being divided, by two small islands, into three channels, has given name to the town. Lat. 46° 23' N., Lon. 72° 29' W. Pop. estimated at between 4,000 and 5,000. (M.)

THUN, toon, a small t. of Switzerland, in the canton of Berne, on the r. Aar, about a mile below its egress from the lake of this name, 16 m. S. S. E. of Berne. Pop. 4,833. (P. C.) The Lake of Thun (called by the Germans Thuner-See, too'-ner sâ), is about 13 m. in length, and 3 m. in its greatest breadth.

THURGAU, toor'-gou, (Fr. Thurgovie, tür'-go'-ve'; Lat. Thurgo'via;) a canton at the N. E. extremity of Switzerland, bordering on L. Constance and the Rhine. Area about 270 sq. m. Pop. 84,124. (P. C.)

FRAUENFELD, frou'-en-felt', the cap., situated in a valley near the Thur (toor), an affluent of the Rhine, has only about 1,800 inhabitants. (B.)

THURINGIA, thu-rin'-je-a, (Ger. Thüringen, tü'-ring-en,) the name of an extensive tract in the central part of Germany, watered by the rivers Saale and Werra, and including the Thuringian Forest. Its limits have varied at different times, and the name is now but little used, the original Thuringia having become incorporated with the territories of different states.—Adj. THURINGIAN, thu-rin'-je-an.

THURINGIAN FOREST (Ger. Thüringer Wald, tü'-ring-er wâlt), a hilly and woody tract of country in the central part of Germany, forming a portion of the ancient Hercynian Forest, extending through Gotha, Weimar, Coburg, and some other small states.

Ti/BER (It. Tevere, *tà/-và-rà*; Anc. *Ti/bris* or *Ti/beris*), a celebrated r. of Central Italy, which rises in the Tuscan Apennines, and, flowing south-easterly to within about 20 m. of Rome, then turns to the S. W., and falls into the Mediterranean by two mouths, 17 m. below that city. Its whole length is about 150 m. It is said to have been anciently navigable for vessels of considerable burden, as far as Rome, and for small boats nearly to its source; but, at present, the navigation is at all times difficult, especially near its mouth and in the vicinity of Rome. Its average breadth, in the lower part of its course, is about 300 ft.

TIBET. See **THIBET**.

TICINO, *te-chee/-no*, (Anc. *Tici/nus*), a r. in the N. of Italy, which rises in the S. part of Switzerland, and, flowing northward through L. Maggiore, falls into the Po, 24 m. S. of Milan. It is navigable to L. Maggiore.

TICINO (Fr. *Tessin*, *tês'-sân'*), a canton in the S. E. part of Switzerland, bordering on Italy. It derives its name from the above river, by which it is intersected. Area, 1,042 sq. m. Pop. in 1837, 113,923. (M.) This is the only Italian canton in the Swiss confederation; the inhabitants speak a dialect resembling the Milanese; they are all Roman Catholics.

Ti/-LIS or **TEFLIS**, the cap. of the Russian prov. of Georgia, on the Koor, about midway between the Black and Caspian seas. The houses are generally ill built; the streets are crooked and extremely narrow. The newer portion of the town, however, which is separated from the old by the ruins of the ancient fortifications, has broader streets, and buildings in the European style. Tiflis is the residence of a Georgian metropolitan and an Armenian archbishop. Lat. $41^{\circ} 41'$ N., Lon. about 45° E. The pop. is rapidly increasing, and is now probably near 45,000. (P. C.)

TIGRÉ, *tee/-grà*, the most powerful and warlike of the three principal kingdoms into which Abyssinia is divided, situated E. of the r. Taccazzé. Adowa is the chief town.

Ti/-GRIS, a large r. of Asia, which rises in Asiatic Turkey, 70 or 80 m. N.W. of Diarbekir, between 38° and 39° N. Lat., and near 39° E. Lon. Its general course is south-easterly, and in about 31° N. Lat. and near 47° E. Lon., it unites with the Euphrates, to form the Shatt-el-Arab. The whole length of the Tigris is estimated at 920 m. Between Diarbekir and Mosul (near 300 m.) the river is navigable for rafts, at certain seasons: below Mosul, it is navigable throughout the year.

Til/-BURG, a manufacturing t. of Holland, in N. Brabant, 14 m. S.W. of Bois le Duc. Lat. $51^{\circ} 33'$ N., Lon. $5^{\circ} 4'$ E. Pop. 10,000. (B.)

Til/-SIR, a t. of Prussia, on the Memel, 60 m. N. E. of Königsberg. Here was concluded, July, 1807, the celebrated treaty of peace between France, and Prussia and Russia. Lat. $55^{\circ} 4'$ N., Lon. $21^{\circ} 56'$ E. Pop. about 12,000. (B.)

TIM-BUC'-TOO or **TOM-BOOC'-TOO** (more properly Ten-Boctoo), a commercial t., cap. of a kingdom of the same name, in the N. W. central part of Africa, near the S. border of the Great Desert, about 8 m. from the left bank of the Joliba or Niger. Though its importance has much diminished from what it was in the 14th century, when the kingdom of Timbuctoo was the nucleus of a great empire, it may still be regarded as the principal centre of commerce in this part of Africa. Lat. $17^{\circ} 10' N.$, Lon. about $3^{\circ} W.$ Pop. estimated from 10,000 to 12,000. (B.)

TI'-MOR, the largest of the Lesser Sunda Islands, between $8^{\circ} 20'$ and $10^{\circ} 30'$ S. Lat., and $123^{\circ} 20'$ and $127^{\circ} 20'$ E. Lon. Length, near 300 m., with a mean breadth of about 45 m. Timor is divided among a great number of petty kingdoms, nearly all of which are dependent on the Portuguese or Dutch. (B.)

TI'-MOR-LAUT', one of the Lesser Sunda Islands, intersected by the 8th parallel of S. Lat., and 131st meridian of E. Lon. It is about 90 m. in length, and 40 m. in its greatest breadth. Scarcely anything is known of it except that the natives are unfriendly to strangers.

TI-o'-GA, a small r. which rises in the N. part of Pa., and, making a circuit, passes into N. Y., and finally returns into Pa., and joins the E. branch of the Susquehanna.

TIOGA, a co. in the S. part of N. Y., intersected by the E. branch of the Susquehanna, and bordering on Pa. Pop. 24,880. Co. t. Owego.

TIOGA, a co. in the N. part of Pa., on the sources of the Tioga r., and bordering on N. Y. Pop. 23,987. Co. t. Wellsborough.

TIP'-PAH, a co. in the N. part of Miss., bordering on Tenn. Pop. 20,741. Co. seat, Ripley.

TIPPECANOE, tip'-pe-ka-noo', a co. in the W. N. W. part of Ind., where the Tippecanoe river joins the Wabash. Pop. 19,377. Co. t. Lafayette.

TIP-PER-A'-RY, an inland co. in the S. of Ireland, prov. of Munster, S. E. of, and bordering on the Shannon. Pop. in 1831, 402,564. (P. C.)

TOCANTINS, to-can-teens', a large r. of Brazil, which flows into the estuary of Para. Length estimated at 1,500 m.

TOCAT, to-kât', a large t. of Asiatic Turkey, on the Yesheel Irmak. Its appearance is said to resemble that of a European city. Lat. about 40° N., Lon. 36° 50' E. Pop. estimated by Balbi, on the authority of M. Fontanier, at near 100,000; but several other writers make it much less.

TODD, a co. in the S. W. part of Ky., bordering on Tenn. Pop. 12,268. Co. t. Elkton.

TOEPLITZ. See TÖPLITZ.

TO-KAY' (Hung. pron. to-koi), a t. in the N. E. part of Hungary, at the confluence of the Bodrog and Theiss, remarkable as the market for the famous wine of this name, which is produced in the surrounding country. Lat. 48° 7' N., Lon. 21° 24' E. Pop. 4,000. (B.)

TO-LÊ'-DO (Sp. pron. to-lâ'-do; Anc. Tole'tum), a celebrated but decayed city of Spain, cap. of a prov. of the same name, and formerly of the kingdom of Castile, situated on a hill near the Tagus, 36 m. S. S. W. of Madrid. It is the seat of a university and the residence of an archbishop. The Cathedral of this place is the largest and one of the finest in the kingdom. Toledo was formerly noted for its manufacture of swords; those now made here are said still to command a high price. Lat. 39° 55' S., Lon. 4° W. Pop. 15,000. (B.)—Adj. and inhab.

TONKIN or **TONQUIN**, ton-keen', a kingdom in the S. E. part of Asia, bordering on the gulf of this name. (See *COCHIN CHINA*.)

TONKIN or **TONQUIN, GULF OF**, is situated between 18° and 22° N. Lat., and 106° and 110° E. Lon. Length above 200 m.; greatest breadth about 170 m.

TOO/-LA (Tula), an important manufacturing t. of European Russia, cap. of a gov. of the same name, on the Oopa (Upa), an affluent of the Oka, 110 m. S. of Moscow. Its appearance from a distance, owing to the numerous spires and domes, is very imposing; but the crooked and ill-paved streets, and the houses built mostly of wood, tend to destroy, on a nearer view, the favourable impression which the approaching spectator may have received. Toola is remarkable for its manufacture of arms, the most extensive in the empire, whence it has been called the Birmingham of Russia. It employs above 7,000 workmen, producing annually 70,000 muskets and 25,000 side-arms. Cutlery of various kinds is also manufactured here. There are rich mines of iron ore of an excellent quality in the vicinity, but the metal employed in the manufactures is said to be principally, if not exclusively, from Siberia. Lat. $54^{\circ} 12'$ N., Lon. 37° E. Pop. 51,000. (P. C.)

TOORKISTAN, toork'-is-tân' (*i. e.* the "country of the Turks"), or **INDEPENDENT TARTARY**, is situated in the N. W. central part of Asia, between 35° and 54° N. Lat., and 50° and 82° E. Lon., bounded on the N. by the Russian dominions, E. and S. E. by the Chinese empire, S. by Afghanistan and Persia, and W. by the Russian empire, from which it is partly separated by the Caspian Sea. Length, from E. to W., near 1,500 m.; greatest breadth, from N. to S., about 1,250 m. Area vaguely estimated at 1,000,000 sq. m. A large portion of this extensive country consists of elevated table-land, intersected by ridges of mountains, some of which appear to be not less than 18,000 ft. above the level of the sea. Deserts of greater or less extent are found in different parts. Toorkistan is divided into a number of independent states or *khanats*, which vary greatly in extent and population. All the chiefs or *khans* appear to be possessed of a power more or less arbitrary. The principal khanats are those of Bokhara, Khiva, and Khokand, which are treated of under their respective heads. Mahometanism is the prevailing religion of Toorkistan; it is said that the laws of

the Koran are more strictly observed here, than in any other Mahometan country. (For some further particulars respecting this country, see BOKHARA.)

TOOR/-KO-MANS or toor'-ko-mãns', a nation of Tartars, originally inhabiting the eastern shores of the Caspian Sea, but who are now spread not only over Toorkistan, but Persia, Afghanistan, and a considerable portion of Asiatic Turkey. They lead a wandering life and live in tents. They are said to be excellent horsemen, and to make hardy and brave soldiers.

TOPAYOS, to-pi/-yòs, written also TAPAJOS, a large r. of Brazil, flowing into the Amazon near 2° 20' S. Lat., and 54° 40' W. Lon. Entire length perhaps 1,000 m. It is navigable for boats the greater part of its course.

TÖPLITZ, TOEPLITZ or TEPLITZ, tep'/lits, a small t. of Bohemia, on the Saubach (sou/-bãk); 47 m. N. W. of Prague, noted for its hot mineral springs and baths. Permanent pop. about 2,600. (B.)

TOR-BAY', a spacious basin on the S. coast of England, in Devonshire, which has several times been resorted to as a place of shelter by the fleets of England.

TORGAU, tor/-gou, a fortified t. of Prussian Saxony, on the Elbe, 66 m. S. S. W. of Berlin. Pop. 5,300. (B.)

TORNEÅ, pronounced and sometimes written TOR/-NE-O,* a small t. of European Russia, on the N. W. frontier of the grand-duchy of Finland, at the mouth of the r. Torneå, which falls into the Gulf of Bothnia. Lat. 65° 51' N., Lon. 24° 12' E.

TO-RON/-TO (formerly York), lately the cap. of Upper Canada, on the N. shore of L. Ontario, towards its W. extremity. Lat. 43° 35' N., Lon. 79° 20' W. The pop. of this city has increased of latter years with extraordinary rapidity: in 1826, it was only 1,677; in 1836, it was 9,652, and in 1845, it amounted to 19,706.

TOR'-SHOK' or TORZHOK (Torjok), a t. of European Russia, in the gov. of Tver. Lat. 57° 2' N., Lon. 35° 3' E. Pop. stated at 15,000. (P. C.)

TOR-TO/-LA, one of the Virgin Islands, in the W. Indies, belonging to Great Britain. Lat. 18° 27' N., Lon. 64° 35' W. Length about 12 m.

TOR-TO/-SA (Anc. Derto/sa), a fortified t. of Spain, in Catalonia, on the left bank of the Ebro, with several interesting remains of antiquity. Lat. 40° 49' N., Lon. 0° 33' E. Pop. about 16,000. (B.)

TOT/-NESS, a t. of England, in Devonshire, 20 m. S. by E. of Exeter. Pop. 3,849.

TOUL, tool, a t. of France, in the dep. of Meurthe, on the Moselle, here crossed by a handsome bridge, 13 m. W. of Nancy. Lat. 48° 40' 32" N., Lon. 5° 5' 3" E. Pop. 7,279. (M.)

TOULON, too/-lon, or too'-lòn', (Anc. Te/lo Mar/tius), the second naval

port of France (Brest being the first) in the dep. of Var, with one of the finest harbours on the Mediterranean, 32 m. E. S. E. of Marseilles. Among its institutions for education, may be mentioned the Naval School, with a fine library, and a collection of models of vessels of every kind. Lat. 43° 7' N., Lon. 5° 56' E. Pop. 30,000. (B.)

TOULOUSE or **THOULOUSE**, too'-looz', (Anc. Tolo'sa or Tholo'sa,) an archiepiscopal city in the S. of France, cap. of the dep. of Upper Garonne, and formerly of the prov. of Languedoc, on the r. Garonne, where it is joined by the Southern Canal (Canal du Midi), 132 m. S. E. of Bordeaux. The r. is crossed by a fine bridge of freestone, resting on 7 arches. Before the Revolution, Toulouse was the seat of one of the leading French universities, now replaced by an *académie universitaire*: it has also a royal college, and two public libraries, the one containing 30,000, and the other 24,000 vols. Lat. 43° 36' N., Lon. 1° 27' E. Pop. 68,015. (B.)

TOURAINÉ, too'-rane', a former prov. of France, now divided between the depts. of Indre and Loire, and Indre.

TOURNAY, toor'-nâ', (Flem. Doornik, dôr'-nik; Anc. Tur'nacum or Tor'nacus;) a fortress and important manufacturing t. of Belgium, prov. of Hainault, on the Scheldt, near the French frontier, 45 m. W. S. W. of Brussels. Lat. 50° 36' N., Lon. 3° 23' E. Pop. 29,000. (B.)

TOURS, toor, (Anc. Cæsarodunum, afterwards Tu'rones,) an archiepiscopal city of France, cap. of the dep. of Indre and Loire, and formerly of Touraine, on the left bank of the r. Loire, in the midst of a fertile and delightful plain, 127 m. S. W. of Paris. It communicates with the opposite bank of the Loire by one of the finest stone bridges in Europe, which is about 1,420 ft. long, and 45 ft. wide, and rests on 15 elliptical arches, each of which has a span of 80 ft. The inhabitants of Tours are considered to speak better French than those of any other provincial town in France. Lat. 47° 24' N., Lon. 0° 42' E. Pop. 26,669. (B.)

TRAF'-AL-GAR' or **traf-al'-gar**, a cape on the S. W. coast of Spain, celebrated for the great naval action fought in its vicinity, on the 21st of October, 1805, between the English fleet under Lord Nelson, and the combined French and Spanish fleet, commanded by admiral Villeneuve. The English were signally victorious, but their distinguished commander was slain during the action. Lat. 36° 10' N., Lon. 6° W.

TRAL-EE', a thriving t. of Ireland, cap. of Kerry co., near a bay of its own name, 57 m. W. N. W. of Cork. Pop. in 1831, 9,562, and now (1842) probably 13,000. (M.)

TRANI, trâ'-ne, an archiepiscopal t. and seaport of Naples, on the Adriatic. Lat. 41° 17' N., Lon. 16° 26' E. Pop. about 14,000. (B.)

TRAN'-QUE-BAR', a seaport t. of Hindostan, belonging to the British, on the Coromandel coast, between the two arms of the Cauvery, 140 m. S. S. W. of Madras. Lat. 11° N., Lon. 81° 54' E. The pop. may amount to 12,000, without including that of its little territory. (B.) Till lately (the early part of 1845), Tranquebar belonged to Denmark.

TRAN-SYL-VA'-NI-Å (Hung. Erdély Ország, êr-dai' or-sâåg; Ger. Siebenbürgen, see'-bën-bürg/-en); a large prov. forming the most east

ern portion of the Austrian empire, between $45^{\circ} 12'$ and $47^{\circ} 42'$ N. Lat., and $22^{\circ} 15'$ and $26^{\circ} 24'$ E. Lon.; bounded on the N. by Hungary, N. E. and E. by the Buckowine and Moldavia, S. by Wallachia, from which it is separated by the E. Carpathian Mountains, and W. by Hungary. Greatest length, from E. to W., 184 m.; greatest breadth, from N. to S., 167 m. Area 21,000 sq. m. Pop. about 2,000,000. (M.) The name was given by the Hungarians, Transylvania signifying the country "beyond the wood," *i. e.* the extensive woody mountains which separate this province from Hungary. The true Hungarian name, however, Erdély Ország, signifies "woody country." The origin of the German name, Siebenbürgen, the "seven castles," or "seven boroughs," probably refers to some feature of the ancient condition of the country with which we are now unacquainted.

TRAPANI, trã/-pã-ne, (Anc. Drepanum; Gr. Δρεπανον, *i. e.* a "scythe," the tongue of land on which it is built being curved in the shape of that instrument;) a fortified seaport t. of Sicily, cap. of a prov. of the same name, at the N. W. extremity of the island, 46 m. W. of Palermo. Drepanum appears to have been an emporium from the earliest times, and the modern town is one of the first commercial places in Sicily. Lat. $38^{\circ} 2' N.$, Lon. $12^{\circ} 31' E.$ Pop. 24,000. (B.)

TRAS OS MONTES, trãs òs mon/-tês, *i. e.* "beyond the mountains," a prov. forming the N. E. extremity of Portugal, separated by a chain of mountains from the prov. of the Minho, and by the Douro from Beira.

TRAV'-AN-CORE', a state of Hindostan, subsidiary to the British, situated at the S. extremity of that peninsula, between the 8th and 11th degrees of N. Lat., and the 76th and 78th of E. Lon.

TREB'-I-ZOND' (Turk. Tu-rã-be-soon'; Anc. Trapezus), a fortified city and seaport of Asiatic Turkey, cap. of an eyalet, on the S. shore of the Black Sea, towards its eastern extremity. This town was for a considerable period the cap. of an empire founded in the early part of the 13th century by a branch of the Comnenian family, who had for several generations held the imperial sceptre at Constantinople. After experiencing a variety of fortunes, this empire fell, soon after the fall of Constantinople in 1453. Though Trebizond has greatly declined from its former prosperity, it is still important on account of its manufactures, its commerce, and its population, which Balbi estimates at 50,000. Lat. $41^{\circ} 3' N.$, Lon. $39^{\circ} 28' E.$

TREMITI, trem/-e-te, a group of small islands belonging to the kingdom of Naples, situated in the Adriatic. Lat. about $42^{\circ} 8' N.$, Lon. $15^{\circ} 30' E.$

TRENT (Ger. Trient, tre-ent'; Anc. Triden/tum), a walled t. of Tyrol, on the Adige, which is here crossed by a fine bridge. Lat. $46^{\circ} 6' N.$, Lon. $11^{\circ} 4' E.$ Pop. near 12,000. (B.)

TRENT, one of the principal rivers of England: it rises on the borders of Cheshire, and flowing at first southerly, then easterly, and in the latter part of its course northerly, falls into the estuary of the Humber, 24 m. S. W. of York. Its whole length is estimated at near 200

m.; it is navigable for barges to Burton on Trent (about 117 m.), and for vessels of 200 tons to Gainsborough, (near 30 m.)

TRENT/-ON, a t. of N. J., the seat of justice of Mercer county, and cap. of the state, on the left or N. E. bank of the Delaware, at the head of steamboat navigation, where the river is joined by the Delaware and Raritan Canal, 27 m., in a straight line, N. E. of Philadelphia. The railroad from N. York to Philadelphia passes through this town. Lat. 40° 14' N., Lon. 74° 30' W. ? Pop. estimated at 8,000.

TREVES (Fr. Trèves, trave; Ger. Trier, treer; Anc. Augu'sta Tre-viro'rum), a city of the Prussian dominions, cap. of a gov., and formerly of an electorate of the same name, on the right bank of the Moselle, over which there is a stone bridge of 8 arches, 690 ft. long. This is perhaps the most ancient, and was long the most celebrated of the German cities. Constantine the Great, and several other emperors, occasionally resided at Treves. It abounds in interesting antiquities, among which may be mentioned the ruins of the palace of Constantine, and the Roman aqueduct, the subterranean portion of which is still pretty well preserved. Treves had formerly a university which has been replaced by a gymnasium; it possesses also a library of 70,000 vols., and other literary and scientific institutions. Lat. 49° 47' N., Lon. 6° 38' E. Pop., exclusive of the military, 14,000. (B.)

TREVISO, trêv-ee/-zo, (Anc. Tarvi'sium), a manufacturing and commercial t. of Austrian Italy, cap. of a prov. of the same name, 18 m. N. N. W. from Venice. Pop. 12,600. (B.)

TRICALA, tree/-kâ-lâ, written also TIRHALA; (Anc. Tric/ca,) a t. of European Turkey, in Thessaly, 37 m. W. by S. of Larissa. It is the residence of a pasha, and of a Greek archbishop. Lat. 39° 31' N., Lon. 21° 48' E. Pop. estimated at 12,000. (B.)

TRICH-IN-OP/-O-LĀ or TRICHINOPOLY, a large fortified t. of Hindostan, cap. of a dist. of the same name, belonging to the presidency of Madras, on the Cauvery, 28 m. W. of Tanjore. Lat. about 10° 50' N., Lon. 78° 50' E. Pop., including the suburbs, estimated at 80,000. (P. C.) Near this town is the island of Seringham (ser-ing/-gum), formed by two arms of the Cauvery, on which stands one of the largest and most magnificent pagodas of Hindostan. The central building is not large, but is splendidly ornamented with sculpture, gilding, and precious stones. It is enclosed within seven square walls, each 25 ft. high, and very thick. These walls are about 120 yards from each other; the circumference of the outer one is about 4 m. There are besides common entrances, 20 very large and lofty triangular towers over as many gateways, each forming a highly-ornamented pagoda.

TRI-ESTE/ or tre-es/-tà (Anc. Terges/te), the principal seaport t. of the Austrian empire, cap. of a gov. of the same name, on the Adriatic, near its N. E. extremity, 73 m. E. by N. of Venice. It has several important manufactures, among which, that of soap is the most remarkable. Among its institutions for education, the Scientific and Nautical School, with 16 professors, deserves particular mention. In 1719, the emperor Charles VI. declared Trieste a free port; at that

time it contained scarcely 8,000 inhabitants. The privileges of the place were afterwards extended by the empress Maria Theresa, so that all goods, with very few exceptions, can be imported duty free. The consequence has been that the population is now above 50,000 (P. C.), and continues annually to increase, and Trieste is the most wealthy and important commercial city in the Austrian dominions. Lat. 45° 38' N., Lon. 13° 47' E.

TRIGG, a co. in the S. W. part of Ky., intersected by the Cumberland river. Pop. 10,129. Co. t. Cadiz.

TRIM'-BLE, a co. in the N. part of Ky., on the Ohio river. Pop. 5,963. Co. t. Bedford.

TRINCOMALEE, tring'-ko-ma-lee', a small fortified t. of Ceylon, on its N. E. coast, with one of the finest harbours in the world. "During the N. E. monsoon, when all the vessels off the Coromandel Coast and in the Bay of Bengal are obliged to put to sea, Trincomalee is their place of refuge, and a vessel from Madras can reach it in two days." (M.)

TRIN'-I-DAD', after Jamaica, the largest and most important of the British W. India Islands, is situated between the 10th and 11th degrees of N. Lat., and the 61st and 62d of W. Lon.: its S. W. extremity is only about 7 m. from the delta of the Orinoco. The form of this island is singular; it is almost a parallelogram, but the N. E., N. W., and S. W. angles, have remarkable projections; the last named consists of a tongue of land, about 30 m. long, and from 2 to 10 or 12 m. broad. Extreme length of the island, from S. W. to N. E., 88 m.; greatest length, from N. to S., about 50 m.; mean breadth, from E. to W., about 35 m. Area estimated at 2,000 sq. m. Pop. in 1834, 43,678. The most remarkable natural feature of Trinidad, is the Pitch Lake, situated in the S. W. part of the island, about a mile and a half in circumference. The pitch or bitumen at the sides of the lake is perfectly hard and cold, but towards the middle it becomes gradually warmer and softer, and at last is seen boiling up in a liquid state. Trinidad has several extinct volcanic craters. Port of Spain, on the W. coast, near its N. extremity, is the cap. of Trinidad, and one of the finest towns in the W. Indies. Pop. about 12,000. (P. C.)

TRIN'-I-TY, a r. of Texas, flowing into Galveston Bay.

TRIP'-O-LI (Anc. Trip'olis*), the most easterly of the Barbary States, between 29° and 33° N. Lat., and 10° and 22° E. Lon.; bounded on the N. by the Mediterranean, E. by Barca, S. by Fezzan and the desert, and W. by Tunis. Area, uncertain. Pop. estimated by Balbi at 660,000; but some other writers rate it as high as 1,500,000, and even 2,000,000. Tripoli belongs to the Turkish sultan, and is governed by a bey or pasha, with despotic sway. We may remark that this country, since the revolution of 1832, has been in a very unsettled state, and our knowledge of its present political condition is imperfect and uncertain.—Adj. and inhab. TRIPOLINE, trip-o-leen' and TRIP-OL'-I-TAN.

TRIPOLI (called by the natives *Ta-râ/-bloos* or *Tarabloos-el-Gharb*, *i. e.* "Tripoli of the West;" Anc. *Cæa*), the cap. of the above state or regency, on a rocky tongue of land projecting into the Mediterranean, with a harbour defended by several batteries. The town is fortified, and is entered by two gates. It contains six mosques, of the first order, some of which are very handsome. The most striking relic of antiquity is a magnificent triumphal arch, (erected A. D. 164) in honour of Aurelius Antoninus and Lucius Verus. Tripoli is one of the principal entrepôts for the commerce which is carried on between Europe and the countries in the central part of Africa. Lat. 32° 54' N., Lon. 13° 11' E. Pop. estimated at from 20,000 to 25,000. (P. C. and B.)

TRIPOLI (Arab. *Ta-râ/-bloos es-Sham*, or the "Tripoli of Syria), a well-built seaport t. of Syria, cap. of an eyalet of its own name, on the Mediterranean, near 150 m. S. S. W. of Aleppo. Lat. 34° 26' N., Lon. 35° 51' E. Pop. estimated at about 16,000. (B.)

TRIPOLITZA or **TRIPOLIZZA**, *tre-po-lit/-sâ*, formerly an important t. of Greece, in the Morea, 22 m. W. by S. of Napoli di Romania. Lat. 37° 30' N., Lon. 22° 25' E. The pop., which appears formerly to have amounted to 15,000 or 18,000, is probably at present scarcely 2,000. (B.)

TRUX-IL/-LO or troo-heel/-yo, a seaport t. of Peru, cap. of a dep., on a small r., about 2 m. from the sea. It was founded by Pizarro, in 1533. Lat. 8° 6' N., Lon. 79° 3' W. Pop. from 12,000 to 14,000. (B.)

TU/-AM, a city of Ireland, in the co. of Galway, 105 m. W. by N. of Dublin. It was, till lately, the seat of a Protestant, as it still is of a Roman Catholic archbishopric. Lat. 53° 30' N., Lon. 8° 50' W. Pop. in 1831, 6,883. (P. C.)

TU/-BING-EN, the second capital of the kingdom of Würtemberg, on the Neckar, 17 m. S. S. W. of Stuttgart. It is chiefly interesting on account of its university, founded in 1477, by Count Eberhard, who afterwards became the first duke of Würtemberg: Reuchlin and Melancthon were among its professors. It was formerly exclusively Protestant; but, since the University at Elwangen was suppressed, Roman Catholics have been admitted: it is now the only university in the kingdom. The number of students is between 600 and 700. It possesses an extensive library, said to contain 140,000 vols., a good collection in natural history, a botanic garden, an observatory, &c. Lat. 48° 31' N., Lon. 9° 4' E. Pop. 8,000. (B.)

TUCK/-ER-TON, a village and port of entry of N. J., in Burlington co., on a creek which flows into Little Egg Harbour.

TUCUMAN, too-koo-mân', a t. of S. America, in the republic of La Plata, cap. of a state of its own name, memorable as the place where, in 1816, the declaration of the independence of the La Plata provinces was first promulgated. Lat. 29° 50' S., Lon. 64° 55' W. Pop. estimated at from 10,000 to 12,000. (B.)

TUDELA, too-dâ/-lâ, (Anc. Tutela,) a t. of Spain, in Navarre, on the Ebro, here crossed by a fine bridge of 17 arches, 45 m. N. W. of Saragossa. Pop. 8,000. (B.)

TULA. See TOOLA.

TUL'-LA-MORE', a t. of Ireland, cap. of King's co., on the Grand Canal, which connects the Shannon with the sea at Dublin, 50 m. W. by S. from this city. Pop. in 1831, 6,342. (P. C.)

TULLE, tüll, a manufacturing t. of France, cap. of the dep. of Corrèze, on the r. Corrèze. Lat. 45° 16' N., Lon. 2° 54' E. Pop. 9,000. (B.)

TUN'-BRIDGE, also written TONBRIDGE, a small t. of England, on the Medway, 27 m. S. E. of London. The watering-place, Tunbridge Wells, is about 5 m. S. of Tunbridge.

TUNGURAGUA, toong-goo-râ/-g-wâ, a r. of S. America, which rises in Peru, and afterwards forming a part of the boundary between this re-

TU'-NĪ-CA, a co. in the N. W. part of Miss., on the Mississippi r. Pop. 1,314. Co. seat, Peyton.

TU'-NIS (called, by the inhabitants, Too'-nis), a state or regency of N. Africa, nominally dependent on the Turkish empire, between 33° and 37° 20' N. Lat., and 8° 30' and 11° 20' E. Lon.; bounded on the N. and E. by the Mediterranean, S. by the desert, and W. by Algiers. Length, from N. to S., about 300 m.; greatest breadth, from E. to W., near 170 m. Area vaguely estimated at about 50,000 sq. m. Pop. 1,800,000. (B.)—Adj. and inhab. TUNISINE, too'-ne-seen', and TUNISIAN, tu-nee'-she-an.

TUNIS (Anc. Tu'nes or Tune'ta), a large and flourishing city, cap. of the above state, situated near the Mediterranean, on a lagoon, 10 m. long, and from 3 to 5 m. broad, which communicates, by a narrow channel called the Goletta (or "little throat"), with the Bay of Tunis. It is encircled by a high wall, with six gates, around which there is another wall enclosing the suburbs, with eleven gates, and about 5 m. in circumference. There are five principal and many smaller mosques. The houses, according to the custom of Barbary, have generally only one story, and the streets are narrow, crooked, and extremely dirty. Tunis appears to be the most populous, commercial, and civilized, as well as most ancient town in all Barbary. Lat. 36° 48' N., Lon. 10° 11' E. Balbi estimates the pop. at not less than 100,000; the P. C. at from 130,000 to 200,000.

TURCOING, tür'-kwân', a manufacturing t. of France, in the dep. of Nord, near the Belgian frontier, 10 m. N. E. of Lille. Pop. 8,749. (M.)

TU'-RIN (Fr. pron. tü'-rân'; It. Torino, to-ree/-no; Anc. Augus'ta Taurino/run); an archiepiscopal city of N. Italy, cap. of the Sardinian States, and of a prov. of its own name, on the left bank of the Po, at its junction with the Dora, about 80 m. W. S. W. of Milan. It is one of the most regularly-built towns in Europe, especially in that part which is called Nuovo Torino (noo-o'-vo to-ree/-no), or "New Turin." Some of the streets are remarkably handsome, reminding one of the finest parts of Paris. With respect to literary and scientific institutions, Turin ranks as one of the very first of the Italian cities. The University, founded in 1405, is the most frequented in Italy (B.); it has a library of 112,000 vols., besides about 2,000 manuscripts. There is also a military academy; a royal academy of sciences; a cabinet of medals, one of the richest in Europe; an Egyptian museum, containing, among many other curiosities, the most extensive and interesting collection of Egyptian manuscripts that exists; and many other similar establishments. Lat. 45° 4' N., Lon. 7° 40' E. The pop., which at the commencement of the last century was only about 42,000, amounted in 1848, including the suburbs, to 135,000. (P. C.)

TUR'-KEY or OTTOMAN EMPIRE (in Turkish, Os'-mân'-lee' Vil'-â-yet'-ee', or the "country of the Osmânlees"), an extensive country occupying the S. E. portion of Europe and the W. part of Asia, priuci-

pally situated between 30° and 48° N. Lat., and 16° and 48° E. Lon.; bounded on the N. by Austria and the Russian empire (from which it is partially separated by the Black Sea), E. by Persia, S. by Arabia and by the Mediterranean, and W. by the Mediterranean, the Adriatic, and the Austrian territories. Length, from N. N. W. to S. S. E., above 1,800 m.; greatest breadth, from N. to S., perhaps 700 m. Balbi estimates the area of European Turkey at about 146,900 sq. m., and the pop. at 7,000,000; the area of Asiatic Turkey at about 741,000 sq. m., and the pop. at 12,500,000, which would give 887,900 sq. miles for the area, and 19,500,000 for the pop. of the whole empire. The religion of Turkey is Mahometanism: the Grand Seignior is regarded as the vicegerent of the prophet, and the protector of the Moslem faith. The government is an absolute despotism, the sultan being under no other restraint than what the laws of the Koran impose. Constantinople is the capital.—Adj. **TURK'-ISH** or **OT'-TO-MAN**; inhab. **TURK** or **OTTOMAN** (Turk. Os'mân'-lee').

TURKISTAN. See **TOORKISTAN**.

UNITED STATES, a federal republic of N. America, between 25° and 49° N. Lat., and 66° 50' and 124° 30' W. Lon.; bounded on the N. by British America, from which it is partially separated by the great lakes Superior, Huron, Erie, and Ontario, and the r. St. Lawrence, E. by the British Province of New Brunswick and the Atlantic Ocean, S. by the Gulf of Mexico and the Mexican States, from which it is chiefly separated by the Rio del Norté and Gila r., and on the W. by the Pacific Ocean. The United States now form nearly a parallelogram of about 2,400 miles in mean length from east to west, and an average breadth from north to south of about 1,300 miles. The extreme length is more than 2,700 miles, and the greatest breadth near 1,600 miles. Total population in 1850 (exclusive of the Indians on the unappropriated territory) 23,246,301, of whom 3,198,298 are slaves. Since the first edition of this Gazetteer was published, astonishing changes have taken place in the extent and resources of the United States. This great confederacy now (1852) possesses an empire extending over more than 3,200,000 sq. m., of which about 825,000 sq. m. have been added by annexation, conquest, and purchase, within the last 7 yrs. A new state, California, has sprung up on our Pacific coast, supplying by its inexhaustible mines of gold, as well as by its peculiar geographical and commercial position, a new and mighty impetus to the enterprise and energy of our citizens of every state and territory. The vast regions of the far northwest, which but a few years ago were gloomy forests or lonely prairies, unexplored and untrodden, except by the wandering savage or the fearless hunter, are now dotted with towns and villages and resound with the hum of an ever-active population. The rivers, whose waters had borne only the light canoe or occasional masses of drift-wood, are now plowed by the rapid steamer or burdened with the unwieldy raft. Even in the older states a rapid progress has been made. With a view to present to the reader data which may enable him to form a correct idea of the advancement of our country, a table has been prepared showing the population of each state in 1840 and 1850, with a list of the counties and their population, those which have been added since the census of 1840 being distinguished from the others by a star. (See Appendix B.) The republic comprises thirty-one states, besides six territories, and the District of Columbia. The United States have been usually classed into four great divisions, viz.:—
 1. The EASTERN or NEW-ENGLAND STATES, comprising Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, and Connecticut. 2. The MIDDLE STATES—New York, New Jersey, Pennsylvania, Delaware, and Maryland. 3. The SOUTHERN STATES—Virginia,

ou, as in *our*; th, as in *thin*; TH, as in *this*; N, nearly like *ng*.

North Carolina, South Carolina, Georgia, Florida, Alabama, Mississippi, Louisiana, and Texas. 4. The WESTERN STATES—Arkansas, Tennessee, Kentucky, Ohio, Michigan, Indiana, Illinois, Wisconsin, Iowa, and Missouri, with Minnesota, Indian, and Missouri territories. To these we may now add, 5. The PACIFIC DIVISION, embracing the State of California, and the territories of Oregon, Utah, and New Mexico. There are six cities (including their suburbs) numbering from 130,000 to 650,000 inhabitants; three from 50,000 to 100,000; five from 40,000 to 44,000; four from 30,000 to 40,000; twelve from 20,000 to 30,000; and thirty-four from 10,000 to 20,000 inhab. The total revenue for the year ending June 30th, 1851, was \$52,312,979.87. Of this amount \$49,017,567.02 were from the customs. Public debt in December, 1851, \$62,560,305.26. Imports for the fiscal year 1851, \$215,725,995; exports for the same period \$217,517,130, of which \$29,231,880 was specie, and \$9,738,695 re-exported foreign merchandise. Cotton exported in the same year 927,237,089 lb, and breadstuffs and provisions to the value of \$21,918,653. Railroads completed 11,565 m., at a total cost of \$335,150,848; in course of construction 11,228 m.

Steam Marine of the U. S.—On the Atlantic coast there are 46 ocean steamers, 274 ordinary steamers, 65 propellers, and 80 ferry-boats—tonnage 154,270 tons. On the Gulf of Mexico, 12 ocean steamers, 95 ordinary steamers, and 2 propellers—tonnage 23,244 tons. On the Pacific coast, 37 ocean steamers, and 13 ordinary steamers—tonnage 37,986.

Inland Steam Marine.—On the northern frontier there are 164 steamers, in the Ohio basin 348, and in the Mississippi valley 255, total 767; tonnage 204,723.

Each of the thirty-one states constitutes a republic independent of the others, with respect to those affairs which are purely local; but matters of general interest, such as providing for the defence of the country, and the regulation of its intercourse with foreign nations, fall within the province of the federal government. The legislature of this government is vested in a senate and house of representatives. The members of the latter are elected every two years by the people; the senators are appointed by the state legislatures, two being chosen by each state, for the term of six years. The executive power is intrusted to a president, who holds his office for a term of four years. The president is commander-in-chief of the army and navy; and has the power, in conjunction with the senate, to make treaties, appoint ambassadors and other public ministers, the judges of the supreme court, and the various executive officers of the general government. The vice-president presides over the senate, and in case the votes are equally divided, he is permitted to decide by a casting vote; in the event of the president's death, he becomes president for the remainder of the term. Washington is the seat of government.

Pop., in 1835, 23,600. (P. C.) The canton is divided into two districts, namely, Upper and Lower Unterwalden. Stanz (stãnts), a little t. near the L. of Lucerne, with about 2,000 inhabitants, is the cap. of Lower Unterwalden, and Sarnen, a small t. of about the same size, on the Aa, at its egress from the L. of Sarnen or Sarner-See (sar/-ner sæ), is the cap. of Upper Unterwalden.

UP/-SAL or UPSALA, up-så/-lå, an archiepiscopal city of Sweden, cap. of a prov. of the same name, on the Sala, 37 m. N. by W. of Stockholm. The most interesting buildings are those of the University, and the Cathedral, which is the largest and most magnificent in Scandinavia. The University, founded in 1478, is the most celebrated and flourishing institution of the kind in the N. of Europe: connected with it is a library of nearly 100,000 vols. The number of students is between 1,000 and 1,500. Many eminent scientific men have been professors in this university, among whom we may cite the names of Linneus, Scheele, and Berzelius. Lat. 59° 52' N., Lon. 17° 39' E. Pop., without including the students of the University, about 4,000. (B.)

U/-RAL (or OURAL, oo-rål/) MOUNTAINS, a chain in the northern part of the Eastern Continent, forming a portion of the boundary between Europe and Asia, between 51° and 70° N. Lat., and 55° and 65° E. Lon. Their general direction is almost due N. and S. None of the summits of this mountain system appear to be very elevated, the highest being, according to the best authorities, between 5,000 and 6,000 ft. above the level of the sea. These mountains are exceedingly rich in ores. It is probable that a very small portion of their treasure has yet been revealed, as most of the mines in this region have been opened within the last 70 or 80 years, and scarcely a year passes without new deposits being discovered.—Adj. U-RAL/-I-AN or oo-ral/-e-an.

URAL (Oural) or YAİK, yâ/-ik, a r. which rises on the E. declivity of the Ural Mountains, near 55° N. Lat., and 59° E. Lon. and flowing southerly, in its general course, falls into the N. extremity of the Caspian Sea, by several mouths. The length has been estimated at 900 m. It is navigable for large barges to Orsk or Orskaya, near the S. extremity of the Ural Mountains.

URBINO, oor-bee/-no, (Anc. Urbi/num Horten/se,) an archiepiscopal t. of Italy, in the Papal State, cap. of the prov. of Urbino and Pesaro, 20 m. from the Adriatic. It is surrounded with walls, has several fine buildings, and is the seat of a university. Urbino is remarkable as the birth-place of the immortal Raphael. Lat. 43° 44', Lon. 12° 37' E. Pop. about 7,000. (B.)

URUGUAY, oo-roo-gwī', a r. of S. America, which rises in the S. part of Brazil, between 27° and 28° N. Lat., and about 50° W. Lon. ; flowing at first westerly, and afterwards southerly, it joins the Parana to form the La Plata. Length estimated at near 1,000 m. Though it brings down a great quantity of water, it is said to be navigated with difficulty, on account of its numerous rocks and the rapidity of its current.

URUGUAY, REPUBLIC OF, or THE EASTERN REPUBLIC OF THE URUGUAY, (Republica del Uruguay Oriental, rā-poob'-le-kā dēl oo-roo-gwī' o-re-ēn-tāl'), called also the BANDA ORIENTAL, a republic of S. America, between 53° and 59' W. Lon. ; bounded on the N. and E. by Brazil, S. by the Atlantic and the r. La Plata, and W. by the r. Uruguay. Length about 380 m. ; greatest breadth near 300 m. Area estimated at 80,000 sq. m. Pop. 70,000. (B.) The territory of this republic formerly constituted the principal part of the Banda Oriental, one of the divisions of the vice-royalty of Buenos Ayres, whence that name is still sometimes applied to the republic. Montevideo is the capital.

U'TAH, originally a part of the territory of Upper California, ceded to the United States by the treaty with Mexico in 1848, was erected into a separate territory in 1850. It lies between 37° and 42° N. Lat., and between 105° 30' and 120° W. Lon., being about 620 m. in length from E. to W., and 347 broad from N. to S., and including an area of 187,923 sq. m. It is bounded on the N. by Oregon, E. by Indian Territory and New Mexico, S. by New Mexico, and W. by California. The Rocky mountains separate it from Indian Territory, and the Sierra Nevada partly from California. It is divided into 9 counties.* By the census of 1850, Utah contained 11,380 inhab., of whom 11,330 were white, 24 free coloured persons, and 26 slaves. There were 232 deaths in the year ending June 30th, 1850, or about 21 in every thousand.

Face of the Country, Mountains, &c.—This extensive region is an elevated table-land, generally of hopeless sterility, and divided into nearly equal portions by the Sierra Madre mountains. The western section, known as the Great, or Fremont Basin, is hemmed in by mountains on all sides, having the Blue mountains of Oregon on the N., the Wahsatch mountains on the E., the Sierra Nevada mountains on the W., and a nameless mountain or mountains on the S. This basin has an extent of about 400 m. from E. to W., by 250 from N. to S., and a general elevation of from 4000 to 5000 ft. above the level of the sea, "with its own system of lakes and rivers, and having no communication with the ocean." The eastern portion is

covered with a white incrustation of saline and alkaline matter, and the western with a mixture of salt, sand, and clay, in which animals sink to their knees. Several detached mountains traverse this basin, the principal of which are the Humboldt mountains, which run from N. to S., near the centre of the basin, and are elevated from 2,000 to 5,000 ft. above the surrounding country. The eastern portion of Utah, lying between the Wasatch and Rocky mountains, is believed to be even more sterile than the western.

Rivers, Lakes, &c.—The Grand and Green rivers, with their tributaries, drain the eastern portion of Utah. The Green r. rises in the S. E. of Oregon, and running southerly about 500 m., joins the Grand r. near the southern boundary of Utah, and forms the Colorado. The Grand r. rises in the Rocky mountains, in the E. of Utah, and runs in a S. W. course about 300 m., to its junction with the Green river. The Great Basin has no large rivers. The Humboldt, or Mary's r., rises in the Humboldt mountains, and running S. W. about 300 m., loses itself in a slough or lake, called Humboldt's lake. Near the base of the Sierra Nevada mountains, on the western border of the Great Basin, is a series of small lakes (the largest, Pyramid Lake, is about 40 m. long), which receive the waters flowing from the eastern declivity of the Sierra Nevada. There are several streams in other parts of the desert, which lose themselves in like manner in sloughs, or small lakes. Nicollet r., on the E. rim of the basin, has a N. and W. course of about 300 miles, and empties into a lake of the same name. Great Salt Lake, the largest body of water in Utah, lies in the N. E. part of the Great Basin, and is about 75 miles long by 35 wide, but has a much greater extent at the melting of the snows. This lake is so salt that no living thing is found in it, and on the receding of the waters from the beach in the dry season, it is left covered with thick incrustations of salt. About 25 m. S. of this, and communicating with it by the Jordan r., is lake Utah, about 35 miles in length. Its water is fresh and well stocked with trout and other fish. The elevation of these lakes is from 4,200 to 4,500 feet above the level of the sea. Bear river, from Oregon, is the largest tributary of Salt Lake, and has a course of about 200 m. in a S. W. direction.

Agriculture and Productions.—The arable portions of Utah are but a small fraction of the whole territory, and are confined to the valleys of the rivers and lakes. The Great Salt Lake Valley, Bear r. valley, Utah valley, Yoab valley, South valley, Sevier valley, and Sand Pitch valley, are the principal agricultural districts. The first of these is much the largest, being about 120 m. long, and from 20 to 40 broad; but of this area a very large proportion is occupied by the lake itself. South valley is 30 m. long by 20 wide; Utah 60 m. long by 20 wide; and Sand Pitch 40 or 50 by 20 m. "There are tracts of land in each of these valleys of considerable extent, which are not susceptible of cultivation, because they cannot be irrigated,"*

a necessary part of husbandry in Utah. The upper portion of the valleys of the Grand and Green rivers is "incapable of supporting any population whatever. The Uintah and Green river valleys, lying lower down on the tributaries of the Colorado, are, however, not so sterile." There is a belt of fertile land at the base of the mountains, and on the borders of most of the streams. The Humboldt r. is important in this respect, as it supplies emigrants to California with pasturage for their animals. Wheat, rye, barley, buckwheat, Indian corn, and the garden vegetables of the Middle States are the agricultural products of Utah. By the census of 1850, there were 15,219 acres of land under cultivation, producing 103,441 bushels of wheat; 9,144 bushels of Indian corn; 8,897 lb of wool; 74,064 lb of butter; 32,646 lb of cheese; and 4,288 tons of hay. The value of live stock was \$533,951, and of farming implements and other machinery \$78,495.

Timber.—"This whole country is almost entirely destitute of timber, except on the sides of some of the high rocky mountains, or in the cañons whence issue the mountain streams. There are some groves of cottonwood and box-elder in the bottoms of some of the principal streams."

Manufactures.—There were also, according to the census reports, 16 manufacturing establishments, producing \$500 per annum and upwards. Home-made manufactures were produced to the value of \$1,391.

Climate and Meteorology.—Dr. Bernishel and Mr. Snow, in their letters to Senator Smith on this subject, say that "the climate of Great Salt Lake City, in Lat. 40° 45' N., is milder and drier than in the same parallel on the Atlantic coast, and the temperature more uniform, the thermometer rarely descending to zero. During three years, according to observation, the highest point attained by the thermometer was 100° above, and 5° below zero. The variation between the temperature of day and night, in midsummer, is from 20° to 40°. Frosts in Utah valley fall as late as the last of May and as early as the first of September, and slight ones during the intermediate months, rendering Indian corn and vines rather uncertain crops. Rain seldom falls between April and October, except on the high mountains, where thunder-showers are frequent."

Great Salt Lake City is the principal town, and the capital of this territory.* It is a Mormon settlement (the most of the inhab. of Utah are Mormons), situated near the E. bank of the Jordan r., and about 22 m. S. of Great Salt Lake. The streets cross each other at right angles, forming squares of ten acres each, with eight lots to a square. There are four public squares in the city. The houses are mostly small, and built of adobes or unburnt brick, but are re-

garded merely as temporary. It is in contemplation to erect a temple larger than that at Nauvoo. There are good schools in this town, in some of which Greek, Latin, German and French are taught. Lying on the emigrant's route to California, this is important as a place at which to refit and rest the caravans. Pop. about 6000.

U'-TI-CA, a handsome city of Oneida co., in the E. central part of New York, is situated on the Mohawk r. and on the R. R. from Albany to Buffalo, 82 m. in a direct line W. N. W. from the former and 231 by R. R. from the latter. The streets are wide and regular, and the houses are chiefly constructed of brick and stone. It is surrounded by a rich, well cultivated country, and is the centre of an active trade, which is facilitated by the Erie and Chenango canals. The former, which is here 70 feet wide, passes through the town and is crossed by several bridges; the latter extends from Utica to Binghamton. Utica is enlivened in the summer and autumn by the arrival of a large number of travellers on their way to Trenton Falls, which are about 15 m. distant. Among the public buildings and institutions are a court-house, an exchange, two academies, the Utica Library, a Museum, a Mechanics' Institute which supports popular lectures, and the State Lunatic Asylum—a large stone edifice, situated 1 m. W. from the centre of the town. This place is the seat of extensive manufactures of iron, leather, paper, and flour. It was incorporated as a village in 1798, and as a city in 1830. The pop. in 1840 was 12,782; in 1850 it amounted to 17,565.

It is enclosed by massive walls, built by the Moors, flanked at intervals with round towers, and is entered by four gates. Among its remarkable edifices may be mentioned the magnificent Cathedral, regarded as one of the finest in Spain. Valencia is distinguished as a seat of literature and science. Its university, founded in 1411, was formerly considered the best in Spain, particularly for the study of medicine, and is now the most frequented of any in the kingdom; in 1830, it had nearly 2,500 students. There are also seven colleges, a royal academy of fine arts, and several other similar institutions. Valencia holds a conspicuous place in Spanish history. It was taken from the Moors about the year 1090, by the celebrated Cid; and though it was reconquered by the Mahometans, it has since been generally distinguished from other towns of the same name, as VALENCIA OF THE CID (Valencia del Cid). Lat. 39° 29' N., Lon., 0° 23' E. Pop. estimated at about 66,000. (B.)

VAL'-LA-DO-LID' (Sp. pron. vâl-yâ-do-leed', almost vâl-yâ-rho-leeth'; Anc. Pin'tia), a celebrated though now decayed city of Spain, in Old Castile, cap. of a prov. of its own name, on the Pisuerga (pe-swêr'-gâ), about 15 m. above its junction with the Douro, and about 100 m. N. N. W. from Madrid. It has a university, founded in 1346, which was formerly celebrated as a school of jurisprudence, and is now, with respect to the number of students, the second in Spain; eight colleges, and a school of the fine arts, besides less important institutions. Lat. 41° 40' N., Lon. 4° 42' W. The pop., which, at the time of its greatest prosperity, was estimated at above 100,000, is now reduced to about 21,000. (B.)

The climate of Venezuela resembles, in the main, that of other tropical countries. The temperature is high, except in very elevated regions. The year is divided into the wet and dry seasons. The wet season, corresponding to our summer, is called winter, though the heat is then greatest. The vegetable productions of Venezuela are mostly those which are common to the tropics—maize, coffee, the cocoa, the plantain tree,* the yucca, potatoe, sugar, wheat, indigo, tobacco, and cotton are the principal objects of cultivation. Caraccas is the capital.

VENICE, ven'-iss, (It. Venezia, vèn-ed'-ze-à,) a celebrated maritime city of Austrian Italy, cap. of E. Lombardy, and formerly of a powerful republic of its own name, situated on a cluster of small islands, in a shallow but extensive lagoon, at the N. W. extremity of the Adriatic. The appearance of this town, from whatever side it may be viewed, is striking and singular in the extreme. Owing to the lowness of the islands on which it is built, it seems to float. It is divided into two principal portions by the Great Canal (Canale Maggiore, kâ-nâ'-là màd-jo'-rà), a serpentine channel crossed by the Rialto (re-â'-to), the principal bridge of the city, and one of the finest in Europe. The various islets which form the foundations of these two grand divisions, are connected by a multitude of bridges, which are intended only for foot-passengers. Almost all the principal houses have on one side a canal and on the other a *cale* (kâ'-là) or foot-walk. The canals which intersect every part of the town, form the "water streets" of Venice: by means of them nearly all the intercourse of the place is carried on, and gondolas are the universal substitute for carriages and horses. Venice is remarkable for the multitude of its superb edifices, among which we must not pass unnoticed the celebrated Church of St. Mark (the patron saint of the city), with its 500 columns of marble, alabaster, bronze and verd antique, and its pavements of jasper and porphyry; over the entrance, in front of the building, are the famous bronze horses, which, having been cast, as is supposed, at Corinth, during the period of Grecian glory, successively adorned Athens, Rome, and Constantinople. Venice has, among other literary and scientific institutions, two royal gymnasia; a lyceum, with a rich cabinet of natural history; besides the library of St. Mark, with 65,000 vols. and about 5,000 manuscripts. Lat. 45° 26' N., Lon. 12° 21' E. Pop. 103,000 (B.); in 1789, before the fall of the republic, it amounted to 139,000. (P. C.)—Adj. and inhab. VENETIAN, ven-ee'-shun.

* The plantain tree belongs to the same species as the banana. The fruit has a farinaceous flesh, in colour resembling the finest yellow butter. It sometimes attains the weight of 60 and even 80 lbs. (P. C.) Some varieties have an exquisite flavour, surpassing, it is said, that of the finest kinds of pear.

VENLOO, vēn'-lō', a fortified t. of Holland, prov. of Limburg, on the Meuse (Maas). Lat. 51° 22' N., Lon. 6° 10' E. Pop. 5,000. (B.)

VERA CRUZ, vā/-rā crooze, the principal seaport and commercial t. of Mexico, cap. of a state of its own name, on the S. W. shore of the Gulf of Mexico. It is enclosed with walls, is regularly built, with wide and well-paved streets, and contains many excellent houses. Though its harbour is very imperfect, and the town is situated in a sickly and barren region, it appears to be gradually advancing in commercial importance and in population. Lat. 19° 12' N., Lon. 96° 9' W. The pop., before the war which separated Mexico from Spain, was estimated at 16,000; it was afterwards reduced to half that number (P. C.), but at present is stated to amount to 15,000. (B.)

VERCELLI, vē'-chel/-le, (Anc. Vercel/læ,) an archiepiscopal t. of N. Italy, in the Sardinian States, cap. of a prov. of the same name, about 40 m. E. N. E. of Turin. Pop. about 15,000. (P. C.)

VERDUN, vē'-dun', (Anc. Virodu/num or Verodu/num,) a t. and fortress of France, in the dep. of Meuse, on the Meuse, where it begins to be navigable. Lat. 49° 9' 31" N., Lon. 5° 22' E. Pop. 9,151. (M.)

VER-MONT', one of the U. S., between 42° 40' and 45° N. Lat., and 71° 30' and 73° 30' W. Lon., bounded on the N. by Canada, E. by New Hampshire, from which it is separated by the Connecticut r., S. by Massachusetts, and W. by New York; and divided into 14 counties.* Length, from N. to S., near 160 m.; greatest breadth, from E. to W., about 90 m. Area variously estimated from 8,000 to 10,000 sq. m. Pop. 313,611. Montpelier is the seat of government.

VE-RO'-NĀ (It. pron. vā-ro/-nā), a celebrated city of Austrian Italy, cap. of a prov. of the same name, and the head-quarters of the Austrian army in Italy, on the Adige, 64 m. W. of Venice. It is pleasantly situated, and very well built, and is surrounded by old walls, flanked with towers. Verona is remarkable for its interesting historical associations, and its monuments of antiquity, and of the middle ages. The ancient amphitheatre, about 510 ft. in length and 410 in breadth, is, after the Coliseum of Rome, the largest existing structure of its kind: a considerable part of it has fallen into ruins, but it is estimated that, when entire, it was capable of accommodating 22,000 spectators. Verona is distinguished for its manufacturing industry, and carries on a considerable trade. It possesses numerous institutions for education; among which are, a lyceum: a royal house for the education of young ladies, which is one of the best establishments of the kind: three gymnasias, and a school of painting and design. Lat 45° 26' N., Lon. 11° 1' E. Pop. 47,000 (B.): the P. C. says it amounts to near 60,000,

VERSAILLES, vər-sailz', (Fr. pron. vər'-sâi' or vər'-sâ/e—see Int. XIX., 18,) a handsome though somewhat decayed t. of France, cap. of the dep. of Seine and Oise, and formerly the principal residence of the royal court, in an undulating plain, 9 m. S. W. of Paris. This place was a mere village in the time of Louis XIII., who used to hunt in the neighbouring woods, and built here, about the year 1627, a small hunting seat, which Louis XIV. converted (1661-72) into the most magnificent palace in Europe, and the village of Versailles grew into a handsome city of about 80,000 inhabitants. (B.) The palace has not been occupied by the court since 1789, and was falling out of repair, when the late sovereign, Louis Philippe, caused it to be restored and converted into an historical museum, which is filled with an immense collection of statues and paintings, exhibiting the principal personages and events in the history of the French monarchy, from Clovis to the present time. Lat. 48° 48' N., Lon. 2° 8' E. Pop. 28,776. (B.)

VERVIERS, vər'-ve-â', a flourishing and important manufacturing t. of Belgium, 14 m. E. by S. from Liege. Pop. above 19,000. (B.)

VI-CEN'-ZA (It. pron. ve-chen'-zâ; Anc. Vicen'tia or Vice'tia), a manufacturing and commercial city of Austrian Italy, cap. of a prov. of the same name, on the Bacchiglione, 26 m. E. N. E. of Verona. It is distinguished by the number of its edifices, remarkable for their architectural beauty or grandeur, a superiority which it owes to the celebrated Palladio, who was born in this town. It has a lyceum, with ten professors: a gymnasium, with fourteen professors, and a town library of 36,000 vols. Vicenza has long been known for its silk manufactures, the most important of the kind in the Venetian States. Lat. 45° 32' N., Lon. 11° 33' E. Pop. 31,000. (B.)—Adj. and Inhab. VIENNA, ve-en/-nə, (Ger. Wien, Ween; Anc. Vindobona), the largest city of Germany, cap. of the Austrian empire, on the right bank of the Danube, where it is joined by the small rivers Wien and Alster, 190 m. E. of Munich. It consists of the interior or old city, and the suburbs. The old city is nearly circular, and not above three miles in circumference. It is surrounded by a broad fosse, and a wall from 40 to 50 ft. high. The houses in the old town are generally high; the streets are narrow and crooked, but well-paved and very clean. The places or squares are irregular, and comparatively small; in one of them, called the Josephsplatz, is a colossal equestrian statue of Joseph II., which is said to be finely executed. The most remarkable public edifice in the Austrian capital, is the Cathedral dedicated to St. Stephen; it was built in the 12th and 13th centuries, and is one of the finest specimens of ancient German architecture; it has four towers, one of which is among the loftiest in Europe; the height is variously stated, from 420 to 480 ft. The Burg (böörġ, i. e. "castle"), or imperial palace, is an immense building of irregular construction, but offering parts of great architectural beauty and magnificence; it contains the imperial jewel office, one of the richest museums of valuable curiosities in Europe, with a cabinet of medals, which far surpasses every other collection of the kind; an extensive cabinet of natural history, &c. The Imperial Library, connected with the Burg, has above 300,000 printed vols., besides 16,000 manuscripts; it contains, among other curiosities, the *Tabula Peutingerana*, a map of the Roman empire in the fourth century, one of the most interesting and precious monuments of ancient geography extant; and Tasso's own manuscript of his "Jerusalem Delivered:" attached to the library, is a collection of 300,000 engravings, which was commenced by Prince Eugene, and is now one of the most extensive and valuable in Europe. The splendid Palace of the Archduke Charles contains an extensive library, with a collection of 180,000 engravings and 15,000 drawings, by old masters. Among the multitude of literary and scientific establishments belonging to the Austrian capital, we may mention, besides those already adverted to, the University, founded in 1365, and afterwards greatly extended and improved by Van Swieten, under the patronage of the Empress Maria Theresa: it is now one of the principal institutions of the kind in Europe, and, with respect to medicine, the first in Germany; it has 80 professors, and above 2,000 students, and possesses a library of 100,000 volumes, an observatory, a botanic garden, and other appendages: the *Josephinum*, founded by Joseph II., a medical institution for preparing surgeons for the army, with very valuable collections: the Imperial Oriental Academy, and the Academy of Fine Arts, of which Prince Metternich is president. As no people are more disposed to works of charity and beneficence than the Austrians, the hospitals and other charitable institutions are numerous and well endowed. The Observatory is in Lat. 48° 12' 35" N., Lon. 16° 22' 58" E. Pop. in 1846 (including the garrison of 14,000 men), 410,945. (P. C.)—Adj. and innab. VIENNESE. ve'-en-neeZ'.

WAR/-SAW (Polish, Warszawa, war-shá/-vá; Lat. Warsó/via); the cap. of Poland, is situated on the left bank of the Vistula, nearly in the centre of the kingdom. The old town was irregularly built, with narrow streets; but since Warsaw has come into the possession of the Russians, a large portion of it has been rebuilt, and it is now said to be one of the handsomest cities in Europe. Everything appears to be done by the Russian government to change its character as a Polish town. The University was abolished in 1834, and its library of 150,000 vols. transferred to St. Petersburg. The Academy of Sciences has

WASH'-ING-TON, the cap. of the United States, is situated in the centre of the District of Columbia, on the N. E. or left bank of the Potomac, which is here crossed by a wooden bridge, nearly a mile in length. The plan of the city combines regularity with variety, but a very small portion only of the original outline has been filled up with buildings, so that the town presents the appearance of a number of isolated villages. The Capitol, containing the Representatives' Hall, the Senate Chamber, and other apartments, is a magnificent building, of freestone, painted white, 352 ft. in length. The Rotunda (so named from its form), constructed entirely of marble, and adorned with historical paintings and pieces of sculpture, is 96 ft. in diameter, and 96 ft. in height, to the top of the dome. The President's House, a handsome structure of freestone, has a front 170 ft. in length and two stories high, with an Ionic portico. The Navy Yard is on an affluent of the Potomac, called the East Branch, about a mile and a quarter S. E. of the Capitol. Pop. 40,000. The state had 31 organized counties in 1850.*

Lakes, Rivers, &c.—Besides the great lakes Superior and Michigan, which wash its northern and eastern shores, Wisconsin has a number of small lakes, abounding in fish. The principal of these, Winnebago Lake, S. E. from the middle of the state, is 28 m. long, and 10 wide. It communicates with Green Bay, a N. W. arm of Lake Michigan, by the Fox river. There are a number of small lakes in this region, and also in the extreme N. W. The principal rivers which traverse the interior have a S. W. course, and empty into the Mississippi, in the following order, commencing at the south: Wisconsin, Bad Axe, Black, and Chippewa. The Wisconsin, by far the most important of these, traverses the middle of the state, first in a S. and then in a W. direction. The Fox, or Neenah, is the principal tributary of Lake Michigan from this state, and runs in a generally N. E. course, through Winnebago Lake, into Green Bay. This river approaches within half a mile of the Wisconsin in its course, and a canal is being constructed to unite the rivers at this place, which, when completed, and some obstructions removed in the rivers themselves, will open steamboat navigation between Lake Michigan and the Mississippi river. The Rock, the Des Plaines, and Fox rivers drain the southern part of the state. The Rock flows S. W. about 300 m. into the Mississippi. The other two are affluents of the Illinois r. Lake Pepin, an expansion of the Mississippi, is on the W. boundary of this state. Most of the rivers are not navigable (except for canoes or floating down timber) to any great extent, without artificial aid.

Face of the Country, Productions, &c.—The state of Wisconsin may be generally described as an elevated rolling prairie, from 600 to 1,500 feet above the sea. The highest portion of this plateau is in the N., and separates the waters flowing into Lake Superior from those running S. and S. W. into the Mississippi. The southern slope is again interrupted about the middle of the state by another ridge, giving origin to a second slope, drained by the Rock river and its branches. The descent on the Lake Superior shore is very abrupt, giving rise to many rapids and falls which interrupt navigation, but furnish numerous and valuable mill sites. There is a third ridge in the S. E., dividing the tributaries of Lake Michigan from those of Green Bay. The north of the state is rugged, and its agricultural

capabilities believed not to be great. On the St. Croix, Chippewa, and other rivers of the N. W., are vast forests of pine timber. "On the N. bank of the Wisconsin, W. from the great bend, is a range of abrupt, thickly wooded heights. In the W. and S. W. are several isolated mounds, with elevations varying from 200 to 1,000 ft. The highest of these, one of the Blue mounds, is 1,001 ft. above the Wisconsin r. The state S. of the Wisconsin and Fox r. is a fine farming region. West of the Pekatonica is the celebrated lead region, also abounding in copper and zinc. This section is broken, but in parts well adapted to agriculture, and especially to grazing. East of the Pekatonica the proportion of prairie land is increased, though there is a considerable portion of timbered land on the rivers and streams. This is probably the best agricultural district in the state. Limestone underlies most of the southern part of the state—the cliff limestone in the mineral district, and the blue elsewhere. Between Green Bay and the lake, the country is timbered with pine, spruce, and birch; and along the Fox r. to Ft. Winnebago it is hilly and well timbered. The agricultural products of the state are wheat, Indian corn, oats, buckwheat, barley, rye, potatoes, wool, and maple sugar. The forest-trees are, pine, cedar, spruce, tamarack, birch, oak, aspen, basswood, hickory, elm, ash, hemlock, poplar, sycamore, &c.

Climate, Meteorology, &c.—The climate of this state compares favourably with western New York, being milder on the shores of Lake Michigan, where the temperature is $6\frac{1}{2}^{\circ}$ higher than on the Mississippi side. The winters are less variable than in the Atlantic states. The Milwaukee r. was closed by ice, on an average (in the ten years preceding 1845), from November 22d to March 26th.

Towns.—MILWAUKIE CITY, the most populous and commercial in the state, is situated on the west shore of Lake Michigan, at the mouth of Milwaukee r., 90 m. N. from Chicago. Its position is admirably adapted for a commercial emporium, and in rapidity of growth it has surpassed all the western towns except those of California. The first settlement made here was in 1834. In 1843 the pop. was over 6,000 and in 1850 it amounted to 20,060. It is built on the high bluffs overhanging the lake, and on the flats bordering on the river. The delicate cream-colour of the bricks employed in the buildings gives the town a peculiar and agreeable aspect. It is the eastern terminus of a R. R. 200 m. long, which is designed to extend to the Mississippi r.; and it has 6 plank roads extending into the country. The number of vessels owned here in 1851 was 39, and the tonnage 8,542. The value of manufactured products was about \$2,000,000. It has 21 churches, and 7 daily newspapers.

Racine, a flourishing town on Lake Michigan, 70 m. N. from Chicago, and 100 m. E. S. E. from Madison. It has a good harbour, and large quantities of produce are shipped here. There are several foundries, machine-shops, and flouring-mills in the place. Pop. 5,100.

REMARKS.

The Colleges marked (*) are under the direction of the *Baptists*; thus (†) *Episcopalians*; thus (‡) *Methodists*; thus (§) *Catholics*. With respect to the Colleges which are unmarked, the prevailing religious influence of those that are in New England is *Congregationalism*; of most of the others, *Presbyterianism*.

By *students* in the above table, except a few of the Colleges in the Southern and Western States, is meant *undergraduates*, or members of the four collegiate classes; not including such as are pursuing professional education, or such as are members of a preparatory department.

Some of the Colleges above enumerated, are not in full operation; and scarcely deserve a place in the Table. According to the census of 1840, there are in the United States 173 universities or colleges, containing 16,233 students. There are 3,242 academies and grammar schools, containing 164,159 students. It is evident that the difference between a college and an academy is not very clearly defined, except that the former has the exclusive right of granting degrees.

The column of *Libraries* includes the number of volumes in the *College Libraries* and in the *Students' Libraries*.

The following list of states and territories will serve to show the order in which the same name belonging to different places in the several states is repeated in this Appendix.

Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Connecticut, New York, New Jersey, Pennsylvania, Delaware, Maryland, Virginia, North Carolina, South Carolina, Georgia, Florida, Alabama, Mississippi, Louisiana, Arkansas, Tennessee, Kentucky, Ohio, Michigan, Indiana, Illinois, Missouri, Iowa, Wisconsin, Texas.

Thus the Washingtons of Maine will be first given; then those of New Hampshire, then those of Vermont, &c. By this means, if the inquirer knows to what state the name he is in search of belongs, he will be able to find it far more readily, than he could have done if this arrangement had not been observed.

BYTOWN, a flourishing t. of Canada West, on the right bank of the Ottawa, about 120 m. above Montreal. At this place, there are falls in the river between 25 and 30 feet in height, of which some use is already made in manufactures. A suspension bridge (the first which has been constructed in the province) of 243 feet span, crosses the Ottawa here. Bytown is the terminus of the Rideau canal, which extends to L. Ontario at Kingston.

CALIFORNIA, an extensive country in the western portion of N. America, divided into Lower and Upper California.

LOWER CALIFORNIA, (Sp. California Vieja, kal-e-for'ne-ä ve-ä'nä, *i. e.* "Old Califor-

nia") a peninsula of above 700 m. in length and 170 m. in its greatest breadth, separated from the main land by the Gulf of California. The aspect of the greater portion of this country is in the highest degree forbidding; indeed the whole of this region may be regarded as one continuous mass of high, bare and steep rocks, intersected by numerous ravines. With the exception of two or three places, it scarcely contains any level ground which can be called a valley. There is hardly any land susceptible of cultivation, except on the east declivity towards the Gulf of California. The climate is exceedingly dry and hot. In some parts it does not rain every year, but only at intervals of five or six years; in other parts it is said that rain never falls. The vegetation, as might be expected, is very scanty. Figs, olives, dates, and vines are, however, cultivated in the less sterile portions to some extent.

CALIFORNIA (State of).—The following interesting matter, having been received after the article in the Gazetteer was stereotyped, is inserted here. It is extracted from an article in Silliman's Journal in Nov., 1851, by Prof. Shepherd, containing a description of the Hot Springs or Geysers, discovered by him in California. For the purpose of abbreviation, we use our own or the professor's language indifferently. "We traveled N. W. from the head of Napa valley, and on the morning of the fourth day reached the summit of a high peak, from which on the W. we saw the Pacific; on the S. San Francisco Bay, Mount Diablo, Sonoma and Napa valleys; on the S. W. the valleys of Santa Rosa and Russian r., and on the E. the Sierra Nevada mountains. On the N., immediately at our feet, there opened an immense chasm, apparently formed by the rending of the mountains in a direction from W. to E., from which, at the distance of four or five miles, we distinctly saw clouds and dense columns of steam rapidly rising; and it was with difficulty we could persuade ourselves we were not looking down upon some manufacturing city. Descending, we discovered within the space of half a mile square, from one to two hundred openings, through which steam issued with violence, sending up columns of dense vapour to the height of from 150 to 200 feet. The roar of the largest tubes could be heard for a mile or more. Many of them acted spasmodically, like a high-pressure engine, throwing out occasional jets of hot scalding water some 20 or 30 feet. Numerous cones are formed by the accumulation of various mineral salts and a deposit of sulphur crystals with earthy matter, which often harden into crusts of greater or less thickness and strength. Frequently the water mounts to the top of the cones with violent ebullition, and beneath your feet you hear the lashing and foaming gyrations as you approach them. The writer, on one occasion, hearing the rushing of water under his feet, struck down with an axe, which went through at the first blow to the extent of the helve, disclosing a stream of angry water, of five or six feet in breadth, boiling intensely."

In the middle of January, 1852, information from California stated, that up to that time, the thermometer had been down to the freezing point but twice, and that green peas and garden flowers were in bloom.

Three shocks of an earthquake were felt at San Francisco, December 27th, 1851.

Seven quicksilver furnaces—the largest yielding 400 bottles per week—belonging to one firm, were in operation, January, 1852.

A remarkable soda spring has been discovered near New Almadin.

A large cave has been discovered in the E. central part of the state.

The legislature held its sessions in the winter of 1851-2 at Sacramento City.

INDIAN or WESTERN TERRITORY, a tract which has been set apart by the U. S. government for the permanent residence of the Indian tribes who have been removed from the different states. It is bounded on the N by Platte r., E by the Missouri r. and state, S by the Red r., and W by the desert country sometimes called the "Great American Desert." It is about 600 m. in extent from N to S, and 400 or 500 from E to W. A large portion of the territory is prairie, but the margins of the streams are generally lined with wood. All the productions of the U. S. of the same latitude can be raised here, and the country seems to be also exceedingly well adapted for grazing.

IOWA CITY, capital of the state of Iowa, and sea. of justice of Johnson co., on the left or E bank of Iowa r., 70 or 80 m. from its mouth. Pop. 2,000.

IOWA r. rises in Chapeau Lake, and after a course of above 300 m. in a general southeasterly direction, falls into the Mississippi. It is navigable for boats at all seasons as far as Iowa City.

IOWA INDIANS, a tribe in the southwestern part of Iowa.

IOWA TERRITORY, an extensive territory of the U. S., bounded on the N by British North America, E by Wisconsin and Illinois, from which it is for the most part separated by the Mississippi r., S by Missouri, and W by

the Indian and Missouri Territories. The Missouri r. marks nearly the whole of its western boundary. In the SE part both climate and soil appear to be well adapted for agricultural settlements. In the E part of the territory, along the Mississippi r., both N and S of the Maccoqueta r., is a valuable mineral region, abounding in lead, zinc, and iron. The people of Iowa have recently accepted the proposition made by Congress (1845-6) to erect the S portion of the territory into a sovereign state. See IOWA, GAZETTEER.

SIERRA DE LOS MIMBRES, se-er'rã del loco mim'bres, *i. e.* the "osier mountains,"* a mountain chain in the N part of Mexico. It appears to be a continuation of the Anahuac Mountains.
SIERRA MADRE, se-er'rã mad'ray, a mountain chain in the N part of Mexico, extending from about 21° to 32° N Lat., traversing the states of Durango and Chihuahua. Height unknown.
SIERRA NEVADA, se-er'rã na-vah'dã, *i. e.* the "snow-clad ridge," a mountain chain running nearly N and S through Upper California, at the distance of from 100 to 200 m. from the Pacific. It is supposed to be even higher than the Rocky Mountains. The pass by which Captain Fremont crossed the Sierra was about 9,300 ft. in height, and the peaks around him rose several thousand feet higher.

- TEXAS**, formerly an independent republic, was annexed to the United States in December 1845. It now constitutes a single state, though its superficial extent is about seven times as great as that of Pennsylvania. Its constitution is in the main similar to those of the other slaveholding states. For a general and brief notice of the country, climate, &c., see TEXAS, in the GAZETTEER. A more particular description of the surface and soil will be found under the heads of the respective counties in this Appendix.
- It may be proper here to add, that the sea-coast of Texas, though indented by numerous bays and inlets, does not afford a single harbour for vessels of a large size. Galveston inlet, the deepest, has 12 feet water, the entrance of Matagorda Bay 11 feet, and San Luis 10 feet. It may be further observed, that the principal rivers of this country, though of great length, are not navigable to any extent except for small vessels, though much might and doubtless will be effected ere long, towards improving their navigation. The Trinity is navigable farther than any of the others; it may be ascended by boats nearly 300 m. The Brazos is navigable 150 m, the Nueces about 100 m., and the San Jacinto 50 m. The Colorado is obstructed by a raft 10 m. from its mouth: when this is removed, it will in all probability be rendered navigable for small steamboats to Austin, above 200 m. The Sabine r. on the E border, is navigable 150 m. The Rio del Norte, on the W, though a very rapid stream, may (except at low water) be ascended by small steamboats nearly 200 m. The Red R. is also navigable for a considerable extent along the northern border.

is situated on the W coast of N. America,
being intersected by the 59th parallel of N
Lat., and the 125th meridian of W Lon.
Length 289 m., with an average breadth of
about 50 m. This island, as well as Queen
Charlotte's, is uncultivated, being inhabited
by Indian savages; but the coasts of both are
indented with numerous bays, and fringed
with towering forests, and the soil appears

WISCONSIN, State of. An act was passed at the last session of Congress providing for the admission of Wisconsin into the Union as a sovereign state, with the following boundaries—Beginning at the north-east corner of the state of Illinois—that is to say, at a point in the centre of Lake Michigan where the line of 42° 30' N Lat. crosses the same; thence, running with the boundary line of the state of Michigan, through Lake Michigan, Green Bay, to the mouth of the Menomonie river; thence up the channel of said river to the Brulé river; thence up said last mentioned river to Lake Brulé; thence along the southern shore of Lake Brulé in a direct line to the centre of the channel between Middle and South islands, in the Lake of the Desert; thence in a direct line to the head waters of the Montreal river, as marked upon the survey made by Captain Cramm; thence down the main channel of the Montreal river to the middle of Lake Superior; thence through the centre of Lake Superior to the mouth of the St. Louis river; thence up the main channel of said river to the first rapids in the same, above the Indian village, according to Nicollet's map; thence due south to the main branch of the river St. Croix; thence down the main channel of said river to the Mississippi; thence down the centre of the main channel of that river to the north-west corner of the state of Illinois; thence due east with the northern boundary of the state of Illinois to the place of beginning.

Wisconsin comprises a portion of a rich mineral region which extends into Illinois and Iowa. Lead ore is abundant; copper occurs in considerable quantities. Antimony is said to have been recently discovered in great abundance, near Helena, Iowa county.

PREFACE TO THE SUPPLEMENT.

THE principal object of the authors in preparing the following Supplement, has been to furnish a manual of geographical pronunciation adequate to the wants of teachers. Many names occurring on the maps ordinarily used in schools, had been omitted in the original Gazetteer, either from the impossibility of then ascertaining the true pronunciation, or from the conviction that they were intrinsically of little importance. For it is perhaps scarcely necessary to inform the reader that the insertion or omission of names in an atlas furnishes no certain criterion whereby to determine their actual importance, since it is not unusual for engravers, in order to obviate the appearance of meagreness or deficiency, to insert the names even of the most insignificant places in those parts of the map where they happen to have plenty of room, while names of real importance are necessarily omitted in other parts for the want of room. It not unfrequently happens, indeed, that the names of places whose existence is doubtful or more than doubtful, are found on maps of those parts of the world which have been but imperfectly explored. Yet names, however insignificant in themselves, occurring in our most popular school atlases, acquire from this very circumstance a certain importance to the teacher of geography. It has accordingly been the aim of the authors to give all the difficult names found in our common school atlases, especially on the maps of those parts of the world which are the best known, and of those which, from commercial or other relations, are most interesting to us.

The names of places in the United States, however, form a partial exception to this general plan, not that it is less important to give the difficult names of our own country, but (as has been stated in the Advertisement to the present edition of this work) "on account of the insuperable difficulties inherent in the task itself." In giving the pronunciation of the names of foreign places—there being ordinarily but one known among the inhabitants—the only points of difficulty, generally speaking, are: first, to ascertain the true sound; and, secondly, to express it in a manner intelligible to the English scholar. With regard, however, to the names of some parts of our own country, it seems impossible to give any pronunciation that will be generally satisfactory, from the fact that in many instances there is no settled pronunciation even among the inhabitants themselves. We have repeatedly known gentlemen of intelligence and education to differ entirely with regard to the proper manner of pronouncing names with which they had been familiar for years. It appears to us that this uncertainty or

diversity must necessarily prevail, at least for a time, when the name is of foreign origin (*e. g.* *Terre Haute*), and the inhabitants are of different nations or from different sections of the country. When this is the case, some will probably conform to the foreign pronunciation, while others will adopt various modes of anglicizing it. We believe that the determining of such questions must be left to time; which will doubtless gradually bring about the same uniformity in the pronunciation of these names as now prevails with respect to the words and names introduced into the English language at the Norman conquest.

It is, moreover, proper to apprise the reader that a multitude of names will not be found in the Supplement as they are given in some of our most popular school atlases, from the fact that they are misspelled in these works. Mistakes in orthography (owing perhaps to the greater difficulty of making corrections on an engraved plate) are much more frequent on maps than in ordinary printing. That the Gazetteer may not be censured—as it has been in several instances—for omissions attributable to the mistakes above alluded to, it is proposed to cite a few examples in illustration and proof of the foregoing statements. That there may be no appearance of reflection on any particular publication, the examples will be taken promiscuously from different popular atlases, and from such only as justly rank among the best works of the kind that have been published.

* These are given first, not because they are preferable in themselves, but because they are evidently the spellings which were before the mind of the engraver when the mistakes were originally made. *Kirmanshah*, *Miskolcz*, and *Soorgootoi* or *Soorgoot*, are in fact preferable to the others.

This list might be greatly extended, especially with names from the maps of those portions of the world of which comparatively little is known, *e. g.* the countries of Africa, Asia, and Eastern Europe.

In some few instances mistakes in spelling, which in the first place have doubtless originated in mere inadvertence, have, by being copied from one map to another, gradually become so general, that they seem at length to have bid defiance to the reproach which ordinarily attaches to such faults, or to have become legitimated by the respectability or number of those by which they are adopted. BEHRING'S (Strait) is a remarkable instance of this kind. In only one out of a great number of atlases that we have examined, is it uniformly spelled correctly. But another, in which the name occurs five times, has it misspelled only once. It is very often given differently on the different maps of the same atlas—generally *Bhering*, sometimes *Beerling* or *Bering*, but very rarely *Behring*, which is the correct spelling. As the strait alluded to derives its name from the navigator who is supposed to have visited it first, it is evident that the name of the strait should be written in the same manner as that of the navigator. Another instance of a similar kind is furnished in LOS ANGELES, the name of a town in California. This is almost invariably written incorrectly *Los Angelos*. As the name is Spanish, and signifies "the Angels," there is no difficulty in determining the true orthography, which is as we have first given it, *Los Angeles*.

It is, however, important to distinguish between the misspelling of geographical names and that legitimate diversity of spelling, which naturally results from the different power attributed by different nations to the same letters. (See Preface to the Gazetteer, page xii.)

It may be proper to say a few words respecting omissions in the Supplement, which are not referable to mistakes in orthography merely. A number of names have crept into some of our most respectable school atlases, for which, after the most careful research, we can find no sufficient authority. CHOUMALARIE, sometimes given as the highest mountain in the world, may be cited as an example. Balbi (who writes the name *Tchhamoulari*) gives it among the mountains of Asia, but speaks of its height as undetermined; at the same time vaguely assigning it a place "on the limits of Bootan." Cannabich gives it (written *Chamalari*) as one of the highest mountains of Asia, without indicating its position more definitely than merely naming it among the Himalayas. Mount Tchhamoulari or Choumalarie is not to be found on Balbi's map of India, nor on the maps of the Society for the Diffusion of Useful Knowledge, nor in the excellent and accurate atlas of Gilbert, recently published in London. This work, in its list of mountains, gives Dhawalaghiri as the highest on the globe, but does not so much as name Choumalarie. It is a curious if not significant circumstance, that those atlases which give Mount Choumalarie, assign to it almost the identical position that is given to Dhawalaghiri on Balbi's map of India; which position, according to the best authorities, cannot be less than *three*

hundred miles from the nearest part of Bootan! The various and contradictory spellings of the name in question, render it no less difficult to determine its pronunciation, than to ascertain the precise locality to which it belongs, if indeed such a locality exist. In view of the foregoing facts, we have thought it advisable to wait for further information before attempting to give the pronunciation of a name, which at present seems wholly involved in doubt and perplexity. In a number of instances, especially, where the pronunciation could not easily be mistaken, we have inserted doubtful names, with a point of interrogation affixed.

From the belief that it will materially contribute to the practical utility of our system of geographical orthoëpy, a list of those names which are most frequently mispronounced is appended to the Supplement. It is obvious that such a list, were it deemed advisable, might readily be much extended in a future edition.

Great pains have been taken in order to render the Supplement a complete key to the various spellings of oriental and other names. (For a full explanation of this interesting subject, see Preface to the Gazetteer, pp. xii. and xiii., and pp. 28 and 29 of the Introduction; also the Table of different spellings at the end of the Introduction.) This feature of our work, which is peculiar to the Pronouncing Gazetteer, and which is so important to every intelligent teacher, inasmuch as it affords the only means of extricating an extensive department of geography from perplexity and confusion, has been much more fully developed in this than in the former editions of the Gazetteer.

Although the utmost care has been taken to render the present edition of our work as faultless as possible, we are not so sanguine as to imagine that it will be found to be without defects. In a publication of this sort, where there are so many minute marks made use of in order to indicate the exact pronunciation,* it is impossible but that some inadvertencies will occur, not to mention those errors which may in some cases result from a deficiency of information. For such unavoidable defects we trust that the candid and enlightened critic will make due allowance.

* It may not be improper here to call the attention of our readers to the great advantage possessed by a stereotype work, from the facilities it affords for attaining absolute accuracy. All persons who have any acquaintance with the subject must be aware of the difficulty or rather impossibility of printing any work which shall at first be entirely free from typographical errors. This difficulty is greatly increased in a book like the present, in which many signs and figures are employed to mark the pronunciation. In a stereotype work the errors may be corrected in the plates, as they are discovered, while those parts which are already correct remain undisturbed. In this way any conceivable degree of accuracy may be gradually attained.

SUPPLEMENT.

EXPLANATION OF THE SIGNS OF NOTATION USED IN THE FOLLOWING WORK

Fâte, fâr, fáll, fát, mê, mêt, nô, nôt; â, ê, î, ô, u, *long*; ä, ë, ÿ, ö, ü, *short*; a, e, i, o, *obscure*; oo as in *moon*, öö as in *good*, ou as in *our* (or ow as in *now*), n similar to *ng*, gh like *g* hard, th as in *thin*, th as in *this*. w indicates a sound similar to our *v*; it is intended, however, that the English scholar shall pronounce it like simple *w*.

Ah is employed to denote a sound intermediate between ä and â, but more resembling the latter, e. g. al-a-bah'ma.

When h (not small capital) occurs at the end of a syllable in the pronunciation of a name, it is not to be sounded.

An acute accent (') is used to denote the primary or principal accent; a grave (`) to mark the secondary accent of a name, e. g. Pas'sa-ma-quod'dy.

For further particulars see pp. 50 and 51 of the Gazetteer—especially Observations 1 and 2, on p. 51.

[The pronunciation of these names, which may be said to belong now to the United States, ought to be anglicized for the same reason that the names of Detroit, Wisconsin, and Texas are anglicized, that is because the great majority of persons who have occasion to use them, speak the English language. Those, however, who prefer the foreign pronunciation should be careful to be consistent, and not pronounce one-half of the name after the Spanish mode and then anglicize the remainder. We should either say rī'o del nort or ree'o del nor'tā, and not ree'o del nort, as we too frequently hear. In like manner Rio Grande should be pronounced either rī'o grand or ree'o grān'dā and not ree'o grand.]

 Wy-o-ming. [The correctness of our pronunciation of this name has been disputed, because the poet Campbell pronounces it Wy'o-ming. We entertain in general a great respect for the authority of the poets in matters of this kind, but as Campbell was never in America, and probably never heard the name in question from the lips of one familiar with the place, it ought not to surprise us that the correctness of his pronunciation on this point should be on a par with his geographical accuracy, when he speaks of Wyoming as one of those lands
 "That see the Atlantic wave their morn restore."
 Had he been acquainted with the true pronunciation of the name, he would undoubtedly have r'ulated his verse in accordance with as he appears invariably to have done with respect to European names. *See* Pronouncing Gazetteer, section II., p. v2.]

(1) See note 4.

(2) This name is pronounced bí'root' by the Turks and by some respectable speakers in English, but there appears to be a great preponderance of authority in favor of the pronunciation given by us as the correct one, this being, moreover, the manner in which the name of Beyroot is pronounced by the native inhabitants themselves.

(3) It is a very common error to pronounce *ch*, in Spanish names, like our *sh*; it should be sounded precisely like the English *ch* in *child*, *chill*, &c.

It is a still more prevalent fault to pronounce the *a*, in foreign names, like *au* or *aw* in English; this should be carefully avoided by those who are anxious to speak correctly. In all European languages except the Hungarian, the *a* should be sounded either like that in *father* (â), or else between this sound and that of *a* in *fat* (â). We should scarcely err, indeed, were we to say that in *all* cases in the pronunciation of foreign words (except the *an* nasal and the *a* circumflex (â) in French, and the Hungarian *a* as before mentioned), the *a* should be a little less broad than the sound we give to it in *far* (â).

Scarcely anything in pronunciation is more barbarous or absurd than the mode sometimes adopted to indicate the second sound of *a* in foreign names, *e. g.* arl-bar'no instead of âl-bâ'no, char-par'lar instead of châ-pâ'lâ; because there is not the slightest shade of the sound of *r* in either of these names, nor in any similar one, unless an *r* occurs in the name itself. We freely admit that some few English or American speakers, who are very faulty in their pronunciation, might sound the *r*, in such cases, so feebly that very little difference would be perceived between their pronunciation and that indicated by the mode employed by us; but it is certainly a great mistake to give a mode of pronunciation which is adapted to those only who pronounce badly, but which is calculated to lead such as are careful to speak correctly, into a ridiculous and barbarous error. In our language, *r* should never be silent in any situation, although it may with propriety be sounded more slightly at the end than at the beginning of a syllable. (See Walker's Principles of Pronunciation, 416 and 419.) It would be far more correct to give the pronunciation of such names with an *h*, as al-bah'no, chah-pah'lah, because it is a rule of the English language always to make *h* silent at the end of a syllable when it is immediately preceded by a vowel. (Principles of Pronunciation, 396.) The only objection which can be urged against this mode of marking the pronunciation, is that it leaves the sound of the *a* somewhat uncertain; for though some might pronounce the *ah* like â, others would probably give it a sound approximating to â; but this would be an infinitely less fault than that which would result from the use of *r*, for, as already intimated, it would hardly be an error to pronounce *a*, in almost all foreign names, less broad than â. Indeed there is a considerable diversity among different foreigners with regard to the pronunciation of this vowel. In some dialects of the same language it is much broader than in others. In many French words its sound is scarcely distinguishable from that of the English *a* in *fat*.

(4) There is considerable diversity even among good speakers, respecting the sound of *a* in the accented syllable of these names. Hindostan, however, is almost universally pronounced with the *a* short (â), as in *man*; while Afghanistan, Beloochistan, appear generally to have the *a* in the last syllable broader, and are in fact sometimes written Afghanistan, Beloochistaan. For these reasons we have given the pronunciation of their final syllable differently from that of Hindostan. Yet, on the whole, it is questionable whether such a distinction ought to be made in names which are so similar in their formation, and which are almost equally familiar to all who have any knowledge of geography. It appears to us that it would not be improper to anglicize all such Asiatic names possessing some celebrity—not only Hindostan, Japan, Kamtchatka, Siam, &c., but also Afghanistan, Beloochistan, Koordistan, Toorkistan, Ispahan, Herat, Kelat, Meinam, Java, and Sumatra, sounding the *a* in the accented syllable as in *man*, or in case the syllable ends in *a*, pronouncing it like the penultima of Alabama, *e. g.* jah'va, soo-mah'tra, almost já'va and soo-mâ'tra. (See Observation 2, pp. 51 and 52 of the Gazetteer.)

(5) This name is sometimes written *Kamchatka* by geographers of the highest character.

(6) See note 4.

(7) See note 3.

(8) This pronunciation, so contrary to good taste and to analogy (compare Syria, Syrian, syringe, Sirius), is extremely prevalent in the State of New York. It was probably first introduced by the Dutch, as *y* in their language is always pronounced like our long *i*. Be that as it may, it is certain that the pronunciation in question is neither classical nor English, and should be carefully avoided by all those who desire to speak with propriety.

THE universal favor with which the Pronouncing Gazetteer has been received, renders it unnecessary to urge particularly, at this time, its claims to public attention. By referring to our "Recommendations," the reader will perceive that it has obtained the highest encomiums from the highest literary authorities in our country. It has been adopted as a *standard work of reference* in the public schools of almost all the principal cities of the United States. It has been introduced into the Philadelphia Normal School as a text-book, *every pupil being furnished with a copy*. Nearly all the recent works treating of geography, or geographical pronunciation, cite it as an authority, frankly acknowledging their obligations to it;* while others, by their plagiarisms, bear an indirect, but no less decisive testimony to its merits.

* See "Key to Pelton's Outline Maps," "Mitchell's Intermediate Geography," "Key to Mitchell's Outline Maps," "R. M. Smith's New Common School Geography," "Pronouncing Vocabulary of Geographical Names," in Worcester's octavo Dictionary, "Geographical Vocabulary," in Harper's Revised Edition of Webster's Dictionary," &c., &c.

As, however, several gentlemen, distinguished for their intelligence and experience in education,* have expressed an earnest desire that the Supplement should be published by itself, for the especial use of the pupils in our public and other schools, this portion of the Gazetteer is now offered to the public in a separate form, and furnished at so low a price that it can be no obstacle even to those of the most limited means. This Vocabulary will be found to be complete in itself, as a work of reference for pupils. Teachers, and others desiring to become acquainted with the general principles of pronunciation which have been followed in the work, are referred to the "Introduction" and "Explanations" prefixed to the Gazetteer.

 The attention of the reader is particularly invited to the "Table of Different Spellings," and the "Table of Mispronunciations," at the end of this work.

* See, in the collection of "Recommendations," the letter from A. D. Bache, L.L. D.; also that of Professor Hart, dated May 16, 1851. Several experienced teachers of our acquaintance have expressed a similar judgment.

RECOMMENDATIONS.

From the NORTH AMERICAN REVIEW, for January, 1846.

"The practical value of a work of this sort, depends entirely on the fulness and accuracy with which it is executed; and in these respects we can commend this volume in the strongest terms."

From the CHRISTIAN EXAMINER (Boston), for January, 1846.

"This is a good book in two ways. It was much wanted, and it is exceedingly well done."

Extract of a Letter from Professor LIEBEE, Editor of the Encyclopedia Americana.

"A Pronouncing Gazetteer is not only a necessary work in the literature of every nation, but it is particularly wanted in the present age." * * * "It seems to me the teachers of whatever schools can scarcely do without having this book of reference near them."

From the Hon. JOHN PICKERING, Author of Pickering's Greek Lexicon.

"This work cannot fail to be highly useful, not only to instructors and pupils, but also to general readers."

From Professor ANTHON.

NEW YORK, Sept. 10, 1845.

"The subscriber has examined Baldwin's 'Universal Pronouncing Gazetteer' with considerable care, having consulted it almost daily for at least a month past, and takes great pleasure in recommending it as a very superior work. CHAS. ANTHON."

From G. C. VERPLANCK, Esq.

"Having often referred to and examined the 'Gazetteer,' I fully concur with Professor Anthon. G. C. VERPLANCK."

"Baldwin's Pronouncing Gazetteer'—a work of great accuracy, learning and taste."—*Note to "Antony and Cleopatra," Harper's Illustrated Shakespeare.*

Extract of a Letter from WILLIAM BELDEN, Esq., Senior Teacher of the Normal School, New York.

"This is just such a book as every teacher in the country ought to possess, and I may add such would be a most useful addition to every private library."

From Professor LEWIS, of the University of New York.

"Such a book has long been wanted for all our institutions of learning, from the college down to the common school. Most of our young men, even those who rank among the best scholars in our colleges and academies, are exceeding deficient in the right pronunciation of foreign proper names." * * * "I should be rejoiced to see the work introduced into all the schools of the country."

From the PRINCETON REVIEW, for October, 1845.

"We have no hesitation in pronouncing this one of the most scholarlike productions of our native press. The authors show not only a familiar knowledge of the modern languages, but a highly respectable acquaintance with general philology." * * * "We look upon this work as full of entertainment and instruction to all who take an interest in orthoepy."

From JOHN GRISCOM, LL.D.

"The scientific accuracy of this book renders it, in my opinion, one of the most valuable contributions to the practical manuals of the teacher, the scholar, and the general reader, which modern times have so liberally furnished."

RECOMMENDATIONS.

Letter from JOHN S. HART, L.L. D., Principal of the Central High School of Philadelphia.

PHILADELPHIA, May 16, 1851.

I have used Baldwin's Pronouncing Gazetteer as a constant work of reference for the last six years, and have ever regarded and recommended it as a work of standard authority — and the only one, so far as I am aware, entitled to that distinction — on the subject of which it treats. It gives me unfeigned satisfaction to learn that the publishers are about to issue, in a separate form, the supplement to the work, containing, in the space of about sixty pages, all the geographical names by themselves, with the pronunciation. The pronunciation introduced by Mr Baldwin in the larger work, has obtained, I believe, general acquiescence among the learned throughout the country, and may be considered as settled. The small volume now to be published, contains this pronunciation in a cheap form, that is likely to find its way into schools, and so introduce what has been so greatly needed, a uniform method of pronouncing the foreign proper names that occur in our School Geographies. I commend the work cordially to all teachers to whom this letter may be presented.

JOHN S. HART.

Letter from ALEXANDER DALLAS BACHE, L.L. D., Superintendent of the Coast Survey, formerly Principal of the Philadelphia High School.

PHILADELPHIA, July 3, 1843.

SIR, — I have examined the specimen of a Pronouncing Gazetteer which you have been pleased to leave with me, and have read the accompanying remarks in reference to the plan and execution of the work. The views which you express of the importance of the work, I fully concur in, and I also approve of the general plan laid down, and method marked out for its execution. *Should the work be of a size which would exclude it from general introduction into schools, for the use of the pupils, you ought by all means to make an abridgment of it expressly for this purpose. No teacher should be without the complete work, and the introduction of an abridgment, executed with the care shown in your specimen, into our schools, would be of very great service to the pupils.*

Yours, respectfully,

A. D. BACHE.

From Professor ROBLEY DUNGLISON, M. D. Extract of a Letter dated June 21, 1845.

"I have examined the Pronouncing Gazetteer which you have sent me. The work exhibits great accuracy, not only in the orthoepy but likewise in the topographical and historical information which it contains; and I cordially recommend it both as a valuable work of reference in the family library, and as an important addition to our list of school books."

From Professor RAY, of Woodward College, Cincinnati.

"I have long regarded a good Pronouncing Gazetteer as a desideratum both to teachers and the advanced class of students. In my intercourse with instructors, as member of the Board of School Examiners of Cincinnati, I uniformly recommended a gazetteer as one of the works that should have a place upon every teacher's desk." * * * "Baldwin's Pronouncing Gazetteer should have a place in the library of every intelligent family, and be used as a book of reference by every geographical student. To teachers especially I recommend this volume as the only work that furnishes the correct pronunciation of all geographical names in general use."

From Professor DEWEY, of the Rochester Collegiate Institute.

"This is a work greatly needed by all who talk or read. It should be found on the scholar's table and in the intelligent man's family. To the teacher it is invaluable — to the pupil essential."

From DR. A. T. W. WRIGHT, Principal of the Philadelphia Normal School.

"Baldwin's Pronouncing Gazetteer was adopted as a text-book at the organization of the Normal School, and has since been used as such, every pupil being furnished with a copy. Besides its use as a geographical work, it is made the standard of orthoepy and orthography in this department of instruction." * * *

"The descriptive, statistical, and historical portions of the book, compare favourably with the best treatises exclusively devoted to geographical knowledge. Every page exhibits the most careful research; resulting in the production of the most accurate work on the subject that has been presented to my notice."

The Pronouncing Gazetteer has been adopted as a book of reference for teachers by the Public Schools of Philadelphia, New York, Detroit, Cincinnati, and several other of our principal cities.
